Public Involvement Program

From the Ground Up

To support the development of San Diego Forward: The Regional Plan, SANDAG implemented a comprehensive public outreach and involvement program. Early in the planning process, the agency developed a Public Involvement Plan¹ (PIP) (Attachment 1) to guide the public outreach program. Per Government Code Section 65980(b)(2)(E), Public Involvement Plans for individual projects must draw upon the SANDAG Public Participation Plan, which serves as a guiding framework for all of the agency's PIPs. The Public Participation Plan² was adopted by the SANDAG Board of Directors on December 21, 2012, and the PIP was subsequently adopted on February 22, 2013.

Background and context

San Diego Forward: The Regional Plan draws heavily from two of the agency's main long-term planning documents. In preceding years, the Regional Comprehensive Plan³ (RCP) and the 2050 Regional Transportation Plan and its Sustainable Communities Strategy⁴ (2050 RTP/SCS) were developed as two separate guiding documents for the region that were expected to be updated on different schedules. The RCP was adopted in 2004, and has not been updated since its adoption. The 2050 RTP/SCS was adopted in October 2011, and by federal law is required to be updated every four years, with this update due in 2015.

Merging the Region's Plans

While the 2050 RTP/SCS was current, the data in the RCP was almost ten years old and conditions had changed significantly since its approval. The RCP no longer reflected important developments that had occurred in the region, such as the economic downturn, loss of funding for redevelopment, and a stronger emphasis on public health and social equity in the SANDAG planning process. Additionally, the RCP did not address more recently adopted statewide climate legislation such as Assembly Bill 32 (2006), which required California to lower greenhouse gas (GHG) emissions to 1990 levels by 2020, and Senate Bill 375 (2008), which supported the implementation of AB 32 by encouraging planning practices that create sustainable communities, and requiring the California Air Resources Board to set regional greenhouse gas reduction targets for 2020 and 2035 for each region in California.

In anticipation of updating the RCP, SANDAG conducted a scoping process in late 2011 and early 2012. Input was sought from the SANDAG Board of Directors, SANDAG Regional Planning Committee (RPC), Regional Planning Technical Working Group (TWG), community-based organizations (CBOs), other metropolitan planning organizations, and various stakeholders to prepare for the anticipated update of the RCP. Input from those meetings revealed an opportunity to merge the region's two primary planning documents. In May 2012, the SANDAG Board of Directors directed staff to combine the RCP and 2050 RTP/SCS into one comprehensive planning document for the region as part of the next regional transportation plan update.

The goal of combining the RCP and 2050 RTP/SCS was to create one clearly defined, overarching regional planning document for the region, with the intent of addressing the planning and land-use objectives contained in the RCP; incorporating the transportation priorities and infrastructure policies from the 2050 RTP/SCS that would support and encourage the regional economy, equity, and environmental goals; and meeting statewide greenhouse gas emissions reduction requirements per SB 375. This consolidated regional plan, which SANDAG subsequently named “San Diego Forward: The Regional Plan,” would offer the opportunity to more effectively communicate the overall regional vision, reaffirm the link between transportation and land use planning, and communicate more effectively with the public and stakeholders.

Developing the PIP for San Diego Forward: The Regional Plan

In an effort to establish a comprehensive public involvement and engagement process for the Regional Plan, SANDAG developed the Public Involvement Program (PIP) (Attachment 1). The PIP established a process and outlined specific activities for communicating with the public throughout the Regional Plan development process, per Government Code Section 65080(b)(2)(F). The PIP was intended to support the development of San Diego Forward: The Regional Plan, creating a variety of opportunities for individuals, organizations, agencies, and other stakeholders to provide meaningful input. The Regional Plan was created based on input obtained throughout the fall of 2012 from the SANDAG Board of Directors, Policy Advisory Committees, working groups, surveys, recipients of community-based outreach grants, and a public workshop held in October 2012. Comments received on the draft PIP and responses prepared to each of those comments were included in the staff report⁵ on the final PIP presented to the SANDAG Board at its regular meeting on February 22, 2013. SANDAG’s overall Public Participation Plan provided guidelines for drafting the PIP.

Adopted in early 2013, the PIP provided a menu of options for SANDAG to gather input on the various anticipated components of the plan, including sustainability and land use goals; priorities for transportation projects, programs, and services; transportation networks; infrastructure recommendations; funding alternatives; policies and programs; performance measures; techniques for meeting greenhouse gas emission targets; and other related issues. A tribal consultation work plan was developed in parallel (see Appendix G).

Goals

The following goals were established in the PIP to guide the outreach process.

- Provide a road map to ensure that all interested stakeholders are given the chance to participate in the process.
- Reach beyond traditional methods to encourage participation from a wide variety of members of the public.
- Communicate the importance of the plan and the opportunities to participate in the process.
- Educate the public about SANDAG and its role in the region.
- Establish the new Regional Plan as a critical policy document helping to balance our future housing, jobs, land use, transportation, health, social equity, economic, and environmental sustainability needs.

Objectives

The following objectives were established in the PIP to help reach the goals of the outreach process.

- Raise awareness of the plan as the region's updated blueprint that will guide the way as our region grows in the next 35 years.
- Gain input from a broad range of individuals, organizations, agencies, and local governments throughout the Regional Plan development and decision-making process.
- Make proactive efforts to involve communities and members of the public that have traditionally not participated in public planning efforts.
- Meet or exceed local, state, and federal guidelines and requirements for public involvement in the development of the Regional Plan.
- Create an inclusive process that leads to broad support for policies, projects, and programs outlined in the Regional Plan.

Strategies

The following PIP strategies were identified to help achieve the objectives.

- Create a recognizable brand for San Diego Forward: The Regional Plan that resonates with the public.
- Provide timely and accessible public information about the Regional Plan to a broad range of regional stakeholders.
- Make public information accessible in a variety of formats and languages, use easy-to-understand language and concepts, and use a variety of media, including innovative visualization techniques.

- Provide a variety of opportunities for the public to be involved, and use technology to reach stakeholders who may not be inclined to participate in traditional outreach methods.
- Widely promote opportunities for public input to reach a broad and diverse audience.
- Communicate the decision-making process to stakeholders and indicate how their input is utilized in the development of the plan.
- Document and address public comments received during the public involvement process.
- Disseminate information to related agencies, metropolitan planning organizations, and engaged sectors throughout the state of California and the nation.
- Assess the effectiveness of the PIP at key milestones (i.e., following workshops or release of draft documents) to evaluate how the strategies and tactics worked and what enhancements could be made for future phases.

Implementation techniques and activities

The PIP included six main approaches for implementing the strategies in coordination with key milestones in the development of the plan:

- **Research**

In order to gauge public knowledge and opinion about issues related to regional planning, the PIP included pursuing activities such as focus groups and public opinion surveys to help identify key topics and the most effective means of public engagement.

- **Public Information**

An important tactic was to create and distribute clear, concise, and engaging information to support public involvement efforts, and to provide materials with a consistent look and feel, reflecting the branding developed for the plan. The potential range of resources included written materials, interactive website, e-newsletters, public notices, presentations, a project fact sheet translated into various languages, videos from public workshops, a series of short regional videos, a dedicated phone and e-mail account, and rider alerts.

- **Face-to-Face interactions**

The PIP recognized that face-to-face interaction was important, and emphasized the need to create opportunities for SANDAG to interact directly with stakeholders in a variety of formats. These included presentations to the SANDAG Board, Policy Advisory Committees, and Working Groups, stakeholder interviews and briefings, small group meetings, community events, public workshops, open houses, translation services/multi-lingual staff members, speakers bureau, a binational workshop, a Tribal Summit, and presentations to local city councils, the Board of Supervisors, planning commissions, and other planning-related organizations.

- **Community-Based Partnership Network**

The PIP recognized that due to their convening capacities, “community collaboratives” or “community based organizations (CBOs)” would be critical to the ability of SANDAG to reach out to underrepresented low income and minority populations who might not otherwise become involved in the planning process.

CBOs provide a culturally relevant structure for developing local protocols, crossing language barriers, and structuring meetings. To help ensure diverse and direct input into the Regional Plan, the PIP included a strategy for SANDAG to continue to broaden its partnership network with CBOs through competitive contracts awarded by SANDAG. The primary goal was to engage and encourage diverse, inclusive, and active public participation from stakeholders in specific communities who traditionally may not have been involved in regional planning processes (e.g., low-income, seniors, minorities, persons with disabilities, and other identified populations). The PIP anticipated that approximately ten CBOs would form the Community-based Partnership Network.

- **Web-based Interactive Communications**

Given the growing role of the internet in people’s everyday lives, the PIP identified opportunities for basic web-based communications to provide information and solicit public involvement in the plan development process, as well as for more innovative interactive web-based opportunities. These included a dedicated website, extensive social media, e-newsletters, internet-based surveys, “virtual” public workshops, and visualizations.

- **Media**

Finally, the PIP identified the opportunity for SANDAG to use print, broadcast, and online media to communicate information to a broad audience and promote opportunities for the public to get involved. These included earned media, media partnerships, and paid media, including reporter briefings, distribution of regular press releases and media alerts to local and regional media, press conferences, editorial opportunities, paid media when appropriate, cultivating a partnership with the media, using SANDAG Board members as media ambassadors, and outreach via trade publications and stakeholder newsletters.

Coordination with other agencies and governments

In addition to the strategies and tactics listed above, the PIP also included specific actions to coordinate with other agencies and governments based on the region’s unique location and constitution.

Tribal Consultation

Tribal nations have a voice in the decision-making process in regional planning based on consultation, cooperation, and collaboration. Through the structure in place, which is outlined in the SANDAG PPP, a Tribal Consultation Plan for San Diego Forward: The Regional Plan was developed. It included: a set of information sessions to clarify the current RCP and 2050 RTP/SCS elements, a survey to all tribal nations on the issues of importance to them, a set of policy workshops on the resulting priority areas, the development of a position paper that outlines the tribal perspective on regional issues based on the results of the workshops, and a Regional Tribal Summit between the SANDAG and Southern California Tribal Chairman’s Association (SCTCA) Boards to determine areas of cooperation and concern. The Interagency Technical Working Group on Tribal Transportation Issues was tasked with providing direct input at key stages of the transportation planning process and recommendations to the SCTCA, which would, in turn, provide input to the SANDAG Transportation Committee for inclusion in the Regional Plan. The Tribal Consultation process and associated results are described in more detail in Appendix G.

Coordination with Mexico

The San Diego region shares an international border with Baja California, Mexico. The PIP specified that SANDAG would continue to coordinate with Mexico through the SANDAG Board of Directors, the Borders Committee, the Transportation Committee, and the Committee on Binational Regional Opportunities (COBRO), as well as other groups conducting binational work and groups and organizations based in Mexico. The PIP called for some of these efforts to be conducted in Spanish and/or simultaneous translation services to be made available.

Coordination with California Metropolitan Planning Organizations, Air Quality, and Regional Transportation Planning Agencies

The PIP also stated that SANDAG would collaborate and exchange information with the Southern California Association of Governments, other metropolitan planning organizations, and regional transportation planning agencies, as well as the California Air Resources Board, on the greenhouse gas emission reduction target-setting process and other SB 375 efforts, and that SANDAG would carry out air quality planning mandates in cooperation with the San Diego County Air Pollution Control District, including conducting interagency consultation for air quality conformity.

The Public Involvement Plan is available as Attachment 1 of this appendix. SANDAG sought comments on the draft PIP as it was being developed. Comments on the draft PIP and SANDAG responses to the comments are available in Attachment 2. The Regional Plan Stakeholders List, which is included in the Public Involvement Plan, is also provided as Attachment 3 of this Appendix, for ease of reference.

Evaluating the Effectiveness of SANDAG’s Public Outreach Efforts for San Diego Forward: The Regional Plan

During the preparation of the 2050 RTP/SCS (the last plan), SANDAG developed performance metrics to evaluate the effectiveness of the public involvement program for that plan. During the preparation of San Diego Forward, a decision was made to develop public outreach goals that surpassed the performance metrics measured during the last plan. Table F.1 (below) provides the metrics and baseline performance measures from the 2050 RTP/SCS, and shows the new goals for each of the metrics for San Diego Forward: The Regional Plan. Table F.2 (at the end of this Appendix) includes a table summarizing the agency’s performance in these areas.

**Table F.1
Outreach Performance Metrics for San Diego Forward: The Regional Plan**

Metric	Baseline – 2050 RTP/SCS	Goal for San Diego Forward
Public Workshops	Ten workshops	Increase number of public workshops by 10 percent
Pre-document consultation	Not tracked	5,000 individual remarks
E-newsletter subscribers	5,000 subscribers	Increase subscribers by 15 percent
Opportunities for engagement	<ul style="list-style-type: none"> Public workshops Special topic/targeted workshops Presentations to community groups Public meetings (SANDAG Board, Policy Advisory Committees, working groups) Draft documents available online 	<ul style="list-style-type: none"> Increase modes of public engagement by 15 percent Hold at least one bilingual workshop in English and Spanish
Web presence	<ul style="list-style-type: none"> 1,005 average monthly unique page views per month on Sandag.org/2050RTP webpage RTP e-newsletter distributed (periodically and at key milestones) 	<ul style="list-style-type: none"> Create dedicated project website Send e-newsletter bi-monthly Establish project presence on social media (SANDAG’s Facebook, Twitter, and YouTube pages) Provide three opportunities for comment/interaction on website Increase average monthly unique website page views by 10 percent during plan adoption period
Engaging low income, minority, and senior populations	Eight grants awarded to CBOs to conduct outreach within communities of concern	Increase outreach to low income, minority, and senior communities by 15 percent
Partnerships	<ul style="list-style-type: none"> Stakeholders Working Group Review by economic stakeholders 	<ul style="list-style-type: none"> Form three new partnerships to address emerging issues
Tribal Consultation	Prepare and implement Tribal Consultation Plan with Tribal governments, SCTCA, and SANDAG Board of Directors	Prepare and implement Tribal Consultation Plan with Tribal governments, SCTCA, and SANDAG Board of Directors

Where the Rubber Met the Road: Implementing the PIP

Within this context, SANDAG set out to obtain meaningful input during the development of the plan. The following section summarizes the main outreach activities conducted between 2012 and 2015 and how the input was used. Attachments 4A and 4B provide comprehensive listings of presentations, public meetings, and workshops by SANDAG and by SANDAG's Community Based Organization network (described further below), and Attachments 5A and 5B provide summaries of the SANDAG and CBO workshop summaries from all of the Regional Plan workshops.

Community-Based Outreach

Social Equity and Environmental Justice

The Regional Plan PIP incorporated a number of techniques for SANDAG to reach low-income and minority groups and others who may face challenges participating in the planning process (such as non-English speakers, individuals with disabilities, and the elderly) to ensure that benefits and burdens are distributed equitably in the region. These techniques included multilingual outreach, public participation conducted in collaboration with community-based partner organizations, and community planning events that reach out to communities with high concentrations of low-income or minority residents. The PIP complies with SANDAG Board Policy No. 025,⁶ Title VI of the federal Civil Rights Act of 1964 (42 U.S.C. 2000d), the Americans with Disabilities Act (as defined in Title 49, Part 37, of the United States Code), Executive Order 12898 on Environmental Justice, Executive Order 13166 on Limited English Proficiency, and other relevant laws and guidance to ensure consideration of social equity, environmental justice, and accessibility (Appendix H: Social Equity: Engagement and Analysis). SANDAG is committed to ensuring that no person is excluded from participation in, denied the benefits of, or discriminated against under its projects, programs or activities on the basis of race, color, creed, national origin, sex, age, income status or disability as provided in state and federal law.

Consistent with U.S. Department of Transportation guidance, SANDAG developed a Language Assistance Plan⁷ (LAP) in order to ensure meaningful input opportunities for persons with limited English proficiency. The SANDAG LAP is available on the SANDAG website and called for SANDAG to translate certain vital documents such as public notices into Spanish. The LAP is updated periodically.

While the PIP anticipated that SANDAG would work with ten community-based organizations, SANDAG was able to enter into contracts with 14 CBOs covering the vulnerable and historically disadvantaged communities around the region to help conduct public outreach for the Regional Plan. Several of the 14 CBOs participated in the public involvement efforts for the previous plan (2050 RTP/SCS). Their participation in the preparation of San Diego Forward provided unprecedented continuity in the planning process and helped to build knowledge about the regional policy-making process in local communities from the very beginning. The following is a list of the 14 CBOs that participated in the development of the plan. An overview of each of the CBOs and a map showing the areas of their geographic coverage is provided in Appendix H: Social Equity: Engagement and Analysis.

- Able-Disabled Advocacy
- Alliance for Regional Solutions
- BAME Renaissance Community Development Corporation
- Casa Familiar
- Chula Vista Community Collaborative
- City Heights Community Development Corporation and Mid-City Community Advocacy Network
- El Cajon Collaborative
- International Rescue Committee
- Jacobs Center for Neighborhood Innovation
- Linda Vista Collaborative
- Operation Samahan
- Mountain Health Collaborative
- Senior Community Centers (currently recognized as Serving Seniors)
- Vista Community Clinic

Each of the CBOs conducted outreach using strategies and techniques they developed, and which they felt were most effective in reaching out to residents and stakeholders in the communities they serve. A summary of the reports, public input, and comments from the community-based organizations is included in Appendix H, and as described above, Attachments 4B and 5B provide detail on the CBO presentations, public meetings and workshops, as well as the CBO workshop summaries from all of the Regional Plan workshops.

This input was used to help develop the transportation project evaluation criteria, performance measures, environmental justice analyses, transportation network scenarios, and other elements of the Regional Plan. In addition, these CBOs invited residents and stakeholders from their own communities to the more formal SANDAG public workshops on San Diego Forward, promoting additional cross-cultural idea exchanges and building community integration into the planning process.

In addition to the activities described in Appendix H, many of the specific CBO-led workshops that were held in conjunction with the more formal SANDAG workshops are described further below.

SANDAG Working Groups and Policy Advisory Committees

Public Involvement through Regularly-Scheduled Public Meetings

Obtaining meaningful public and technical input is important to all of SANDAG’s functional areas and is consistent with the Board’s public participation policy. The SANDAG institutional structure of standing working groups and Policy Advisory Committees provides a forum for continuous involvement throughout the regional planning process.

SANDAG working groups meet on a monthly or quarterly basis and consist of professionals and stakeholders from throughout the region with expertise and interests in the various issue areas. The working groups receive information and provide feedback on a variety of topics. All working group meetings are open to the public. The deliberation and recommendations of the working groups are reported to the various Policy Advisory Committees (PACs). The PAC meetings are also open to the public. The PACs discuss the issues and

make recommendations to the SANDAG Board of Directors for final decisions. This ensures multiple levels of discussion and coordination in the decision-making process.

The three primary PACs involved in the preparation of San Diego Forward included the Transportation Committee, the Regional Planning Committee, and the Borders Committee. Each of the PACs consists of elected officials and their alternates from each of the region’s six subregions (North County Coastal, North County Inland, East County, South County, City of San Diego, and County of San Diego), as well as additional members, as follows:

Transportation Committee: Metropolitan Transit System (MTS), North County Transit District (NCTD), San Diego County Regional Airport Authority, San Diego Unified Port District, Caltrans, and Southern California Tribal Chairmen’s Association.

Regional Planning Committee: U.S. Department of Defense, MTS, NCTD, San Diego County Water Authority, San Diego Unified Port District, Caltrans, Regional Planning Technical Working Group, Southern California Tribal Chairmen’s Association, U.S. Fish and Wildlife Service, California Department of Fish and Wildlife, U.S. Army Corps of Engineers, and Wildlife Conservation Board.

Borders Committee: Imperial County, Riverside County, Orange County, Consulate General of Mexico, San Diego County Water Authority, Caltrans, Southern California Tribal Chairmen’s Association, and Southern California Association of Governments.

Each of the working groups reports to one of the PACs. The following is a list of the working groups (organized by which PAC they report to) that were involved in the preparation of the Regional Plan, their membership, and their responsibilities.

Transportation Committee

Committee or Working Group Name	Membership	Responsibilities
1 Cities/County Transportation Advisory Committee (CTAC)	Public works directors from local jurisdictions and staff from Caltrans, MTS, and NCTD	Provides recommendations to the Transportation Committee regarding: (1) local street projects and programs, including local freeway interchanges; and (2) highways, transit, rail, bicycle, and pedestrian issues and policies that affect local street and road projects and programs
2 Active Transportation Working Group	Staff members from local jurisdictions and representatives from, Caltrans, Civic San Diego, County of San Diego Air Pollution Control District, Metropolitan Transit System (MTS), North County Transit District (NCTD), Bike San Diego, San Diego County Bicycle Coalition, Circulate San Diego, Public Health Stakeholders Working Group, San Diego Safe Routes to School Coalition, San Diego County Department of Education, Post-Secondary Education	Provides input on regional active transportation policy, planning and implementation activities
3 Freight Stakeholders Working Group	Members include one representative from the City/County Transportation Advisory Committee, and the Regional Planning Technical Working Group, and members from Caltrans, Port of San Diego and Port users, Federal Highway Administration (FHWA), California Trucking Association, American Trucking Association, San Diego County Regional Airport Authority, shippers and carriers using the airport, San Diego and Arizona Eastern Railway, Burlington North Santa Fe Railroad, Union Pacific Railroad, regional truckers, warehouse operators, San Diego Regional and Otay Mesa Chambers of Commerce, San Diego World Trade Center, ADMICARGA Baja California short line rail operator, Imperial County Transportation Commission, Southern California Association of Governments, Waste Management, Environmental Health Coalition, and others interested in efficient goods movement in the San Diego region	Provides input and feedback to SANDAG staff and in turn to the Transportation Committee regarding the Freight Gateway Study Update, Analysis of Freeway Operational Strategies Related to the Use of Managed Lanes by Trucks, and Goods Movement Strategy portion of the <i>San Diego Forward: The Regional Plan</i>

Transportation Committee (continued)

Committee or Working Group Name	Membership	Responsibilities
4 San Diego Region Conformity Working Group	Staff from the U.S. Environmental Protection Agency, FHWA, Federal Transit Administration (FTA), California Air Resources Board, Caltrans, and San Diego Air Pollution Control District	Reviews and comments on Regional Transportation Plan and Regional Transportation Improvement Program, transportation conformity and State Implementation Plan development or updates, and fulfills federal and state requirements for interagency consultation
5 San Diego Regional Traffic Engineers Council	Membership shall consist of one representative from each local agency in the San Diego region including; the cities, County of San Diego, Caltrans, MTS, NCTD, and SANDAG	Discusses, reviews, and/or recommends items associated with regional transportation goals and policies
6 Social Services Transportation Advisory Council	Representatives of transit users who are 60 years or older; representatives of transit users who are persons with a disability; representatives of transit users who are persons with limited means; staff from social service providers serving seniors, persons with disabilities, and persons of limited means; representatives from the Consolidated Transportation Services Agency (FACT); and representatives from MTS and NCTD	Designated as the Local Review Committee for the FTA Section 5310 grant applications, holds required unmet needs hearings, and advises on regional issues of accessible transportation provided by the public and private sector; fulfills state Public Utilities Code requirement; fulfills federal requirements for Coordinated Plan development; also reviews and advises on transit capital improvement projects for Americans with Disabilities Act compliance

Regional Planning Committee

Committee or Working Group Name	Membership	Responsibility
1 Regional Planning Technical Working Group (TWG)	Planning directors from local jurisdictions and staff from other agencies, including Port of San Diego, MTS, NCTD, Caltrans, San Diego County Water Authority, San Diego County Air Pollution Control District, San Diego County Regional Airport Authority, U.S. Department of Defense, and Local Agency Formation Commission	Advises on key regional planning and implementation activities, including the preparation of San Diego Forward: The Regional Plan, the development/update of the Smart Growth Concept Map, Smart Growth Incentive Program, land use and transportation performance indicators and targets, Regional Housing Needs Assessment, and other related items. Assists with public outreach activities. Focuses on land use and environmental planning activities of regional significance.
2 Environmental Mitigation Program (EMP) Working Group	Del Mar Councilmember Terry Sinnott (Chair), Carlsbad staff member Mike Grim (Vice Chair); and staff representatives from City of San Diego, County of San Diego, North County Coastal, North County Inland, East County, and South County; representatives from the U.S. Fish and Wildlife Service, U.S. Army Corps of Engineers, California Department of Fish and Wildlife, California Wildlife Conservation Board, Caltrans, the Nature Conservancy, Conservation Resource Network, U.S. Geological Survey, Endangered Habitats League, Building Industry Association, San Diego Foundation, California Coastal Conservancy, and Alliance for Habitat Conservation	Advises on issues related to the coordination and implementation of the <i>TransNet</i> Environmental Mitigation Program
3 San Diego Regional Military Working Group	Five representatives from the armed forces: Navy Region Southwest; Navy Facilities Engineering Command; Marine Corps Installation West; Marine Corps Recruitment Depot; and U.S. Coast Guard San Diego Sector; and one representative each from the following jurisdictions: City of Coronado, City of Imperial Beach, City of Oceanside, City of National City, City of San Diego, County of San Diego, and the Port of San Diego	Provides a collaborative forum for the various branches of the military and SANDAG to address areas of mutual interest, including growth management, habitat, transportation, regional growth, housing, water, energy, and other related topics

Regional Planning Committee (continued)

Committee or Working Group Name	Membership	Responsibility
4 Public Health Stakeholder Working Group	Staff representatives from the following organizations: City of San Diego and County of San Diego Planning and Engineering Departments, Lemon Grove School District, Local Law Enforcement, San Diego County Health and Human Services Agency, San Diego County Department of Environmental Health, San Diego County Air Pollution Control District, Caltrans, UC San Diego, San Diego State University/School of Public Affairs, Public Health Institute, Active Living Research, American Heart Association, American Cancer Society, American Lung Association, Environmental Health Coalition, Childhood Obesity Initiative, Center for Policy Initiatives, San Diego County Bicycle Coalition, Circulate Diego, Kaiser Permanente, Sharp Healthcare, Rady Children’s Hospital, SANDAG Social Service Transportation Advisory Council, Children’s Physicians Medical Group, Urban Design Subcommittee of the American Institute of Architects/Council of Design Professionals, and American Society of Landscape Architects	Supports SANDAG in implementing health considerations into San Diego Forward: The Regional Plan, and serves as a forum for discussing opportunities for strengthening the links between public health and the built environment
5 Regional Energy Working Group	San Marcos Councilmember Chris Orlando, Chair (North County Inland), San Diego County Supervisor Dave Roberts, San Diego Councilmember Sherri Lightner, Chula Vista Deputy Mayor Pamela Bensoussan (South County), Del Mar Councilmember Don Mosier (North County Coastal), Santee Councilmember Rob McNelis (East County); and staff representatives from San Diego Gas & Electric, Port of San Diego, San Diego County Regional Airport Authority, California Center for Sustainable Energy, Energy Policy Initiatives Center at University of San Diego School of Law, San Diego Regional Chamber of Commerce, regional economic development councils (North County and South County), San Diego Clean Cities Coalition, Environmental Health Coalition, Sierra Club, San Diego State University, University of California San Diego, MTS, and CleanTECH San Diego	Advises on the implementation of the Regional Energy Strategy and serves as a forum for discussion of regional energy issues

Regional Planning Committee (continued)

Committee or Working Group Name	Membership	Responsibility
6 Shoreline Preservation Working Group	San Diego County Supervisor Dave Roberts (Chair), San Diego Councilmember Lorie Zapf (Vice Chair), Carlsbad Councilmember Michael Schumacher, Coronado Councilmember Barbara Denny, Del Mar Councilmember Sherryl Parks, Encinitas Councilmember Teresa Barth, Imperial Beach Councilmember Brian Bilbray, Oceanside Deputy Mayor Esther Sanchez, Solana Beach Councilmember Mike Nichols, Unified Port of San Diego Commissioner Garry Bonelli, and Mitch Perdue, U.S. Navy; and technical advisors from: California Coastal Commission, National Marine Fisheries Service, State Department of Boating and Waterways, State Department of Fish and Wildlife, State Department of Parks and Recreation, State Lands Commission, U.S. Army Corps of Engineers; and community advisors from California Coastal Coalition, California Lobster and Trap Fisherman Association, Coastal Environmental Rights Foundation, Scripps Institution of Oceanography, Southern California Tribal Chairmen’s Association, and Surfrider Foundation	Advises on the implementation of the Shoreline Preservation Strategy, the Regional Comprehensive Plan, and the Coastal Regional Sediment Management Plan

Borders Committee

Committee or Working Group Name	Membership	Responsibility
1 Committee on Binational Regional Opportunities	Stakeholders from both sides of the United States/Mexico border, including representatives from local jurisdictions, businesses, and academia	Advises on binational-related planning and project development issues
2 Interagency Technical Working Group on Tribal Transportation Issues	Representatives from each of the 17 federally recognized tribal governments and California tribes in San Diego County	Discusses and coordinates tribal transportation issues of mutual concern with the various public planning agencies in the region, including SANDAG, Caltrans, the County of San Diego, and the transit operators

Through the institutional mechanisms in place, SANDAG worked collaboratively with our 19 local jurisdictions and our other member agencies, including the U.S. military, our 18 federally-recognized tribal governments, the San Diego Unified Port Authority, San Diego County Regional Airport Authority, the San Diego County Water Authority, as well as the Republic of Mexico, and several state agencies, such as Caltrans and the California Air Resources Board, in the preparation of San Diego Forward: The Regional Plan.

Public Workshops/ Public Hearings

Fall 2012 – regional kick-off workshop

In October 2012, SANDAG held a large-scale public workshop at the Caltrans Headquarters in Old Town to kick-off the preparation of the Regional Plan. After several months of discussion with the SANDAG Board of Directors, Policy Advisory Committees, and working groups culminating in the decision to merge the updates of the Regional Comprehensive Plan and the 2050 RTP/SCS, SANDAG held a public workshop to initiate the planning process for the combined plan. The workshop focused on gathering initial ideas on the topics that should be addressed in the plan and ideas for techniques to involve the public in the preparation of the plan, including web-based public participation tools. The workshop was structured in an interactive manner, with a focus on engaging in facilitated discussions, listening to the thoughts and perspectives of workshop attendees, and minimizing staff presentations. This interactive workshop structure served as a model for the additional workshops held during the plan's preparation.

The invitation was distributed and advertised widely in both English and Spanish via e-mail distribution lists, web postings, social media postings, editorials, and press releases, various local TV stations, and through the CBOs. A survey on how the public prefers to experience visualizations as part of the planning process was conducted at the workshop.

More than 120 participants attended the workshop. The attendees rotated between 11 tables, resulting in more than 30 separate facilitated roundtable sessions on a half dozen topics (communities, healthy environment, mobility, partnerships, reaching out, and vibrant economy). Participants' ideas and feedback were recorded by SANDAG facilitators and note-takers. Subsequently, notes from each table were compiled into a 67-page summary and posted on the SANDAG website (Attachment 5A). In addition, a short summary was e-mailed via e-blast to all participants who registered for the workshop and expressed interest in the development of the plan. A demographic survey was included in the follow-up e-blast asking participants about their gender, ethnicity, age, and income.

A key comment heard at the workshop was the desire from participants to know how their input affected the development of the plan. As a result, SANDAG began an effort to include more specific information in all Policy Advisory Committee and Board Reports and at subsequent workshops on how the public input was being used and specifying next steps in the process. This information is summarized in the various sections of this appendix, as well.

An email distribution list was initiated based on registration and workshop attendance, and the distribution list was maintained throughout the plan preparation process.

Ideas from the workshop were incorporated into the Public Involvement Plan (adopted by the SANDAG Board in February 2013), and helped shape the plan's vision and goals (approved by the SANDAG Board on May 10, 2013) and policy objectives (approved by the Board on July 12, 2013).

Winter 2013 – public scoping meeting for environmental impact report

On December 14, 2012, SANDAG issued a Notice of Preparation of a Programmatic Environmental Impact Report (EIR) for the 2050 Regional Plan. On January 13, 2013, SANDAG held a public scoping meeting to solicit input from the public on the scope and content of the environmental information to be included in the Draft EIR. Public input was taken at the meeting. In addition, SANDAG provided a 60-day public comment period, requesting written comments by February 15, 2013. Comments received through the scoping process influenced the content and alternatives included in the final EIR.

Spring and Summer 2013 – series of policy workshops

In May 2013, SANDAG embarked on a series of subregional workshops to seek input on San Diego Forward: The Regional Plan. Nine workshops were held from May through August 2013. Four of the workshops were held on each Thursday evening throughout the month of June in various places throughout the region including San Ysidro, Escondido, Oceanside, and La Mesa; three of the workshops were held on the third Fridays in May, June, and July at the Caltrans headquarters in Old Town during the day; and two of the workshops were held in communities with large low income and minority populations in which CBO representation had not yet been secured (National City and Central San Diego at the Jacobs Center). The workshop invitations were distributed and advertised widely in both English and Spanish via email distribution lists, web postings, social media postings, editorials, and press releases, as well as various local TV stations.

The workshops were intended to build upon the “fall kick-off” workshop held in October 2012 to continue to refine the dialogue on critical policy issues to be addressed in the Regional Plan. Each of the evening workshops focused on five broad topics, and each of the daytime workshops focused on specific and in-depth sets of topics, as listed below. The workshops held in San Ysidro, National City, Oceanside, and at the Jacobs Center were conducted simultaneously in both English and Spanish, and all materials and subsequent

summaries were provided in both languages. All workshops had bilingual staff members, and at one of the daytime workshops, a translator assisted a break-out table to conduct a discussion in Arabic, as organized per one of the CBOs (the International Rescue Committee).

Evening Workshops: Varying locations, 6 – 8 p.m.

Topics: Mobility; Healthy Communities; Healthy Environment; Energy and Climate Change; and Economic Prosperity and Borders

- **June 6:** South County: San Ysidro
- **June 13:** North County Inland: Escondido
- **June 20:** North County Coastal: Oceanside
- **June 27:** East County: La Mesa
- **June 29:** South County: National City
- **August 21:** Central: Jacobs Center

Daytime Workshops: Caltrans Headquarters in Old Town, 11:30 a.m. – 1:30 p.m.

- **May 17: Topics:** *Healthy Environment, Energy, Climate Change, and Public Health* (More specifically, break-out tables were held on: Clean Energy, Clean Fuels, and Innovation; Healthy Communities; Habitat and Shoreline; Air and Water Quality; and Climate Change)

- **June 21: Topics:** *Land Use and Transportation* (More specifically, break-out tables were held on: Mobility, Parking and Pricing, Land Use Scenarios, Active Transportation, Emerging Technologies, and Transportation Project Evaluation Criteria)
- **July 19: Topics:** *Economic Prosperity, Public Facilities, and Borders*

Prior to the workshops, the new name and brand for the plan were finalized. The series of policy workshops provided an opportunity to show a video⁸ to introduce the plan by its new name, “San Diego Forward: The Regional Plan,” and feature various regional leaders speaking about the purpose of the plan, the importance of public involvement, and the topics to be addressed based on the input gathered from the kick-off workshop in October 2012. A portion of the video was conducted in Spanish and the video was fully translated into Spanish for use at related CBO workshops and for posting on the website.

In total, more than 650 attendees participated in the spring and summer 2013 series of workshops.⁹ The rotating table topic format produced a total of more than 200 small-group discussions. During the table discussions, SANDAG staff members asked the groups a series of questions on the topics, promoting free-flow discussion among the participants. The discussions were transcribed and are available on the SANDAG website at sandag.org/sandiegoforward and as part of Attachment 5A. The small-group discussions (comprising more than 66 hours of conversations) yielded 4,750 comments. Because of the volume of comments, a database was developed with 36 searchable categories to assist with the development of various components of the Regional Plan (many comments relating to more than one category).

After each workshop, written summaries were e-mailed to the project contact list reiterating the key points made by participants. A 32-page summary compiling all of the e-blasts was posted on the San Diego Forward

website. The individual detailed note-takers notes were also posted for each workshop. In addition, video clips¹⁰ featuring short interviews of participants at the various workshops were posted on line. Several of the interviews were conducted in Spanish.

Input from the workshops was reported to the SANDAG Board in September 2013. The input received was used to continue to develop key components of the Regional Plan, including the preparation of various policy white papers (e.g., Public Health, Economic Strategies, Emerging Technologies, and Climate Change Mitigation and Adaptation), as well as analysis of related planning efforts folded into the Regional Plan, including the Active Transportation Implementation Strategy, Project Evaluation Criteria and Performance Measures, Habitat Management Strategic Plan, Regional Transit Oriented Development Strategy, Land Use and Transportation Scenarios, and Complete Streets Policy.

Spring and Summer 2013 – binational and economic workshops

In addition to the policy workshops, SANDAG also held workshops on binational and economic topics.

The binational workshop was held at Caltrans on June 4, 2013, with a theme of “Moving the Border Forward: Key Reflections on the 20th Anniversary of the Signing of the North American Free Trade Agreement (NAFTA) and the 30th Anniversary of the Signing of the La Paz Agreement.” This workshop was held as part of the annual series of workshops organized by the SANDAG Borders Committee and Committee on Binational Regional Opportunities (COBRO) in both English and Spanish. Workshop results helped inform the border-related elements of the Regional Plan.

On August 23, 2013, SANDAG held an Economic Stakeholders Workshop at the SANDAG offices geared toward staff members of economic development corporations, chambers of commerce, and citywide economic development departments. This workshop focused on the Series 13 Regional Growth Forecast, the land use scenarios, the economic impact analysis for the Regional Plan, and on preferred methods for continued involvement of economic stakeholders. Approximately 25 people participated in this workshop, which set the stage for closer staff-to-staff working relationships during the preparation of the plan and the economic competitiveness roundtable discussions held approximately one year later, in August 2014.

Summer and Fall 2013 – transportation sessions: project evaluation criteria and performance measures

Two of the topics at the spring and summer 2013 workshops centered around the questions of how to evaluate the transportation projects that would be considered in the Regional Plan, and then how to evaluate the alternative transportation networks which would be composed of various combinations of individual transportation projects.

Project Evaluation Criteria

SANDAG sought initial input on these topics at the earlier workshop series, followed by a workshop specifically on transportation project evaluation criteria on August 5, 2013, at Caltrans. More than 75 participants attended the workshop. More than 400 comments were collected from local jurisdictions, partner agencies, stakeholders, and the general public. This feedback provided valuable information that factored into the development of the draft project evaluation criteria (Attachment 5A).

Peer Review Session with the Public

A five-person peer review panel including experts from academia, other Metropolitan Planning Organizations, and the private sector was created to review and assess the draft project evaluation criteria. A peer review panel meeting was held at SANDAG on August 22, 2013, concluding with a session open to the general public. Prior to the meeting, the panelists were provided with various pieces of information, including a public outreach comment matrix which had been compiled based on comments from the series of policy workshops and from the August 5th workshop. During the public session, the panel shared its findings and recommendations. Participants posed questions to the panel and SANDAG staff as to how the panel's recommendations might be accomplished. Based on the panel's review and comments and the public input received, several changes were made. The SANDAG Board approved the final transportation project evaluation criteria on October 11, 2013.

Performance Measures

Performance measures are used to help assess the performance of each of the transportation scenarios. These measures help provide a "scorecard" to compare the scenarios. Public input on the performance measures was solicited as part of the Regional Plan workshop series. In addition to the more general workshop series, a public workshop focusing specifically on performance measures was held on November 4, 2013, at Balboa Park. More than 40 people participated.

Approximately 380 comments collected from local jurisdictions, partner agencies, stakeholders, and the general public was compiled into a comprehensive matrix. Comments focused on greenhouse gas reductions, access to jobs and services, safety, cost effectiveness, public health, social equity, mode share, and travel times in the evaluation of scenarios (Attachment 5A).

Peer Review Session with the Public

The peer review panel that provided input on the draft transportation project evaluation criteria was reconvened to review and assess the draft performance measures. A meeting was held at SANDAG on November 12, 2013, concluding with a session open to the general public. A summary of the peer review panel's findings and recommendations was presented to the Regional Planning and Transportation Committees in early 2014. The Board of Directors approved the final performance measures to evaluate the performance of the draft revenue constrained transportation network scenarios on March 28, 2014.

Summer 2014 – transportation scenario workshops and CBO outreach

The next steps in the process were to develop alternative transportation scenarios using the ranked transportation projects; evaluate the performance of the scenarios using the performance measures approved by the Board of Directors; and solicit public input on the draft transportation network scenarios. In August 2014, SANDAG held three public workshops and worked with the partner CBOs to develop the content for and hold 21 multi-lingual community workshops (four in Spanish, one in Vietnamese, one in Arabic, and one in Tagalog) to discuss and gather feedback on two transportation scenarios developed for consideration for San Diego Forward. More than 200 people participated in the SANDAG-led workshops. More than 400

people participated in the CBO workshops, which were held throughout the region (Attachment 5B). SANDAG also held a series of economic roundtables to gather input from business interests around the region.

The workshops were structured to provide information about the current regional transportation system, the investment choices in the two potential scenarios, and the performance of each scenario. Interactive exercises were included, and the complete workshop materials were posted on the San Diego Forward website. The public was also able to provide feedback via an online comment tool which included the same questions asked on the workshop input sheet.

The following workshops and roundtable discussions were held:

- **August 4:** Caltrans Headquarters, two workshops (one during the mid-day and one during the evening). Interactive meeting materials were posted on the San Diego Forward website to gather additional comments via an on-line comment tool. More than 140 people participated in these two workshops.
- **August 6:** SANDAG, joint working group’s workshop, including Regional Planning Technical Working Group, Cities/County Transportation Advisory Committee, Active Transportation Working Group, Public Health Stakeholders Working Group, Committee on Binational Regional Opportunities, Freight Stakeholders Working Group, and San Diego Region Conformity Working Group. More than 60 people attended this workshop.

- **August 4 – 20:** Twenty-one Community Based Organization Workshops throughout the region. Approximately 400 people attended these workshops.
- **August 4 – 8:** Sixteen Economic Competitiveness Roundtable Discussions. Approximately 50 people attended the roundtable sessions.

The format for this round of workshops included interactive activities regarding participants' commuting patterns, and a "walk score" activity. Other tools used at the meetings to seek input included: a PowerPoint and video explaining the key differences between the two scenarios; five rotating stations on Managed Lanes, transit, and active transportation staffed by SANDAG, the transit operating agencies, and Caltrans; seven informational boards; Spanish-speaking staff members; and comment cards. All materials were made available in both English and Spanish. Handouts included a list with all transportation projects included in both scenarios, a performance measures scorecard comparing the performance of the two networks, community input worksheets asking key questions, and workshop evaluation sheets.

Feedback was also solicited from the Transportation and Regional Planning Committees on August 1, 2014 and the SANDAG Board of Directors on August 15, 2014.

More than 1,730 comments were submitted throughout this phase of public participation, and another 150 comments were submitted regarding potential locations for mobility hubs. CBO workshop participants provided more than 1,000 comments. Participants at the SANDAG-led August 2014 workshops and economic roundtables provided more than 500 comments, and more than 90 comments were received via the online comment tool. Additionally, 115 comments on the draft transportation network scenarios were submitted via letter. Comments included support for: additional transit services, particularly focused on job centers, beaches and tourist attractions; two Managed Lanes earlier in the plan; and active transportation projects. In addition, various stakeholder groups requested that SANDAG develop a third scenario that would implement the transit and active transportation projects within the first ten years of the plan (Attachment 5A).

The transportation network scenario performance measure data and all public input was shared with the SANDAG Board of Directors on September 12, 2014, with a staff recommendation to select a blend of the two scenarios as the preferred revenue constrained network for the Regional Plan. At its meeting, the Board adopted the Revenue Constrained Transportation Network for the Regional Plan. As part of their action, the Board also requested that as a parallel effort, staff develop and analyze an accelerated alternative transportation scenario that would advance public transit and active transportation projects. The purpose of the analysis would be to inform future planning efforts and funding strategies. The analysis was presented to the Board at its Board Retreat in early 2015, and work on this effort continues to move forward and will be used in the next planning cycle.

Winter 2015 – Regional Transit Oriented Development (TOD Strategy) workshops

To explore and encourage the practical implementation of initiatives with the potential to further enhance the relationship between transportation and land use, and to meet one of the commitments made in the 2050 Regional Transportation Plan, SANDAG held a one-and-a-half day Transit Oriented Development (TOD) Implementation Forum on January 27 and 28, 2015. The goal of the forum was to inform the development of a Regional TOD Strategy that identifies barriers to TOD, discusses potential solutions, and provides input

on how SANDAG and the region’s local governments can work with the private sector to facilitate implementation of development projects that create and enhance communities and employment centers near transit. A series of white papers were drafted and posted to the SANDAG website in preparation for the forum. A panel of speakers from across the United States made presentations regarding lessons learned from TOD projects in other metropolitan areas for consideration in the preparation of the draft Regional TOD Strategy. The TOD Strategy will be incorporated as an appendix of San Diego Forward: The Regional Plan. Approximately 150 people attended the first day of the workshop, and 75 people attended the second day, during which six roundtables were held to discuss the proposed strategies included in the white papers.

Spring 2015 – Workshops and Public Hearings on Draft San Diego Forward: The Regional Plan/Draft Environmental Impact Report

The Draft version of San Diego Forward: The Regional Plan was released by the SANDAG Board of Directors for public review and comment on April 24, 2015 and the Draft Environmental Impact Report (EIR) for the plan was released on May 21, 2015. Senate Bill 375 requires that SANDAG conduct two public hearings to gather input following the release of the Draft Regional Plan and its EIR. To that effect, SANDAG held seven public workshops and two public hearings to collect feedback on the Draft Regional Plan and its EIR. To promote these events, fliers were distributed and advertised widely in both English and Spanish (Attachment 8) via email distribution lists, public notices, web postings, social media postings, e-newsletters, as well as press releases. The workshops and public hearings were hosted in communities throughout the region to maximize opportunities for input and were held during the months of May and June of 2015:

Workshops

Draft 2015 San Diego Forward: The Regional Plan Workshops

Date	Location	Venue	Time
Tuesday, May 12	North County Inland	Escondido City Hall	6 – 8:30 p.m.
Wednesday, May 13	East County	La Mesa Community Center	6 – 8:30 p.m.
Thursday, May 14	Central	Caltrans District 11	1 – 3:30 p.m.
Wednesday, May 20	North County Coastal	Oceanside City Hall	6 – 8:30 p.m.
Thursday, May 21	South County	Casa Familiar	6 – 8:30 p.m.
Wednesday, May 27	Mid-City / South East	Jacobs Center	6 – 8:30 p.m.
Thursday, May 28	Central	UTC Forum Hall	6 – 8:30 p.m.

The seven workshops followed the same format, which included a video and informative SANDAG staff presentation of the Regional Plan, a panel discussion (including panelists from local communities) about the merits of the Plan, and a Q&A session with the attendees. The second half of each workshop consisted of an open-house during which participants were invited to review maps, displays, and information; ask questions of staff; complete comment cards; and/or speak to a bilingual English/Spanish transcriber to have their comments recorded. Spanish translators were available at every workshop and on May 21 at Casa Familiar, the workshop was conducted entirely in Spanish with English translations made available. Additionally, the workshops at Caltrans District 11, Casa Familiar, and the Jacobs Center streamed live on the internet via the San Diego Forward website and the videos were later uploaded to SANDAG's Youtube channel. Every panel discussion was transcribed and is available as part of Attachment 5A. In total, more than 350 people attended the May 2015 workshops in person and the live-streamed videos have been viewed collectively more than 380 times.

Public Hearings

Draft 2015 San Diego Forward: The Regional Plan Public Hearings

Date	Location	Venue	Time
Friday, June 12	Central	SANDAG	10 a.m.
Thursday, June 18	North County Coastal	North County Transit District	11:30 a.m.

In June 2015, two public hearings were officiated by a designated public meeting officer and provided the public with an additional opportunity to submit comments on the Draft Regional Plan and the Draft EIR. During the hearing, attendees could complete comment cards or speak directly to the SANDAG Board, which was transcribed by a court reporter and included in Attachment 5A.

Public Comment Period for the Draft Regional Plan and the Draft EIR

The public comment period for the Draft Regional Plan and Draft EIR opened on the day of their draft release and closed July 15, 2015, with the Draft Plan and SCS released on April 24, 2015 and the Draft EIR released on May 21, 2015. As previously mentioned, participants at the workshops and public hearings were afforded

a variety of means to submit comments on the Draft Regional Plan and the Draft EIR. Additionally, other means of submitting comments were provided during the public review period including the submission of comments via sdforward.com, directly through email at sdforward@sandag.org; via telephone at (619) 699-1934, toll free (877) 277-5736 and TTY (619) 699-1904, via fax at (619) 699-1905, and through the mail to ATTN: Regional Plan, 401 B Street, Suite 800, San Diego CA, 92101; and in person by dropping off written comments at SANDAG's offices at the address above.

All of the public comments on the Draft Regional Plan and the Draft EIR received during the comment period (including during the public workshops and public hearings) and the staff responses to each of those comments were presented to the Regional Planning Committee and Transportation Committee on September 4, 2015 and the Board of Directors on September 11, 2015. This comment matrix with staff responses is included in the Final Regional Plan (Attachment 12) and EIR, respectively.

Tracking the Public Outreach Activities for the Regional Plan

Public outreach activities, including meetings, presentations, community events, notices, and newsletters, were tracked and recorded to document the wide range of efforts that SANDAG employed to communicate with people throughout the region during the development of the Regional Plan. The following attachments are included at the end of this Appendix to capture the breadth of public outreach activities, in addition to

the workshops described above, conducted for this planning effort. The tribal consultation process for the Regional Plan was carried out in a parallel time frame, but it followed a government-to-government framework and is detailed in Appendix G: Tribal Consultation Process for San Diego Forward: Communication, Cooperation, and Coordination. All comments from Regional Plan related activities in 2012 through 2015 are included in Attachment 11.

- **Attachment 3:** Regional Plan Stakeholders List
- **Attachment 4A:** SANDAG San Diego Forward: The Regional Plan Presentations, Public Meetings, and Workshops
- **Attachment 4B:** Community Based Organization (CBO) Presentations, Public Meetings, and Workshops
- **Attachment 5A:** SANDAG Summaries from all Regional Plan Workshops and Public Hearings
- **Attachment 5B:** Community Based Organization (CBO) Workshop Summaries from all Regional Plan Workshops
- **Attachment 6:** San Diego Forward: The Regional Plan Public Involvement Efforts Regarding SB 375 Requirements
- **Attachment 7:** San Diego Forward: The Regional Plan Press Coverage
- **Attachment 8:** Regional Plan Press Releases, Advertisements, and Public Notices for Workshops and Public Hearings
- **Attachment 9:** Regional Plan Social Media and E-Blasts
- **Attachment 11:** 2012 through 2014 Comments on Regional Plan Development Process
- **Attachment 12:** 2015 Comments and Responses on Draft Regional Plan

Dedicated Website with Interactive Elements

SANDAG created a dedicated web page at sdforward.com for the Regional Plan. The website served as the information portal for all news, community events, and reports related to the plan, including the posting of the white papers. It also included various interactive elements, including a “word cloud” to promote more interactive engagement around the regional plan topics.

The screenshot shows the homepage of the San Diego Forward website. At the top left is the logo for "San Diego FORWARD The Regional Plan". To the right of the logo are navigation links: "About San Diego Forward", "Mobility Planning", "Environment/Communities", and "Economy/Jobs". Above these links is a search bar with the text "Google Custom Search" and a magnifying glass icon. Further up, there are links for "NEWSLETTER", "HELP", "FAQ", "SITE MAP", and "CONTACT".

The main content area features a large banner image divided into three sections: a green leaf on the left, a red train in a station in the middle, and a blue architectural structure on the right. Below the banner are four columns of content:

- WHAT IS SAN DIEGO FORWARD?**: A section with a diagram of a transportation network and text asking "What do we want our region to look like in 2050? Where will we live? How will we get around?". It includes a "What's New" section stating that the SANDAG Board of Directors has selected a preferred transportation network scenario.
- IN MOTION: PROJECT TIMELINE**: A horizontal timeline with years 2011, 2013, 2014, and 2015. A red arrow points to 2014, with the text "September 12 Board of Directors - Draft Scenario Recommendation" and "*Meetings Subject to Change".
- BE HEARD**: A section with a graphic of a road branching into three directions. Text states: "Thousands of San Diegans have participated so far through public workshops, attending hearings, and staying up-to-date on the latest developments. This feedback will continue to help guide the development of the plan." It also includes a thank you message: "Thanks to all of you who submitted comments on the Network Scenarios. Read what we heard."
- WHAT TO WATCH**: A section featuring a video player with a woman's face and a "Click to Play Video" button. Below the video is a "VIEW MORE VIDEOS" link.

The footer contains a "Select Language" dropdown menu, a "Home | Site Map | Privacy Policy | Legal | Accessibility" navigation bar, the SANDAG logo, a "SIGN UP FOR E-NEWS" button, and social media icons for Facebook, Twitter, and YouTube. Contact information for SANDAG is also provided: "SANDAG, 401 B Street, Suite 800, San Diego, CA 92101" and phone/fax numbers.

Regional Plan Videos

Several videos¹¹ were produced to engage viewers in the discussion about the region’s future plans for communities, transportation, employment, the economy, and the environment. The videos provide an overview of the work, strategies, forecasts, and public input that are serving as guides for the region’s vision through the year 2050.

- Five-minute video entitled “San Diego Forward Overview”
- One-and-a-half minute introductory video, entitled “Welcome to San Diego Forward?”
- One-minute video entitled “How We Will Grow”
- Two-minute video entitled “The Regional Plan: Our Changing Future”
- Three-and-a-half minute video entitled “San Diego Forward: The Regional Plan”
- Numerous man-on-the-street style videos of participants and Regional Plan public workshops

Public Opinion Survey

At the direction of the Board of Directors, SANDAG conducted a public opinion survey in March 2013. The goal of the survey was to gauge the top priorities of the region’s residents as SANDAG began the process of developing the San Diego Forward: Regional Plan.

SANDAG hired True North to conduct the survey. The 10-minute telephone interviews included nine questions, as well as screening and demographics inquiries. The survey process sought feedback from 1,500 respondents divided amongst six subregions in the county of San Diego.

The survey questions were divided into sections, with the first ascertaining a quick gauge of the respondent’s feelings about the overall quality of life in the region. The second section tested their broad priorities on a variety of issues that would be addressed in the Regional Plan, including: improving transportation; protecting

the environment; improving the economy; maintaining our existing Infrastructure; and setting land use policies that encourage smart growth. Further questions obtained more detailed opinions about each of those general areas.

The study employed a strategic oversample by planning area to balance the statistical margins of error associated with estimates at the planning area level. SANDAG used the survey results to stimulate additional public policy discussions and provide background data to use for developing the Regional Plan. The survey results are included as Attachment 10 to this appendix. Table F.2 includes results of the outreach through September 11, 2015.

Results of Public Outreach Efforts

The following table summarizes the public involvement achievements related to the preparation of the Regional Plan.

Table F.2

Measuring Outreach Performance for Draft San Diego Forward: The Regional Plan

Metric	Baseline – 2050 RTP/SCS	Goal for San Diego Forward	Progress to Date (September 11, 2015)
Public Workshops	Ten workshops	<ul style="list-style-type: none"> Increase number of public workshops by 10 percent 	<ul style="list-style-type: none"> 19 workshops conducted – This includes a kick-off workshop in October 2012; 7 workshops in May-July 2013; Evaluation Criteria workshops in August 2013; a Performance Measures workshop in November 2013; 2 Network Development workshops in August 2014; and 7 public outreach workshops on the Draft Regional Plan in May 2015.
Pre-document consultation	Not tracked	5,000 individual remarks	8,227 individual remarks
E-newsletter subscribers	1,050 subscribers	Increase subscribers by 15 percent	1,405 subscribers

Table F.2 (continued)

Measuring Outreach Performance for Draft San Diego Forward: The Regional Plan

Metric	Baseline – 2050 RTP/SCS	Goal for San Diego Forward	Progress to Date (September 11, 2015)
Opportunities for engagement	<ul style="list-style-type: none"> • Public workshops • Special topic/targeted workshops • Presentations to community groups • Public meetings (SANDAG Board, Policy Advisory Committees, working groups) • Draft documents available online 	<ul style="list-style-type: none"> • Increase modes of public engagement by 15 percent • Hold at least one bilingual workshop in English and Spanish 	<ul style="list-style-type: none"> • Public workshops with Spanish translation made available • Bilingual public workshops conducted in Spanish with English translation made available • Special topic/targeted workshops • Presentations to community groups • Public meetings (SANDAG Board, Policy Advisory Committees, working groups) • Draft documents available online • Online interactive activities sought input (word cloud, transportation network survey, online presentation tool, online comment cards, online videos) • Provided opportunity for interaction via social media (Facebook, Twitter) • Four policy workshops conducted simultaneously in English and Spanish and one policy workshop provided an Arabic translator; Three workshops streamed live via sdforward.com and archived online

Table F.2 (continued)

Measuring Outreach Performance for Draft San Diego Forward: The Regional Plan

Metric	Baseline – 2050 RTP/SCS	Goal for San Diego Forward	Progress to Date (September 11, 2015)
Web presence	<ul style="list-style-type: none"> RTP e-newsletter distributed (periodic and at key milestones) 1,005 average monthly unique page views per month on Sandag.org/2050RTP webpage 	<ul style="list-style-type: none"> Create dedicated project website Send e-newsletter bi-monthly Establish project presence on social media (SANDAG’s Facebook, Twitter, and YouTube pages) Provide three opportunities for comment/interaction on website Increase average monthly unique website page views by 10 percent during plan adoption period 	<ul style="list-style-type: none"> Created dedicated project website Sent eleven issues of e-newsletter Established project presence on social media (SANDAG’s Facebook, Twitter, and YouTube pages) Provided five opportunities for comment/interaction on website 1,404 average monthly unique page views on sdforward.com
Engaging low income, minority, and senior populations	Eight grants awarded to CBOs to conduct outreach within communities of concern	Increase outreach to low income, minority, and senior communities by 15 percent	A network of 14 CBOs from the most disadvantaged communities across the region contracted as part of the Communications team, brought on board from the moment the Public Involvement Plan was approved. Two-pronged scope: (a) engage, educate, and ensure the voice of their communities was heard throughout the process; (b) collaborated with staff on the social equity analysis of the Plan (c) held multi-lingual community workshops (in Spanish, Vietnamese, Arabic, and Tagalog)

Table F.2 (continued)

Measuring Outreach Performance for Draft San Diego Forward: The Regional Plan

Metric	Baseline – 2050 RTP/SCS	Goal for San Diego Forward	Progress to Date (September 11, 2015)
Partnerships	<ul style="list-style-type: none"> Stakeholders Working Group Review by economic stakeholders 	<ul style="list-style-type: none"> Form three new partnerships to address emerging issues 	<ul style="list-style-type: none"> Military Working Group Economic Stakeholder Outreach Public Health Stakeholders Working Group
Tribal Consultation	Prepare and implement Tribal Consultation Plan with Tribal governments, SCTCA, and SANDAG Board of Directors	Prepare and implement Tribal Consultation Plan with Tribal governments, SCTCA, and SANDAG Board of Directors	Prepared and implemented Tribal Consultation Plan with Tribal governments, SCTCA, and SANDAG Board of Directors (see Appendix G)

San Diego Forward: The Regional Plan

Public Involvement Plan

February 2013

BOARD OF DIRECTORS

The 18 cities and county government are SANDAG serving as the forum for regional decision-making. SANDAG builds consensus; plans, engineers, and builds public transit; makes strategic plans; obtains and allocates resources; and provides information on a broad range of topics pertinent to the region's quality of life.

CHAIR	FIRST VICE CHAIR	SECOND VICE CHAIR	EXECUTIVE DIRECTOR
<p>Hon. Jack Dale</p>	<p>Hon. Jim Janney</p>	<p>Hon. Don Higginson</p>	<p>Gary L. Gallegos</p>
<p>CITY OF CARLSBAD Hon. Matt Hall, Mayor (A) Hon. Farrah Douglas, Councilmember (A) Hon. Lorraine Wood, Councilmember</p>		<p>CITY OF SANTEE Hon. Jack Dale, Councilmember (A) Hon. John Minto, Vice Mayor (A) Hon. Rob McNelis, Councilmember</p>

1.0 INTRODUCTION

SANDAG is embarking on a program to involve the public in the development of a large-scale regional plan, an overarching document that will merge and update two of the agency's most important regional policy documents: the Regional Comprehensive Plan (RCP), adopted in 2004; and the 2050 Regional Transportation Plan and Sustainable Communities Strategy (RTP/SCS), adopted in 2011. The new regional plan – San Diego Forward: The Regional Plan – is scheduled to be adopted in 2015. It will provide a blueprint for the growth and development of the San Diego region, focusing on issues affecting our quality of life and environment over the decades to come.

This Public Involvement Plan (PIP) is intended to support the development of San Diego Forward: The Regional Plan, creating a variety of opportunities for individuals, organizations, agencies, and other stakeholders to provide meaningful input. The PIP has been created based on input obtained throughout the fall of 2012 from the SANDAG Board of Directors, Policy Advisory Committees, working groups, surveys, and a public workshop held in October 2012. The PIP was drafted using the guidelines provided by the agency's overall Public Participation Plan (PPP), which provides the foundation for specific public outreach approaches which were developed to support individual projects and programs. The PIP describes efforts that SANDAG will undertake to secure input on: developing sustainability and land use goals; priorities for transportation projects, programs, and services; transportation networks; infrastructure recommendations; funding alternatives; policies and programs; performance measures; greenhouse gas (GHG) emissions targets; and other related issues.

Implementation of this Public Involvement Plan will accomplish the following:

- Provide a road map to ensure that all interested stakeholders are given the chance to participate in the process
- Reach beyond traditional methods to encourage participation from a wide variety of members of the public
- Communicate the importance of the plan and the opportunities to participate in the process
- Educate the public about SANDAG and its role in the region
- Establish the new regional plan as a critical policy document helping to balance our future housing, jobs, land use, transportation, health, social equity, economic, and environmental sustainability needs

This PIP is intended to be a living document. Because of the fluid nature of public participation, this plan may be updated at major milestones and adjusted in response to issues and circumstances that arise throughout the planning process.

1.1 Background

1.1.1 Regional Comprehensive Plan

The SANDAG Board of Directors adopted the Regional Comprehensive Plan (RCP) in 2004. It serves as the long-term planning framework for the San Diego region. It provides a broad context in which local and regional land use decisions can be made, encouraging the region to move toward smart growth and a sustainable future. The RCP lays out a vision, long-term goals, and recommended

actions for the region. Because each individual jurisdiction is responsible for making its own decisions on planning and land use, SANDAG analyzed jurisdictional plans, assessed their collective effects, and examined overall trends to create the RCP, laying out a sustainable blueprint for regional growth and the protection of our quality of life. The RCP contains an incentive-based approach to encourage and channel growth into existing and future urban areas and smart growth communities, as well as promote sustainable development.

1.1.2 Regional Transportation Plan/Sustainable Communities Strategy

The RTP/SCS is the blueprint for a regional transportation system that enhances quality of life, promotes sustainability, and offers more mobility choices for people and goods. SANDAG is required under federal law to update the RTP every four years. The most recent update, adopted in 2011, produced the 2050 RTP/SCS. It was the first RTP in the state of California to include an SCS, as required by California Senate Bill 375 (Steinberg, 2008) (SB 375). SB 375 took effect in 2009, and is intended to combat climate change by linking transportation and land use planning to GHG reduction targets for cars and light trucks. SB 375 required the San Diego region to cut 7 percent of per capita emissions from cars and light trucks by 2020, and 13 percent by 2035 (from a 2005 baseline). The SCS outlines how the region will meet or exceed its GHG reduction targets by creating more compact, walkable, bike-friendly, transit-oriented communities, preserving important habitat and agricultural areas, and promoting a variety of transportation demand management and system management tools and techniques to maximize the efficiency of the transportation network.

1.2 Current Status and Future Planning Effort

In the past, the RCP and the RTP/SCS were developed as two separate documents that were scheduled to be updated on two different schedules. The data in the current RCP is about a decade old and conditions have changed significantly since it was approved. The RCP does not reflect the changes in the region that have occurred in the interim, such as the economic downturn, loss of funding for redevelopment, and a stronger emphasis on public health and social equity in the SANDAG planning process. Additionally, the current RCP does not address new climate legislation such as Assembly Bill 32 and SB 375.

In anticipation of updating the RCP, SANDAG conducted a scoping process in late 2011 and early 2012. Input was sought from the SANDAG Board of Directors, SANDAG Regional Planning Committee, Regional Planning Technical Working Group, community-based organizations (CBOs), other metropolitan planning organizations, and various stakeholders to prepare for the anticipated update of the RCP. Input from those meetings revealed an opportunity to merge the region's two primary planning documents. In May 2012, the SANDAG Board of Directors decided to combine the RCP and RTP/SCS into one comprehensive planning document for the region.

The goal of combining the RCP and RTP/SCS is to create one clearly defined, overarching regional planning document for the region. San Diego Forward: The regional plan will address planning and land use objectives contained in the RCP; identify transportation priorities and infrastructure policies that will support and encourage the regional economy, equity, and environmental goals; and meet statewide GHG emissions reduction requirements per SB 375. This consolidated new regional plan will offer SANDAG the opportunity to more effectively communicate an overall regional vision, as well as reaffirm the inextricable link between transportation and land use planning in implementing that vision.

2.0 PUBLIC INVOLVEMENT PLAN STRATEGIES AND IMPLEMENTATION TECHNIQUES

This PIP establishes the framework for a dynamic and interactive process to develop and seek input on the regional plan. What follows includes a menu of strategies and techniques that may be used in the public outreach process for the regional plan.

2.1 Stakeholder Categories

The following is a list of stakeholder categories specified in SB 375 that SANDAG will seek to involve in the development of the regional plan. In addition, see Appendix B for a partial list of individuals and organizations previously identified as interested in the regional plan development process. That list will be updated throughout the implementation of the PIP.

- Affordable Housing Advocates
- Broad-Based Business Organizations
- Commercial Property Interests
- Congestion Management Agencies
- Environmental Advocates
- Home Builder Representatives
- Homeowner Associations
- Landowners
- Neighborhood and Community Groups
- Transportation Agencies
- Transportation Advocates
- Transportation Commissions

2.2 Public Involvement Plan Objectives

The primary goal of the PIP for San Diego Forward: The Regional Plan is to engage a broad and diverse cross-section of the San Diego region in the development of the plan. Obtaining this input is critical to creating a plan that reflects the varied needs and interests of San Diego County's residents and businesses.

The objectives of the PIP are as follows:

- Raise awareness of the plan as the region's updated blueprint that will guide the way as our region grows in the next 35 years
- Gain input from a broad range of individuals, organizations, agencies, and local governments throughout the regional plan development and decision-making process
- Make proactive efforts to involve communities and members of the public that have traditionally not participated in public planning efforts

- Meet or exceed local, state, and federal guidelines and requirements for public involvement in the development of the regional plan
- Create an inclusive process that leads to broad support for policies, projects, and programs outlined in the regional plan

2.3 Public Involvement Plan Strategies

The following strategies will be implemented to achieve the objectives identified above:

- Create a recognizable brand for San Diego Forward: The Regional Plan that resonates with the public
- Provide timely and accessible public information about the regional plan to a broad range of regional stakeholders
- Make public information accessible in a variety of formats and languages, use easy-to-understand language and concepts, and use a variety of media, including innovative visualization techniques
- Provide a variety of opportunities for the public to be involved, and use technology to reach stakeholders who may not be inclined to participate in traditional outreach methods
- Widely promote opportunities for public input to reach a broad and diverse audience
- Communicate the decision-making process to stakeholders and indicate how their input is utilized in the development of the plan
- Document and address public comments received during the public involvement process
- Disseminate information to related agencies, metropolitan planning organizations, and engaged sectors throughout the state of California and the nation
- Assess the effectiveness of the PIP at key milestones (i.e., following workshops or release of draft documents) to evaluate how the strategies and tactics worked and what enhancements could be made for future phases

2.4 Public Involvement Plan Techniques and Activities

The PIP proposes six main approaches for implementing the strategies above in coordination with key milestones in the development of the regional plan:

- Research (focus groups, public opinion surveys)
- Public information (written materials, website, e-newsletters, public notices, presentations)
- Face-to-face interactions (SANDAG Board and committee meetings, briefings, small group meetings, community events, public workshops)
- Partnership network with CBOs (low income and minority communities)
- Web-based interactive communications (website, social media, e-newsletters, Internet-based surveys, “virtual” public workshops, visualizations)
- Media (earned media, media partnerships, paid media)

2.4.1 Research

In order to gauge public knowledge and opinion about issues related to regional planning, focus groups and a public opinion survey may be conducted at the outset of the public involvement program. This research could help identify key topics and the most effective means of public engagement. Additional focus groups and a survey may be conducted at the mid-point of the planning process to determine the effectiveness of the outreach effort and identify opportunities for improvement. The information gained from this research could help SANDAG make adjustments, as needed, to optimize the outreach effort and inform future outreach processes.

2.4.2 Public Information

SANDAG will create and distribute clear, concise, and engaging information to support public involvement efforts. These materials will have a consistent look and feel, reflecting the branding developed for the plan.

Below is a menu of materials that may be used to provide information about the plan and its components; the development process; why this process is relevant to the region's residents; and information about how, when, and why stakeholders should get involved. All materials will be written in easy-to-understand terms with limited jargon, and will be provided in a variety of languages and formats as needed. Materials will be distributed via a range of channels, including electronically (e-mail and website); at presentations, meetings, and events; at community locations (libraries, recreation centers, senior centers, and stores); and in the media (notices and advertisements). Materials will be updated as needed throughout the process.

- *Project fact sheet*: Basic information about the regional plan, its components, purpose, timeline, and information on how to get involved. (Translated into Spanish, Tagalog, Vietnamese, and Chinese.)
- *Project brochure*: Engaging images, a summary of opportunities for public involvement, key messages, and basic information about the regional plan and its timeline. (Translated into Spanish, Tagalog, Vietnamese, and Chinese.)
- *Interactive website*: The primary portal for public information about the regional plan, incorporating interactive elements to provide opportunities for broad participation. SANDAG will explore the possibility of adding direct links to audio recordings of key meetings, as well as creating and posting videos of public workshops.
- *Regional plan videos*: A series of short (+/- 3 minutes) videos explaining the importance of the plan to the region's future, why it is relevant to the everyday lives of residents, and how public input will help shape the plan.
- *E-newsletter*: E-newsletter reporting progress, encouraging participation, and providing information about opportunities for participation.
- *Multimedia presentation*: An interactive and engaging presentation for speakers bureau opportunities, intended to explain and draw people into the planning process, encouraging individuals and organizations to get involved.

- *Community event booth*: An engaging and interactive opportunity at community events for members of the public to learn about, give feedback on, and engage in the process of developing the regional plan.
- *Media kit (print and online versions)*: Key background information for the media to encourage accurate and balanced reporting.
- *Public notices*: Notices for public meetings and opportunities for public comment published via media outlets, advertisements, and printed materials. (All public notices translated into Spanish, Tagalog, Vietnamese, and Chinese.)
- *Frequently Asked Questions*: Addressing the most common questions about the plan and its components.
- *Phone line and e-mail address*: A dedicated phone line and e-mail account, providing easy methods for the public to make comments and ask questions.
- *Rider Alerts*: Featuring information and soliciting feedback about the regional plan from transit riders.

2.4.3 Face-to-Face Interactions

A number of public involvement efforts will be conducted creating opportunities for SANDAG to interact directly with stakeholders in a variety of formats. In addition to conducting initial public outreach activities (listed in the first section below), SANDAG may draw from a menu of techniques (listed in the second section below) to share information with stakeholders and seek their involvement in the process. Translation services will be provided as needed for presentations, public workshops, and events.

SANDAG will conduct the following public outreach activities:

- *Presentations to SANDAG Board, Policy Advisory Committees, and Working Groups*
Presentations to the SANDAG Board, Policy Advisory Committees, and Working Groups throughout the process will provide updates on plan development, share input received from the public, and receive policy direction. These meetings are open to the public and provide ongoing opportunities for discussion and input at multiple stages of the planning process. A wide variety of public stakeholders sit on numerous SANDAG working groups, which range in topic area from energy, to disabled access, to housing, to environmental preservation, and bicycles- and pedestrian-related issues.
- *Stakeholder Interviews/Briefings*
SANDAG staff will conduct informal interviews/briefings with key stakeholders. These interviews/briefings provide an opportunity to share information about the plan and its purpose, as well as seek input about how stakeholder groups would like to be involved in the process and what public involvement strategies are the most effective with their respective constituencies.

- *Speakers Bureau*
Staff will engage in a proactive effort to offer presentations about the plan to a variety of organizations throughout the region. These groups may include community planning groups, chambers of commerce, environmental organizations, transportation advocacy groups, community collaboratives, CBOs, ethnic organizations, civic organizations, trade organizations, professional organizations, and others. The purpose of these presentations is to educate the public about the planning process, receive public input, and promote opportunities for public involvement.
- *Public Workshops/Open Houses*
SANDAG will conduct public workshops/open houses at important milestones during the plan development to solicit input. Online/interactive versions of these public workshops also may be made available. At least one workshop will be conducted in conjunction with the agency's Baja California counterparts in coordination with the SANDAG Borders Committee and the Committee on Binational Regional Opportunities (COBRO). In addition, a Tribal Summit and tribal consultation activities will be held as part of the development of the regional plan, as described in Section 3.
- *Presentations to City Councils, the County Board of Supervisors, and Planning Commissions*
SANDAG staff will be available to make presentations to local city councils, the Board of Supervisors, planning commissions, and other planning-related organizations.

In addition, SANDAG may pursue a variety of other public outreach opportunities, possibly including some of those listed below, or others not yet determined:

- *Stakeholder Discussion Sessions on Rotating Topics*
In order to provide an opportunity for regular interaction with key stakeholders (those who will actively and frequently seek to participate), SANDAG may host regular "stakeholder discussion sessions" addressing various topics and sections of the plan at key milestones during the process. The purpose of these discussion sessions would be to seek high-level input from those who are knowledgeable about the planning process and have specific interests in the plan. While a list of key stakeholders would be developed, these meetings would be open to the public and participants would not be required to attend every meeting. Meeting topics would be determined ahead of time and promoted to the public.
- *Participation in Community Events*
A mobile project information booth may be created for use at community events and trade shows. The booth would be eye-catching and incorporate branding developed for the project. Project information would be available, as well as interactive opportunities for public input. For example, an educational project video could run on a loop to provide background information about the planning process, and participants could be provided an opportunity to share their input via an online survey or game using computers at the booth. Events targeting low-income and minority communities would be included to ensure proactive outreach to these audiences.
- *Subregional Liaisons*
SANDAG staff may be assigned to staff subregional areas on a regular basis to develop or build upon relationships and establish a regular SANDAG presence in the community. These staff members would keep their communities informed of the development of the regional plan and encourage those communities to participate in the process. Staff assigned to a particular area would be responsible for:

- Developing relationships with community leaders
 - Attending planning and community group meetings
 - Engaging with business organizations
 - Presenting to civic organizations (i.e., Rotary and Kiwanis clubs)
 - Maintaining regular contact with key jurisdictional staff
 - Coordinating presentations to city councils, planning commissions, and other planning groups
 - Identifying opportunities for community events and speakers bureau presentations
- *Facilitated Outreach*
SANDAG may create a program to engage various organizations in facilitated discussions regarding the regional plan. SANDAG would make participation in the program available to organizations throughout the region (such as planning groups, business organizations, service groups, professional organizations, advocacy groups, etc.). A SANDAG facilitator or staff members would attend meetings of each organization multiple times (at the beginning, middle, and end of the plan development process) to discuss various aspects of the regional plan and draw out specific feedback. That feedback would be documented and its influence tracked as the plan is developed. These sessions also would serve to educate individuals throughout the community about the regional plan, creating a large secondary group of knowledgeable people and organizations able to disseminate information about the regional plan throughout the process, as well as encourage further public involvement.
 - *Outreach to Major Employers and Their Employees*
SANDAG may develop and implement an outreach effort aimed at reaching the region's major employment sectors. "Lunch & Learn" sessions would be scheduled to speak directly to the region's employees and solicit their input. These informative presentations would provide opportunities for the region's businesspeople and their employees to learn about the regional plan on a lunch break and provide input to SANDAG. Employers from the region's major employment sectors will be targeted (i.e., hospitals, manufacturing, service industry, biotech, military, etc.).
 - *Outreach to/through Local Colleges, Universities, and the Region's Youth*
SANDAG may tap into local institutions of higher education to involve youth, either directly or through already existing school classes and programs.

2.4.4 Community-Based Partnership Network

Community collaboratives act as forums for local institutions such as churches, schools, health clinics, ethnic groups, and others to discuss issues of common concern. Due to their convening capacities, community collaboratives are critical to the ability of SANDAG to reach out to underrepresented populations who might not otherwise become involved in the process. Collaboratives provide a culturally relevant structure for developing local protocols, crossing language barriers, and structuring meetings. When members of a collaborative begin to make connections between their local concerns and regional planning efforts, they can begin to understand regional planning in a way that is relevant and meaningful to their communities and convey their input into the regional planning process.

To help ensure diverse and direct input into the regional plan, SANDAG will continue and broaden its partnership network with CBOs and collaboratives in critical communities of concern. Through competitive contracts awarded by SANDAG, CBOs will be provided with resources to engage their communities in the planning process and tasked with implementing outreach programs appropriate to their community context. The primary goal of the Community-Based Partnership Grant program is to engage and encourage diverse, inclusive, and active public participation from stakeholders in specific communities who traditionally may not have been involved in regional public policy planning processes (e.g., low-income, seniors, minorities, persons with disabilities, and other identified populations). Approximately ten CBOs will form the Community-based Partnership Network, working closely with SANDAG staff on the development of involvement techniques in coordination with other agency public involvement activities being undertaken to help prepare the regional plan.

2.4.5 Web-Based Interactive Communications

SANDAG will take advantage of a variety of web-based opportunities to provide information and solicit public involvement in the plan development process. Initial activities will include those listed in the first section below. In addition, SANDAG may draw from a menu of additional web-based opportunities (listed in the second section below) for the public to engage in the planning process and provide input. Online opportunities will be translated into additional languages as needed.

SANDAG will conduct the following web-based public outreach activities:

- *Regional Plan Web site*
The Regional Plan Web site will be the primary portal for all public information about the project. It will include project information, downloadable public information materials, and electronic versions of project documents. The public will have the opportunity to submit comments through the Web site, take online surveys, and sign up for the e-newsletter. Online regional plan social media also will be linked to the Web site.
- *E-mail Updates*
SANDAG will send regular e-mail updates to a list of all interested stakeholders, informing them about the ongoing process, upcoming meetings and milestones, and opportunities to take part in the development of the plan.
- *Social Media*
Regional plan pages on Facebook, Twitter, Pinterest, and YouTube will be created to provide information to stakeholders and to receive comments. The regional plan YouTube channel will include project videos, TV news coverage about the plan and public involvement process, and videos of public meetings (if available). Twitter can be used by the public to submit comments and ideas that SANDAG can keep track of through the use of hashtags. Facebook can be used for more content-rich posts and to promote events and opportunities for public involvement. The Pinterest page will be a place to share visual inspiration and ideas for San Diego's future.
- *Visualizations*
The project team will create visualizations to assist in the planning process, as well as to make the concepts explored in the plan more accessible and easier to understand for the general public. Those visualizations will be placed on the Web site.

In addition, SANDAG may pursue a variety of other web-based public outreach opportunities, possibly including some of those listed below, or others not yet determined:

- *E-newsletter*
A regular e-newsletter to stakeholders who opt into the regional plan interest list could include project updates, promote opportunities for public involvement, provide a calendar of upcoming events, and feature links to the online survey and social media.
- *Web surveys*
SANDAG may develop a series of electronic surveys that could be taken via the Web site. These surveys will be posted on the Web site throughout the plan development process. While not scientific, these surveys could provide an interactive way for the public to share opinions and give SANDAG a “snapshot” of what visitors to the Web site are interested in. The surveys could be linked to e-newsletters, promoted in written materials and via the media, and used as an interactive experience at community events.
- *Virtual Public Workshops*
Public workshops and open houses will be conducted at key milestones in the process to provide information and seek input. Some members of the public may not be able to attend the workshops in person or may prefer to participate in a different way. Therefore, online public workshops may be offered via The Regional Plan Web site. These virtual workshops will be available for a finite time (e.g., during the public comment period for the environmental document), and comments submitted would become part of the public record. Participants would be provided with project information via video, online versions of handouts and graphics, and/or online presentations. A user-friendly online system for submitting comments would be developed to make the process as simple as possible for stakeholders who wish to utilize this feature.

2.4.6 Media

SANDAG will utilize print, broadcast, and online media to communicate information to a broad audience and promote opportunities for the public to get involved.

- *Reporter Briefings*
SANDAG will host briefings for reporters covering the regional plan development process to inform them of the plan and its purpose, and ensure they are made aware of the various efforts to engage the public in the plan’s development.
- *Distribute regular press releases/media alerts to local and regional media*
To promote awareness among the media and foster accurate news coverage, press releases and agenda information will be distributed to local and regional media outlets, including print, broadcast, and online media. Reporters will be kept updated on the development and key milestones of the regional plan. A media list is included as Appendix A.
- *Press Conferences/Media Availability*
SANDAG will coordinate press conferences and media availability opportunities as needed. Press conferences will be convened to promote unique and newsworthy milestones and events. Media availability of SANDAG officials will be coordinated after key decision-making milestones.

- *Pursue Editorial Opportunities*
SANDAG will seek opportunities to submit editorial comment about the regional plan at milestones throughout the plan development process. For example, an op-ed authored by the chair of the SANDAG Board may be submitted at the launch of the public involvement process to emphasize the importance of public input in the development of the plan.
- *Paid Media*
When appropriate, SANDAG will utilize paid media to promote the planning process and opportunities for public engagement. This may include print advertising, public service announcements on broadcast media, and online advertising that links back to the Regional Plan Web site. Paid media buys will be leveraged for additional coverage whenever possible.
- *Cultivate a Media Partnership*
SANDAG will explore the possibility of cultivating a media partnership with a local news outlet. This partnership may include exclusive content for the outlet, joint promotions of events and involvement opportunities, and paid media opportunities.
- *Utilize SANDAG Board Members as Media Ambassadors*
SANDAG will work with Board members to serve as media ambassadors for the regional plan. Board members may be asked to discuss the regional plan in media interviews, on morning TV and radio shows, and author editorial commentary.
- *Outreach via Trade Publications and Stakeholder Newsletters*
SANDAG will work to place articles about the regional plan, its development, its content, etc., in related trade publications locally, as well as statewide and nationally. SANDAG also will seek to place notices and articles in the newsletters and other communications of various interested stakeholders, including civic organizations, advocacy groups, as well as business and professional organizations.

3.0 SOCIAL EQUITY, ENVIRONMENTAL JUSTICE, AND COORDINATION WITH OTHER AGENCIES/GOVERNMENTS

3.1 Social Equity and Environmental Justice

Roads, freeways, and other transportation infrastructure can have a significant effect on the quality of life for a region's residents by shaping access to housing, jobs, services, and recreational opportunities. Achieving social equity and environmental justice in the context of creating a comprehensive plan for the region is a major goal of SANDAG. It requires making investments that provide all residents, regardless of age, race, color, national origin, income, or physical ability, with opportunities to work, shop, study, be healthy, and play. Without proper planning and development, transportation systems can degrade the quality of life in communities. In addition, the construction of roads, freeways, and rail transit systems has sometimes placed health burdens on many lower-income and minority communities. At times, new transportation projects have physically divided communities or impacted access to community services, resulting in long-lasting social and economic costs. It is important to understand the impacts of transportation and other infrastructure investments on our most vulnerable communities in order to better plan for the future. For these reasons, environmental justice principles and social equity goals will be an important consideration in the regional plan development process. Promoting social equity and environmental justice in regional planning efforts requires involvement from a wide variety of communities and stakeholders.

The regional plan PIP incorporates a number of techniques for SANDAG to reach low-income and minority groups and others that may face challenges participating in the planning process (such as non-English speakers, individuals with disabilities, and the elderly) to ensure that benefits and burdens are distributed equitably in the region. These techniques include multilingual outreach, public participation conducted in collaboration with community-based partner organizations, and community planning events that will reach out to communities with high concentrations of low-income or minority residents. SANDAG also will target organizations and media outlets representing these communities in order to provide regional plan information, solicit participation and input, and provide a means for communicating with members of these communities. Lists of these organizations and media outlets are included in the media list (Appendix A) and stakeholders list (Appendix B), and will be supplemented while the regional plan is under development based on requests from the public and SANDAG awareness of organizations that should be included.

The PIP complies with SANDAG Board Policy No. 025, Title VI of the federal Civil Rights Act of 1964 (42 U.S.C. 2000d), the Americans with Disabilities Act (as defined in Title 49, Part 37, of the United States Code), Executive Order 12898 on Environmental Justice, Executive Order 13166 on Limited English Proficiency, and other relevant laws and guidance to ensure consideration of social equity, environmental justice, and accessibility. SANDAG is committed to ensuring that no person is excluded from participation in, denied the benefits of, or discriminated against under its projects, programs or activities on the basis of race, color, creed, national origin, sex, age, or disability as provided in state and federal law.

Consistent with U.S. Department of Transportation guidance, SANDAG has developed a Language Assistance Plan (LAP) in order to ensure meaningful input opportunities for persons with limited English proficiency. The SANDAG LAP is available on the SANDAG Web site and calls for SANDAG to translate certain vital documents such as public notices into Spanish. SANDAG may, at its discretion, translate documents into additional languages if the nature of the document and the character of the document's target audience justify additional translation. The LAP provides further guidance for serving limited English-speaking populations.

3.2 Tribal Consultation

SANDAG has implemented a government-to-government framework with the tribal nations in the region based on consultation, cooperation, and collaboration. Tribal nations now have a voice in the decision-making process in regional planning. Through the structure in place which is outlined in the SANDAG PPP, a Tribal Consultation Plan for the regional plan has been developed (attached as Appendix C). Ideas were first formulated at a collaborative staff level between the Southern California Tribal Chairmen's Association (SCTCA) and SANDAG. Various outlines for a possible plan were presented to the tribal leaders in the region at a special workshop in fall 2012. The tribal leadership discussed the options, drew on their own experiences in other consultation processes, and developed a consultation plan that meets their needs. The plan includes: a set of information sessions to clarify the current RCP and 2050 RTP/SCS elements to the tribes, a survey to all tribal nations on the issues of importance to them, a set of policy workshops on the resulting priority areas, the development of a position paper that outlines the tribal perspective on regional issues based on the results of the workshops, and a Regional Tribal Summit between the SANDAG and SCTCA Boards to determine areas of cooperation and concern. The Interagency Technical Working Group on Tribal Transportation Issues will provide direct input at key stages of the transportation

planning process. It also will provide recommendations to the SCTCA, which will, in turn, provide its input to the SANDAG Transportation Committee for inclusion in the regional plan.

3.3 Coordination with Mexico

SANDAG will coordinate with Mexico through the SANDAG Board of Directors, the Borders Committee, the Transportation Committee, and COBRO, as well as other groups conducting binational work and groups and organizations based in Mexico. SANDAG will engage these groups and conduct other outreach efforts, as needed, to include joint U.S.-Mexico planning collaboration. Some of these efforts will be conducted in Spanish and/or simultaneous translation services will be made available.

3.4 Coordination with California Metropolitan Planning Organizations, Air Quality, and Regional Transportation Planning Agencies

SANDAG will collaborate and exchange information with the Southern California Association of Governments, other metropolitan planning organizations, and regional transportation planning agencies, as well as the California Air Resources Board, on the GHG emission reduction target-setting process and other SB 375 efforts. SANDAG will carry out air quality planning mandates in cooperation with the San Diego County Air Pollution Control District, including conducting interagency consultation for air quality conformity. In addition, SANDAG will coordinate with member agencies and other local governments to disseminate information about the plan development process and encourage public participation.

4.0 PUBLIC INVOLVEMENT PLAN ASSESSMENT

To assess the effectiveness of the regional plan PIP, SANDAG will analyze the results of public involvement efforts conducted at key milestones in the plan development process. These reviews will help SANDAG evaluate public involvement strategies and techniques, and make adjustments as needed. These reviews will include:

- A summary of all outreach efforts and input received
- A qualitative assessment of how effective the efforts to obtain input were (i.e., audiences or stakeholders reached, the type of input provided by the stakeholders needed for development of the regional plan, etc.)
- A quantitative assessment of the public involvement plan, including the number of meetings/presentations/events participated in, website hits, number of survey responses, approximate number of people reached, number of comments received, and number of media contacts/amount of media coverage

5.0 CONNECT WITH SANDAG

SANDAG is committed to a public involvement plan that includes opportunities for interaction with the Board of Directors, other elected officials, local planning and public works directors, business, community, and education leaders, other key stakeholders, and the general public. Public workshops, meetings, and other outreach efforts provide forums for input and feedback on SANDAG policy, program, project, and funding decisions.

Contact Our Public Information Office

The Public Information Office is open 8 a.m. to 5 p.m., Monday through Friday. You can reach the Public Information Officer by phone at (619) 699-1950, by e-mail at pio@sandag.org, or by visiting the SANDAG Public Information Office at 401 B Street, Suite 800, San Diego, CA 92101.

Get on Our Contact Lists

SANDAG maintains e-mail and mailing lists so we can provide information to those who request it. Contact SANDAG at pio@sandag.org or (619) 699-1950 and let us know when you want to hear from us.

Visit SANDAG.org

The comprehensive SANDAG Web site is your resource for regional information, project updates, meeting schedules and agendas, and reports and other publications. SANDAG periodically posts surveys and promotes opportunities for online input.

View Our Calendar

Visit sandag.org/calendar for a comprehensive monthly calendar of all Board of Directors and Policy Advisory Committee meetings, working group meetings, ad hoc meetings, public workshops, and more. These meetings are open to the public and agendas are typically posted seven days in advance of the meeting.

Listen Live to SANDAG Meetings

Most SANDAG Board and Policy Advisory Committee meetings are broadcast via a live audio stream on the sandag.org home page. For a complete list of meetings, dates, times, and agendas, visit sandag.org/meetings.

Sign Up to Receive rEgion

To subscribe to rEgion, the SANDAG free monthly e-newsletter, go to sandag.org and enter a valid e-mail address in the box at the bottom left corner of the page. Each month you will receive information to keep you updated on what's happening in the San Diego region with regard to transportation planning and construction, environmental management, housing, open space, growth, energy, criminal justice, binational topics, and more. To read the latest edition of rEgion, visit sandag.org/region.

Connect with Us Through Social Media

Stay informed and get involved in the region's decision-making process. Find us on Facebook at SANDAGRegion, follow us on Twitter @SANDAG, and subscribe to our YouTube channel at SANDAGRegion.

APPENDIX B: Regional Plan Stakeholders List

This list is intended to give a general sense of the stakeholders SANDAG will seek to involve in the process of developing the regional plan. The list includes individuals and organizations that expressed interest during the initial outreach process that SANDAG conducted to inform the writing of this PIP, as well as those involved in the development of the 2050 Regional Transportation Plan and other outreach efforts SANDAG has conducted. This list should be considered partial, and it will grow and evolve over time. Any additional stakeholders identified during the process that may be interested in the regional plan will be added to this list.

APPENDIX C:
SANDAG REGIONAL PLAN
TRIBAL CONSULTATION PLAN

1. Tribal Conference on RCP/2050 RTP/SCS

- Convene an informational conference on the content of the Regional Comprehensive Plan (RCP) and the 2050 Regional Transportation Plan (RTP) for all of the tribal nations in the region;
- The purpose of this conference would be to provide tribes in the region an opportunity to become familiar with what is in the existing plans and understand how the region views the role of tribes;
- Tribal nations would like to have available subject experts from SANDAG to cover their area of expertise and answer questions.

2. Survey on Tribal Policy Issues and Planning

- Based on discussions at the conference, staff from SCTCA and SANDAG will develop a survey to distribute to all tribal nations on potential policy areas to discuss for the development of the Regional Plan, including transportation issues;
- Survey instrument will be taken to the SCTCA Board for approval;
- Survey will be distributed to Tribal Offices and each tribe will determine how to gather the information from each tribe;
- Survey results will be collected and compiled for the SCTCA and Borders Committee to discuss.

3. Technical Workshops on Identified Policy Areas

- Based on the survey results, the SCTCA will determine as a board the type and number of meetings and workshops necessary to discuss the tribal perspective on policy areas of the Regional Plan;
- SANDAG and SCTCA staff will develop a schedule, based on recommendations from the SCTCA and Borders Committees;
- The structure and participants for these workshops will be determined by the SCTCA Board and each tribal nation. Some workshops may be among tribal leaders, while other will include tribal experts in a designated policy area, or both.

4. Tribal Transportation Working Group

- On a parallel track, the Working Group will work on the transportation elements of the Regional Plan;
 - The Working Group will provide input into the development of each stage of the Plan and provide guidance to the SCTCA Board and tribal nations;
 - At key decision-making points the Working Group will provide recommendations to the SCTCA for tribal consideration and relay this input to the Transportation Committee through their representation on that Policy Advisory Committee.
 - The Working Group will provide a forum for action related to the transportation issues in the Regional Plan, including the inclusion of Long Range Tribal Transportation Plans in the Regional Plan.
-

5. Develop Tribal Policy Paper for Regional Plan

- Based on the outcomes of the series of workshops, SANDAG/SCTCA staff prepare a policy paper on the tribal perspective for the Regional Plan;
- The paper will be taken to the SCTCA Board and Borders Committee for review and comment.
- Elements of the tribal policy paper will be incorporated into related areas of the Regional Plan.

6. Convene San Diego Regional Tribal Summit

- At a timely and meaningful moment in the process of developing the Regional Plan, the San Diego Regional Tribal Summit will be convened between the Boards of SANDAG and the SCTCA to discuss key policy issues for inclusion in the Regional Plan and a potential collaborative agenda.
 - The strategic actions agreed upon in the Summit will be included in the Regional Plan, as well as issues of concern to tribal nations.
-

Draft Regional Plan Public Involvement Plan (PIP) Comments and Responses

No.	Date	Form	Name/Agency	Comment	Response	Section
	1/22/13	Email	Erik Tilkemeier JKA Group	Identify and utilize informal communication networks in the San Diego region to engage the public	Social media, Web-based outreach, and the PIP's Community-Based Partnership Network (Section 2.4.4) are aimed at drawing in this larger audience.	Sections 2.4.4 and 2.4.5
	1/22/13	Email	Lynda Barbour , Director of Field Advocacy, American Cancer Society Cancer Action Network, Inc.	1 - Use lay health advisors to convene people who have not traditionally been involved. 2 – Add Public Health Stakeholders Working Group to stakeholders list 3 - Document and address public comments received during the public involvement process.	1 - The Community-Based Partnership Network (Section 2.4.4) will reach out to critical communities of concern. 2 – Language was added (Section 2.4.3) to include all SANDAG working groups. 3 – PIP (Section 2.3) calls for documenting and addressing public input.	Sections 2.3, 2.4.3 and 2.4.4
	1/24/13	Letter via email (See attached letter)	Jim Varnadore	1 – In paragraph 2.1, insert a second bullet saying: Agencies providing services to immigrant and refugee communities 2 – In paragraph 2.4, the fourth bullet should become the first bullet and should then be re-phrased as: Partnership network with Community Planning Groups, especially in areas with significant populations of low-income individuals or of individuals from racial or ethnic minorities. Community Planning Groups in turn should coordinate with community-based organizations. 3 – In paragraph 2.4.1, between the first and second sentences, insert: A stratified random selection will be used to assure that focus group members are chosen from and are representative of all areas of the region. Observing that many citizens, especially low-income citizens do not have electronic access, the public opinion survey will not be restricted to only electronic methods. 4 – In paragraph 2.4.2 and throughout the document, where lists of languages used to distribute information appear, they should include Somali.	1 – The Community-Based Partnership Network (Section 2.4.4) will reach out to immigrant and refugee communities. 2 – Community planning groups and committees are captured under section 2.4.3, under the heading “Presentations to City Councils, the County Board of Supervisors, and Planning Commissions,” and will be a target of the PIP’s outreach program. 3 – This level of detail will be addressed during implementation. 4 – Based on the SANDAG four factor analysis and Language Assistance Plan, Spanish was deemed to meet the language threshold. However, depending on the project and the needs of the surrounding community, translation may be provided in other languages on a case-by-case basis, including Somali. Details are provided in the SANDAG Language Assistance Plan, available online at: www.sandag.org/legal . 5 – See responses to 1 and 2 above. 6 – See response to 1 above. 7 – This level of detail will be addressed at implementation, with a variety of formats being used depending on the audiences and circumstances of public meetings. 8 – See response to 2 above. 9 – The PIP calls for the facilitated outreach program to be available to those interested in participating, including community planning groups.	Sections 2.4.3, 2.4.4, and Appendix B

No.	Date	Form	Name/Agency	Comment	Response	Section
				<p>5 – In paragraph 2.4.3: In the second public outreach bullet, the first sentence should be lengthened by adding: including planning groups, town councils, and other directly elected community bodies, and especially including agencies that provide services to immigrants and refugees.</p> <p>6 – In paragraph 2.4.3, in the third public outreach bullet between “ethnic organizations” and “civic organizations,” insert: agencies that provide services to immigrants and refugees.</p> <p>7 – In paragraph 2.4.3, the fourth public outreach bullet and throughout the document, delete “open house(s)” entirely. Duncan McFetridge, Cleveland National Forest Foundation letter dated 2/7/13

Elyse Lowe, Executive Director of Move San Diego letter dated 2/7/13

COMMENTS FROM JIM VARNADORE
1/24/13

Paragraph 2.1: Insert a second bullet, "• Agencies providing services to immigrant and refugee communities"

Paragraph 2.4: the fourth bullet should become the first bullet and should then be re-phrased as:

"• Partnership network with Community Planning Groups, especially in areas with significant populations of low-income individuals or of individuals from racial or ethnic minorities. Community Planning Groups in turn should coordinate with community-based organizations."

Paragraph 2.4.1: Between the first and second sentences, insert:

"A stratified random selection will be used to assure that focus group members are chosen from and are representative of all areas of the region. Observing that many citizens, especially low-income citizens do not have electronic access, the public opinion survey will not be restricted to only electronic methods."

Paragraph 2.4.2 and throughout the document: Where appearing, lists of languages used to distribute information should include Somali.

Paragraph 2.4.3: In the second public outreach bullet, first sentence should be lengthened by adding "including planning groups, town councils, and other directly elected community bodies, and especially including agencies that provide services to immigrants and refugees".

Paragraph 2.4.3: In the third public outreach bullet between "ethnic organizations" and "civic organizations", insert "agencies that provide services to immigrants and refugees,".

Paragraph 2.4.3: The fourth public outreach bullet and throughout the document, delete "open house(s)" entirely. All public presentations should be done with an organized staff presentation to the attendees, with time for questions and answers. Open houses do not let citizens understand and appreciate the complexities of a document of this size and scope.

Paragraph 2.4.3: In the first bullet under other public outreach opportunities, the language should be changed to require notice to all Community Planning Groups, City and County. Planning groups are the chief advisory bodies on land use and transportation matters.

Paragraph 2.4.3: The fourth bullet, facilitated outreach, should be interpreted to emphasize input from planning groups, which are bodies whose members are elected by citizens at large to whom the planning groups are accountable and to de-emphasize input from advocacy groups, which are special interest organizations whose members are not elected by citizens at large and are not accountable to anyone.

Paragraph 2.4.4: I predict you'll be disappointed with what you get from collaboratives if, as it seems, you presume they have access to the specific groups you seek. My experience with them is different. You should not make a grant of money to any CBO(s) that cannot show proof that it has (they have) access to a group you seek, down to the names and contact addresses of individuals.

Paragraph 2.4.5: If you want to reach families with low-incomes, very low-incomes, or extremely low-incomes, electronic means are worthless. Electronic means reach only families of moderate or higher incomes.

Paragraph 2.4.6: If you want to reach ethnic communities, it will be well to provide their media with copy in the language(s) they serve. You should arrange translations yourself rather than rely on media staff to translate complex English language into other languages with smaller vocabularies. This caution affects all the bullets under this section.

Paragraph 4.0: This set of recommendations from me, that you're now reading, is a step in SANDAG's public involvement effort. It occurs at the very first outreach of the plan development process. I predict that nothing in this set of recommendations from me will appear in any assessment SANDAG makes of SANDAG's outreach efforts, nor will any recommendation here be adopted as a step toward a good public involvement plan.

Appendix-B: Some of the agencies you list no longer exist. Some of the agencies that do exist, that you should contact, are not shown in this appendix. A list of the City of San Diego's Community Planning Groups is at: www.sandiego.gov/planning/community/pdf/cpg/contactlist.pdf. I don't know where the County lists its planning committees.

San Diego, CA 92101

Re: Public Participation Process

We would first like to thank SANDAG for undertaking a public participation process “intended to support the development of the overarching regional plan, creating a variety of opportunities for individuals, organizations, agencies, and other stakeholders to provide meaningful input.” We very much appreciate the opportunity to comment at this early stage.

It should be noted at the outset, however, that with respect to welcoming public involvement in the planning process, perhaps the most well-informed and broad-based public input ever to be received by SANDAG finds no mention in the [January 2013 draft document](#)¹. I refer to the legal action brought against the 2050 SANDAG RTP/SCS EIR by the California Attorney General, Center for Biological Diversity, California Sierra Club and Cleveland National Forest Foundation. Also absent is any reference to the subsequent [validation of the lawsuit underpinnings by the San Diego Superior Court](#)².

The authority underlying these critically important legal documents, as well as the important and detailed planning information contained therein, cry out for the widest possible public dissemination and yet, nowhere do we find mention of them in the draft public involvement plan. Failure to share this valuable planning information or even to mention its existence at the very outset of a so-called public involvement campaign calls into question the intentions of SANDAG --- In other words, is it your goal to simply spread propaganda and deny the failure of the transportation plan that is a foundation of the Regional Plan? Or does SANDAG truly desire to educate and involve the public in this critical planning process? In short unless the educators are themselves willing to be educated by the facts and the evidence of their own planning failures

¹ http://www.sandag.org/uploads/projectid/projectid_428_15385.pdf

² <https://docs.google.com/file/d/0BxdvAym6vs17bHlqRnhGUkdONGc/edit>

and to SHARE that news with the public, it is difficult to avoid the conclusion that SANDAG is operating in bad faith with the public and risks their alienation and mistrust in lieu of their involvement.

Given this abject failure of disclosure, we strongly suggest that to maintain credibility and to promote agency transparency and accountability, SANDAG must unabashedly publish the claims of the RTP lawsuit plaintiffs and the court verdict vindicating these positions. Subsequently, SANDAG must in good faith consider the following suggestions to improve its public involvement campaign:

1. For the sake of public accountability and transparency, SANDAG should engage in a public peer review process by inviting outside experts chosen from award winning transit-based cities to put on workshops open to the public over the next 12 months. Special emphasis should be placed on cities that have achieved high bike, walk and transit mode share or have implemented other creative measures resulting in a marked reduction in GHG emissions.
2. SANDAG should invite to make presentations to the Board and the public representatives from Metropolitan Planning Organizations throughout California that have successfully integrated land use and transit plans to achieve reductions in GHG emissions.
3. SANDAG should develop and disseminate very early on an alternative integrated land use and transit plan that would result in meaningful GHG reductions through 2050, so as to meet the targets embodied in Executive Order S-3-05s.
4. SANDAG should at the outset identify critical modeling assumptions that have the propensity to skew transit ridership and bike, walk and transit mode share models, especially in the designated Urban Area Transit Strategy Plan.

Again, thank you for the opportunity to provide input at this stage of the public involvement planning. With the additional transparency and educational provisions recommended above, we are confident the Regional Plan development process will be able to avoid the fate of the recently overturned RTP.

Sincerely,

Cleveland National Forest Foundation (CNFF)

RE: Draft Public Involvement Plan (PIP) Comment Letter

Dear Mr. Hicks:

Thank you for the opportunity to comment on the proposed Public Involvement Plan for the integrated Regional Plan update. Move San Diego, is the public non-profit voice in support of effective and sustainable transportation in the San Diego region. We organize and serve a broad collaboration of people and organizations to prioritize, fund, and implement sustainable, healthy, convenient transportation and related land use solutions. Move San Diego values public participation and community and stakeholder engagement on the benefits of smart land use and transportation options, and how they will result in a more healthy, equitable, livable and vibrant region.

It is of vital importance to further inform and equip the region's residents, and encourage public participation in the planning process. By using technology to reach out to the public in new innovative ways, planning for low income community engagement where there is still a digital divide, and using an ongoing educational program with a marketing appeal can and will help the public understand that their opinion matters in the regional planning process.

We support using the public's tax dollars to create an engaged citizenry, with increased levels of participation in developing a Regional Plan that reflects the public's values for equitable transportation options. . Thus, SANDAG has definitely taken a step in the right direction by proposing many innovative and positive changes to the PIP.

The PIP outlines a number of strategies to further involve already well-established stakeholder groups such as Transportation Agencies and Advocates. However, we suggest the Plan create further strategies intended to reach groups and individuals not acquainted with the regional planning process already. Although the PIP clearly states that it seeks to "reach beyond traditional methods to encourage participation from a wide variety of members of the public" this is not entirely clear under the set of actions listed under the draft PIP.

Move San Diego recommends SANDAG:

- Concentrate on stakeholder outreach in areas where planned and

potential smart growth improvements (Smart Growth Opportunity Areas) are being considered. It is critical to bring the public in early in the process of infill development.

- Where none exist, work with local jurisdictions to create stakeholder groups in the TOD, and planned/existing transit corridors. Other MPOs have successfully created such user groups based on transit geography, and have used those localized groups to help improve outreach to the SANDAG “communities of Concern”. Those groups may eventually become the groups to engage in future transit and TDM revenue measures.
- Identify stakeholder groups within your existing framework:
 - Public Health groups- community clinics, hospitals, etc.
 - Climate- Communicate closely with groups who are concerned with AB 32, SB 375.
 - Senior groups like AARP and Senior Community Centers.
- Review how the San Diego Foundation’s Greater San Diego Vision Project can contribute the valuable opinions of 30,000 regional residents; and determine if any of the methods they used were cost effective enough for SANDAG to use and replicate.

The “Lunch & Learn” sessions listed under the PIP is a very good example of how these different segments should be approached. Thus, SANDAG should develop programs like the “Lunch & Learn” sessions that are catered to a specific demographic of people.

To target university students, SANDAG could focus their attention on major four-year universities and junior colleges in the region. This is important especially the region considers the millennial generation, and their desire to work remotely, have shorter commutes, and live without a car if they are able. Move San Diego recommends SANDAG to establish its presence on the following campuses: the University of California San Diego, San Diego State University, the University of San Diego, California State University, Palomar Community College, Grossmont College, San Diego Miramar College, and San Diego Mesa College. Each campus’ respective office in charge of handing out parking and bus passes is a smart way to reach out to students if at least to give them a link to a website on where they can learn more about engaging in the regional plan. The beginning of each academic session is a good time to have a booth next to the office about the Regional Plan and actively engaging people, taking input and answering their questions.

Similarly, to engage the elderly and low income communities SANDAG needs to proactively go to them. In this case, however, SANDAG has to partner with senior community centers, community clinics, and other low cost health care options to hear what individuals from this sector have to say. A few senior community centers worth mentioning are: the AARP in North Park, the Paradise Community Senior Center in Barrio Logan and the Redwood Club in Balboa Park. SANDAG staff members could hold talks at these centers to both inform and receive input from members about how the Regional Plan can accommodate their needs as well.

Examples of community clinics in San Diego are: La Maestra Family Clinic in City Heights, the Linda Vista Health Care Center in Linda Vista and the Family Health Centers in San Diego network, which is spread out throughout the region. In this case, SANDAG interns could go to these centers

and ask the people in the waiting room to take a survey that would be crafted in such a way that would educate the person taking it about the Regional Plan, while also taking their input.

WEBSITE: Move San Diego requests SANDAG consider improving the navigability and user-friendliness of SANDAG's website and the proposed website for the Regional Plan. SANDAG's current website is non-intuitive, which may make it hard for a first time visitor to navigate and search for information. One way to improve this is to have bigger fonts and to reduce the number of tabs visible on the home page. It would also help if the site did not feel so text heavy by incorporating more images. Changes like these would encourage more casual readers to visit the website and educate themselves, which would also be made much easier if SANDAG created a "Planning 101" tab that explained the planning process through a series of flow charts.

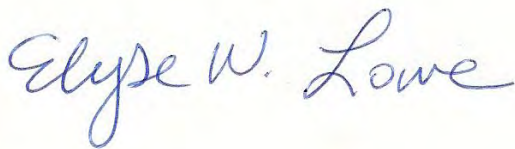

Our last recommendation is to provide more information in the e-newsletter than mentioned in the PIP. The e-newsletter should contain the following:

- Status updates on the development of the Regional Plan,
- An outline indicating when policy decisions will be made, or updates on upcoming policy decisions, goal setting, etc.
- A summary of comments made by the Board at key meetings,

Information that will help the public understand the planning process, as well as the implications that the policy decisions to be made will have on the project.

Thank you once again for this opportunity to voice our concerns and recommendations.

Sincerely,

A handwritten signature in blue ink that reads "Elyse W. Lowe". The signature is written in a cursive, flowing style.

Elyse Lowe

Executive Director

transportation and related land use solutions. Move San Diego educate the public of the benefits of smart transportation options and how they will result in a more livable and economically vibrant San Diego

Attachment 3 - Regional Plan Stakeholders List

This list, pulled directly from the PIP, is intended to give a general sense of the stakeholders SANDAG sought to involve in the process of developing the Regional Plan. The list includes individuals and organizations that expressed interest during the initial outreach process that SANDAG conducted to inform the writing of the PIP, as well as those involved in the development of the 2050 Regional Transportation Plan and other outreach efforts SANDAG has conducted. This list should be considered partial, as it was intended to grow and evolve over time.

Public Workshop on the Regional Plan: Comprehensive List of Comments and Suggestions From Each Roundtable

On October 19, 2012, SANDAG hosted a public workshop to engage the community and stakeholders in creating the region's first-ever combined regional plan. The workshop contained 11 tables at which discussions were s by two SANDAG staff members (one serving as the facilitator and one serving as the note taker). The discussions at each table revolved around six focused themes, listed below. Participants rotated tables three times allowing the opportunity to share their ideas and opinions at each new table. The table themes were as follows:

- *Communities (2 Tables)*
- *Healthy Environment (2 Tables)*
- *Mobility Choices (2 Tables)*
- *Partnerships (2 Tables)*
- *Reaching Out (1 Table)*
- *Vibrant Economy (2 Tables)*

The following is a comprehensive list of the comments, questions, and suggestions made by community members and stakeholders who participated in the October workshop. Feedback is organized by the table (i.e., Vibrant Economy, Table 2) and the round (1st, 2nd, and 3rd) at which it was shared.

Public comments that were submitted in writing are also included. The feedback collected at the workshop will help guide the development of the regional plan for San Diego.

Communities: Table 1

Round 1 Participant Responses

1. Great place to live, work and play.
2. Connectivity is needed to make it better. Freeway impediments. Need safe bike access.
3. We need more bike paths, broader pedestrian pathways.
4. Tree-lined streets are important (most agree). Good for the environment and aesthetically pleasing, too. Maintenance (metal grates). Undergrounding utilities are also needed for tree maintenance. Mature landscaping is also good for property values.
5. Accessibility issues. Sidewalk maintenance and curb ramps are essential.
6. Bicycling is challenging from a safety perspective. Walking and biking paths are important.
7. Transit is difficult to use.
8. Downtown in particular: dangerous driveways, underground parking garages. Also, in general, downtown is dangerous for pedestrians. For example, leaving Horton Plaza.
9. Possible solutions to address safety issues are education/awareness safety campaigns. Bicyclists also need to abide by laws. Sensors. Technology and education are both needed to make people aware that bicyclists and pedestrians have rights as well.
10. Complete neighborhoods enable you to walk to the library, park, groceries, etc. (walkability). Having a mix of commercial, housing, employment, community meeting places. Concentrate on streets that lead to/are compatible with the uses in the neighborhoods.
11. Traffic is atrocious. More vanpools and shuttle buses are potential solutions.
12. People in cars are scared of homeless people because they are erratic and abusing substances.
13. There is an inequity of funding. Neighborhoods where citizens are vocal is where funding is prioritized. San Ysidro is a good example. Need a more equitable way to distribute investment.
14. Older urban neighborhoods have the majority of density. Designate major corridors through older neighborhoods that could serve as major pedestrian and bike promenades. Monroe Avenue, for example, would be a good street to prioritize pedestrian and bicycle travel. Visual tools would be helpful (photo simulations) to understand how pedestrian and bike promenades could work.
15. To reach underserved communities, SANDAG should work with existing organizations, schools, etc.
16. Receive information through e-mail, media (radio), being active in community groups.

17. The best way to receive information is e-mail, community planning groups, resident communities/groups, targeting groups with messages that are appropriate to the audience. Languages and culturally-appropriate messaging is important.

Communities: Table 1
Round 2 Participant Responses

18. San Diego is a great place to live, but population growth is making it worse. Traffic is making it less desirable.
19. Experienced many improvements in downtown.
20. Perceived improvement is contingent on your socio-economic circumstances.
21. Better, faster, more sanitary, less expensive transit is vital.
22. Land use to support transit access. Lip service to smart growth but we haven't accomplished it. Oceanside hasn't updated general plan. Need integrated planning. Lack money to invest in local planning efforts.
23. Compatibility is needed between the community plans and the regional plans. Need to update community plans to make them more compatible with regional plans. Developments (San Elijo) – green community but cut-off from the rest of the city. Developments should be incentivized or required to support transit ridership. New developments – the goal shouldn't just be to improve level of service – those impact fees shouldn't all go into roadway improvements.
24. There is a mismatch in investment: only 1 percent for pedestrian and bicycle; we need to revisit priorities.
25. Outdated infrastructure. Bike paths that are safe, connected, and accessible are needed; their current state is prohibitive. Updating infrastructure should be a priority. Water reclamation program should be citywide.
26. Trolley needs to go directly to the airport.
27. Baby boomers – senior mobility – transit-oriented development, transit, and pedestrian improvement...seniors need help with orienting to use transit. Wheelchair conflict.
28. Better information about how to use transit. Not just small-print kiosks. Education for all on how to use transit, but especially seniors. It's cultural. Smart phones are changing/improving usability. Transit stops/centers need to be safer and more secure. Some are afraid to use transit at night due to safety concerns.
29. The city needs bike plans to improve bike safety and accessibility.

- 30. People need to make sacrifices to change our mobility choices, etc. Younger people are more willing to make changes. Could be good to target younger people in the planning process.
- 31. Transit for families is very difficult. Consider family-oriented improvements.
- 32. Aging infrastructure needs to be a prominent issue to address.
- 33. Businesses benefit from transit – fees to address infrastructure needs. Developers do pay significantly. Transit investment rather than roadway improvements.

Communities: Table 1
Round 3 Participant Responses

- 34. The San Diego region is a good place to live, work and play— if you have time and money.
- 35. I've seen a decline – traffic, air quality has declined, decreases in quality of life.
- 36. A more equitable distribution of investment is needed. Support older communities through equitable investment. Border development is a significant issue – no information to community about projects...need to address border issues through planning. Symbiotic social equity – disproportionate funding goes to northern communities.
- 37. Interstate 15 (I-15) improvements have significantly improved mobility.
- 38. Sand replenishment program is a positive, but timing isn't great. Mistimed. Regional issue.
- 39. Walkable communities should be supported. Sidewalks, trees, lighting, width of streets, curb ramps...walkable is way more important than auto mobility. Prioritize different streets for different purposes.
- 40. Not enough light rail frequency, but must mitigate impacts (for example, grade separation).
- 41. Need more mobility choices.
- 42. Integrate the transit fare systems – seamless. Adding single trips to Compass is cumbersome.
- 43. Access to the beach from San Ysidro is impossible due to border patrol access. Bikeway is an asset but it doesn't go to San Ysidro. Need bike connection to cross border. Truncated at the border.

44. Providing jobs is key to stability. First step to sustaining our communities. Sustainable jobs. Need regional advocacy. How do you manage job growth and community improvements without gentrification?
45. So dangerous to ride bikes. Need dedicated bike paths. Good investment.
46. Motorists don't pay attention to "sharrows." Bike lanes or paths are much more helpful. Sharrows shouldn't be an excuse for not providing a lane or path. They are good for awareness to a degree. Good interim step before installing a bike lane.
47. There are conflicts between transit drivers and bicyclists.
48. Smart growth is a great principle, but in practice need to be very judicious about how to implement in existing communities. Design appropriateness is important.
49. Transit frequency is critically important.
50. For communities that lack open space standards within their communities, how can they gain access to regional resources to make up that deficit?

Communities: Table 2

Round 1 Participant Responses

51. Safe, beaches, good quality of life, access to mountains.
52. Weather, mobility, get anywhere in 10 to 15 minutes.
53. Lots of outdoor activities.
54. Good cultural facilities, theatre, rock music, museums.
55. Variety of activities, sports, Chargers, Padres.
56. Decent transportation and mobility, but could improve.
57. Border city, border region, international port of entry.
58. Need for better collaboration with our international communities.
59. For low income populations, not as welcoming.
60. Biodiversity, green spaces, trails.

61. Educational opportunities, community colleges, universities.
62. Need better Public Transportation.
63. Commuter rail right along the freeway would improve.
64. Infrastructure deteriorating: streets, roads, intersections (inner-city).
65. Border crossing traffic.
66. More frequency of public transportation.
67. Serve each neighborhood and community, and connections to each community and jobs.
68. Focus on transportation in other areas than Downtown.
69. Need to focus more on public transportation to Universities, UCSD, and USD.
70. Connection to Airport with the Trolley.
71. Better paying jobs.
72. Focus towards the service industry.
73. Create more jobs with connection to transportation.
74. One-third of the population in North County.
75. Not as much opportunity for work up in North County.
76. Not as many transportation options in North County.
77. Eastern San Diego County needs more connectivity
78. Walkability and pedestrian safety.
79. Close down certain streets and make them completely walkable.
80. Bikeways.
81. Need dedicated bike facilities.
82. More connectivity to public transport by bike.
83. Better infrastructure and more money dedicated to bike facilities.
84. Frequency and Safety of Public Transportation.

85. Streets widened for bus lanes.
86. The ability to send kids to any area of San Diego.
87. Negative effect on communities.
88. Keep communities together, it begins with the school system.
89. More infrastructure, Walkability, Bike lanes, Public Transportation, Mixed Uses, and Connectivity.
90. Better balance of where the jobs are located in the city as compared to transportation.
91. More flexible hours for employees at jobs.
92. Spread out the times people get off work.
93. Need for a more active role by tax payers to improve their communities, individually by community.
94. More parks in downtown San Diego.
95. Ageing populations gaining independence within their own communities.
96. Friendly for the elderly.
97. Safety.
98. Connection to public transportation.
99. More options for elderly, single story homes, better home care, in home services.
100. Village structure, the city of villages.
101. Inner city: single family neighborhoods necessary to retain and develop.

Communities: Table 2
Round 2 Participant Responses

102. Natural resources, parks, beaches.
103. Diversity of job options.
104. Urban parks, beach.

105. Weather, climate, mountains, beaches, all types of landscapes.
106. Diverse, large county.
107. Historic background, rich cultural and diverse history, variety of architectural styles, and preservation, would like to have more connection to beaches and mountains.
108. Bad for work and jobs, poor job market.
109. Not enough public transportation.
110. Price of owning a home.
111. There are a lot more communities outside of the downtown area and the beach area.
112. Not enough connections to the outlying communities.
113. Diversity and diverse needs create a challenge to the planning process.
114. Would like to improve on connections to beaches and mountains.
115. Transportation, connectivity, frequency.
116. Census information incorrect.
117. Not as much growth.
118. SANDAG needs to push back against the State about what type of housing needs to go in certain communities; re-evaluate low-income and affordable housing locations.
119. Need to count the existing housing that is available.
120. Safer and more extensive bike systems and networks.
121. Safe commuting, recreation, family recreation.
122. Better facility types.
123. Expanded facilities.
124. Small little connections, not just the longer routes.
125. Connect the routes already in place.
126. Community bikes, bike shares.

127. Better pedestrian systems, walkability.
128. Density is a good thing.
129. Not allowing density creates trouble for next generations.
130. There needs to be better public transportation, infrastructure and traffic mitigation.
131. Housing. Create housing in areas closer to stores, transportation, jobs.
132. Build and grow the city close to transportation corridors and connect to those areas.
133. Think as a region, not just as individual communities trying to hang on to their own areas.
134. Think as a whole, all a part of a bigger picture.
135. A healthy region is the best way to connect the smaller communities as one region.
136. Lack of parking can create more walkability and bike accessibility.
137. Must provide transit up to businesses.
138. Green spaces within each community.
139. Transit must connect densities to parks and green spaces.
140. Think open mindedly about other options besides transit.
141. Not everyone can take transit.
142. Better bus systems, more frequency, express bus systems.
143. There needs to be more transportation and land use connections.
144. Better schools and connections of schools to communities.
145. More connection to beach communities from other areas of San Diego.
146. More information and communication between the City and SANDAG.
147. Better communication and ways of getting information about community issues.
148. Connection to public transit, higher frequency.
149. Connection to green spaces development of better bike facilities and more walkable communities.
150. More housing options closer to transit and more dense communities.

151. Focus towards improving schools.

Communities: Table 2
Round 3 Participant Responses

152. Beaches, Mountains.

153. Downtown, different neighborhoods.

154. Arts and culture.

155. Relatively compact and easy to access.

156. Not enough connectivity throughout the city.

157. Health issues in lower income communities like second hand smoke, housing and health.

158. Partnerships with the communities are needed.

159. Economic segregation occurring in San Diego.

160. Needs to be more zoning structures enforced and developed to allow for economic and cultural diversity to occur in each individual community.

161. Plan as a region, not every little entity planning for itself.

162. Not just planning for congestion.

163. Congestion and traffic creates more need for transit and makes people walk more.

164. The convenience of driving to get to large stores or to jobs is too high.

165. Moved away from communities with a center.

166. Needs to be parks, rec centers, schools, and community centers.

167. Walkable communities.

168. Mixed use, more density.

169. Looking at ways to make mixed use and more dense communities work for both residences and businesses.

170. Education of communities.

171. How we efficiently run neighborhoods and communities?
172. Provide communities with more infrastructure.
173. Must provide incentives for people to live in more walkable communities.
174. How do we help businesses move to areas like this?
175. Transit, public transit.
176. More efficient ways of getting to the airports
177. Transit to the airport.
178. More accessibility to the airports and shopping centers, and places of tourism.
179. Rethinking transit and bringing it into the community.
180. Rezoning to empower smaller neighborhoods to be more self-sufficient.
181. Healthy food access, healthy homes, environmental health.
182. Must pay close attention to the health of each community.
183. Also the economic health of each community.
184. Moving businesses and shopping centers into areas where people are already.
185. This way people don't have to travel to these locations.
186. Management of open spaces in the urban areas, also promote and manage smaller urban parks as well.
187. Small business promotion and help for smaller businesses.
188. Incentives for small business to go into certain neighborhoods that promotes walkability.
189. Bike lanes, safe, designated.
190. Safe walkways.
191. Providing options and safe options for the growing elderly populations.
192. Complete neighborhoods.
193. Proximity to all different types of services and jobs and schools.
194. Every community is different.

- 195. Balance of open spaces and connection.
- 196. Open spaces.
- 197. Better school.
- 198. Better healthy food access.
- 199. Community gardens.
- 200. Plans for communities need to actually be able to be implemented.
- 201. Allow for people to have options that focus on only having to use their vehicle certain portions of the time. (i.e., 20% vehicle use, 20% transit use, 20% walkability.
- 202. Connectivity to parks and schools by residences with having low densities

Healthy Environment: Table 1

Round 1 Participant Responses

- 203. Improving air quality.
- 204. Increase in traffic.
- 205. Development.
- 206. More people.
- 207. Loss of open space.
- 208. Polluted creeks, healthiness of watersheds.
- 209. Wildfires.
- 210. Biological connectivity.
- 211. Power line safety.
- 212. Positive – alternatives sources of water, such as reclamation.

213. More attention to public transit riders (such as no smoking).
214. More recycling, plastic bag ban.
215. Need more composting facilities.
216. More community gardens.
217. Some structure in place for conservation planning (MSCP).
218. CCSE – promoting sustainable energy.
219. How do you find out about things: Newsletters, news, e-mails, SANDAG Facebook page?
220. Leaders: politicians (but not on environment), league of women voters, regulatory agencies (only thing that will happen is what is required to happen).
221. There is a lack of diversity at this table (for example, San Ysidro). SANDAG needs to find ways to involve everyone.
222. Air quality standards (greenhouse gas emissions) should protect planet.
223. People want everything, no sacrifice; don't want to pay for things.
224. Unresponsive politicians in this County – they like the status quo.
225. Reliable water source for the future (such as recycled water in the City of San Diego).
226. Open space is important – need to control consumption of open space by development (sprawl) – many reasons for environment and people to have access to open space.
227. SANDAG needs to do a better job of publicizing successes (like habitat acquisition).
228. Critical to have open space nearby – in particular in minority communities.
229. Marine protected areas (like open space for offshore).
230. City of San Diego seriously lacks park space compared with other urban areas – lots of benefits.
231. Huge gaps in San Diego County in terms of access to parks. Information is there – no success taking any action to improve things.
232. Inequity is a problem. Areas like San Ysidro are not equally served.
233. Reuse brownfields to provide parks.
234. Better greenway connections, better urban forestry.

- 235. Air pollution – leaf blowers are a problem.
- 236. Ways water is used (e.g., cleaning driveway with water, instead of broom).
- 237. Raising prices can be effective in reducing demand.
- 238. Need consensus among disparate groups in order to achieve change.
- 239. SANDAG should not provide things like Styrofoam, plastic water bottles – this is not setting a good example.
- 240. Top two:
 - a. Access to parks/open space.
 - b. Greenhouse gas emissions: we need to provide serious incentives, regulations, and requirements for people to get out of cars and use other modes. Public transportation needs to be faster (and cheaper or free for students). Since people like cars, how do we get people into cleaner cars like hybrids?

Healthy Environment: Table 1
Round 2 Participant Responses

- 241. Lack of funding.
- 242. Get general public more involved.
- 243. Environment is a cross-border issue, but not looked at this way.
- 244. Get more people from places like Tijuana involved.
- 245. Need to monitor air quality.
- 246. Water – how to provide enough for growing population (also water quality).
- 247. Don't provide plastic water bottles.
- 248. Even here there is only "white paper" recycling – essentially we could be doing a lot more including composting and green waste.
- 249. There have been tremendous changes in recycling over a long period of time.
- 250. Things like air quality and traffic have gotten worse.

251. Sand replenishment at Moonlight Beach – Encinitas is getting the better of two types of sand.
252. Putting the sand on in October is a bad idea because winter storms will wash it away.
253. Train noise if you are near a crossing – SANDAG should push quiet zones.
254. Idling freight locomotives on double track cause diesel pollution.
255. Need grade separation for safety, improved vehicle circulation...also need double track.
256. Trolley causes a lot of traffic congestion in San Ysidro – San Ysidro has a lot of respiratory issues relative to other communities.
257. Habitat acquisition is important.
258. Plants should be native (no bamboo at Caltrans).
259. Overwatering is also a problem – too much water is allocated to landscaping.
260. Should promote children having access to nature.
261. Tremendous indifference from the public – education should be pushed hard to overcome indifference – starting with children would help.
262. Example of education would be SANDAG attending community events.
263. Community gardens, healthy foods.
264. Gentrification of older neighborhoods, transportation access for residents of these neighborhoods.
265. Need to add to the Bayshore Bikeway – should add a 1.5 mile connection from San Ysidro to the Bayshore Bikeway.
266. Border crossing is chaotic; air pollution is bad, significant delays (particularly during construction).
267. Old cars, trucks, etc. move across the border. Then those vehicles return as part of their use in Mexico. This causes pollution problems.
268. Provide people with mechanisms for changing behavior and they will. Financial incentive to save money has been successful for recycling, for example. Economic benefit is key to making people change behavior. SDG&E is another example. Appeal to their personal benefit. People want to do what is normal – so if everyone is recycling then people want to recycle too. Change the psychology of people’s thinking.
269. Social media is under-utilized.
270. Lack of transit use is due to schedule, convenience, lack of access to a station/stop.
271. More bike lanes need to be built, also maintenance.
272. Plant more trees (right ones in right places).

- 273. Help environment in ways that help people (equity) and economy (jobs).
- 274. What if public transit were free? Could that help? How would we pay for it?
- 275. Communication is extremely important. Outreach too often is cookie cutter. Need to target messages specific to specific communities. Target youth.

Healthy Environment: Table 1
Round 3 Participant Responses

- 276. Finally recognizing that urban sprawl is damaging to the environment (thanks to Duncan McFetridge).
- 277. Densification in mid-city (San Diego) – severity of impacts was not known ahead of time. Future projects are causing problems – infrastructure is not keeping up with development. This has environmental impacts. How to get people to not drive (walk, bike, etc.). Part of this is providing trees and making walking a nice experience.
- 278. Nice walkways along the San Diego River.
- 279. Security issues are important.
- 280. Mission Valley was a missed opportunity. Should be an urban park instead of a jungle.
- 281. Downtown San Diego – over 32,000 residents. Infrastructure is crumbling. SANDAG wants to bring 60-foot buses into Downtown. This is insanity. They want to put a bus lot downtown. Downtown is a neighborhood, just like a suburban neighborhood. Not anti-transit, but anti *this* transit. Should not have 60-foot buses. “49 60-foot long buses”.
- 282. Transit should be fast and efficient. Expanding our light rail. Consider a pedestrian mall, such as only weekends on 4th and 5th. An example of this in Denver is very popular.
- 283. Transit is important, needs to be designed better, better operations.
- 284. Lack of parks and access to them. City policy for park mitigation is unsuccessful.
- 285. Security issues in open space areas. Need funding for rangers, towers, etc.
- 286. Triple wall on the U.S. Border with Mexico is bad for the natural environment.
- 287. System of open space linkages in the County has been a positive. Trying to balance urbanization needs with environmental needs.

- 288. Energy – how it is generated. And water quality and consumption. Climate change. There is denial about it.
- 289. Money and revenue.
- 290. “Fracking.”
- 291. Water billing system in La Mesa – tacks onto property tax and saves the city money.
- 292. Chicago – urban heat island mitigation. They use permeable pavers. Vegetated roof/green roof. Planted a lot of trees. Chicago was able to drop temperate 10 degrees.
- 293. Mid-west drought.
- 294. Need to educate people.
- 295. Politics are important. Decision-makers refuse the facts. They are beholden to special interests.
- 296. SANDAG could have a tremendous impact. There are representatives of all cities.
- 297. Could there be a change to the SANDAG Board – county-wide elections instead of local representatives?
- 298. Banning smoking at Trolley stations is moving smokers toward apartments. Buses also layover in front of the apartments.
- 299. Young people only care about themselves.
- 300. SANDAG can look for under-utilized open space areas in the City. Enhancing these areas could solve multiple problems at once – open space, pollution, homeless encampments.
- 301. HOV lanes – encouraging hybrids, carpools.
- 302. San Diego River could be like the river walk in San Antonio.
- 303. Need walkable neighborhoods for older population.
- Key Points:
- 304. Access to parks/open space.
- 305. Water (how much water is used, what it is used for, and also water quality).
- 306. Greenhouse gas emissions/climate change.
- 307. SANDAG not setting a good example at the workshop by providing things like plastic water bottles, Styrofoam plates, no recycling for cans/bottles, etc.

Healthy Environment: Table 2

Round 1 Participant Responses

- 308. Still concerned about the cleanup of cigarettes, second-hand smoke, indoor environmental issues (health: lead, children).
- 309. Increase in Type 2 Diabetes and children are spending little time playing outdoors.
- 310. Wildfire encroachment into areas, many of which are developed areas.
- 311. Open roads, change in landscape, North County.
- 312. Fewer families are outside and interacting with the environment.
- 313. Mixed use zoning, lung issues, especially in young children.
- 314. Tree cover in cities has declined.
- 315. Streets without trees.
- 316. Cell phone towers and planning, want better reception, especially in North County.
- 317. Gaps in availability with the coaster (schedule?).
- 318. Poor areas selling alcohol and other products to youth.
- 319. The number of species close to extinction is increasing because of development.
- 320. Rooftop generation for solar has improved.
- 321. Water conservation improvement.
- 322. Coastal areas, trails, and other recreational developments have increased.
- 323. More local funding for environmental issues.
- 324. The Clean Air Act and Clean Water Act had positive impacts on the community.
- 325. More awareness of local food.
- 326. California Coastal Commission is doing a good job (keeps coast accessible, prevents huge developments and high towers along the coast).
- 327. Good organized events, near canyons.
- 328. Restoration of canyons.

329. Shopping areas have more local restaurants and the local economy has pushed out national chains.
330. We should plan ahead instead of mitigating current impacts.
331. Immediate human impacts, not either or, but protect human health as a whole.
332. Rise of farmers markets is encouraging people to eat locally.
333. Push out development, San Diego State.
334. We are in trouble with climate change and we might have trouble planning for the future.
335. Not want to be in the car as much, lower vehicle miles traveled, more mode choices for families.
336. People need to accept higher density and realize they are able to walk to more places.
337. Instead of widening freeways, more money should be used for bicycle and walking facilities.
338. Inequitable distribution of services. The communities that speak up more and have more money get to do more. This should not lead to gentrification.
339. Have a one car per family. Life revolves around 3 miles such as schools and jobs.
340. Pay more taxes to get more services and facilities.
341. Some communities (poorer) in more needs of resources. Merge community plans into a few communities.
342. Happy to suffer more congestion so people choose alternative modes.
343. Want less congestion to get around.
344. Focus on short trips with the family, walking.
345. Region works together well but different cities need to work together on development instead of fending it off.
346. Big property management companies need to maintain properties to help communities.
347. Drive slower or have more congestion (i.e., Del Mar or Pacific Coast Highway, cuts off street, make vibrant street).
348. Why don't we have an urban growth policy? How does the county and SANDAG handle this?
349. Reevaluating mitigation projects. Do they still equate with current values?
350. Sand project. Why do we spend so much time and money moving sand? Affects rivers and their functions, need silt screens/hay bales/etc.
351. Include more human impacts in this process.

Key Points:

- 352. Food reliance (eat local), healthy communities/families, and sustainability is important.
- 353. Supported open space, recreation, and conservation projects (beaches, canyons, water quality, etc.).
- 354. Concerned about development patterns, wants to see denser/walkable communities, wants to spend less time in the car and more in alternative modes (bicycling, walking, transit, car share, etc.).
- 355. Many people thought air quality seems like it's improving but others thought it was still an issue and an area of concern.

Healthy Environment: Table 2
Round 2 Participant Responses

- 356. Better air quality over the years.
- 357. Storm water management has improved.
- 358. Multiple Species Conservation Program plans connect the natural environment and resources around.
- 359. Drying up of the Colorado River; San Diego doesn't contribute to this.
- 360. Increased air quality, decreased traffic.
- 361. Beaches are cleaner than they were 40 years ago (sewer spills).
- 362. San Diego has some of the highest ozone levels in the country; this has improved (or has it?).
- 363. Sustainability; formerly looked at site specific issues. This makes the overall picture worse, (i.e., sand and gravel extraction) – look at using different technologies and uses to sustain community or region as a whole.
- 364. Some mass transit has been good; trolley expansion, high speed rail, rail to inland communities is good.
- 365. Having trains and public transportation downtown is good but noise pollution can be loud. Technology has to be improved here in San Diego similar to how it is in Europe. We are a wealthy country so we need to look at this.
- 366. We need sustainable electricity and things such as sustainability measures to keep us going (county and region need to invest and plan for this). Invest in clean energy (not just solar, can't run a lot of things) such as clean municipal power, like power plants. We don't want to invest for 20-30

years to see this, it should be cheap and easy to install. We don't have enough water in the county. We need to improve reservoirs, be sustainable for 50 percent of population, and not rely so much on the Colorado River.

- 367. We consume, don't recycle, and build where we shouldn't build. We need to use more sustainable products such as a shower that has used water feed into the toilet. Need to recycle more.
- 368. Ozone has increased.
- 369. Lots of open space, trees, parks.
- 370. Vehicles miles/commuting have increased.
- 371. Balance between the environment and the economy, growth and development in equilibrium and more sustainable balance.
- 372. We need to plan water, electricity, etc. before development happens so that it is reasonable for everyone.
- 373. Sewers are in terrible shape everywhere. We need to increase and update infrastructure.
- 374. We need fewer cars on the road, smart and efficient public transportation.
- 375. Smaller cars?? Smart cars, smaller cars, electric cars. Are smaller cars safer?
- 376. Put cars on a conveyor. Technology was developed 20 years ago.
- 377. Greater density, jobs where people live.
- 378. Individuals should choose to put solar panels on the roof.
- 379. Reuse/recycling of water.
- 380. Have a system to recycle water when a new house/development is built. Use rain barrels in back yard.
- 381. Education on alternative transportation. Car2Go should be more available, more car sharing and education.
- 382. Offset carbon dioxide with green space, wildlife corridors, and bring back San Diego to the way it used to be. Get away from the noise and the lights. Topography is interesting. Keep it so it's not Los Angeles.
- 383. Neighborhood parks, places for kids to play.
- 384. More trees in general to reduce ozone.
- 385. Sand replenishment is very important, everyone uses the beach.
- 386. Why replenish when we need to deal with the big issue...why is the sand disappearing?
- 387. Tourism economy, important to keep nice beaches.

- 388. People want green yards. Use more indigenous plants.
- 389. The use of pesticides in people's yards contaminates the ocean, water, etc.
- 390. The County is building a park on a former parking lot (underneath?). Near former administration building's parking lot. This is a good idea and we should see more of this.

Key Points

- 391. More water sustainability.
- 392. More energy efficiency-individuals supported solar energy but also wanted more planning for renewable energy as a whole.
- 393. Sand replenishment is important to keep the beaches pristine to support San Diego's tourism and recreation economy but we need to get at the issues that are causing erosion and try to prevent the negative impacts of the sand replenishment.
- 394. Supported more trees and open space.

Healthy Environment: Table 2
Round 3 Participant Responses

- 395. Increase in air quality.
- 396. Noticeable difference between San Diego and Los Angeles.
- 397. Poor water quality in some parts of the region, urban runoff, doesn't think it's improved.
- 398. It's easy for us to enjoy our public resources, make this easier from day to day happenings, incorporate this in design (engineering and architecture), (i.e., open windows instead of using air conditioning to enjoy the weather).
- 399. We need to think about a healthy environment differently now than in the past, local stakeholders take more action, emphasize what we can do and not what we can't do (environmental laws).
- 400. Alternative sources of energy, blackout last year, what to do about nuclear energy, need to think about safe and clean energy going forward.
- 401. San Diego should expand solar energy, lots of sun and space.
- 402. Forest fires are a concern.
- 403. Habitat loss, fires, development and sprawl.

- 404. We've had two of the hottest summers over the past three years due to global warming. How do we deal with warmer summers and climate change?
- 405. Bring people together, mentally and physically healthy. Bring different generations together.
- 406. Make communities more accessible, transportation modes, more children being driven to school.
- 407. Disapprove of the new Port of Entry; it's a disaster environmentally. Many companies move across the border because of costs. Need a regional perspective.
- 408. AAA: Awareness, Apathy, and Action. People are oblivious to their own actions and make environmental behaviors a social norm.
- 409. Looking to the public agencies to lead and govern us, we need self-government (within the region). We need to protect our watersheds, environment, and plan for growth in our communities. Planning process and government should happen at the local level.
- 410. Increase public transportation.
- 411. Ride my/your bike around more.
- 412. Bike, take the bus (takes a long time), want to be able to take a train anywhere and walk within 10 minutes. Make San Diego more bike-able.
- 413. We need to figure out what draws people to San Diego and emphasize that. What are we competing against?
- 414. Trash collection. Create rewards for "good behavior" (recycling). How do we do this and decrease costs? Pay for trash bags. People who try to recycle should pay less.
- 415. Support urban agriculture and community gardens. Want to see more regional outreach for this and other issues.
- 416. Regional governments should help out the local governments more. (i.e., make an example of community gardens). Encourage businesses to change work schedules so single parents could raise a family better. We're trying to work in an old environment and this has to change.
- 417. Data presentation, time for a different presentation and information method/style. Where are greenhouse gas emissions highest? SANDAG should be more of an educator. Communicate individuals making decisions on the entire environment/region.
- 418. SANDAG should be more of a leader to shape the region. SANDAG is in a good position to do this.
- 419. SANDAG has to abide by Board of Directors which may have positive and negative political benefits.
- 420. We need to restructure mitigation; remove one flower and replant someplace else for it to prosper in a larger and more productive habitat.
- 421. Wild habitats are so fragmented. For food and reproductive purposes, we need to understand this fragmentation and try to reverse this.
- 422. SANDAG should get the message out about habitat conservation and beach replenishment.
- 423. SANDAG should have a greater role in the regional water supply and energy.

424. Look to see what the region will look like and its competitiveness in 40 years. SANDAG should be more progressive.

Key Points

425. SANDAG should take a leadership and educational role in regional issues such as energy and water.

426. For habitat restoration, SANDAG should support projects that are less fragmented and instead should support larger, more diverse habitats.

427. Forest fires have gotten worse and the weather is getting hotter (blackouts).

Mobility Choices: Table 1

Round 1 Participant Responses

428. We need to have a Trolley connection to the airport (no brainer). Eminent domain would be easy, only a few parcels.

429. Seeing more cars around the place. Seeing more people walking and biking in neighborhoods.

430. In the suburbs no one is walking and riding bikes, but when you come to city neighborhoods like Hillcrest lots of people are walking and biking.

431. People walk when there are places to walk to (i.e., not sprawl areas; it depends on how areas develop).

432. A lot has to do with geographic positioning of San Diego. It is hard to get anywhere without a solid mode of transportation.

433. Realistically, people can't walk an hour and a half.

434. Need something in between walking and driving (Segways, Vespas).

435. Decreasing the travel time by bus...bus to KM took three hours.

436. That's why we have Bus Rapid Transit (BRT) on I-15 near city heights and El Cajon Boulevard. A place where people are going to already and parking is a problem.

437. Don't know why we put the Trolley to Santee (nothing against Santee). Need the higher traffic destinations to put the Trolley...beach on holidays takes 3 hours to find parking. Barcelona gets to the beach in 3 minutes...we're better than that.

438. We need more service if we don't want to drive. We can't wait an hour for the bus or Trolley.

439. New to San Diego, streets are friendly and wide, so much more space for cars, not designed to be friendly for bikes. Need to have streets friendlier to bike for people not clad in spandex.

- 440. Going up Washington Street we need to add a walkway up there but then get up to University Avenue, the road is very narrow and not sure how you'd get a bike path up there.
- 441. Need carpool lanes on freeways, not just on the on ramps. Need them on I-5 and I-8.
- 442. San Diego hasn't figured out how the modes interact together; not all streets need to be for all modes. Some need to be priority for cars, businesses, others for bike and pedestrian...SANDAG needs to do a better job of that.
- 443. Measure things by impacts in certain way (e.g. save money by building Trolley to certain places).
- 444. Cost savings vs. cost to implement.
- 445. Extra 3/4 percent to sales tax, both things should be done at same time.
- 446. Owe Kehoe a great deal of gratitude for bringing up transit on I-5 Corridor.
- 447. Need antenna up on public transit. Need a train plus a bus.
- 448. Companies need to adjust times for work.
- 449. Everyone needs to sacrifice 3 times a week; must go to public transportation.
- 450. Have all the info where people go so you can plan transportation.
- 451. Look to Brazil, France, Spain; SANDAG needs to get international.
- 452. We are controlled by oil costs.
- 453. Los Angeles Times, Newspapers, KPBS for news.
- 454. Need better notice to the community of those meetings.
- 455. Not just e-mails of surveys.
- 456. If you support something, say this decision is going to be made here. Takes 20 minutes to look through agenda/have to dig.
- 457. Need tailored e-mail for each topic.
- 458. Amount of time spent on bus every day.
- 459. Equip busses with Internet connection; more productive, can get more done.
- 460. More hybrid buses instead of gas.
- 461. Use money saved to develop new routes.

- 462. More routes for tourist areas, jobs.
- 463. More efficient to have electric buses.

Mobility Choices: Table 1
Round 2 Participant Responses

- 464. More cars and more driving; there's more traffic.
- 465. Transit is getting worse. It is slower than using a car.
- 466. Reference to a WAZE Tool.
- 467. Public transportation does not take you to high usage routes (i.e. airport).
- 468. Need more Trolley service.
- 469. Challenge is to get to areas where employment is more concentrated.
- 470. Jobs/employment has spread out because of parking in suburbs. It's the chicken and egg question. Now the priority is on roads and highways, but the Regional Transportation Plan has been changing to acknowledge the need for better transit.
- 471. Projects: Safe Routes to School, to provide mobility choices to families; bike lanes separated from the streets.
- 472. Better connections between job centers and residential areas.
- 473. Change policies to provide disincentives to suburbs.
- 474. City infrastructure will need maintenance and we need to create and conserve a tax base to pay the costs.
- 475. We need to look better at the effects of what we are doing now. SANDAG can influence land use decisions to encourage in-fill, not sprawl.
- 476. Generate more active transportation metrics and use it to justify projects.
- 477. Put less emphasis on freeways.
- 478. Have plans for mobility needs.
- 479. Re-evaluate what Quality of Life means for our region.
- 480. Pay attention to health impacts.

- 481. Transit must be convenient, fast, and affordable.
- 482. Use freeway right of way for other modes of transportation (i.e. trains).
- 483. Review the alternate transit plan (Move San Diego). Is it a good plan?
- 484. Use social media.
- 485. Evaluate how soon to roll-out information.
- 486. Present a schematic plan.
- 487. Meet with San Diego Foundation to avoid duplicating.
- 488. Keep one-on-one discussions.
- 489. Get to the young people, those that are going to be the beneficiaries (colleges).
- 490. Add technology to transit: Wi-Fi, broadband.
- 491. Use not only electric cars, but electric bikes too for short trips.

Mobility Choices: Table 1
Round 3 Participant Responses

- 492. Need more HOV lanes in freeways and shared uses.
- 493. Need a more efficient Trolley (faster).
- 494. Take advantage of corridors and add trains.
- 495. Use more efficiently existing infrastructure.
- 496. Focus in "network mobility" rather than in those that have chosen to have long commutes (Riverside).
- 497. Focus in major (dense) areas and have better HUBs: Airport, Land Ports (San Ysidro LPOE handles more passengers than LAX), and Del Mar racetrack.
- 498. Connections.
- 499. Pay attention to pedestrians and bikes, and be more creative to promote active transportation.

- 500. When prioritizing, pay attention to environmental impacts.
- 501. NPR/KPBS and other local channels and newspapers.
- 502. Cities' public meetings.
- 503. Have more short-term goals and tangible deliverables.
- 504. Come to community meetings and provide enough notice.
- 505. E-mail, Web site, Printed notices.
- 506. Use of technology in transportation.
- 507. Have more support/equipment for the use of electric cars.
- 508. Use technology to monitor transit: Next arrivals, wait time, travel time...
- 509. Consider the possibility of an earthquake and its possible impacts.
- 510. Have more Park & Ride and retrofit with technology.
- 511. Improve technology in transit passes
- 512. Have a transit (San Diego commute) application for mobile devices, and overlay modes of transportation for real-time and greenhouse gases emission comparison.

Mobility Choice: Table 2

Round 1 Participant Responses

- 513. The COASTER, from a regional and local perspective. The COASTER changed communities, huge difference from local perspective.
- 514. The new routes on the Trolley, no transfer at Old Town, no more green line transfer and orange line. Grossmont Center allows people better access to the transportation system.
- 515. A lot of transit cuts in the systems. University Heights, the 11 bus eastbound doesn't go to San Diego State anymore. The 7 bus is the only one going there. A lot of service has been cut to a lot of areas accessing University Heights. To not have access on a Sunday afternoon anywhere is difficult. Route 1 and Route 115 used to go to downtown, now they are cut short partly into Hillcrest, North Park etc.

- 516. Mixed bag, a lot of bike enhancements last couple years, last ten years a lot of freeways, sprawl, highway building, and elimination of transit transfer was a big deal.
- 517. Process change, changing role of SANDAG being a regional coordinating agency, power through funding and decisions SANDAG can make that other entities made in the past, changes in transportation framework planning. MTS and NCTD used to have their own planning operations and now it is at the regional level.
- 518. Planning and emphasis on land use to create mobility choices. In the past it was one's right to get a driver's license and have a car. Younger generations are not making the same car choices. This is a huge change in the paradigm and where we are moving forward. This impacts land use, transportation cost, etc.
- 519. Express lanes and toll lanes are good.
- 520. Carpool lanes are fantastic, passing cars in general purpose lanes.
- 521. For new development consider density, smart growth, high profile articulation, and Transportation Demand Management (TDM) which will allow for benefits to residents making those choices. It cannot all be on the governments back. We need TDM for residents to have options, long-term transit passes instead of parking spaces, people well connected in the area with carpooling, vanpooling, etc. Organization is set for these programs for residents, etc.
- 522. So many jobs require a driver's license; make a proposal for businesses needing to offer these options, penalties, higher taxes, etc. Company in Poway requires driving based on the accessibility.
- 523. A lot of our jobs are in San Diego, and North County needs more jobs so commute patterns may shift. North County needs to become more sustainable, not just San Diego as a major employment area, include North County too.
- 524. Need to demonstrate to residents in the region the impacts of their choices. If we choose to fund "x" amount to freeways, transit, etc., what does it mean if we flip flop this scenario, and what does it mean with respect to quality of life? Transportation scenarios were used in the last plan and this time the plan will look at land use scenarios too. It is easy to show "x percent" but what does this mean?
- 525. See things coming from the outside in and not from the other way. The Plan is concocted, and now we are going to make it fit.
- 526. I can't drive and I can get everywhere from East County, it is inside out based.
- 527. Plan needs to be designed from inside out with recipients, on paper it is a great plan, but implementation is another story. The community needs to be together.
- 528. Projects are included by the plan and this is driven by the outcomes, metrics, etc. Need to see how trips will lead to direct improvements in travel time, etc.
- 529. This is a 35-year plan, and there are a lot of people who are not born yet. We need to anticipate their needs, a sustainable plan is important.

- 530. Need to consider the repercussions on the environment and society. We are all paying taxes and need to understand these impacts and needs.
- 531. Laying a good foundation by providing good choices, BRT lines, managed lanes, etc.
- 532. The challenge is capitalizing on the framework of those new utilities, moving efficiently and effectively, etc.
- 533. How many people take the bus and Trolley? If we made more spaces in the network that allowed this then the choices would be available and much better.
- 534. There is no parking at Old Town.
- 535. There is parking in downtown, plenty of paid parking.
- 536. Putting lots near downtown that do not already have some economic need being fulfilled, a big lot where transit could perform a service.
- 537. We want more diversity, and we are not going to improve intensity and density to support transit, etc. We are not supporting the needed density to support this. Get the people and jobs in the right location; however, local communities do not want to do this. SANDAG provides good tools for this. We need to understand what the level of density and intensity is to make it work. What is the financial feasibility needed? Local cities want bus routes, but intensity and density is not there for it.
- 538. Putting the information together is important. All information needs to be used.
- 539. Visualizations are really good, and we need more tools and coordination with locals.
- 540. We have great planned projects including transit, bikes, etc. It is hard to get projects implemented, NIMBYs in University Heights, etc. Good planning needs a connection to implementation.
- 541. One of the most effective tools that local governments have had to support intensification etc. was with redevelopment. With the dissolution to this it has created significant challenges, and we need a successor mechanism.
- 542. Different types of transportation need to meet specific needs, and different cities need a combination of solutions. How do you weight that combination? You can have bike lanes, walkable neighborhoods, quality of life initiatives, etc. We need more options. In downtown, for example, we see empty bus after empty bus, at different hours of the day. No more buses, expand the Trolley system instead, and no expansion of freeways. By-product of freeways is tampering with the environment etc.

Mobility Choices: Table 2
Round 2 Participant Responses

543. In Talmadge over the last 30 years, traffic density and volumes have grown and it is a concern. We live in a smaller neighborhood that cannot accommodate traffic.
544. The ADA perspective, for example; in Mira Mesa there are a lot more curb cuts, however, ADA compliant streets are too wide for people with limited mobility. This is an issue, and a half-baked implementation solution.
545. First leg of the Trolley from downtown to the border as the expansion of the Trolley system was an impressive transit project.
546. COASTER was impressive too.
547. Making things a little better for bike and pedestrian mobility.
548. They have to be. Transit-oriented development is critical, and building in is the future of new towns, and expansion, etc. We need to avoid the Point Loma situation, and policy is supportive so we need to continue.
549. Transportation is linked to housing issues, the Riverside County imbalance as an example; San Diego needs to be competitive with other counties, and we need increased housing near transit centers, transit-oriented developments, etc.
550. We need to be looking at major employers, school zones, etc. and making transit system connections to major employment groups, and planning housing and employment for better balances.
551. Educating the public that roads are not just for cars, and that they are also for pedestrians, handicaps, and bicycles, etc.
552. We need to be building roads that reflect that.
553. Stop signs are for everyone, bikes, drivers, pedestrians, etc. Bike and walking paths are very important, and there is a lot of work to do in San Diego on the education piece.
554. The biggest challenge is the cost to build roads and freeways. It has not been sustainable over the past 50 years, and we need other options like pedestrian density, bikes, and Trolley buses, all of these needs to be on the table. General discussions would benefit from an economic cost analysis.
555. We need access to mobility, fair and equal access across the county. Completing transit networks and multimodal opportunities, is the best case scenario and expanding the network to provide access to mobility.
556. Revolution as far as how many people are driving more, building bigger roads is costly, etc.
557. It has to go beyond SANDAG and needs to reach the counter parts in Los Angeles and San Francisco, there needs to be commonality.
558. The recent I-405 expansion saves 3 minutes and it took 2 years to finish it. If people are willing to carpool it may work. People don't really understand what public transit involves, it is not door-to-door transportation, you need to walk to access that transportation; it is not like a taxi cab.

- 559. One of the biggest failures was the carpool concept, and the money put into carpool lanes. It is not being used to the thought extent, and we are failing miserably in that.
- 560. Businesses need to offer incentives.
- 561. Before investing in something, research whether it will be used.
- 562. I would use the Trolley if it went anywhere I needed to go. The Point Loma example is a good one, and a subsidy will not change the time issue. Trolley needs to go to neighborhoods, driving is a better solution right now.
- 563. Trolley line expansions are great, but by 2040? We need more express buses, faster transit, more choices are better. We have diversity between our ethnicities in the county. All plans north of Interstate 8 get a vast majority of the funding, proportionally, yet we have the world's busiest border crossing and trade being affected by border time waits. The Blue Line Trolley is busiest to San Ysidro, and there is no expansion until 2030. Accelerate this implementation, other than that the plans are great.
- 564. I used mass transit in the east coast, and in Washington DC, carpool lanes are highly used. The volume of traffic is a solicitation of drivers and it is collaborative. It also makes driving more difficult and mass transit easier as a one-way service. It is similar to smokers being forced outside. If we raise the cost of parking outside, this will influence transit. We need to understand this effect, taking transit and the trade-offs, walking home and hopping on transit, the multipurpose commute (understanding incentives and benefits).
- 565. Identify the most important corridors that need improvements, the I-15 corridor for example, and prioritize these corridors and move them up the list to implement.
- 566. The express lanes are \$35 and you only need 2 people in a car to ride for free. It should be increased to 4 people so that people use the transit. Mass transportation means bigger, spend more money on bigger buses. Airlines would go broke if they operated at half capacity, and the buses are not full of people; even school buses are not full. We are paying for this through our taxes, the problem is the utilization. You cannot send buses half full. We need to provide door-to-door services in the northeastern part of the county. In Paris, Ireland, and in Europe, buses are full of people, and connect with walking and biking, etc. Hawaii has this too.
- 567. Transit frequencies and schedules need to be increased, not decreased. We cannot cut routes.
- 568. Point Loma and other communities do not have access to use transit unless a person drives to the station. Grantville requires that a person drive there and there is not a good connection to transit.
- 569. Ridesharing or car sharing, and people carpooling; technology can help with this. Maybe rideshare is a product of new technologies, Car2go, etc. Technology helps with this new business model, the same thing goes for bikes, technology could help too.
- 570. We are on the road to taking advantage of technology. Compass card was not here 20 years ago, we are on the right track. An example of newer technology would be a MAGLEV, something regional including local feeder networks too.
- 571. High-speed rail is good idea, and we need to make San Diego the endpoint, not Los Angeles.

- 572. Access to transportation information is important. We could use some kind of center, like in shopping malls, that explain where you are. A technology for pedestrians to understand how to get from point A to point B, similar to a Kiosk, possibly a Kiosk center.
- 573. We could include the Kiosk concept but on a phone basis. It would be important to have Kiosks distributed well, and we would need to have options at hubs, real time readouts, etc. This would be the best way to go at the moment.
- 574. We need to have better accessible transportation centers. Right now getting from where you live to that center is a problem. In the future we should be looking at monorails. Putting everything on the ground, concrete, etc., is moving backwards. Today, we live in the air and not the ground anymore. Everything developed has been up and down north and south, not east and west. We don't have that yet, and an electric monorail could provide this connection.
- 575. We need mobility and the airport system tied into the plan; focus on transportation to the airport.
- 576. Address the Point Loma downtown issues, bike paths are very dangerous, and they seem to be a lower cost solution to allow people to get safely to downtown to work. This would increase their use, and we need to accelerate those plans.
- 577. Some of the bikeway paths are very dangerous, and we need to be careful in planning bike paths.
- 578. Safety concerns are based upon drivers not necessarily the development of infrastructure. We need to accelerate some of those safety plans.

Mobility Choices: Table 2
Round 3 Participant Responses

- 579. We have more HOV and Managed Lanes along the I-15 corridor and that is good.
- 580. Highway 80 in Mission Valley, the Interstate 805 was built, and we used to take Euclid Avenue. It is amazing how many different ways things have changed. The Trolley is great, and all different methods have been a wave of the future.
- 581. Public transit has taken a 1 step to now 3 step level.
- 582. There have been multiple cycles of transit being very good to very bad.
- 583. Downtown to La Jolla transit needs improvement. I left downtown at 8:00 and got to La Jolla at 9:45, and this is too long.
- 584. The biggest changes are transit cutting back and the changes in transit scheduling and also the funds available.
- 585. Many measures are based on statistics and not use. Poway is a great place to take the bus, but a transfer will yield longer times, frequency, etc.

586. Bikes, the Boston area has bad weather, yet people bike because it is safe and there are dedicated bike lanes, etc. There is a disconnection between bikeways and communities in San Diego, maybe one community has good bike facilities, but there are disjointed communities. San Diego has great weather and everyone should ride a bike, we need better means to ride a bike.
587. Trolley needs to go to the airport, the beach, the university, we need to implement these things so that people can use for transit for their convenience.
588. I am opposed to the Trolley, we need more rapid buses. The Trolley is costly and inefficient.
589. Existing railroad tracks are out of the way, and are not located where people are. We need transit-oriented development. Everyone seems to want the Trolley but not in their backyard.
590. The Blue line is working; there is density and room for more density. There is no grade separation in San Ysidro, or the park. The recreation building and Trolley stops traffic every 15 minutes. We need to be properly funding areas where we are impacting the community. A successful project is not optimal if we are causing traffic to move out of direction.
591. The price of the Trolley is ineffective; it is actually cheaper to drive to and from home every day. Parking is \$170 per semester, and it is a 15 minute drive from Pacific Beach. Think about the economics, tuition for students, etc.; money is a big issue.
592. UCSD is extending the Trolley to the UTC area. To have a parking pass on campus is \$700/year. There is not much parking on the actual campus it is mostly for faculty, we need to park on east campus to get to the main part of campus. The free bus zone (Superloop) is great. We need to take the 41 bus so living farther away is more difficult, and a more frequent busing is needed. Living on campus without adequate transit creates isolation; it took an hour to get off of campus to Balboa Park.
593. Schedule and pricing of transit fares is a major problem, we need discounts for seniors.
594. We need to consider our criteria for prioritizing bicycle projects. Supervisor Cox is working on getting a list of items. When in San Ysidro, there are no dedicated bike trails, and it is not safe to ride because of traffic. The community is dependent on public transportation; there are priorities such as getting to work, school, and meeting the basics necessities.
595. We spent several million for the Bay-shore Bikeway project; however, this is a mostly recreational facility. If we only added 1-2 miles on the staging area near Dairy Mart Road connecting to Bay-shore Bikeway, it would connect San Ysidro and a barrio-to-barrio bike connection. This is a community where teenagers do not have cars, and you would be connecting communities to communities. San Ysidro to Otay Lakes, used to ride my bike to Otay Mesa, but there is no more bike trail. We need to look at the priority, and understand where trails can be placed for maximum use. This would support the Blue Line Trolley.
596. Prioritization and the overall effect on the environment and the economy need to be addressed over the long term. Congestion affects both of these on freeways; it is a drain on resources and peoples time. We need to get from point A to B, faster and more efficiently, and bikeways are important. What will move people more is transit, and the method to address the issue is through BRT and to have designated times during the

day where lanes are for BRT only. This would be a disincentive for people driving, and would give people a reason to ride the bus. It is a sacrifice in short term, but for a large group of people willing to take transit, dedicating the lane to buses would be effective (use the built infrastructure).

597. We need to focus on our connections. We have facilities and services, but they just do not connect properly, and we need to really look at what we have. We need to focus on scheduling and connections, for example, adding a mile to facilities and making these connections provides for a bigger network. San Ysidro and Mira Mesa are different communities, and there is no real way to get to them. To enjoy all San Diego has to offer, we need to link things together.
598. We need to focus on a different transit route development system. Think about who is more apt to use transit, and then build and develop those areas. Focus on student areas and who is more likely to use the transit (market approach versus project based).
599. Transit has to be more attractive than getting into your car, and paying the bus fare should not be an issue. If using transit, you are not paying gas, car insurance, etc. Here everyone wants everything (understand trade-offs versus connections).
600. The UCSD Board as an example, getting the Trolley before SDSU, however, community needs were different and the College Area community won and SDSU got the Trolley. UCSD wanted to grow the hospital to a different location, now they are looking at adding the Trolley back. It is important to know ahead of the curve versus after the curve. We need to look at criteria, and consider what is important, and not just focus on politics.
601. For criteria it is important to look at health impacts. Congestion creates air pollution and health impacts, and criteria can also capture the ability to bike and walk. This needs to be included in prioritization.
602. People always want to fix transportation issues by building more lanes. We should consider *allowing* congestion to force people to use other options. Do not create extra capacity so people will look for other options.
603. It takes a lot of money and time building an extra lane, and the capacity is taken up quickly.
604. Consider the BRT freeway shoulder lanes to be used for transit.
605. Start with the land use first. Smart Growth grants (on steroids) up to \$100 million or billion. Make the Smart Growth centers compete where it is relative to the Trolley, excess bus capacity, increased density, etc. We are stuck with the idea that we live in a city based on cars. Consider cities with great transit have transit that goes where the people are.
606. Balboa Park and the beach as examples, we need to look at connecting destinations, including Trolley lines. Santee to the Convention Center as an example.
607. Use the environment as a strategy. SANDAG responds to the community to focus on environmental justice. Consider going to Washington DC to use the environment for leverage, the health impacts on people, etc. We argue in Washington DC based on economic impacts, but we should be arguing for the environment.

- 608. Consider employer-sponsored public transportation, the County of Education as an example, and other large companies providing incentives paying for monthly passes, etc.
- 609. In Boston you can have a parking spot, or transit, or cash if you ride a bike. This allows people to choose how their subsidy works.
- 610. Traffic alerts on your phone, alerting to not get on the freeway, messaging, etc.
- 611. Smart phone information, a transit expert function.
- 612. Trip planner needs to be improved and redone. I want to e-mail it to myself, and so I can go offline and look at bus schedules.
- 613. Multimodal comparison would be good, consider drive versus real time. The 511 site has drive times. Consider the time it will take to get to where you want to go on one screen to compare travel options.
- 614. Allow the compass card to be loaded up with cash, \$20 etc.
- 615. There is a tap card in Los Angeles where if you are a senior, student, etc., there are different rates on the same card. You can buy a group amount and you will get a discount. MTS should be more diverse to serve users with cost systems.
- 616. The MTS application is 90% wrong; the technology is wrong.
- 617. Consider real-time tracking updated every 30 seconds with GPS location, so you know where transit is, etc.
- 618. Lack of technology within certain communities can pose an issue as far as equitable options to use newer technologies.

Partnerships: Table 1

Round 1 Participant Responses

- 619. Go to the communities – go where people are already meeting, community events.
- 620. Have better follow-back from Board members. Elected officials (Jerome Stocks, etc.) need to give better feedback to the community and should do so at Council meetings, outside Council meetings etc. Elected officials should report back to their jurisdictions on SANDAG matters and decisions.
- 621. There are a lot of civic organizations that are interested in what SANDAG is doing. SANDAG should reach out to the various civic organizations and have them share info with their members.
- 622. San Ysidro is far from downtown – would appreciate having some meetings in the community (various). Multiple languages as well.

623. When outside consultants come in for planning efforts, the community organizations are tapped for participation too far along in the process. Community organizations often know how to best reach out to the community. Sometimes there is low turn-out because the consultants don't have a relationship or any trust in the community.
624. Sometimes the language is used with general terms that are too "sunshine." The materials should say when the plan is done you will be living in high density housing; you can't use your car, etc. Then see how many people turn up at the meetings.
625. In theory I like transit but the reality is that it's dirty, there are germs, intercoms don't work, it is smelly, some people ride the bus all day long, etc. Have hand sanitizer on board and find ways to make the user experience nicer.
626. People who are usually interested are other organizations, organizations providing tribal senior transit services. School districts should help to give communications in conjunction with SANDAG, help hold meetings, share info. etc. Schools are used during disasters etc., they could also be used to share this type of information.
627. Seniors are looking for transit information but can't find it. Seniors sometimes don't understand how to use computers. The information needs to get out to the public.
628. A lot of school districts are now using e-mail and internet to communicate with parents and students. Idea of a partnership between schools and SANDAG is a good idea (links to Web sites etc.) Schools often provide computer access to parents who didn't have them at home – across income levels. Could get more low-income parents involved.
629. In Northern California there is a movement looking to get away from regional planning efforts. SANDAG should also look at that as well; the same push may happen here.
630. I live in Cardiff by the Sea, an educated community. I am on the list and got the e-mail but most of my friends knew nothing about this meeting. Stocks doesn't report at the end of Council meetings as to what's been happening at SANDAG meetings.
631. Coaster horns are loud. Portions of the track aren't double track. Looked into taking Coaster but the schedule didn't work for today's meeting. Sometimes the transportation alternatives just aren't available.
632. Born in San Diego, as soon as we solve a problem we create a new one.
633. Growth – water issues, canyons, but it's like just keeping packing people in and no consideration for this. Cross the border on a weekly basis. There is still clean air down there.
634. Border crossing is chaotic .There is no information for crossers.
635. Didn't mention military. Cause of major influx of population. How then is the military to be held accountable for anything they are doing as they are under federal law?

- 636. Military is not included in overall population for re-districting. A lot of that is military secret. There is a very high military population in Southern California. People use the facilities, and police them, and military money is an important part of the regional economy. Need lower income housing. Building a large hospital on Camp Pendleton.
- 637. The military does have land use authority on its bases. Large events such the air shows do have impacts on larger community. SANDAG could be a good partner for that.
- 638. MTS Board meeting, NCTD board meeting – give all the info there.
- 639. Casa Familiar – several staff members have been involved in various organizations for 25 years. They get lots of mailing, e-mails, etc., and then try to share the info with their members.
- 640. Other mechanism that would be good to explore.
- 641. People in San Ysidro depend a lot on the U.S. Postal Service. Flyers sent to community organizations that can then distribute.
- 642. Problem – agendas sometimes don't have link to staff report or staff reports don't have enough information.
- 643. Staff reports should have more detail. Don't find out about it until after it has been approved by the Board.

Partnerships: Table 1
Round 2 Participant Responses

- 644. Reach out to people and make it easy to participate – maybe a postcard program with a quick survey, opportunities for input on the internet. If you make it quick and clear people will give input.
- 645. Last RTP you had a pretty extensive outreach to community groups – get feedback from them. PTA meetings, school assemblies, etc.
- 646. Start with the schools – educate the kids, pass info onto parents. Announcements, self-stamped cards with utility bills or tax bills, with short survey or input cards.
- 647. Local newsletters – for example, in Scripps Ranch they have a newsletter
- 648. Maybe work with big employers to share the info with their employees. Schools are key –especially the high schools
- 649. Put something on all of the city Web sites.
- 650. Some of the issue is getting some of the different interest communities together to talk – environment, social justice, transit providers, etc. SANDAG should create a forum for those different groups to get together and talk and work through issues. Would like to make sure SANDAG

propose a group for all those people together. San Diego Foundation Vision did a large survey – take a look at what they did – what worked, what didn't work. Would like to get all the partners together. Break-down the silos.

651. San Diego Foundation did full page ads, impressive outreach effort.
652. Chambers of Commerce. Faith based organizations should be engaged as well.
653. The San Diego Foundation did electronically. Romney's 53 percent participated, 47 percent didn't. Many people don't have internet access.
654. Needs to be multi-pronged – get some people online, some at church, some at school.
655. When you buy your bus ticket or Trolley
656. Lottery sale point – 4 question survey
657. Different languages are needed. Somali, Spanish, Tagalog, Samoan.
658. In North County, social service Alliance for Regional Solutions (ARS) does e-mail blasts. SANDAG should get on their list
659. Very low-income families can participate through the social services system.
660. We like where we are and don't want things to change in City Heights. People get along together well. Don't have baby gangs. A lot of friendly interaction. Have mutual respect. Don't have transit access to higher wage jobs in Sorrento Valley or San Ysidro where there are higher wage jobs.
661. Need to have better north-south transit access
662. Need transit access to airport. Light rail, no shuttles
663. Worry about gentrification – beach town. Young people can't live there like they use to. Huge growth in second homes – from Los Angeles. Those people don't contribute to the community. High growth of second homes. That is what we're getting in the mixed-use units in a downtown area.
664. Military should be noted.
665. Would love to see Baja and San Diego better integrated. But the feds control and it is crazy with the fences, busiest border crossing in the world and not utilized well.
666. Baja Innovadora event – trying to reach out to San Diego community.
667. Why is the border crossing finished on the Mexican side on the US side – ridiculous.
668. There are many people who live in Southern Riverside and they work in northern San Diego County. Similar with the military.
669. Military 311,000 jobs – San Diego County people because military is here.
670. Would like to see if there is property released at Miramar in the future; it should be turned into open space.

- 671. Plan for future base closures – i.e. San Francisco – not a developer free for all when it happens.
- 672. Need more opportunities for longer range plans.
- 673. Airport example if we recognize our regional limits and plan for who we are we could do more with it.
- 674. SANDAG keep its nose out of land use and land planning business. Should do great job transportation but not be involved in land use. When SANDAG tries to get involved in land use it scares everyone. Stay out of land use and land planning.
- 675. SANDAG does have some legal obligations under the law to integrate land use and housing with transportation. I think SANDAG is trying to have a dialogue as to how land use and transportation fit together. They can't keep their nose out but they don't have any authority of land use.
- 676. If you look at the examples of past plans, SANDAG is comprised of jurisdictions. The jurisdictions don't work together and things don't work as well as they could.
- 677. Need to think about partnership of Board members to help bring together their communities and get them to working land uses with adjacent communities.
- 678. Need to coordinate and work with local community colleges and universities to get out information and to get information about transportation needs. Enhance other industries to get other high-paying jobs to come to San Diego because we have high-skilled students and workers.
- 679. In Chula Vista there are courses at Southwestern College to train people in green technology, and we need to promote this in the region. We have great weather and transportation; the work force ready for these high tech jobs.
- 680. We need forums like this to voice our thoughts on a yearly basis and face-to-face. Meet new people, get new info.
- 681. Should have both online tools and face-to-face meetings like today.
- 682. City Heights and Kensington are working together on issues such as Fairmount Avenue, interchange from I-8, and is also working with the SDSU area. SANDAG is already interested in Fairmount Avenue for bikers. If we can get these three planning groups together to identify infrastructure issues.
- 683. If you continue to have meetings like this and take the suggestions seriously, you are headed in the right direction.

Partnerships: Table 1

Round 3 Participant Responses:

- 684. It's not possible to get everyone to participate. Many people won't choose to participate. The usual group of people will participate.

- 685. There always some communities that are more organized and they are ahead of the curve; others are trying to catch-up. If you look at the re-districting of the city some communities voiced concerns with where they stayed/went in districts. Some communities are very organized and others you never hear from.
- 686. The age of the community and its affluence often influence the organization levels. Newer communities with home owners associations are meeting constantly and are organized.
- 687. To get everyone's voice be cognizant of these issues. Look for advocates from the various communities even if they aren't seeking you out.
- 688. There is probably an inventory of different groups and what type of outreach efforts they have. In some areas it will be churches, in some it will be the chamber of commerce. Would really like to get young people (children) involved. We often write them off because they aren't voters, but they are the ones who will live with the plan in the long term.
- 689. Schools would be a good partnership – other youthful activities. X games, sports etc. Helps get kids to care about society, and shows their community cares about them.
- 690. Get a couple of ambassadors from the various high-schools. Could get class credit or a college recommendation letter.
- 691. My alma-mater for high school has the second semester of high-school do internships instead of class; could have some free interns or do outreach to get youth involved.
- 692. Reaching out to high schools is very important – some require attendance of public meetings.
- 693. Is there any type of diagram that shows which churches, community groups etc., talk together? What are the existing partnerships and how do we increase links between those groups?
- 694. Work primarily in Riverside – travel in the opposite direction. I-15 congestion is very bad. Need to interface with WRCOG to not have Riverside just be bedroom communities. It's a money drain for Riverside
- 695. People want to know what's in it for them.
- 696. SANDAG has reached out my little community – Kensington/Tallmadge. Would be good to reach out to other communities too.
- 697. What does the San Diego region want to be when it grows up? In China 1,000,000 people flowing into a city is no big deal. Personally I would like to see the San Diego region where there are more innovative ideas; an idea hub that then licenses that out other places.
- 698. The various communities don't like to communicate with each other. To make this happen would take over three years. Probably need to have some type of online tool – maybe something like the demos.
- 699. University Heights – lots of NIMBYs but I don't agree with them regarding the rapid buses. Sometimes your community preaches things that you don't agree with.

- 700. One of the benefits of planning is that it gets people thinking of things and working together in getting them implemented. Partnerships can live on for other things.
- 701. Do all your due diligence and document it. And come up with a good product which people will want to attach themselves to it.
- 702. There are a lot of things that make San Diego great. UCSD and the industries around it. Major military presence. Mission Bay, etc. Probably going to lose the Chargers; the site is well served by transit. It could be used for something else.
- 703. Try and market San Diego region – beach, UCSD, mission bay, Barona, etc.
- 704. Why do other places have more innovate things – why aren't we getting interested innovative partnership – should partner with companies of people who live in Rancho Santa Fe etc.
- 705. What about having committees throughout the region and getting reps for influential organizations from those communities – South Bay etc.

Partnerships: Table 2

Round 1 Participant Responses

- 706. Use social groups such as churches and community planning groups.
- 707. For hard to reach people not affiliated with any groups go to shops and grocery stores.
- 708. Look at 2010 census outreach strategy and how they reached people.
- 709. Use language brokers, leaders, brokers of relationships. Train people if needed.
- 710. Build upon existing efforts from other outreach efforts such as the San Diego Foundation; do not start from scratch.
- 711. Use schools for outreach.
- 712. Web tools: pick the right tool and an advertising strategy to pull people to use the site.
- 713. Use TV, radio, newspaper, San Diego magazine, and the Patch (online newspaper for different communities).
- 714. To reach people who are busy, reach out to them at gathering places and provide iPads for input right there.
- 715. Instead of us pushing out information, we should go out to them to get their input.
- 716. Use nonprofit networks and tap into their communication channels.

- 717. Shopping strip malls designed for autos.
- 718. Transportation and land use decisions are not coordinated enough; many places are not accessible without a car.
- 719. Baby boomers will become seniors in a few years – need to restructure the physical environment for aging or accommodate migration of these people from suburbs to urban centers due to need for accessibility and affordable housing.
- 720. Too much red tape on designing and building in infill areas and empty lots. Provide efficient ways for development/construction to occur.
- 721. Zoning process has segmented different land uses. Need living spaces of mixed use to create a security. Make it easy for infill development.
- 722. The public health impact needs to be taken into consideration in the plan.
- 723. The UTC area needs to expand bike lanes to reduce auto dependency, and bike lanes need to be dedicated lanes so they are safe for bikers to use.
- 724. Ocean Beach offers bike and walk opportunities and is not auto constrained.

Partnerships: Table 2
Round 2 Participant Responses

- 725. Need to use community based organizations such as churches, non-profit, cross section groups.
- 726. Use professional organizations.
- 727. Use sports groups, social groups. Bike clubs, recreational, athletic, hobbies, art, music teams.
- 728. Be aware of different language groups (City Heights has more than 80 language groups). Use organizations affiliated with language groups and interpreters and when reaching out to these groups, need to explain and be more specific about why their input is needed and how it will be used.
- 729. Need partnerships with property management companies of apartment complexes, to change the inner environment and improve standard of living.
- 730. Disabled/elderly or do not have ability to participate in the process. Tap in to in-home service providers to reach these people.
- 731. Setup booths at community fairs/events to reach people.
- 732. Use schools and PTAs as outlet to reach people through kids.
- 733. Short voluntary surveys could be before movies in movie theaters or advertise about Plan during movie previews in theaters.

- 734. Partner with libraries.
- 735. Partner with chains like Starbucks or grocery stores.
- 736. Need to do more for prevention of youth crime, give them something to do, get them engaged – need more recreation, sports and youth group facilities.
- 737. Cut down on liquor stores licenses.
- 738. Better align land uses with the people living in the communities.
- 739. Apartment building owners and managers are not encouraged to be responsible for interaction in their communities.
- 740. Need to recognize the need of building communities that encourage social interaction, people and business. The old norm is auto oriented design. This causes environment issues with social interaction. Need to encourage multiple use development, mixed use since driving a car everywhere takes too much time and causes pollution.
- 741. Need to address single parents' needs and involve them in the planning process.
- 742. Balance people's needs. Incentivize people to live in the urban core by providing more services with good public transit, improved air quality.
- 743. Urban areas need better connections to food. Direct services from farm to cities.
- 744. Community gardens as urban agriculture at the vacant lots within some communities.

Partnerships: Table 2
Round 3 Participant Responses

- 745. Community fairs.
- 746. Attend local community planning group meetings instead of just using city planners/city managers for input.
- 747. Start with a model and push it to the region. Use bottom up approaches (grass root).
- 748. Use Farmers' markets, libraries.
- 749. Advertise with media (TV, radio, internet).
- 750. Utilize the web more by using banner ads.
- 751. Make sure to contact housing commission.

- 752. Outreach using employers.
- 753. More outreach and partnerships with North County needed. North County has 1/3 pop. but South County gets all of the attention.
- 754. Use east county's Chambers of Commerce.
- 755. Go to senior housing to get input from seniors.
- 756. Provide a free app that shows the progress of the projects such as mindmixer, crowdbrite.
- 757. Use more surveys and maybe put them in places like utilities bills.
- 758. Put postings up at bus shelters.
- 759. Reach out to kids and let them know they will be involved in the plan and reach out to their parents.
- 760. Incentivize people who participate in the surveys by doing things such as giving out transit passes
- 761. Need to improve walkability/bike-ability, reduce noise, and improve transit efficiencies in downtown.
- 762. Quality of non-freeway roads needs to be improved.
- 763. Gaps in bike path/pedestrian networks need to be closed.
- 764. Several people said they would bike more if they did not have traffic safety concerns. Also the quality of the pavement of bike lanes needs improvement - smooth the pavement for safety.
- 765. Public transit along I-15 such as Trolley/train is needed.
- 766. Need to connect the Trolley and train to the airport and major employment centers such as Golden Triangle.
- 767. Trolley works well in downtown.
- 768. Bike trail along rail inland is comprehensive and trails are very good.
- 769. Car sharing in downtown works and is successful.
- 770. San Ysidro border crossing improvements are great.
- 771. Provide visualization tools and map overlays of the facilities so people can identify better with the plan and be more interactive.
- 772. Improve the Web site quality in terms of the font size and simplified design.
- 773. Not use PDFs on the Web site because they can't be manipulated.

Reaching Out: Table 1

Round 1 Participant Responses

- 774. Methods of outreach include e-mail, business organizations, Google Search for SANDAG, SANDAG committee. Kensington Planning Group: Chair sent it to them. E-mail, Facebook, or Twitter: one of them.
- 775. Haven't touched a paper in over a year; it's pushing out the owner's opinion.
- 776. Prefer Google alerts, newspaper online editions.
- 777. Twitter, Yahoo, and Google.
- 778. In terms of things that interest me: LinkedIn groups, meet up groups, looking at information from smart phone.
- 779. If you want the public to know about this, you need to get it in the newspaper, community. Newspapers – a lot bigger reach than individual Facebook accounts, etc.; community papers are much different than for example, the Union Tribune.
- 780. I think that's true for CV too.
- 781. Signs at key intersections, great response from these.
- 782. One thing that my wife always reads are real estate agent newsletters, three newsletters that come directly to my house, two real estate agents who are huge boosters for the community, they have a voice because they talk to everyone.
- 783. In CV – its community groups – they have huge e-mail lists.
- 784. Send information to the cities and let them put the information on their Web sites.
- 785. Where are the Hispanics at? There are very few Hispanic representatives.
- 786. You leverage the nonprofits, not crazy about the Union Tribune but a lot of people still read it.
- 787. We can't handle everybody at this meeting, it's important that everyone knows about this process.
- 788. What you have now is a group of people who are interested.
- 789. Approval levels for federal, state and local levels are very low.
- 790. The problem is that you hear back from the NIMBYs and the special interests, it's not a fair representation.
- 791. You have to make it easy for people to participate, opportunity for quick input (online, post card) you'd get a lot more participation than from people coming to a meeting like this.

- 792. It's hard to put information on an agenda because everyone (the public) thinks it's an action item, it's about providing a process. Most people don't have the time to come to events like this.
- 793. People won't attend because they think that the decisions have already been made.
- 794. You have to have a transparent process, if you have things that go on behind closed doors; you end up building up resentment.
- 795. What most agencies don't do, they don't talk about how the input affects the process. You're not telling people that their input is making a difference that it's not going to a black hole.
- 796. You want to have follow-up, like an annual newsletter.
- 797. What's the feedback that says we've taken that input, this is where we've gone, and this is why we've gone?
- 798. Rather than SANDAG hosting meetings, take advantage of the existing meetings in the county, go to their meetings and let them run them.
- 799. You need to let people know that there is a process and everyone should be heard, people appreciate their input being recorded and then knowing what happened.
- 800. We always discuss things as being a living/changing document/thing – it provides realistic expectations for people.
- 801. It depends on the community, for me, I prefer online, but some people want a public forum. It's a mixture.

Reaching Out: Table 1
Round 2 Participant Responses

- 802. My adjunct professor is JW, she wanted us to come to a community meeting.
- 803. I'm from SANDAG SSTAC committee, we sent out an e-mail.
- 804. I was the North Coast Coastal representative for the 2050 plan.
- 805. I am from a CBO in San Ysidro, either me or my boss has been involved in SANDAG efforts, and also from other.
- 806. This is dovetailing on the electronics, I am on the list, but I saw the information through other sources, city Web site, APA, it's important to see that strategy being used.
- 807. Take one Rider Alerts and the electronic screens on bus stops – they could use those more, maybe not so much SANDAG stuff.
- 808. Are you looking to get information out or information in from the community?

- 809. There are existing templates for underserved communities – the 2010 outreach model – ways to engage those communities SD Foundation campaign, key to reaching hard to work communities: securing the buy in and trust of existing community leaders, specifically including those kinds of leaders in this process.
- 810. Speaking from a student perspective, don't underestimate the power of students and young people to care about something, social media, it's the way we interact now, there are 5 major universities in this area, it's important to get them involved so they can spread the word; social media is a powerful tool for getting information out. For example, petitions circulating online and actual change coming from those.
- 811. Every council member has their own newsletter, those get sent out to a lot of people, if you want to convey some ideas, send it to Sherri Lightner, she'll put it on her newsletter, get the information top down to other orgs who will then reshare information.
- 812. The City of San Diego stopped doing mailings for their planning issues, a lot of SY community (50%) doesn't have access to internet, for these, important for SANDAG should come out to the community, the way we do outreach in SY, Casa Familiar does its own paper distribution of information through the housing projects with partners with and also through the school districts, they help us distribute to parents, send it through the kids.
- 813. Flyers, workshops, forums, all in Spanish or bilingual, we tackle complicated issues with several meetings, incentives, raffle prizes, dinner, etc. also survey attendees for the topics that are important to them. We have really active part of the forum, not always presentations.
- 814. We need to reach out to the new generation.
- 815. Distinctive to distinctive communities, in some communities it's faith based, community centers, community organizations, it's very customized.
- 816. I don't have a concrete list, but what would be feasible is to have citizen groups where you have nonprofits, business representatives, etc. you can verse with those groups who are well versed.
- 817. SANDAG does that with working groups.
- 818. A town hall would be good, the way you reach out needs to be much more graphic, and not so text based 140 characters is important, as planners you're always talking about the future, it's important to get the younger people excited about the plan so that 20 years down the line, they remember that plan and stop putting plans on the shelf.
- 819. Important to get people from university.
- 820. Who's impacted by the plan? That's who should be reached. In SANDAG working groups, figure out who's going to be impacted and engage some community members from those groups.
- 821. People won't go to anything unless it affects them. Graphics are good. Planners have a very difficult time trying to stir people up regarding a plan 20 years from now. It's about branding, marketing.
- 822. You almost have to predict what's going to happen because people aren't good about knowing what they want.

- 823. Ask people where will their kids live, work and play in 20 years? Have to find something that people care about to make it relevant.
- 824. CASA has plans that are several years old, nowhere does it show what's complete, how it ties to the city general point.
- 825. If people don't receive results in a short period of time, for ex. Canyon lands, we provided input, it went into a black hole, they didn't listen.
- 826. Two things: 1. taking the input and saying thank you 2: communicating the outcome of the input and letting people know how the two things are related (we heard you, here's what we're doing with it)
- 827. I am in public policy – even if it was a gesture, I would feel like something was accomplished. I know that our members want to see specific projects. I know that's not always feasible.
- 828. If there's not an outcome – where is it going?
- 829. Marketing is important – quick, to the point, interesting, gimmick.
- 830. I was just thinking of having a social compelling aspect is important. Create a community around a plan.
- 831. You need to keep the conversation going, proposing new questions.
- 832. Doesn't have to be SANDAG conducting the conversation – can be SANDAG 'ambassadors' – here's a wine bottle, let's have a conversation – having coffee chats.
- 833. Every region varies, for some people electronic might work, for others, flyers, you have to look at the region and customize
- 834. The Reader is a great paper.
- 835. Not very many people look at direct mail.
- 836. Electronic means are important, grassroots approaches, a booth at the farmer's market, a street fair, keep it very simple with information on where to get more information, a brief survey.
- 837. Televised news.

Reaching Out: Table 1

Round 3 Participant Responses

- 838. One of the challenges we have is how to we engage people who are hard to engage? These populations don't have computers, means of connection. Many of the ways you want to get feedback are not available to them. Part of it is getting tools in the hands of people who need them.

839. What we want is that you take our suggestions and implement them.
840. Well, take them and listen to them at least.
841. Get a screen, get yes/no questions put it where you buy the lottery tickets are, then you'll get input.
842. Educate people who drive that roads are also for pedestrians and bicyclists.
843. You need a wide cross section, you want a mix of ages, socio-economic backgrounds, regional representation, getting into schools. Knowing that it can't be the same approach for everyone, because if you do, you're going to get the same people.
844. You need to get in touch with the school system, the school system is never interested for more than just schools, and yet they're the most influential people in the community. All your services clubs – sir optimists, lion's club, etc. no one has gone to their meetings.
845. You can try to market yourselves: Facebook, Twitter, LinkedIn.
846. Maybe a jingle, everyone likes a jingle.
847. For someone who this isn't part of their day – you don't know what it is and you can't connect with it, pull out specifics that people can relate to, not make it such an umbrella, it's really not approachable. I have friends who would want to be here – it's from 11:30 a.m. – 1 p.m. on a Friday afternoon. They're working. It won't work because of the timing and the dissemination of it (the information).
848. It has to be a variety, it means you have to be where people are – it might be after hours, organizations that deal with the public have a bigger responsibility – maybe not every meeting.
849. Maybe it plugs into something you're already going to – train people then have them take it out to their communities (ex. of beach volleyball group).
850. In health field – often use the "promotora model" – doesn't have to just be health education – train people in the community to get input and bring it back to SANDAG, people's ideas come out in ways that make sense to them, not necessarily in a way that SANDAG can use it.
851. Community level meetings and seeing the fruition of my ideas make me feel heard.
852. There's a big disconnect with community outreach when you don't ever see any of the ideas you heard implemented.
853. Go to local businesses they have employees, resources, outreach programs.
854. Interactive televisions, could easily present information and get immediate feedback, Web-based participation is good, but it's about knowing how to access it.
855. With these kinds of programs, you don't get a response.
856. Following up with people after they've given their input and telling them how they're input was used.

857. You need to do other forms of outreach, not just workshops. On mind mixer, you can vote on ideas. These tools can be used to show how people are thinking about communities; you've got to give a reason why someone should participate, if they don't think there's a reason, they're not showing up.
858. Reason is – what's in it for you?
859. Let's tap into our future, our future is our youth. We can start getting their mind set for what's coming and what's going to be expected of them.
860. What we did in our general plan update: we got parents involved early on in the general plan process and we had to stop the teachers (Encinitas). Students put together picture boards and then presented them to Encinitas City Council, it got not just the child, but also the adults (parents) involved.
861. If there is to be a Web site, post photos of ideas that did get implemented.
862. Not a method, more of a mindset, people need to stop looking at 'how am I going to benefit' should be 'how is society going to benefit from it'.
863. The process takes too long.
864. Important to educate about why this matters and how this translates to anything in my life; all education is focused on state and federal level.
865. Education – need teachers to teach the importance of what we're doing and why it benefits/is important.
866. Flyers at the Charger/Padres game – put flyers in their windshields.
867. I feel that people aren't listening so I keep coming back, I would continue to come if I felt that the things that were discussed had an impact.
868. We have to see results; people are impatient.
869. Use timelines with milestones.
870. Investing in quick goals, maybe you can't get into every district, get into one school – report that back, even if it's getting an e-mail with pictures or quotes, people love seeing that; love seeing their name/information/ideas up.
871. Pride in participation (PIP).
872. I would be impressed if I got an update and it showed that even one thing was done as a result of this workshop (the school idea).
873. How about tours or volunteers? Let people see what it's like to work for SANDAG (interns, etc.).
874. It sounds like people want to feel like they are a part of the organization.
875. Internet, TV for information.
876. Subcommittees, planning commissions, internet, meetings, board meetings, tribal meetings; engagement is a hit or miss thing, for the most part, people say I didn't know that and walk off.

Vibrant Economy: Table 1

Round 1 Participant Responses

- 877. Economy is worse – unemployment, foreclosures (several people mentioned this).
- 878. Economy depends on each other as a consumer society; need to take time to look ahead for the sake of future generations.
- 879. Economy is more vibrant; things starting to improve (person has been here for 4 years).
- 880. Reassessing priorities for government spending. There is not enough money to do as much as we would like.
- 881. Not creating the type of jobs we need (higher paying jobs, especially).
- 882. Need more efficient transportation system to create better economy (e.g. border crossing).
- 883. Need new markets to replace old jobs/markets that no longer exist (don't try and recreate the past).
- 884. Greater emphasis on manufacturing jobs – balance between the type of job and how much it costs to live in San Diego.
- 885. Concern about people coming in from out of San Diego at lower wage – hurts local residents.
- 886. Not sure manufacturing jobs will come back.
- 887. New workers want flexibility in work hours, transportation system on how to get around; those that do are more competitive than other employers.
- 888. The market in Mexico can help the San Diego economy if we enable easier crossing of border. It is there today, but could be a lot more (some crossing matters are federal responsibility, but there are things SANDAG could do).
- 889. Is more important than the state/federal; we are going through a major change in how business is done and local government can help facilitate the change.
- 890. Local government needs to streamline how regulations and permits are handled (processes need to adapt to new economy and to facilitate economic growth); need to minimize uncertainty on how processes work.
- 891. Local governments should help identify geographies that can assist in growth and industries that can be nurtured; provide information databases that can help businesses.
- 892. Strong mayor has hurt representation of neighborhoods.
- 893. Improve efficiency/sustainability with energy/water consumption using new technology.

- 894. Better information for customers on transportation choices—makes it easier for people to get around; improve basic infrastructure like sidewalks and bike lanes (allows people to engage in their community more as well).
- 895. Business needs more support, less regulation.
- 896. Online; webinars (with visual tools) to spread information to the public.

Vibrant Economy: Table 1
Round 2 Participant Responses

- 897. Standard of living is both better and worse-- some neighborhoods are better (e.g. Little Italy), others have suffered (many suburban areas); lower income groups have suffered.
- 898. Suburban areas hard to get around due to lack of transportation choices; hurts ability to participate in economy.
- 899. More difficult to get a good education.
- 900. Housing prices still too high relative to cost of living.
- 901. Lower income groups increasing.
- 902. Really good transit system (world-class) that made it easier to get to work would help; more connections to employment/higher education.
- 903. Incorporate smaller businesses into neighborhood areas (new opportunities) – City of Villages needs to be implemented.
- 904. Need more attention to encouraging businesses to come – streamline government processes.
- 905. Education – needs improvement.
- 906. Don't have a lot of large businesses; most is small businesses, so build off this by encouraging new small businesses (incubator).
- 907. Match education to jobs and what businesses are looking for.
- 908. Streamline permit processes (CEQA and building side).
- 909. Work better with businesses/ promoting partnerships with businesses/education so that it is not just government solving social problems.
- 910. Promote cross-border partnerships (e.g. better transportation connections and creating new business opportunities).
- 911. Pay more attention to role of port.

- 912. Parking management – helps efficiency of system and frees up space given over to parking lots.
- 913. More efficiency in transportation system (things that can be done vs. just building things) – i.e. TDM.
- 914. Partnerships with local schools to provide leadership to improve education.
- 915. Transportation systems need to be more flexible – e.g. BRT, better bus system, TDM; improves accessibility to jobs.
- 916. Trip reliability and competitive travel times compared with auto.
- 917. Need more options for comprehensive news coverage – need more reliable/trustworthy sources.
- 918. Liked San Diego Foundation outreach and surveys – good brainstorming techniques.
- 919. Technology okay, but still need face-to-face meetings for local interfaces; a lot of older and low income groups don't have the same access to technology.
- 920. Public school districts – hook up with them to communicate info.
- 921. Work at community level (e.g. local community newspapers).

Vibrant Economy: Table 1
Round 3 Participant Responses

- 922. Economic standard of living is both good and bad; some pocket of prosperity but growing gap between rich and poor.
- 923. Visual reminders – foreclosures in homes and businesses; less government services.
- 924. Some things are better – e.g. downtown; some of suburbs have problems/people have moved back to inner city.
- 925. Economy is more diversified than in previous years – retain this.
- 926. Over 50 years, things are better/have improved.
- 927. Mobility improvements over last 20 years are significant; but too many cars.
- 928. Don't need more service sector jobs; need higher paying jobs.
- 929. Need to better understand why a business would not want to locate in San Diego, and then finds answers to attract them; look at biotech industry for examples.

930. Don't have Fortune 500 companies due to cost of living and mobility issues; need to emulate what other successful cities are doing (e.g. Portland, Austin).
931. We are cul-de-sac geographically that hurts us.
932. Others felt we have a lot of advantages – Pacific Rim.
933. Need a vibrant core – downtown role as employment center declining—it needs to regain its role as regional center.
934. Need working waterfront.
935. Need better land use decision making – residential vs. employment areas.
936. Partner more with the military.
937. Need to remove fiscal decision making focus of local governments – need to be more regional focused.
938. Sustain public sector employment.
939. Education: need educated/talented youth to fill future job markets and attract businesses from elsewhere.
940. “Live/Learn/Educate/Play” focus.
941. Keep community master plans up to date – creates uncertainty for businesses.
942. Various government agencies need to better coordinate their plans – differences can often create problems for businesses --- no comprehensive vision.
943. Education facility needs to be factored more into land use decisions.
944. Better customer information at transit stops.
945. Car2Go is great; need bike share.
946. Phone apps for alternative modes (transit, bike, car sharing, TDM) – how to use these apps for first-and-last mile services.
947. Need to get younger folks involved since they are the ones who will live here in 40 years.
948. Let folks know when key decision points are being made.
949. Technology for allowing people more opportunities to be involved.
950. Community-based outreach – go out to them, not just the reverse.

Vibrant Economy: Table 2

Round 1 Participant Responses

- 951. Mixed use has been a failure in City Heights.
- 952. Need to do market research before building mixed use projects.
- 953. Need tax incentives to facilitate job creation.
- 954. Local governments need to provide friendlier permitting process for business.
- 955. Common permitting and zoning policies should be adopted throughout the region to promote business retention and the location of new businesses in the region.
- 956. Consistent forms should be developed to make it easier for businesses to locate in the region.
- 957. Zoning standards should be liberalized to provide more certainty.
- 958. Too many low paying jobs in the San Diego region.
- 959. Cost of living is high.
- 960. Hotels are promoting a tax that is designed to help the tourism industry not the region or economic health of the region as a whole.
- 961. Homelessness in the region has increased (climate related).
- 962. The performance of schools has decreased.
- 963. Schools are focused on a college track; need to focus on vocational training too.
- 964. Community colleges have been affected by the state budget problems.
- 965. Some people are better off; some people are worse off economically.
- 966. Need to provide people with opportunities to live and work closer together.
- 967. Need to better connect jobs and housing.
- 968. Freight corridors and land zoned for employment need to be protected from housing encroachment.
- 969. The residential project near Solar (Fat City project) is a good example of the potential for development to drive out 2,000 jobs.
- 970. Existing jobs in the region need to be protected.

- 971. Need to identify and promote emerging industries such as solar and green technology.
- 972. Need to more public transportation – more trains; grade separation issues need to be addressed.
- 973. Bike facilities/network should be improved.
- 974. Provide on-line tools for all jurisdictions to get community input.
- 975. Make the SANDAG regional database available to all jurisdictions.
- 976. Coordinate efforts with San Diego Foundation.

Vibrant Economy: Table 2
Round 2 Participant Responses:

- 977. Economy of the region has changed for the worse.
- 978. Facing a fiscal cliff at state and federal level.
- 979. We look at issues from the standpoint of what is cheapest; don't look at longer term return on investment issues.
- 980. If you own a house your standard of living is different than if you don't own a house.
- 981. Housing in the region has become unaffordable.
- 982. The gap between income and housing costs is one of the biggest in the country.
- 983. We have lost the middle class in the country and region; we have high wage and low wage jobs, and very few middle income jobs.
- 984. The region has the third highest cost of living in the country (recent report).
- 985. The military and tourism have kept the region afloat economically.
- 986. People adapt to the situation; vintage re-sale stores have become popular; people are re-selling things instead of donating them to thrift stores.
- 987. Public transportation needs to be improved in the region.
- 988. The Otay Mesa area could be developed to help improve the economy.
- 989. We should facilitate cross-border infrastructure.
- 990. The region needs to see itself as part of a world-wide economy; what happens in Spain, Greece, Italy, and other parts of the world affects us.

- 991. We are not a hub; we need better connections to the rest of the world by air.
- 992. SANDAG should help the cities with smart growth.
- 993. Smart growth has been shown to be better for the economy than big box retail uses.
- 994. Encinitas developed and approved a downtown specific plan that has helped create a vibrant downtown.
- 995. The bus turn-around facility proposed in downtown San Diego will negatively affect the vibrant community of Little Italy.
- 996. The facility should be located in a different area of downtown.
- 997. Change is difficult; there are always trade-offs with different choices, but change should not be at the expense of the neighborhood.
- 998. Visualizations can help show that change can be beneficial.
- 999. The San Diego region should work toward becoming the economic hub of an industry or industry cluster; government and the Chamber of Commerce/EDC should get together to collaborate on this idea (i.e. center for sports equipment, etc.).
- 1000. We need to develop more middle class jobs.
- 1001. The development of industry clusters is an organic process that happens over time.
- 1002. Take advantage of the job-generating ability of our universities such as UCSD (e.g. Qualcomm).
- 1003. The region should focus on education, workforce development and places for employment to locate.
- 1004. The region could play a leadership role in the development of solar and other alternative energy forms.
- 1005. The region needs to focus on and educate people about the importance of and opportunities associated with the Port District and the Port of Entry to Baja California/Mexico.

Vibrant Economy: Table 2
Round 3 Participant Responses

- 1006. The San Diego region’s “paradise tax” increases the cost of living.
- 1007. The region lacks middle income jobs.
- 1008. It is difficult today to live in a humble way.

1009. The growth in the region cannot be sustained.
1010. SANDAG could do a better job of communicating the fact that we are going to have more density in the region and that we need to do things in a smarter, more efficient manner.
1011. We need to revitalize areas and provide affordable housing to ensure that people of all income levels have places to live.
1012. Develop a good neighbor program.
1013. Improve public transit.
1014. Be more efficient in our energy use.
1015. The region's employment centers are scattered and difficult to serve with public transit.
1016. We should work with local jurisdictions to think about where the 450,000 projected new jobs should be located.
1017. We should publicize the work we are doing and tell stories about the positive aspects of growth and neighborhood change and revitalization.
1018. We should figure out ways to reduce greenhouse gases to lower levels in the long term.
1019. We should look at ways to reduce greenhouse gases through changes to land use; show different futures using land use planning modeling.
1020. More education and outreach is needed.
1021. We need to consider how to harness the new economy for the region.
1022. The regional plan does not have teeth; need carrot and stick (combination) approach.
1023. SANDAG needs to better explain its vision and how we can get from policy to implementation.
1024. The Blueprint work in the Sacramento region was noted as a good example of regional planning that should be considered.

Comments Submitted in Writing

E-Mail	Phone	Address	Comment
kdelmastro@yahoo.com		4675 Oregon Street #5, San Diego, CA 92116	<p>(Sent via e-mail on 10/12/2012 to Paula Zamudio) I strongly feel that public transportation must be strengthened, as well as bicycle pathways/safety. Many of my friends say they wish they could bicycle, but they do not feel safe. I've also heard many people tell me that public transit is too slow or unreliable. I know I would take bicycle or transit if the options were better. I believe both of these are key to San Diego becoming a more vibrant city. We need San Diego to become less dependent on the car, and less dominated by cars and freeways, otherwise it will become a sprawling urban area like LA. I think many San Diegans like our small town character, which is helped by public transit and bicycle usage.</p>
eric.f.schaller@gmail.com		135 W Glaucus St, Unit A, Encinitas, CA 92024	<p>(Sent via e-mail on 10/17/2012 to Paula Zamudio) I just wanted to express my frustration with the hypocrisy of SANDAG. Pretending to want input at a meeting that's to be held two days after an e-mail notice is sent, and during the day on a workday, is a blatant insult to the intelligence of constituents supposedly "represented" by these individuals. How about a workshop to discuss defunding SANDAG?</p>

<p>cargra@san.rr.com</p>			<p>(Sent via e-mail on 10/13/2012 to Paula Zamudio) As a response to your message where you request opinions about communicating with the public, I am sending you the following comments:</p> <p>The community could be divided in the following groups: first the professionals, secondly the government sector, third the private sector and finally the community groups. Considering these sectors in the decision process I think we need three types of forums as follows:</p> <p>1) Face to face discussions in the form of seminars and debates among or between professionals to discuss the following:</p> <ul style="list-style-type: none"> - Problems in our trans-border region and in San Diego proper and - Critiques and/or discussions of current practices in SANDAG (methods, implementation issues and decision process) - Lack of and/or approaches to our vision and goals for the region - Possible scenarios - Approaches an appropriate methods to deal with planning our region and urban areas.them, <p>2) Specific forums for specific presentations by individual professionals. I am an architect and a planner with more than 30 years experience both in San Diego and Mexico and I think I speak for many professionals when I say that we have little opportunities to present our ideas. Universities could be the places for those events.</p> <p>3) Meetings between representatives of the four</p>
---	--	--	--

			sectors mentioned above.
Dwood8@cox.net	(619) 463-9035		<p>(Sent via e-mail on 10/18/2012 to Paula Zamudio) (1) SANDAG should work with its local government members to design, fund and construct a true regional bike lane network. The bike lanes should be similar to the one along the east side of Mission Bay. The bike lane network should be totally separate from the regions streets and roads, since when 100 lb bike riders and two ton cars collide the rider usually dies. SANDAG should route the new bike lanes parallel to old Trolley routes like the one between Pacific Beach and La Jolla, and along existing and planned Trolley and BRT right of ways.</p> <p>(2) The updated regional plan should also focus on encouraging distributed renewable energy generation on ratepayers rooftops and parking lots throughout the county, using financing options like the City of San Diego's new PACE program, where customers can pay back loans on their property tax bills over time.</p> <p>(3) SANDAG should more carefully examine the costs and benefits of moving to a more accelerated public transit development and expansion process, similar to those being undertaken in Los Angeles and the Bay Area. Expanding public transit to better connect where people actually live and work should take priority</p>

			over new freeways and freeway expansions.
city_heights@yahoo.com			(Sent via e-mail on 10/22/2012 to Paula Zamudio) At the workshop yesterday attendees were asked how they learned about it. Most indicated electronic contact. One attendee noted that electronic contact facilitates those who use the internet and ignores those who cannot. That led to a lively discussion about how to close the gap between the people SANDAG does reach and the people SANDAG should reach. There's a piece in the newspaper today on page B4 about how the San Diego Symphony expects to reach a lower-income audience than it usually reaches. SANDAG might find some ideas there helpful in its quest to reach that same audience, especially putting ipads at libraries, community centers, and I would add social service offices.
crodman@affordablehousingadvocates.org	(619) 233-8441, ext. 11 (619) 233-8474, direct line	4305 University Avenue, Suite 110 San Diego, CA 92105	(Sent via e-mail on 10/05/2012 to Susan Baldwin) Although Item 7 says that input was sought in August and September including from working groups, your e-mail on the 25th was the first that I heard. Perhaps I missed an e-mail or meeting. I see that other languages are incorporated in meeting notices, and use of Google translate on SANDAG's Web site also helps. I suggest outreach include youth (at least at the college level but if possible to jr and sr hs), and the homeless (at shelters and transitional housing), as well as include collaboration with

			other organizations, such as The SD Foundation, who are conducting their own, related efforts.
spevakgin@gmail.com			<p>(Sent via e-mail on 10/25/2012 to Paula Zamudio) Thank you for the summary of the meeting. I was sad not to be able to attend, but the time and location did not work for me. In the future maybe you could hold web meetings where we could phone in and ask questions, take polls, etc.</p> <p>Even though I could not attend I am so very pleased with what the 120 people who did attend, and what they came up with. I could not agree more and love that better and more efficient public transportation came up over and over again.</p> <p>What is the next step? What will you do with this information? Is there an organization I can contact who's sole focus is better public transportation in San Diego? Do we need to sign petitions to get some long range vision started?</p> <p>Is there a video of the meeting we can watch so we can see what took place?</p>

<p>joe@avetterra.com</p>			<p>(Sent via e-mail on 10/25/2012 to Paula Zamudio) I attended last Friday's Public Participation Session. I meant to ask if SANDAG intended to convene a stakeholder's panel for the RTP update. I ask because Community Planners Committee (CPC) previously had 1 or 2 seats on that panel. It seems SANDAG is taking a different approach this time but I did not want to make any assumptions.</p>
<p>jimbellels@cox.net</p>			<p>(Sent via e-mail on 10/19/2012 to Paula Zamudio) Here's my regional plan. Creating a Sustainable Economy and Future On Our Planet</p> <p>The San Diego/Tijuana Region A Case Study By Jim Bell Second Edition March 20, 2007</p>
<p>MBROWN@rbf.com</p>			<p>(Sent via e-mail on 10/30/2012 to David Hicks and Paula Zamudio) Thank you for the opportunity to participate in the workshop for the combined regional plan. I was at your "Reaching Out" table in the second round, sitting directly across from David. I am a planner with RBF Consulting and recently transferred from Irvine to the San Diego office so that I could live here.</p> <p>If you haven't already decided on a Web platform for participation, I wanted to let you know that we like MetroQuest quite a bit--the product is good, and they are really responsive. RBF's new parent company has used them for large-scale</p>

			<p>transportation projects and we recently used them for a survey about ped and bike access to Metrolink stations in Orange County. The MetroQuest platform includes a scenario comparison tool and the ability to place comments on a map. Please let me know if you'd like to talk to them or to someone at our company who has worked directly with them.</p> <p>As a new transplant to San Diego, I find it exciting that there is a growing interest in public engagement on the part of both SANDAG and the San Diego Foundation. I also hope that there is some coordination between those efforts. I've even wondered if one of the organizations would be interested in forming an advisory body focused on public participation in the San Diego region. I really enjoy talking with other people in this field, so I would love to try to make that happen!</p> <p>In any case, I hope that you'll continue to reach out as you plan for public participation. Thanks again and I look forward to being involved in the future.</p>
<p>wingfield.richard@yahoo.com</p>		<p>2140 D Ave, National City, CA</p>	<p>(Submitted via Written Comment on 10/19/2012 at Workshop) I didn't have time to stay but would like to get some ideas across. A county wide interconnected trail system would be a great alternative means for transportation for transportation and I would like to see and increased emphasis placed on light rail for the county.</p>

crystal@enviromineinc.com	(619) 284-8515	3511 Camino Del Rio South, San Diego, CA	(Submitted via Written Comment on 10/19/2012 at Workshop) Please include the construction aggregates interests in the process. We want to be included in how the plan develops. Distance Matters. To build roads and transit in the RTP we need to plan where the construction aggregate is going to come from. This land use is important and essential to be included in the process.
dianepitzel@hotmail.com	(619) 574-0905	4378 Cleveland Ave, San Diego, CA	(Submitted via Written Comment on 10/19/2012 at Workshop) I would like to serve as a public transit advocate for my neighborhood (University Heights) as well as the larger community. I believe that the value of my perspective is that I rely on public transit and have since moving to San Diego in 1984. I would hope that my participation could be rewarded with a free monthly bus pass or some incentive to make my time an investment that works both ways. Nice event today. Best of luck with all of the public transit advancements you are creating.
emsand1952@yahoo.com	(619) 269-2719	4670 Alpine Drive, San Diego, CA	(Submitted via Written Comment on 10/19/2012 at Workshop) Ask me back! Loved it.

WORKSHOP SUMMARY: FOCUS ON HEALTHY ENVIRONMENT, ENERGY, CLIMATE CHANGE AND PUBLIC HEALTH - MAY 17, 2013, AT CALTRANS

Thank you to the more than 150 participants who took part in last Friday's workshop on San Diego Forward: The Regional Plan on Regional Bike to Work Day!

Your input and feedback are keys to the process of creating a vision and plan that will keep the San Diego region a great place to live now and in the future. If you attended Friday – remember, there are more workshops coming up, so please stay involved. And if you couldn't make it, consider attending an upcoming event – the next one will be held on the evening of June 6, in English and Spanish, at Casa Familiar Civic Center in San Ysidro. For more information, visit www.sandag.org/sandiegoforward.

Below is a summary of the thoughtful and extensive input provided by stakeholders during 30 facilitated roundtable sessions held at the May 17 event. This input will be used to shape policy objectives related to healthy environment, energy, public health, and climate change in San Diego Forward: The Regional Plan.

Listed below are just some of the ideas and concerns expressed by participants at the workshop, and some pictures, too.

Thanks again – and we hope to see you at one of our upcoming workshops.

Climate Change

- Place greenhouse gas (GHG) reductions at the center of the identified Regional Plan goals and objectives.
- Provide strong regional policy guidance on GHG emissions reductions.
- Address Environmental Justice (EJ)/Public Health issues associated with climate change and the measures to reduce GHGs.
- Explain the full set of options that the SANDAG Board has in expending *TransNet* funds (e.g., what percent/amount of funding and category/function/program can't be modified but every 10 years, what requires 2/3 vote to modify, and portion of the allocation is discretionary).
- Comprehensively add both climate adaptation and mitigation (without silos) and promote the synthesis between the two plans (the Regional Transportation Plan and the Regional Comprehensive Plan).
- Prepare for the impacts of climate change on both the natural and built environments. Key concerns include increases in wildfires and heat waves, sea-level rise, water supply and demand, public health impacts, agriculture and food-security, and disproportionate impacts on low-income, minority, and senior populations.
- Pursue regional coordination on climate change and adaptation efforts. We need scalable solutions – from the parcel to the regional to the state level.
- Promote best practices that provide co-benefits, such as xeriscaping, graywater re-use, tree planting, and other low-impact development solutions.
- Prioritize transportation investments based on their benefits to the environment.
- SANDAG should provide a forum for regional collaboration, incentives for adaptation and mitigation, guidance on design standards, and other resources to address climate change.
- Build transportation infrastructure that can withstand the adverse effects of climate change, like sea level rise.
- Incorporate greenhouse gas (GHG) reduction and climate change efforts into the regional plan (including goals, policy measures, and funding opportunities).
- Plant more vegetation/trees now as a low-cost mitigation measure that will ultimately absorb more GHGs in the future and enhance communities.
- Empower the community to address climate-related behaviors at an individual and neighborhood level. Start with educating the children.

Air & Water Quality

- Address respiratory problems with better public transportation, more carpooling and vanpooling, and communities where people can bike and walk more.
- Bring air quality issues down to the micro level, for example, by bringing small hand-held air quality monitoring devices to community members.
- More urban forestry/vegetation can help reduce air and water pollution, and improve economic conditions in local communities.
- Work within the environment: create more attractive spaces using native species – these don't require a lot of water and fertilizer.
- Create a regionally driven policy for reclaimed water.
- Look at all impacts related to water quality, not just the impacts related to new development projects.
- Address both health and social equity issues related to air and water quality – need to focus on impacted communities, those that suffer the most.

Habitat & Shoreline

- San Diego has been successful in preserving habitat. Focus on restoring and providing access to these areas.
- Incentivize higher density development around transit. That would allow people to get around easier and also preserve open space.
- Make access to open spaces more equitable.
- Wetlands protection needs to be done on a larger scale; wetlands protect shorelines and act as carbon sinks.
- Wetland rehabilitation efforts that remove concrete linings of channels and restore the riparian habitat are important, and we should also incorporate bike lanes so that people can enjoy it.
- Make policy changes that incorporate permeability and other green infrastructure codes that help mitigate urban run-off.
- Create open spaces and trails for residents in developed areas.
- Create policies that require upland development projects to include a sand mitigation component as this material can no longer flow naturally from inland to the coast.
- Balance preservation and recreation – providing access while protecting habitat.
- Develop bicycle trails along the San Diego River to mix the green corridor into open space – like the San Antonio River Walk.

Healthy Communities

- The ability to walk and bike within communities and to school is important.
- Consider rethinking the methodology of how trips are calculated within a complete streets framework, using something other than Level of Service (LOS) and moving toward a multi-modal analysis.
- Look at the inequities and health disparities between neighborhoods and focus the investments in areas of need.
- Look at areas with concentrations of obesity and diabetes and examine current transportation infrastructure to find the gaps. Shift transportation modes toward active transportation.
- Make public health a line item within the policy making process, and not an afterthought – focus on how to bridge disparities.
- Consider the needs of all populations including the aging population.
- Create bike facilities for commuting AND recreation.
- Marry functionality and safety in neighborhood design to encourage more walkable communities which can lead to greater social interaction.
- Need walkability connections to grocery stores, creating access to healthy foods.
- Leverage existing resources with the Human Health and Services Agency (HHS) and other organizations.
- Provide more diverse bike options. Class 1 lanes are not very common in California, but for women in particular, they could help lower stress levels for biking.
- Social equity is important to address with public health because many communities have suffered from years of disinvestments, and have higher rates of chronic diseases, including diabetes.
- Healthy communities and public facilities should address the needs of the homeless.
- Healthy communities should have a robust urban forestry program, and a lot of green space. This can impact food, safety, and health.
- Where one lives should not determine the quality and length of life.
- Promote policies that motivate healthier food options to move into low-income neighborhoods, and provide incentives to those companies which promote healthy eating.

Clean Energy, Clean Fuels & Innovation

- Place a high value on issues that will be important for the younger generations.
- Plan and build facilities for safely riding bikes to and from school.
- Alternative energy sources:
 - Energy efficiency and roof-top energy needs to be a priority in making communities more self-sufficient.
 - Need to fit the communities that we already have with photovoltaics, and deemphasize fitting the back country with large energy plants.
- Transit centers could have conference rooms attached so people can rent a room and hold meetings at a place that is accessible by transit.
- The net energy use by communities should be evaluated.
- Encourage roof-top photovoltaic: public buildings, industrial and residential.
- The only practical way to get people to use the good stuff is to highly tax the bad stuff. This is politically unpopular, but economically popular.
- Presentations to high school students nearing driving age should be made regarding affordable energy-efficient cars.
- Car2Go is good program because buying a zero-emission vehicle is out of reach to many families
- There are programs that help seniors with the bills and they talk to them about other ways to save money. Many seniors have inquired about ways they can be more environmentally friendly
- Border crossing wait-times should be improved to reduce emissions and health impacts.
- Provide opportunities for and promote mobility options that produce low emissions or no emissions at all (bicycling and walking).
- Create community garden opportunities to reduce emissions related to the transportation of fruits and vegetables.
- Focus on renewable energy (e.g. wind, solar, geothermal) and increasing low carbon fuel standards.
- Focus on distributed (on-site) generation of green energy. Solar, wind, biofuel require less infrastructure and protect open space/habitat areas; industrialized solar/wind energy is destructive and requires transmission lines.
- Build more infrastructure to support electric cars.
- Develop apps or ways people can determine how much water and energy they are consuming to help them conserve and use these resources more efficiently.
- Focus on green jobs related to transportation, buildings, etc.; support entrepreneurs.
- Reduce energy use by buying local food and creating food hubs.

WORKSHOP SUMMARY / RESUMEN DEL TALLER: JUNE 6, 2013 / 6 DE JUNIO DE 2013 CASA FAMILIAR, SAN YSIDRO

ENGLISH	ESPAÑOL
<p>Thank you to the almost 100 participants who took part in the June 6th workshop on San Diego Forward: The Regional Plan!</p> <p>Your input and feedback are keys to the process of creating a vision and plan that will keep the San Diego region a great place to live now and in the future. If you attended – remember, there are more workshops coming up, so please stay involved. And if you couldn't make it, consider attending an upcoming event – the next one will be held on the evening of June 13 in Escondido. For more information, visit www.sandag.org/sandiegoforward.</p> <p>Below is a summary of the thoughtful and extensive input provided by stakeholders during 30 facilitated roundtable sessions held at the June 6 event, and some pictures are included, too. This input will be used to shape policy objectives in San Diego Forward: The Regional Plan.</p> <p>In addition to this summary, a complete set of notetakers' notes has been posted on the website. We have also added notetakers' notes from the May 17 workshop to the website.</p>	<p>¡Gracias a los casi 100 participantes que tomaron parte en el taller del jueves 6 de junio en Adelante San Diego: El Plan Regional!</p> <p>Su aporte y retroalimentación son claves para el proceso de crear una visión y un plan que mantendrá la región de San Diego como un gran lugar para vivir ahora y en el futuro. Si usted asistió al taller, le recordamos que habrá más talleres para seguir involucrado. Y si no pudo participar, considere asistir a un próximo evento. El próximo taller se llevará a cabo en la tarde del 13 de junio en la ciudad de Escondido. Para obtener más información, visite www.sandag.org/sandiegoforward.</p> <p>A continuación se encuentra un resumen de las ideas y reflexiones que los participantes expresaron en las 30 mesas redondas facilitadas en el taller del 6 de junio y se incluyen algunas fotos, también. Esta retroalimentación será utilizada para dar forma a los objetivos de política en Adelante San Diego: El Plan Regional.</p> <p>Además, un resumen completo con las notas que se tomaron en el taller se ha publicado en la página de internet. También hemos agregado las notas del taller del 17 de mayo a la página de internet.</p>

ENGLISH TABLES

MESAS EN ESPAÑOL

Mobility

- Promote a well-integrated, multimodal transportation system with an emphasis on transit access and frequent service, safe walkable streets for all ages, and bikeable communities to provide access to daily uses such as groceries, healthcare, and jobs, and to promote healthy lifestyles and a strong sense of family and community.
- Add more frequent Trolley services at the border, recognizing that the Trolley provides transportation for both the local community and international travelers.
- Add localized transportation options, such as jitneys, within the San Ysidro community.
- Focus on walkability as a key priority for residents in San Ysidro. Barriers include wide roads, large parking lots, missing/inadequate sidewalks, and not enough street lighting.
- Balance regional and local transportation needs by adding criteria considering transit service to particular neighborhoods.
- The San Ysidro Transit Center is the busiest Trolley station in the region and represents the beginning of the Trolley line at the border. It is a perfect opportunity to take it above grade.
- Adopt policy changes similar to Portland's that build upon a pyramid of pedestrians first, bicyclists next,

Movilidad

- Se necesitan rutas de transporte público más directas, rápidas y con mejores conexiones.
- El tipo de transporte público cerca de la frontera está en malas condiciones. Los Trolleys hacia el norte son más nuevos y están en mejor condición.
- En los fines de semana, el servicio de transporte público no cumple con las necesidades y no es suficiente.
- Los operadores de los autobuses no tienen paciencia con los adultos mayores.
- No hay espacio en el Trolley o autobuses durante las horas pico.
- Hacen falta pasos a desnivel en la ruta del Trolley.
- Compass Card no es adecuado y es muy caro. Una familia de cuatro personas sin carro no puede pagar el costo para cuatro pases mensuales.
- Se necesitan baños en las estaciones.
- Se necesitan banquetas para acceder a las escuelas. No hay la seguridad para caminar.
- No hay rutas disponibles para bicicletas.
- Cuando atardece, es peligroso para los niños que caminan y no hay suficientes autobuses.
- Se necesita más transporte público para los niños. Caminar no es posible cuando hay distancias largas a la escuela.

transit, commercial vehicles, taxis, then single vehicles last.

- Focus on infrastructure for pedestrians and bicyclists to improve safety, especially safe routes to schools.
- Explore better greenhouse gas (GHG) emission reduction alternatives.
- Use urban growth boundaries to maximize infill opportunities.
- Provide more security on the bus/trolley.

Healthy Communities

- Provide more access to organic products and healthy foods.
- Invest in more public transit and bike paths.
- Create a more attractive pedestrian environment – wider sidewalks; places to sit; shaded areas, trees.
- To improve air quality, create more green areas, plant more trees, and provide a natural buffer between homes and freeways.
- Add security to the Trolley and remove trash from the Trolley cars.
- Address idling from cars at the border crossing.
- Reduce high levels of toxins in the soil to promote gardening.
- Invest in special paint that attracts carbon to the walls.
- Improve crosswalks; design streets and communities for people, not cars; promote more ways to connect.
- Address safety concerns of children when there aren't enough sidewalks near schools – they have to go through paths in canyons – no lighting, sometimes encounter dangerous wildlife.
- Provide more open spaces such as small pocket parks that can be within the neighborhood for families to stop by; place to socialize.
- Provide access to The Tijuana River Valley – beautiful but no trails.
- Close down a street for a street fair or farmers market and promote a community garden.
- Provide incentives/shared bike program for people who use their bikes at the border.
- Build a Class 1 Bicycle path from the international border to the Bayshore Bikeway.

Healthy Environment

Comunidades Saludables

- Atraer mercados que ofrezcan comidas y productos orgánicos.
- Mejorar la promoción del uso del transporte público a la comunidad.
- Mejores calles; arreglar los hoyos que existen en las calles; construir más banquetas para la seguridad del peatón y la juventud.
- Deben de haber rutas seguras a la escuela para los alumnos.
- Crear mejor acceso para el peatón al transporte público.
- Se necesitan mercados que sean más económicos, saludables y sustentables.
- Combatir y eliminar el uso de drogas dentro de la comunidad.
- Contaminación – el smog ha causado el incremento de casos de asma; se debe reducir el uso de carros para reducir la contaminación.
- El tiempo que se toma para cruzar la frontera es demasiado. La demora causa una “tortura” y causa un estrés muy grande.
- Necesitamos educación para el ciclista, el conductor, y para la comunidad para mejorar la seguridad de todos.
- Se debe ampliar los carriles para ciclistas sobre la calle para mejorar la seguridad.
- Necesitamos sembradillos locales – se debe usar lotes vacíos para la educación y para mejorar la comunidad.
- No hay hospital en San Ysidro.
- Necesitamos mejores parques y que estén bien cuidados y seguros y que cuenten con baños. Crear un programa como “Park and Ride” en la comunidad y aumentar el acceso a “van pools”.

Medio Ambiente Saludable

- Manage water runoff more effectively since the water eventually goes out to our beaches.
- There is a new global climate law in Mexico, so work together to achieve certain greenhouse (GHG) emission goals.
- Address air pollution and the negative health impacts caused by idling cars at the border.
- Promote more connections to the Tijuana Estuary so that people can appreciate the natural resources and become more active in that area.
- Address beach closures in Imperial Beach due to high levels of contamination and sewage.
- Encourage more public areas to be non-smoking.
- Climate change and sea level rise is a concern. Everything is interconnected and sea level rise will make crops harder to grow.
- Work with the Environmental Health Coalition, Wildcoast, and Ocean Force to look at salinity of the oceans, tide levels, and effects on ecosystems.
- Reinstate the bike incentive for crossing the border.
- Reduce crime. Crime is an aspect of healthy environment, because it restricts people from going out on walks or letting their children outside when it is not safe, and this limits activity levels and community participation.
- Increase children's education programs focused on the outdoors.
- Se necesitan más árboles.
- Hay que conservar el agua y usarla en forma más restringida.
- Hacen falta más baños en los parques.
- La contaminación del aire en San Ysidro es cuatro veces peor que en otras comunidades de San Diego.
- La línea azul del Trolley paga por el sistema; es la línea que funciona mejor.
- Sería bueno tener un tren como el COASTER que fuera hasta la frontera.
- San Ysidro debe ser un centro de transporte; mucha gente se va hasta Los Ángeles.
- Hacen falta campañas de educación para que la gente entienda como sus acciones impactan al medio ambiente. Se necesita una campaña dirigida a las empresas también.
- No hay confianza en el agua potable.
- El agua es caro; no se puede usar la de la canilla.
- Debe haber usos distintos de agua (agua de riego versus potable).
- Necesitamos más arborización de las calles.
- Promover en las escuelas la protección de la playa.

Energy and Climate Change

- Increase awareness and understanding of how climate change relates to the average person.
- Tailor the message to different population segments, taking factors such as language and culture into consideration.
- Provide more green space, which can help address pollution and climate change.
- Expand Car2Go car-sharing throughout the region.
- Demonstrate the benefits of making individual changes to reduce GHG emissions.
- Invest more in sustainable energy.
- Increase gas prices to encourage alternative forms of transportation.
- Synchronize stoplights to reduce idling, traffic, and pollution.
- Proactively and naturally reduce fuel for wildfires, for example, by using goats.
- Change building codes to allow gray water to drain directly into gardens/landscaping.

Energía y Cambio Climático

- En la frontera, hay más contaminación que se siente más por la cercanía a la garita.
- Revisar las emisiones de vehículos que cruzan la frontera.
- Educar más a los niños acerca del cambio climático.
- Publicar los horarios de la escuela y qué relación tienen con los niveles de emisiones.
- Simplificar la información para que gente entienda.
- Agilizar el cruce fronterizo para los peatones.
- Implementar paneles solares y sistemas eólicos.
- Difundir la información de planes y programas de desarrollo en lenguaje coloquial.
- Sembrar más áreas verdes y jardines para respirar aire más puro.
- Aprovechar la energía solar.
- Mejorar la eficiencia de los vehículos y reducir las emisiones.
- Caminar y andar en bicicleta como medio de transporte.

- Collect rain water as a sustainable way of conserving water.
- Provide electric vehicle (EV) charging stations, raise gas prices, and offer incentives to encourage people to use alternative fuel vehicles.
- Demonstrate cost comparisons and provide education on the benefits of electric/ alternative fuel cars.
- Build better bike lanes and dedicated bike lanes.
- Spend less money on highways and more on public transit.
- Invest more money into each individual community, not just transportation but infrastructure, so that people don't have to leave the community in order to find medical services or grocery stores, or meet other basic needs.
- Usar transporte público y compartir carro para reducir emisiones.
- Informar a la gente acerca de cómo reducir el cambio climático y la contaminación, usando impuestos de negocios contaminantes.
- Plantar más áreas verdes en San Ysidro y promover campañas de forestación.

Economic Prosperity and Borders

- Reduce border wait times. Lengthy wait times affect prosperity, health, pollution, and the environment.
- Invest more in border infrastructure as this can lead to more jobs and a healthier environment.
- SR 905 interstate was a great addition.
- Assist seniors. Currently it is difficult for seniors to find work since finding ways to commute can be a challenge. They also have difficulty accessing social services, groceries, medical care, and housing.
- Address the mismatch between skills of individuals and skills needed in jobs.
- Invest more in schools and motivate students.
- Invest more in communities that haven't received as much; social equity.
- Increase the focus on education & school achievement. In San Ysidro, create more STEM (science, technology, engineering, math) programs and add a college in South Bay.
- Recognize that many people own business in Tijuana but live in San Diego, and that they are contributing to both economies.
- Think of San Diego and Tijuana as a mega-region.
- Collaborate on transportation. Continue rail service south of the border. Integrate rapid transit from Baja to Alta California, with no need to transfer at the border.
- Acknowledge that trade at our border affects many states. For example, items manufactured in maquiladoras don't just stay in San Diego...what

Prosperidad Económica y Fronteras

- La frontera y la prosperidad económica están profundamente vinculadas porque hay mucho comercio entre las comunidades de San Diego y Tijuana.
- Por los altos costos de vida en San Diego, mucha gente se va a vivir a Tijuana. Rentar una casa puede costar \$300 dólares, lo que en San Diego no existe.
- No se puede cruzar la frontera para ir de visita o de compras debido a las demoras actuales, y eso está impactando de manera negativa la economía fronteriza; muchos negocios están cerrando porque no hay suficiente comercio.
- Hay que hacer la gestión de la frontera una prioridad.
- Los tiempos actuales de espera impactan de manera negativa la salud mental y física de las personas quienes tienen que cruzar.
- Hay que invitar a los agentes federales a eventos comunitarios para que participen en las discusiones sobre cómo mejorar el funcionamiento de la frontera y para que escuchen las preocupaciones de la comunidad, pues ellos viven aquí, van a nuestras escuelas, usan nuestras calles, etc.
- Se deberían enfocar más recursos en las instalaciones públicas para la comunidad en lugar de invertirlos en el turismo.
- Se debe generar más trabajos mejor remunerados para que la gente pueda salir adelante económicamente.
- Se deben aumentar las opciones o alternativas de

happens if they are delayed due to border crossing waits?

- Learn from each other regardless of language or cultural barriers.
- Consider smart parking; build up instead of across.
- Implement a marketing campaign with San Diego and Tijuana ambassadors, including tours on how Tijuana really is. Should be able to say “Let’s go to Tijuana to grab dinner, see a show and come back.” It’s done in other borders throughout the world, why not this one?
- There is a need for more:
 - Understanding of diversity.
 - Community action to bridge the border.
 - Blur the separation, as we move forward... it seems like the division gets stronger and we need more collaboration.
 - Easier border crossing system – enhances the regional economy & better relations.
- Concerted campaign to engage everyone.

transporte público en la frontera.

- Deben de haber más carriles para peatones que cruzan la frontera.
- Se tiene que desarrollar un centro de transporte y comercio en la frontera de San Ysidro que inspire orgullo y brinde a la gente los servicios que necesita.
- Para lograr la prosperidad económica hay que atender también la educación y la salud pública de las comunidades fronterizas.
- La ciudad de San Diego junto al sector privado debe de invertir fondos para construir un nuevo centro de transporte en San Ysidro
- Hay una gran oportunidad para prosperidad económica en la región fronteriza de Tijuana-San Diego, pero solamente se podría aprovechar de ella si se mejora la organización del cruce fronterizo.

WORKSHOP SUMMARY: JUNE 13, 2013, ESCONDIDO

Thank you to the 30 participants who took part in the June 13th workshop on San Diego Forward: The Regional Plan! Your input and feedback are keys to the process of creating a vision and plan that will keep the San Diego region a great place to live now and in the future. Below is a summary of the input provided by stakeholders during the facilitated roundtable sessions. This input will be used to shape policy objectives in San Diego Forward: The Regional Plan.

For more information and the detailed Note-takers Notes, visit www.sandag.org/sandiegoforward.

Mobility

- Provide more transportation options to people as they age.
- Address barriers to transit, including: infrequent transit service, transfers, the timing of connections, and the design of the pedestrian environment (small sidewalks, massive parking lots, auto-centric roadway design).
- Provide more flexible pricing for transit passes, such as options that allow for two days a month, one day a week, ten uses, etc.
- In Fallbrook, use a mini-bus rather than large buses during off-peak periods.
- Focus on family mobility concepts, such as riding bikes, skateboards, walking, safety, and sidewalks, particularly around schools.
- Decrease bus fares, provide shade at bus stops, and increase transit frequencies.
- Consider raising gas taxes to generate money for more transit options. Revenue from gas tax could be used for transit along the I-15 corridor that would provide equivalent transit travel times compared to a car.

- Front-load the construction of transit projects, and push back freeway projects.
- Recognize that our region is very car dependent.
- Invest in simple infrastructure improvements such as crosswalks and street lights to promote walkability and safety.
- Address traffic congestion during commute times, especially from Escondido to Oceanside.
- In North County, make improvements such as more bike lanes, creek flood mitigation, and increased frequencies on the SPRINTER, COASTER, and buses.
- From the North County perspective, the region should balance transportation investments around the county, even if the majority live in San Diego.
- Explain how the plan will incorporate all of this feedback.

Healthy Communities

- Increase access to active recreation spaces to address childhood obesity.
- Include greater emphasis on “making connections” in grant criteria to improve connectivity from creek crossings or major arterials to schools and parks.
- Provide pedestrian access to destinations that provide social and family services.
- Include greater emphasis on walkability and multi-modal transportation as part of the transportation project evaluation criteria.
- Create clean and aesthetically pleasing streets to encourage walking and being on the street.
- Provide multiple options for accessing healthy foods.
- Concentrate services such as clinics, dentists, and grocery stores in central locations accessible by walking and transit.
- Increase the number of bikes that can fit on a bus rack to help support active lifestyles.
- Don’t invest in bike infrastructure for commuters. Commuting to work by bike is not convenient or efficient.
- Increase pedestrian safety by addressing dangerously wide boulevards.
- Focus bike and pedestrian infrastructure in areas where fewer people own cars, for example, in college communities.

Healthy Environment

- Include buffer zones/set-backs from freeways for new housing developments.
- Maintain existing agricultural lands and industrial zones for a diverse economy.
- Focus on indirect potable water reuse and conservation in addition to imported water.
- Decrease the amount of water used on landscaping in our arid region.
- Use grey water to water plants and yards.
- Focus on the resilience of our food supply as related to climate change.
- Work harder toward the goal of zero emissions at the ports and borders.
- Encourage more grey water use and rainwater harvesting for residents.
- Preserve open spaces to provide people with places to walk, hike, bike, etc.
- Plan neighborhoods in a way that draws people to walking, biking, and using transit to get to places. Make the walkable areas more inviting.
- Support beach sand nourishment along the shoreline.
- Distinguish between conservation and preservation. Some land should be off limits to the public and the public should be informed why.
- Encourage the construction of underground parking garages and underground parking lots.
- Provide continuity between open space trails. Pursue a complete Trail Master Plan to help connect the city trails with county, state, and federal trails.

- For water quality, tie in green infrastructure and permeability.
- Provide incentives for projects that go above and beyond Best Management Practices.
- Encourage water pricing to protect crop production.
- Address zoning issues related to community gardens and use empty lots for growing crops, like in Seattle.

Energy & Climate Change

- Expand installation of solar panels in urban areas.
- Incorporate solar panels into new developments, and use “wasted spaces,” i.e. rooftops, parking lots, etc. for solar.
- Increase use of solar energy in transportation – it has the portability/utility of gasoline and can work with our existing infrastructure.
- Reduce passenger trips and make vehicles more efficient.
- Increase alternative fuel vehicles.
- Encourage the development and use of virtual meetings.
- Promote electrified truck stops in Otay Mesa.
- Continue expanding port on-shore electricity connections for ships.
- Promote organic farming throughout the county’s farms.
- Increase community gardens in urban areas, especially as a teaching tool for children.
- Generate electricity from garbage incineration.
- Install more reservoirs that can capture rain water and install more rain water recovery systems.
- Expand grey water infrastructure and availability.
- Do not expect the business community or developers to finance everything.
- If the cost of doing business increases too drastically, then it becomes economically infeasible for companies to stay here.
- Support strong climate action plans at the city level.

Economic Prosperity & Borders

- Educational debt is a big issue. Reduce high student debt rates and increase job opportunities for graduating students.
- Provide transportation options, especially for college kids who can’t afford a car and gas.
- Explore how the increasing use of online education will affect travel patterns.
- Build more border crossing lanes to reduce border wait times.
- Ensure that there’s a level of prosperity for everyone, not just the top end of income groups.
- Promote jobs with livable wages.
- Coordinate more bike and pedestrian infrastructure in the county – many studies show that these types of investments have positive localized economic impacts.
- Need more job opportunities for people who don’t earn degrees; this has correlation with crime.
- Charge a “cover charge” for commuters coming down the I-15 from the Temecula area.
- Developments within tribal nations can have regional impacts on water quality. Coordinate discussions with tribal nations.
- Retrofit suburbia to draw people in; SANDAG can serve as a partner.
- Increase the reliability of our transportation system to take people to job interviews and work. People are shut out of jobs if the transportation system is not reliable.

WORKSHOP SUMMARY: JUNE 20, 2013, OCEANSIDE

Thank you to the 75 participants who took part in the June 20th workshop on San Diego Forward: The Regional Plan! Your input and feedback are keys to the process of creating a vision and plan that will keep the San Diego region a great place to live now and in the future. Below is a summary of the input provided by stakeholders during the facilitated roundtable sessions. This input will be used to shape policy objectives in San Diego Forward: The Regional Plan.

For more information and the detailed note-takers notes, visit www.sandag.org/sandiegoforward.

Mobility

- Place higher priority on transportation projects in North County, especially to alleviate congestion on the north end of I-5 near Camp Pendleton.
- Accommodate more travel alternatives to the freeway.
- Overcome the LOGUT (Let the other guy use transit) mentality.
- Explore the transportation needs of each unique community – Downtown/urban areas differ greatly from suburban neighborhoods.
- Increase transit frequency and operating hours, especially on Sundays and in the evenings.
- Make bike paths work. Learn from Frankfurt, Germany, where bike paths exist throughout the city on sidewalks rather than in the way of oncoming traffic.
- Promote and build bike corrals, like was done in City of Long Beach.
- Place greater focus on bike security at transit stations.
- Prioritize the double-tracking of the COASTER to make this project happen sooner.
- Move the COASTER station from Sorrento Valley to the University Town Center (UTC).
- Promote reciprocal fare arrangements between Amtrak and COASTER/SPRINTER.

- Improve connectivity across the COASTER rail tracks, particularly in Encinitas for individuals trying to get to school.
- Add transportation connections and safe places to park bicycles at SPRINTER stops.
- Apply I-15 principles (e.g. FasTrak, premium express buses, vanpools, etc.) to I-5.
- Extend car-sharing to North County.
- Support electric bicycles.
- Use technology to its full extent in terms of transportation planning.
- Unbundle parking.
- Consider physically impaired veterans who have special parking and transportation needs and the aging population since many Baby Boomers will be incapable of driving in the future.
- Put a price on carbon emissions to promote market incentives for sustainable travel behaviors.

Healthy Communities

- Offer active transportation options and convenient multi-modal travel choices for all age groups that reduce greenhouse gas emissions.
- Widen and improve sidewalks to promote walking, bicycling, wheel-chair access, and stroller accessibility, and to provide safety and connectivity within the community.
- Provide affordable access to basic necessities such as food, water, and housing.
- Employ local residents, regardless of age, income level, or ethnicity.
- Accommodate and prioritize the needs of the homeless, the aging population, and those with mental illnesses.
- Provide multi-modal and complete streets, increased access to transit for seniors, more senior-friendly buses, and safe housing options for the elderly.
- Promote farmers markets.
- Promote a Walk to Work Day.
- Do more to limit smoking in public areas.
- Encourage new sustainable farming concepts such as the “key-hole garden” – a drought tolerant circular raised bed with a compost pile in center which distributes nutrients to surrounding areas.
- Develop and embody characteristics of resilient communities.

Healthy Environment

- Encourage replacing non-native plants that are used in landscaping by native plants to help conserve water.
- Provide more incentives, such as competitions, to encourage reductions of energy and water use.
- Build more community gardens in the North County Coastal area.
- Create better habitat protection links with watersheds.
- Improve water quality of oceans – can’t swim in the water because of sewage system breakdowns in North County related to old water pipeline infrastructure. Modernize sewage infrastructure.
- Acknowledge that population growth will affect everything; think proactively about ecological and economic issues.
- Recognize and address the barriers to achieving our goals, which include: 1) public mind-set, 2) political mind-set and division of jurisdictional lines, and 3) honest assessment of costs.
- Ensure steady supply of water.
- Consider requiring each city to have a certain percentage of open space.
- Focus on climate stabilization; if we don’t do that, we will lose everything, including habitat.
- Do more than the bare minimum with regard to climate change and environmental issues.
- Build better and more sustainably – everything should be sustainable.
- Understand the trade-offs between desalinization to increase water supply and impacts to the environment and marine life.
- Focus on the quality of drinking water as a #1 priority.

Energy & Climate Change

- Use existing and proven technologies, such as solar power.
- Expand installation of solar panels in urban areas.
- Shade parking lots with solar panels.
- Promote electric-powered vehicles.
- Implement a carbon fee to help solve the GHG emissions problem.
- Promote free markets to handle GHG reductions.
- Strengthen legislation for reducing GHG emissions and keep agencies accountable.
- Promote more public education in schools about climate change at all levels.
- Provide more options for public transportation.
- Create reliable technology for bus stop times on computers and cell phones.
- Work with employers to incentivize ride share and shuttle programs.
- Create tools for disaster planning.
- Create safer and complete streets (cars, biking, walking).
- Maximize “low technologies” such as active transportation (bikeways, walking).
- Support programs that allow individuals to produce biofuels.
- Include regional water issues in the new plan (desalination is very energy intensive).
- Raise personal awareness about energy and water footprint through visual tools.
- Make transportation maps and data more accessible.
- Look for strategies to reduce growth. Population growth is directly correlated with energy use. The easiest way to reduce our energy demand is to reduce growth.

Economic Prosperity & Borders

- Focus on the kinds of businesses you want to attract, such as business clusters with green tech.
- Reduce regulations. The free market will come up with ideas to protect the environment and deal with growth. Regulation is stifling businesses from creating innovative ideas and causing businesses to leave California.
- Encourage job creation closer to people living in Oceanside to improve commutes.
- Increase public transportation between Escondido and Temecula.
- Move people more efficiently across our international border crossings. It takes less time to travel on a plane from Mexico to the United States than to cross the border at San Ysidro.
- Encourage cooperation and cross-border economic development.
- Improve utilization of all border crossing lanes, including the SENTRI and Ready Lanes.
- Address the conflicts between security and ease of crossing at the international border.
- Protect our borders because there are many types of potential threats.
- Consider a train that travels across the U.S./Mexico border. This could help with the time it takes to process individuals through customs.
- Decrease water rates to promote and preserve agriculture in the region.
- Improve wages for lower paying jobs.
- Provide education as a means for acquiring higher paying jobs.
- Encourage apprentice programs and job training programs.

Español

Comunidades Saludables

- Necesitamos acceso a comida saludable y económica, incluyendo verduras frescas.
- Queremos una ciudad limpia; que no tiren basura en la calle y que controlen los animales e insectos.
- Necesitamos calles bien pavimentadas sin baches y hoyos y con banquetas.
- Banquetas son importantes para la gente con discapacidad.
- Es un riesgo para los niños caminar a la orilla de la calle sin banquetas.

- Necesitamos centros comunitarios para que los jóvenes tengan acceso a actividades educativas.
- Es importante alocar los recursos de manera equitativa.
- Deberían plantar árboles en las calles y en los parques.
- Necesitamos más alumbrado/iluminación.
- SANDAG debe de invitar a más jóvenes para escuchar sus puntos de vista también.

Energía y Cambio Climático

- Debemos disminuir el uso de la energía para frenar el cambio climático.
- Los calentadores solares son buenos para ahorrar energía al largo plazo.
- Los paneles solares son ahora más accesibles que antes, pero hay que educar a la gente sobre los beneficios de instalar los paneles solares.
- Hay una falta de infraestructura para cargar vehículos eléctricos.
- Si uno no gana suficiente dinero, no puede comprar una casa, y si uno renta su casa, no se puede instalar paneles solares, o hacer otras renovaciones que ayudan ahorrar energía.
- Deben de haber programas de asistencia que eduquen a la gente sobre cuales tecnologías alternativas se pueden implementar.
- Deben de haber programas de incentivar a la gente tomar medidas de disminuir el uso de la energía, y también utilizar tecnologías alternativas.
- Se necesita reforestar por el bien del medio ambiente y también para el beneficio de la gente y las comunidades.
- Se debe plantar árboles, y también mantenerlos.
- Tenemos que estar preparados para los efectos causados por el cambio climático.
- El cambio climático está conectado al transporte y la salud pública.
- Toma demasiado tiempo usar el transporte público, y el servicio debe ser más frecuente y deben de haber más rutas.
- Las paradas de autobús y del Trolley deben de contar con tejados ya que hay muchas que no los tienen.

Prosperidad Económica y Fronteras

- Queremos mejores sueldos, más trabajos, más oportunidades de educación, y también programas de entrenamiento.
- Empresas privadas deben de ofrecer programas de entrenamiento laboral.
- Necesitamos inversiones económicas en nuestras comunidades.
- La movilidad impacta a la economía; hay comunidades en que no es fácil trasladarse a ciertos destinos.
- Demora de 2 a 4 horas para cruzar la frontera, tanto en coche como a pie.
- Mucha gente, especialmente los de la tercera edad, cruzan a Tijuana para obtener servicios y bienes más económicos, y debe de ser más fácil cruzar.
- Los carros que esperan en la línea fronteriza causan mucha contaminación del aire.
- El smog que está saliendo de los carros en la frontera causa un impacto negativo.
- Las largas esperas en la frontera impactan negativamente a la economía porque personas quiénes quisieran cruzar la frontera para fines comerciales o para hacer compras no lo hace por las demoras.
- Sería una buena idea tener un carril dedicado a las bicicletas, pero tendrían que controlar el tráfico para que la gente no lo abuse.
- Sería buena idea empezar un programa de compartir bicicletas en la frontera.

WORKSHOP SUMMARY: FOCUS ON LAND USE AND TRANSPORTATION - JUNE 21, 2013, CALTRANS

Thank you to the over 125 participants who took part in the June 21st workshop on San Diego Forward: The Regional Plan!

Your input and feedback are keys to the process of creating a plan that will keep the San Diego region a great place to live now and in the future. Below is a summary of the input provided by stakeholders during the facilitated roundtable sessions. This input will be used to shape policy objectives and other core components of San Diego Forward: The Regional Plan.

For more information and the detailed note-takers notes, visit www.sandag.org/sandiegoforward.

Mobility

- Focus on intra-regional mobility which can bring money to outlying areas which can foster regional economic vitality.
- Consider a child bike-share program with helmets as a part of a larger bike-share program.
- Create reliability for developers to invest around transit stations.
- Consider moving air freight travel out of Lindbergh, separating passenger from freight and moving freight to Carlsbad or Brown Field.
- Any type of bike-share program needs to include infrastructure to support safer routes to ride.
- Expand traveler information to ease of use of the systems (e.g., "Next Bus" signs)
- Develop a "transit ambassador" program for seniors.
- Make transit competitive with driving in terms of travel time.

- Apply a complete streets model for main boulevards accommodating multiple modes of travel.
- Provide transit service that reaches hard-to-access job centers (e.g. North County).
- Design transit so that it accounts for different areas (e.g. higher density areas merit light rail projects).
- Improve walk/bike/other connections between bus and rail and to/from destinations.
- Direct growth through transportation investments.
- Encourage growth along Smart Growth transportation corridors.
- Consider public health in decision-making.
- Consider including punitive measures to effect change, rather than just incentivizing change; the 18 cities and Port District should be required to follow the Regional Plan goals and principles.
- Include transportation options for all demographics (e.g. youth without licenses trying to get to beach as well as aging population of baby boomers).
- Promote telecommuting and encourage businesses to offer telecommuting to their employees 1-2 days per week.
- Consider sidewalk access and improvements.
- Look at impacts of freight movement versus other modes – do the needs of trucks conflict with the needs of bikes, for example.
- Make transit convenient, cost-effective, and reliable so that transit is competitive with driving.

Parking and Pricing

- Integrate parking with purposeful economic returns.
- Balance demand management strategies (congestion pricing) with alternative transportation modes (public transit, active transportation, etc.).
- Make car-sharing a more attractive option for transit users.
- Develop park-once strategies where people are encouraged to 'park once' during a day/trip.
- Use metered parking in a manner that creates turnover of spaces in high demand (for shopping or dining purposes, for example) and allows longer term metered parking (for work/employment) further away.
- Use emerging technologies to connect the public with available parking (available parking spots/vacant lots, variably priced metered parking, etc.).
- Survey communities to better understand their specific needs, in order to create more tailored solutions rather than a one-size-fits-all.
- Consider shared parking strategies that balance the peak AM/PM use and off-peak uses.
- Allocate the parking revenues to contribute to not only to the enhancement of the transit experience, but the walkability of the street.
- On the private side, we need to give carpools priority parking. Cities should require it.
- Companies should be incentivized to reduce employee parking and to subsidize transit passes.

Land Use Scenarios

- Give more priority to protecting our urban open space, recreation, and habitat areas.
- Expand the higher density core to include Chula Vista and the border area.
- Include the area south of the border for affordable housing opportunities.
- Explore the impacts of each scenario on the economy, health, environment, and quality of life.
- Explore smart growth scenarios that help with transportation choices, transportation costs, and health benefits.
- Consider second units close to the transit oriented development areas.
- Look at the redevelopment of the region's commercial areas and development of shopping malls near transit hubs.
- Address jobs/housing fit and try to do a better job of matching income levels with housing choices to address the range of types of income levels in a job place (i.e., high-paying jobs versus service workers working in high-tech buildings). SANDAG's modeling process should look at the implications of jobs/housing fit.
- Modify scenarios to acknowledge and better integrate the major employment clusters.
- Conduct a market feasibility analysis on all of the scenarios.

- Map topographic land constraints; many slopes are uninhabitable for human development. River valleys and steep slopes are not suitable for human development.
- Create a scenario with urban growth boundaries.
- Address sea level rise in the scenarios.
- Consider placing just as much emphasis on creating more walkable and bikeable communities than is placed on transit oriented (TOD) communities so we do not have to invest in so much public transit.
- The TOD scenario is more reflective of where job centers are throughout the region.
- Consider housing costs and affordability in scenarios.
- Consider quality of life issues and transit access to parks, healthcare, education, family resource centers, clinics, childcare, and other community resources/social service facilities.
- Adapt to current trends such as telecommuting, co-work spaces, etc. which are becoming more popular and more sustainable.

Active Transportation

- Focus on Safe Routes to Transit as a key goal.
- SANDAG is doing an admirable job at trying to connect with communities but needs to do a better job in reaching out.
- SANDAG's efforts to reach-out and invite participation from groups that traditionally are not engaged in the process are appreciated and beneficial.
- Broaden the active transportation goal to include skateboarding, scooters, etc.
- Implement separated bicycle infrastructure facilities on major corridors.
- Plan according to younger generations that want to live in communities where they can walk and bike.
- Improve systems for carrying bicycles on transit vehicles.
- Engage schools as a method of encouraging kids to walk and bike to school.
- Consider expanding wayfinding signage to direct users to transit stops which would encourage people to bike.
- Develop infrastructure like bike stations to encourage more people to bike to transit.
- Separation between bicyclists and vehicles is critical since a fear of safety is a barrier.
- Incorporate the complete streets concept into SANDAG's planning.
- Offer incentives to encourage more biking; encourage employers to provide more shower and locker room facilities to employees.
- Encourage bicycle education.
- Emphasize utilitarian trips and not just commuter trips.
- Having an Active Transportation discussion puts health first and foremost including individual and environmental health.

Emerging Technologies

- The ability to track the bus is important when people are going somewhere.
- Self-driving vehicles can help reduce accidents.
- When considering emerging technologies, include sustainability, mobility/accessibility, and safety.
- The idea of crowd sourcing would be easy to focus on and easy to do. Provide the cloud to interested individuals and go beyond what is traditionally done.
- Expand Car2Go system geographically so that there is coverage across the whole county.
- Expand the availability of plug-in charging.
- Use technology for information such as real-time traffic information. This would help people decide what mode of transit to take and what route.
- Provide a greenhouse gas calculator application to help change peoples' behavior
- Apply emerging technology to infrastructure improvements that reduce reliance on vehicles.
- Consider security and loss of privacy.
- Keep up with technology – signal detection, loops, etc.
- Technology can help with lowering costs.

- Autonomous vehicles are an easy solution to reckless drivers; they would allow more cars on the road without building more lanes, and the idea holds promise.
- The shared economy (Car2Go, etc.) is growing. Consider this in the planning process.
- Provide better traveler information.
- Consider equity as an issue since there are barriers to entry for technology, and not everyone can afford a smart phone, car, or Google glasses.

Transportation Project Evaluation

- Consider sustainability and return on investment. Can you sustain what you are building?
- Incorporate public health into the evaluation criteria and prioritization of transportation projects.
- Balance return on investment and use of transportation facilities.
- Provide a complete analysis of the costs and benefits of the projects, on other forms of transportation, and compare between all modes of transportation.
- Encourage smart growth, neighborhood shuttles.
- Add reduced GHG emissions to the criteria.
- Place greater value on community involvement and input in the evaluation of these projects. Make sure the community's voice is heard.
- Focus priority on moving the most people at the least cost and increasing transit frequency.
- Consider density as a factor in determining transit project priorities.
- Think about health costs, too.
- Keep equity in mind... neighborhoods that don't have many transportation options should be focused on first.
- Think about students, where they need to get to, and how they get to school, and how they make their connections.

WORKSHOP SUMMARY: JUNE 27, 2013, LA MESA

Thank you to the nearly 90 participants who took part in the June 27th workshop on San Diego Forward: The Regional Plan! Your input and feedback are keys to the process of creating a vision and plan that will keep the San Diego region a great place to live now and in the future. Below is a summary of the input provided by stakeholders during the facilitated roundtable sessions. This input will be used to shape policy objectives in San Diego Forward: The Regional Plan.

For more information and the detailed note-takers notes, visit www.sandag.org/sandiegoforward.

Mobility

- We need to change the mentality of “us” versus “them” between bicyclists and automobile users.
- Having kids makes it challenging to take public transit. Transit should be more family friendly.
- Change SANDAG’S current policy goal from expanding local freeways and roads, to one that focuses instead on no-automotive mobility approaches.
- Focus on infrastructure for pedestrians and bikes to improve safety including the development of a region-wide bike path network that does not require bikes to share the streets and roads with multi-ton cars and trucks.
- The public perception of transit needs to change to increase ridership.
- Automobile use is easy and convenient; therefore if you make transit and biking more convenient, then more people will use alternative transportation.
- Build bus and transit directly to the airport and to the beach, in rapid fashion.
- Focus on connecting and developing older neighborhoods as well as newer neighborhoods. Include all neighborhoods in the process.
- Encourage density, mixed use development, and active transportation so there can be more growth in smaller neighborhoods so that people don’t have to travel outside of their communities.

- Education and outreach need to be made a priority.
- Seniors have limited transportation options regarding access to food, medicine, and amenities.
- Busses should be converted to alternative/non-polluting types of vehicles.
- Keep jobs and housing in one specific area. Make it so people don't have to travel as often to achieve their daily tasks.
- Access to reasonably priced healthy food, health care facilities and services is lacking in rural areas.
- SANDAG should consider opportunities for a bi-national convergence using a form of smart growth in a rural setting.

Healthy Communities

- We need to plan for mother-in-law flats so that elderly and disabled or ill can age in place or be cared for by their families.
- The first and last mile for transit becomes a greater challenge due to hilly topography.
- It is preferable to live with a grocery store within walking distance. La Mesa residents are concerned about the emergence of 7-11 and the sale of alcohol, cigarettes and unhealthy foods.
- There needs to be more affordable housing to support the large refugee population in San Diego.
- Smoke free parks and trolley stations would support a healthy community. Secondhand smoke inhibits the health of others and is a big problem.
- Accessibility, safety, and engagement are important in a community. People need destinations and a sense of place to feel safe.
- The ability to grow your own healthy food could support a healthy community. Since not everyone has a yard, community gardens and urban agriculture regulation reform can improve access.
- There needs to be safety for children in order for parents to allow them to walk or bike to school.
- Walking school busses are brilliant. Encourage more ideas like this.
- Connectivity in La Mesa is important. Freeways break up communities. We need to provide better pedestrian access to circumvent freeways and reconnect communities.
- We need interregional connectivity. There should be a comprehensive bike network connecting the region.
- Support policies and programs that integrate health in the planning process. Transportation planners should interact with health care districts to educate the public on how vehicle emissions affect personal health and community health.
- Implement effective and informative signage, especially that which transcends language barriers.
- Consider placing distance markers along trails and sidewalks to encourage pedestrians to monitor their physical activity. For example, some seniors set a pedometer goal of 10,000 steps each day.
- Green spaces should be accessible by walking and accessible to all demographics. Parks are important because there is a correlation between access to green spaces and mental health.
- Acknowledge the health-wealth disparity in transportation planning; Public policies should reflect the fact that some people are more impacted by policy decisions.
- Make public transit economically attractive and time efficient.
- Update the iCommute webpage so that it is more user-friendly.
- Support a concentrated effort to provide mental health support to homeless people.
- Consider mitigation strategies to address the noise and air pollution near Gillespie Field.
- Encourage programs and policies that promote community gardens and parks.

Healthy Environment

- The local and state trails are disconnected. We need a forest system to link everything together.
- Shoreline is important for our regional economy, but it sounds like we're destroying one ecosystem for ours through the beach sand replenishment program.
- We need to have better land use controls upstream – we let people build so close to the shoreline that it degrades environment.

- Provide more funding for active transportation projects and invest in systems (like BRT) and technologies that produce less exhaust.
- Runoff from roads impacts shoreline, habitat, water quality.
- I like the current habitat preservation goals, and would like to see a greater emphasis on that as the plan develops.
- We need more shade trees that cool the environment.
- We need for better education programs to foster understanding and stewardship for natural resources, especially in schools.
- Use porous materials for roads and sidewalks, which will replenish aquifer
- We need to restore our watersheds as much as possible. Watersheds that have been compromised have a higher occurrence of natural
- A lot of energy goes into making potable water – use it appropriately.
- Secure the local water supply by including desalinization.
- Encourage complete communities and ensure access to affordable local produce so that less energy and emissions are used for transporting goods. This is especially important for disadvantaged communities.
- People are not able to enjoy the open space if they are not able to get to it. However, the idea of people driving to the natural spaces is very unfavorable. People driving to these locations means that the fresh mountain air that is so valued will become polluted.
- There should be more agricultural lands for crop production in San Diego.
- More grey water should be used for watering plants.
- It should be a requirement for new housing developments to use drought tolerant and native plants.
- More public transportation is needed to reduce the cars on the road and the pollution in the air.
- It is important to keep the open spaces staffed so that they stay maintained.
- There needs to be brush management to prevent fires.

Energy & Climate Change

- The closure of San Onofre has caused a push for increased fossil fuel power plants. SANDAG should try to oversee this to ensure that fossil fuel plants don't pop up as a result.
- San Diego lacks a natural tree scape, as the worst performing region in the US in terms of where our tree canopy needs to be. Planting trees in vacant space (small specimens) and keeping them maintained is the solution to this problem.
- Standardize codes to make permitting easier for solar technology to take hold.
- SANDAG should encourage local agencies to follow green building codes through incentives.
- If you can't measure it, it doesn't exist – we need to have systems that recognize the intrinsic value of the environment and show current regional greenhouse gas (GHG) statistics. We can't move forward if we don't know where we are at.
- The expression of changing a lifestyle scares people; it is more approachable to suggest making small changes to improve one's life and create a healthier environment.
- Incentivize electric vehicles
- Cross border issues – Mexico air pollution and sewage
- The most polluted areas in the region are lower-income neighborhoods. Asthma and cancer rates are higher in sensitive populations, including lower-income, elderly, and disabled populations.
- Gillespie field should be relocated because it is the highest polluting airport in the region.
- Generate more power and energy locally instead of outsourcing. The region should be more self-sufficient and self-generating.
- Implement better landfill models by switching to an anaerobic digestion-model which better captures methane and gets more organics out of the landfills.
- Convert all trash trucks to Compressed Natural Gas (CNG).
- Encourage more rooftop solar. Currently, there are disincentives to putting generated energy back onto grid. SANDAG should stand up against the utility.

- Electric vehicle charging stations at solar panel covered parking lots which will encourage people to buy electric cars (e.g., San Diego Zoo parking lot).
- Educate people on water/energy nexus (embedded energy in water).
- Support Community choice aggregation (CCA), where cities can band together to buy energy and gives consumers a choice in what kind of energy they want.

Economic Prosperity & Borders

- Hiring locally boosts the local economy.
- Economic prosperity needs to be tied with transit investments. Too many people live far away from where they work.
- We need to foster a creative class of young professionals as many leave San Diego due to lack of affordability coupled with the lack of desirable jobs in the region.
- Border wait times are too long - at least two hours. We can't continue to allow this time barrier to exist as many people who live in Tijuana are commuting to San Diego (many via SENTRI Pass).
- There is a lack of diversity in the job market. Lower paying jobs go to minority communities and we must change this imbalance. Latinos are not encouraged to go to college in the same way as other groups are and it's very divisive.
- There are many farmers markets now, but the products are a bit out of reach despite SNAP acceptance. More healthy food can be purchased at a conventional grocery store for the same amount of money.
- If there is no local prosperity, there is no culture or street activity.
- Encourage a diversification of the economy in San Diego to go beyond biotech and hospitality.
- Fund economic development in rural areas. We don't support sprawl but we want something self-contained to elevate our standard of living, as 87% of our communities are living in poverty.
- Big box retail removed many small businesses beginning in the 1960s/70s. The ability to shop local has diminished. We want money to circulate locally in La Mesa, not go out of state.
- The big box retail issue is a real dilemma with no quick solution. One can save 25 cents on toilet paper at a big box store but it doesn't justify lower wages and the lack of employee benefits. There are repercussions associated with a decreased quality of life.
- The SANDAG RTP places smart growth nodes too far out (e.g. Ramona) due to the political process.
- SANDAG should invest more in the Blue Line; it has high ridership and boasts a 70% cost recovery rate, yet it does not receive the financial support it deserves.
- We can improve economic prosperity and bring jobs and commerce into the region by improving the flow of traffic at the Border.
- Implement zoning laws that allow for more multi and mixed uses.
- Our transportation system divides us rather than integrates us – with car you drive right thru neighborhoods.

WORKSHOP SUMMARY / RESUMEN DEL TALLER: JUNE 29, 2013 / 29 DE JUNIO DE 2013, NATIONAL CITY

ENGLISH

ESPAÑOL

Thank you to the almost participants who took part in last Saturday's workshop on June 29th on San Diego Forward: The Regional Plan!

Gracias a los participantes que tomaron parte en el taller del sábado 29 de junio en Adelante San Diego: El Plan Regional!

Your input and feedback are keys to the process of creating a vision and plan that will keep the San Diego region a great place to live now and in the future. If you attended last Saturday – remember, there are more workshops coming up, so please stay involved. And if you couldn't make it, consider attending an upcoming event. Visit www.sandag.org/sandiegoforward for more info.

Su aporte y retroalimentación son claves para el proceso de crear una visión y un plan que mantendrá la región de San Diego como un gran lugar para vivir ahora y en el futuro. Si usted asistió al taller del sábado 29 de junio, le recordamos que habrá más talleres para seguir involucrado. Y si no pudo participar, considere asistir a un próximo evento. Visite www.sandag.org/sandiegoforward para obtener más información.

Below is a summary of the thoughtful and extensive input provided by stakeholders during 4 facilitated roundtable sessions held at the June 29 event. This input will be used to shape policy objectives in San Diego Forward: The Regional Plan.

A continuación se encuentra un resumen de las ideas y reflexiones que los participantes expresaron en las 4 mesas redondas facilitadas en el taller del 29 de junio. Esta retroalimentación será utilizada para dar forma a los objetivos de política en Adelante San Diego: El Plan Regional.

Listed below are just some of the ideas expressed by participants at the workshop, and some pictures, too.

A continuación se enumeran algunas de las ideas expresadas por los participantes en el taller, y se incluyen algunas fotos, también.

ENGLISH TABLES

MESA EN ESPAÑOL

Mobility

- The mind-set needs to change that accessibility for biking is just as important as cars.
- Ensure that sound barriers and walls are factored into the cost of expanding freeways.
- A bullet train will be necessary in future and should be built in center of the freeway with a station every 4-5 miles underneath.
- Create a stronger public transit network so it's more

Movilidad

- Información de mapas en español, folletos en español en trolley y camiones.
- Actualizar información ofrecida al público en transporte público.
- Fines de semanas no hay muchas rutas disponibles (Ruta 961).
- Parada de camión (18th y Highland) la parada de camión no tiene protección para el sol (techo).

connected, timely, and frequent.

- Expand bus service in South County.
- South County lacks access to healthy foods.
- Encourage Farmers Markets in National City.
- People will just take their car if they have to walk far to get to a bus.
- Improve transit to the Airport.
- We need better transportation to key destinations throughout the county.
- Transit networks need to be expanded in communities with higher dependency, such as low-income and senior residency areas.
- Operate transit into the evening so that people can attend night events.
- SANDAG needs to use demographic trends to increase bus routes and tailor increased service to communities that are most dependent on transit.
- Focus on transit projects rather than automobile infrastructure.

Healthy Communities

- All streets should have safe bike lanes and sidewalks, especially along routes to schools to promote walking and biking to schools.
- Implement more engaging and participatory outreach to promote Safe Route to schools – there is an opportunity for SANDAG to have a presence in schools and educate children.
- Improve water quality in schools– currently children are discouraged from drinking water, as it tastes like drinking from corroded pipelines.
- Convert all buses to run on compressed natural gas.
- Implement policies to invest in and install existing technology that helps reduce energy uses.
- A healthy community means friendly people and an inclusive community where people feel safe.
- Kids should be able to walk to school, but parents and kids are concerned with safety.
- Schools should design loading/unloading zones to support a safe environment for pedestrians.
- There should be more bike lanes and better signage for bikes and pedestrians.
- Wider sidewalks would help calm traffic and make streets safer.
- We need more housing in National City, the right kind where people can walk to their daily needs.
- It is important to focus on children and seniors who are more dependent and at risk.
- Our community suffers from high obesity and diabetes, and high asthma rates.
- SANDAG should focus their funding on infrastructure to mitigate air pollution, especially around freeways.

- No hay conexiones de North Park a National City.
- Miércoles y jueves en el parque Kimball venir para hacer encuestas para preguntarle a la gente su opinión.
- National City esta desconectado de San Diego y sus comunidades alrededores.
- No hay rutas a la playa por transporte público.
- Necesitan acceso a lugares de interés regional como Balboa Park y sus museos. Un transporte especial los fines de semana, por ejemplo.

Comunidades Saludables

- Vivir en ambiente limpio, libre de toxinas, libre tránsito, áreas verdes.
- Áreas verdes para los niños (no existen parques).
- Enfrente Iglesia existe terreno que se pudiera acondicionar para área verde, atrás de la escuela en el centro comunitario existe solo un pequeño centro.
- Seguridad de tráfico para los niños (escuela en la calle 18 – intersección de Highland y 18th) semáforo atrás de la escuela. Los carros no se detienen, reforzar respeto al peatón además que el semáforo peatonal no dura mucho. La alcantarilla bloquea el cruce peatonal.
- Gas para mina está localizado a pie de calle en la gasolinera y es peligroso por accidentes de choque o conductores en estado de ebriedad.
- Iluminación en la misma zona. Así como falta de iluminación en Old-Town National City.
- Determinar límites de velocidad por la misma zona para la seguridad de los niños que van a la escuela.
- El programa 'Bus Caminante al Escuela' está empezando a ser impulsado por las escuelas.
- 16th y D St. Necesita arreglos incluyendo la banqueta para los peatones. Siempre hay accidentes en esta zona.
- Impulsar jardín comunitario, no existen tiendas cerca de la gente para conseguir comida sana como fruta y verduras.
- No es seguro usar bicicletas por las avenidas pero si por las calles vecinales.
- Los carriles de bicicletas no son respetados porque la gente estaciona sus carros en los carriles de bicicleta.
- Los talleres y fábricas contaminan todos los aspectos de la comunidad.

Economic Prosperity and Borders

- Create a border crossing efficient process for the people and goods that regularly move to and from our region.
- Strengthen relationship with the military.
- Improve public transit so that people can get to jobs.
- Attracting more businesses, and not fast food or taco shops.
- Encourage home-ownership and regulate the up-keep of rental properties.
- Make it easier/faster to cross the border.
- Provide more secure bike parking and storage to prevent bicycle theft.
- National City has the highest taxes in the county, but is the most impoverished.
- National City isn't seen as a business environment. It's somewhere you live, but you have to go other places to work.
- There should be more educational opportunities in National City, such as trade Schools.
- Improve the cleanliness and aesthetics of the city to attract more employers/businesses. The way things look can drive people away.
- Increase street sweeping frequencies and remove dumped trash.
- Improve the responsiveness and oversight of local and regional government.
- South County is lacking tourism.
- National City needs to be more welcoming and create destinations and events to attract business and activity. People don't want to visit a dirty city that makes them feel unsafe and uncomfortable.

Prosperidad Económica y Fronteras

- Más acceso a mercados, gimnasios, lugares comunes.
- Civic Center y Wilson interseccion. No quieren un negocio más sino un negocio que ayude a la comunidad como un supermercado.
- Fuentes de empleo cerca de la comunidad.
- Área de bicicletas en el trolley. (seccion especial para gente con bicicletas).
- Reducir costos de trolley (pase mensual).

WORKSHOP SUMMARY: FOCUS ON ECONOMIC PROSPERITY, PUBLIC FACILITIES AND BORDERS

JULY 19, 2013, CALTRANS

Thank you to the more than 70 participants who took part in the July 19th workshop on San Diego Forward: The Regional Plan!

Your input and feedback are keys to the process of creating a plan that will keep the San Diego region a great place to live now and in the future. Below is a summary of the input provided by stakeholders during the facilitated roundtable sessions. This input will be used to shape policy objectives and other core components of San Diego Forward: The Regional Plan.

For more information and the detailed note-takers notes, visit www.sandag.org/sandiegoforward.

Borders

- Government entities should coordinate more and reduce paperwork and red tape.
- Include the Border Master Plan in the Regional Plan.
- Recognize that border issues such as air pollution aren't restricted to geographic borders; health issues and different diseases cross border-lines.
- Coordinate natural corridors and open spaces with fire and forest management.
- Expedite border crossings to capitalize on Tijuana's projected economic growth.
- Promote bike lanes at the border crossing to alleviate the pressure at the border and allow quicker crossings.
- Decentralize border-crossing ports-of-entries (POE).

- Promote better movement of goods across the border, not just passengers.
- Recognize that the tribes have more to offer than just casinos; tourism prospects are good for them and for the county. Tourists will go to the casinos, but most likely will use other facilities in the region as well.
- Acknowledge Temecula as an important economic partner for goods movement along I-15.
- Minimize travel time between San Diego and Imperial Valley so that San Diego can capitalize on the renewable energy effort that is occurring in Imperial County.
- Increase weekend service for public transportation, especially to and from Orange and Riverside Counties.
- Increase connections between employment locations and affordable housing.
- Increase the safety of public transit by encouraging more people to take transit; crime is a deterrent for many potential transit riders.

Public Facilities

- SANDAG should coordinate with other agencies and community based organizations to better provide and promote public facilities, serving as the “glue” that brings people, organizations, and cities together.
- Use SANDAG data and information as planning tools.
- Facilitate conversations about funding so cities don’t have to “re-create the wheel” and spend a lot of time searching for funding sources.
- Prioritize funding for maintaining public facilities first versus fixing broken infrastructure later.
- Take social equity into consideration when planning new facilities. Consider a holistic approach to planning that links public facilities to the needs of communities.
- Integrate parking with purposeful economic returns.
- Perform regular maintenance on roads and construct sidewalks to make communities more walkable.
- Provide planning at the “complete streets” level by constructing and regularly maintaining streets and pedestrian sidewalks, parks, public restrooms, trash cans, and community centers in urban areas.
- Provide safe routes to school.
- Collaborate with local agencies to promote green infrastructure that can improve air quality, water quality, and ultimately quality of life.
- Encourage the maintenance and delivery of water facilities.
- Promote collaboration on all levels to discuss water retention from storm water in an effort to reuse water.
- Consider the use of water desalination in the region.
- Fund maintenance improvements for the piping network in San Diego.
- Provide regional coordination to prohibit housing development in fire-prone areas.
- Make roads more truck accessible.

Economic Prosperity

- Provide education for a variety of skill sets in the region.
- Support and encourage “high tolerance communities”— diverse, college-bound communities with no ethnic barriers.
- Find ways to tap into the highly-educated immigrant and refugee population to support our economy.
- Subsidize bus passes for students to get between jobs, home, and school.
- Support local food and our local economy.
- Connect farmers and agriculture with the public through Farmers Markets. Encourage cities to support local farmers.
- Promote more collaboration with other organizations, such as non-profits in the county and the city; this collaboration should outweigh competition and personalities.
- Focus on a cost-effective, consistent water supply for the region in the future, especially for farmers and businesses.
- Promote the development of multiple economic hubs to allow people to live close to work.
- Support the development of job centers in South Bay to improve social equity. It will take people off the freeway by providing jobs close to where people live.

- Enhance opportunities for disadvantaged populations.
- Align the cost of housing with levels of income for more people to afford to live here.
- Support bike parking in the business districts. Include more urban furniture, forestry, traffic calming, etc. to bring people to these areas and increase economic prosperity.
- Provide safe routes to school for the local neighborhood communities to encourage economic prosperity.
- Facilitate small businesses by creating collaborative workspaces and facilities (e.g. business incubators).
- Support trucking and transportation needs in the region. If we can't get goods and people around, the economy won't be prosperous.
- Plan for moving goods in all contexts, including the border, the port, and by air.
- Transit oriented development should be paired with job development to help prepare for a growing population.
- Balance regional growth geographically.
- Consider moderate densities of 3-4 stories.
- Support infrastructure that improves connections for bicyclists and pedestrians to access transit services.
- Fill up empty storefronts to support economic development.

All Topics- Arabic

Economic Prosperity

- Prosperity first starts within the family, then the community, each company, organization, and city.
- Recognize that small local economies drive larger economies.
- Provide more affordable housing for new family arrivals as the refugee and immigrant population continues to increase.
- Encourage more affordable housing throughout the San Diego region.
- Consider implementing rent control in the San Diego region.
- Use empty lots throughout San Diego for farming and agriculture.
- Address transportation barriers that keep immigrants away from workforce development programs. For example, provide more gas cards as incentives, and teach people how to use the transit system to get to these programs.

Public Facilities

- Better allocate the structure and planning for parks. For example, while dog parks and open space portions are large, the actual playground portions for children are small.
- Provide more benches and seating in public spaces and parks, and at beaches, for people to enjoy the public realm in El Cajon and downtown San Diego.
- Develop partnerships, such as those in New York City, where indoor and outdoor public spaces such as atriums are privately owned, but the public has free access to these areas.
- Support more de-centralized public composting for waste management.
- Provide more recycling bins in public spaces and along sidewalks.
- Develop improved signage to make it easy for people to place recyclables into appropriate bins.

Borders

- If there were more affordable medical and dental services in the San Diego region, then people wouldn't go across the border as frequently.
- Agriculture and industrial projects should be built along the border to provide jobs for both sides.
- Address traffic at the border.
- Improve border crossing times to improve the economies of both regions.
- Provide better coordination of schedules for people traveling to and from San Diego to Los Angeles on public transit.

June 6, 2013
Public Workshop on the
Regional Plan:
Summary of Comments
and Suggestions
From Each Roundtable

6 de junio de 2013
Taller Público sobre el
Plan Regional:
Resumen de Comentarios y
Sugerencias de Cada Mesa

Between May and July 2013, SANDAG held a series of public workshops to engage the community and stakeholders on potential ideas and policy objectives that could be considered in the development of the regional plan. The workshop summarized below was held on June 6, 2013, at Casa Familiar in San Ysidro and was structured as a completely bilingual workshop in both English and Spanish. The workshop focused on topics addressing issues of mobility, environment, economy, borders, climate change, and healthy communities. The workshop contained 10 tables at which discussions were hosted in English or in Spanish by two SANDAG or Casa Familiar staff members (one serving as the facilitator and one serving as the note-taker). The discussions at each table revolved around five focused themes listed below. Participants rotated tables three times, providing their ideas and opinions at each table they attended. The table themes were as follows:

Entre mayo y julio de 2013, SANDAG organizó una serie de talleres públicos para involucrar a la comunidad y las partes interesadas sobre posibles ideas y objetivos de política que podrían ser considerados en el desarrollo del plan regional. El taller que se resume a continuación se llevó a cabo el 6 de junio de 2013, en la Casa Familiar en San Ysidro y se estructuró como un taller completamente bilingüe en inglés y español. El taller se centró en los temas de la movilidad, el medio ambiente, la economía, las fronteras, el cambio climático, y las comunidades saludables. Hubo 10 mesas en el taller en las cuales las discusiones fueron llevadas a cabo en inglés o en español por dos miembros del personal de SANDAG o Casa Familiar (uno que se desempeñó como facilitador y otro que tomó notas). Los diálogos de cada mesa giraron en torno a cinco temas, los cuales se enumeran a continuación. Los participantes rotaron mesas tres veces, ofreciendo sus ideas y opiniones en cada mesa que asistieron. Los temas de mesa fueron los siguientes:

1. *Mobility / Movilidad (Two Tables; Dos Mesas)*
2. *Healthy Communities / Comunidades Saludables (Two Tables; Dos Mesas)*
3. *Healthy Environment / Medio Ambiente Saludable (Two Tables; Dos Mesas)*
4. *Energy & Climate Change / Energía y Cambio Climático (Two Tables; Dos Mesas)*
5. *Economic Prosperity & Borders / Prosperidad Económica y Fronteras (Two Tables; Dos Mesas)*

The following is a list of the comments, questions, and suggestions made by community members and stakeholders who participated in the workshop, as recorded by the note-takers. Feedback is organized by the table (i.e., Healthy Communities, Table 2) and the round (1st, 2nd, and 3rd) at which it was shared. Public comments that were submitted in writing are also included. The feedback collected at the workshop will help guide the development of the San Diego Forward: The Regional Plan.

Lo que sigue es una lista de los comentarios, preguntas y sugerencias de los miembros de la comunidad y las partes interesadas que participaron en el taller, según lo que registraron los encargados de tomar apuntes. La retroalimentación se organiza por mesa (es decir, Comunidades Saludables, Mesa 2) y la ronda (1 º, 2 º y 3 º) en la que se compartió. Los comentarios del público que se presentaron por escrito también se incluyen. La información recolectada en el taller le ayudará a guiar el desarrollo de San Diego Forward: The Regional Plan (Adelante San Diego: El Plan Regional).

Mobility: English Table

Round 1 Participant Comments

1. There needs to be a well-integrated multimodal transportation system with an emphasis on transit access and frequent service, safe walkable streets for all ages, and bikeable communities to provide access to daily uses such as groceries, healthcare, and jobs, and to promote healthy lifestyles and a strong sense of family and community.
2. The Trolley provides services for both the community and international travelers. Improvements need to consider these dynamics and account for more frequent service.
3. Localized transit services should be considered to augment regional service.
4. Collectively, transit plays a major economic role in the San Ysidro community, and improvements to job and housing access are vital.
5. Mobility relates to everyone having the ability to get around. The transportation system needs to offer more than just driving. Transportation should include multimodal options such as transit, biking, and walkability.
6. Cancer patients have difficulties affording transportation, could there be bus passes directly for cancer patients?

7. The movement of people needs to be through all types of modes including pedestrian, bike, transit, through goods and services, etc.
8. Mobility determines what an individual can do, how one lives, and what choices an individual has to get from place to place.
9. If a bus schedule is not accurate or if the transit system does not provide needed connections, individuals face challenges getting from place to place and imbalances where they may live and work.
10. In San Ysidro there are two kinds of transportation needs at the border: pedestrian and transit needs. Forty-four percent of people do not drive an automobile or have access to a car in San Ysidro. *TransNet* is a good funding source, but if the community doesn't use it, then what good is it.
11. Ineffective transit impacts free time, and choices, such as whether to go to a movie. This forces people to consider leaving San Ysidro to go to Downtown; the San Ysidro community will not necessarily feel comfortable doing this. Localized transportation options are needed within the San Ysidro community. Jitneys are an example of a localized transit service. Stores send them to the border to pick up clients or charge \$1 to take them around the community. This can be a way that SANDAG addresses intra-community mobility. It is more cost effective and can be contracted out, and would foster economic growth.
12. Transit should not be the only consideration for transportation access. Even if transit is accessible, it does not matter if there is no safe place to walk. Walkable issues include small sidewalks, and when designed with huge roads, a message is sent of a priority for vehicles. UCSD/UTC area is an example of this. Students who don't have cars depend on walkability; barriers include wide roads (La Jolla Village Drive), large parking lots, and inadequate sidewalks. Distance to transit can be two or more miles; only other options are a taxi or a bike and depending on the time of day or trip, the trip may not be taken.
13. There may be transit access to a community like San Ysidro, but the needs of an elderly person may not be being met in the same form of access. At some point, it becomes a local versus a regional issue. We might need a criteria considering service to particular neighborhoods. It is hard to navigate and account for the quality of sidewalk infrastructure and border impacts to provide transit access. Trolley stops necessitate long wait times due to packed trolleys. Something needs to happen, whether allowing one trolley to stop at Beyer Trolley station or having the Beyer station be the last stop.
14. Would like to see more Trolleys, and busses that are more like the express bus service. There are a lot of job centers in North County. If someone doesn't drive, it might be hard for them to find a neighborhood that is pleasant to live in which has access to an employment center like Sorrento Valley. Carlsbad/Oceanside transit services are scheduled for people traveling south, not north. There needs to be a connection with jobs to residential areas to better accommodate people who don't drive. A bus may go to Rancho Bernardo, but if it takes two hours, people probably will not make this trip; as compared to the express bus services operating in the opposite direction during peak periods.

15. It would be great if the two San Ysidro stations Beyer and San Ysidro Transit Center had raised platforms so they would be at a level grade. The other is to, at a minimum, consider raising the Trolley station at the San Ysidro Transit Center as it makes the most sense to be able to deal with traffic conflicts that happen there.
16. When considering transportation priorities, modes should be prioritized during time periods; for example, focus on freeway improvements for a time period, focus on Trolley improvements over a time period, bike/pedestrian, etc. Do a big push on one modal category at a time. The Car2Go service could possibly be integrated within San Ysidro.

Mobility: English Table

Round 2 Participant Comments

17. Walkability is a key priority for residents in San Ysidro, safety and adequate facilities are of importance for families and aging populations.
18. The access residents have to transportation has a major impact on their lives with respect to education, employment, public health, and healthcare access.
19. There is a strong correlation with transportation travel times impacting the available time for families to experience time together within their homes and communities.
20. Mobility makes me think of the word car.
21. Mobility is people moving in different directions.
22. Mobility is freedom.
23. In National City, there are many mothers who do not have a car; they tend to walk a lot.
24. Mobility is not working well; we are rated very low in the state of California.
25. Transportation is necessary, we need to have it for access, we rely on it, and we need effective local transportation.
26. There are impacts of living too close to the freeway, all the particulate matter leads to health issues such as asthma. For mothers walking around Old Town and National City, walkability is not safe. There is also not adequate signage for kids to walk to school, not enough of stop signs, and a general lack of accessible pedestrian facilities.
27. The way transportation affects people's lives has to do with the efficiency of the system. It affects job and school choices; where you live equates to how fast you can access jobs and education. You may need to commute from Riverside where you can afford a home. Transportation impacts how healthy you are through access to healthcare. Getting out of the car and walking and biking leads to more healthy of a lifestyle.
28. Transportation is time consuming when getting from place to place. As a mother, you want time with your children and family. Transportation needs to be efficient so time is maximized.
29. An example of a hardship is a mother needing to take her children to medical care. It may take two hours just to access the needed healthcare translating into a four hour total trip not including wait times at the healthcare center.

30. Google is how I get information for transportation.
31. At the border in San Ysidro you have visible signage, on the ground at the station once you cross.
32. The San Ysidro Transit Center is the busiest Trolley station and represents the beginning of the Trolley line. It is a perfect opportunity to take it above grade and match some infrastructure with the entrance in Mexico (25 feet above level). We need to bring it above grade and get this station right to increase the Trolley frequency. Currently, it has to cross five tracks and gate arms come down and everything stops. In Mission Valley the Green Line is above grade and ridership is 1/10 of the border crossing.
33. We need to make policy changes similar to the City of Portland's priorities. Oregon puts pedestrians first, bicyclists next, transit, commercial vehicles, taxis, then single vehicles last, the pyramid diagram. The San Diego region is vehicles first. It needs to be reversed. What are the funding priorities in San Diego? When we spend billions of dollars on freeways, it only relieves congestion for a couple of years. We continue to pour too much money in freeways, which leads to health impacts such as asthma. The region needs to adopt a priority similar to Portland.
34. Residents in National City feel isolated and disconnected. It takes an hour using transit but only takes 10 minutes using a car. Residents with no car access have much longer travel times.
35. Bicycles have a certain magic to them, in uptown and downtown there is decent protection with bicycle facilities. The same can't be said in San Ysidro and National City. The same kind of bike awareness should be included in all communities. The bike offers more practicality and expands your trip distance 2-3 miles. Bikes should be the focus.
36. San Diego has basic elements of a complete transportation system via the airport, train/rail, bikes, pedestrians, and cars. SANDAG and agencies are working to enhance and improve and integrate these elements. We are still looking for an integrated modal airport, combining Trolley, the airport, and buses in a concentrated spot.
37. Intermodal and multimodal seems to be the trend.
38. There is an economic benefit when communities are able to connect through transportation. National City's physical isolation leads to political isolation.
39. Infrastructure for pedestrians is a challenge. There are no complete sidewalks (in San Ysidro) and this makes the road dangerous for kids to walk to school. It also causes families to have to drive their kids based on this danger. Pedestrians and bikes need this infrastructure for safety, especially safe routes to schools.
40. With peak traffic and gridlock, there needs to be a way to stagger working hours.
41. Bus/rail hours of service are challenging. If I go to a concert in Downtown that ends near 11pm, the Route 11 bus ends service by the time it is over, so a car is needed. It is a matter of economics to fund transit systems and get ridership. At the National Planners Conference in Chicago, I was very impressed with the transit service; tandem double bus systems, digital signs when the next bus would arrive, transparent information.
42. Good accessibility feels like you can access transit easily.
43. You should not have to plan your day 30 minutes in advance if you want to take you kids to Balboa Park. You should not need to spend time a lot of time, or worry about getting somewhere without ease.

44. The Oregon pyramid is a good way to determine funding. There is way too much funding into the freeways; there is an equity issue and communities need an approach similar to this pyramid to be prioritized.
45. We need to come up with better GHG reduction alternatives. Give the public a chance to get the truth. The only alternative is a no project or to build this lane or freeway. There needs to be alternatives that analyze GHG emissions and health impacts.
46. We need to follow the law as other regions do in California. There are success stories in Chicago; we need a better land use response to these issues.
47. We need to piggy back on other development projects such as in-fill, and give up on development occurring outside of the city, discourage sprawl. Density is a key priority, buses will get ridership.
48. Utilize urban growth boundaries to maximize infill opportunities.
49. We should analyze where you will get highest return on investment, urban area focus.

Mobility: English Table

Round 3 Participant Comments

50. Mobility is having walk access.
51. Being able to get around the community and go to different places is important.
52. Mobility means defining how easy it is to get down the street, to the bus stop, Trolley, or car.
53. Mobility is transportation.
54. Having multimodal options; biking, using the bus, driving... a range of options to get around.
55. Planning for transportation decisions is much easier if you have a car. A bus may take an hour; several buses may take more time.
56. If there is traffic to go to work, you have to leave earlier, spend more time away from family.
57. Online Internet, word of mouth, GPS and cell phones are where I get my transportation information.
58. In the South Bay area, how far you have to walk to a bus/Trolley stop is a challenge. In Chula Vista, there are similar issues accessing bus stops. Suburban area bus stops are spread out. Walking to services and transferring between service types requires a lot of time; we need accessible frequent services.
59. Sidewalks may not be walkable because they are not stable.
60. Seniors fall down on sidewalks because of cracks and walkers get unbalanced.
61. Trolley door has closed on people. An 80 year-old had a door close three times on them.
62. Inefficiencies of the transit system lead to anxiety.
63. Newer models for the Trolley system need to be implemented throughout the system as they provide better access to handicap seats, walkers etc.

64. There are not a lot of street lights, I never walk when it is dark and there is not enough infrastructure. From the Trolley station to residences, there's no sidewalk and no lights in San Ysidro. When working late I would rather use a car because of safety concerns.
65. Security on the bus/trolley is important. It can be crowded, smell like urine, and if you are on a trolley for a long time, it can be stressful. Communication can be positive, word of mouth on the Trolley, social networking. There are negatives versus positives.
66. You have to have a car to live in San Diego. It takes 3 hours to get to work from San Ysidro to Aero Drive.
67. Transit infrastructure is the big thing, transit schedules and how far the buses and Trolleys are from one another. There should be more access for people without cars. Younger people that can't drive also need the ability to take transportation. It needs to be more available and easier to use, and security/safety should be prioritized. Proximity to malls and grocery stores is important; it is about all your trips, how many grocery bags can you carry when using transit, accessing healthcare center, etc.
68. MTS should make disabled services more available.
69. Streets need to be more walkable.
70. It is on the community to engage policy makers and to be proactive. As long as everything is equal there should be better improvements comprehensively. San Ysidro doesn't have as many nonprofits, but that shouldn't mean that there is no need. We need to be aware of language barriers.
71. There should be more direct transit lines to cut the distance for traveling; it takes too long to get everywhere, fund projects that are more frequent.
72. Sidewalks should be the priority for families.
73. More businesses near the Trolley, groceries, medical, make better access within the Trolley line. Think of it as similar to water infrastructure and residential access, communities near the Trolley.
74. San Ysidro lacks a downtown... if there was a downtown area with walkability, access to stores, there would not be the need to drive.
75. Building a development project near the Trolley station needs to be affordable, have access to food, have senior access, and be able to fill appointment related needs with a close proximity to residences.
76. Trolley station and nearby streets would be better for safety if they had better lighting. Communities also need improvements to downtown areas.

Movilidad: Mesa en Español

Comentarios de los Participantes en Todas las Mesas

77. El tiempo que se requiere de trasladarse al trabajo o a la escuela afecta la salud, el estrés y la calidad de vida.

78. El tráfico que se congestiona a la salida para la frontera afecta a los usuarios en épocas de diciembre. Mucha gente va a Las Américas para hacer las compras.
79. Se necesita más alumbrado y más banquetas en Otay Mesa.
80. Se necesita transporte público más organizado en la frontera.
81. La gasolina es carísimo.
82. Quiero que las rutas sean más eficaces y que se modifique la frecuencia en que pasan los autobuses en Chula Vista.
83. Las rutas no van donde la gente necesita ir.
84. Necesitamos rutas de tránsito más directas y rápidas.
85. Necesitamos rutas que conectan.
86. Esperamos por mucho tiempo - 20 o 30 minutos. ¿Porque no hay servicios cada 5 minutos?
87. Estamos atrasados con nuestro sistema de transporte – no es suficiente para una ciudad tan grande.
88. Toma cuatro horas llegar en *Trolley* a *San Diego State University* (SDSU, por sus siglas en inglés) para una estudiante que vive en San Ysidro. Esto es inaceptable.
89. Se necesita transporte público más accesible y eficiente.
90. El transporte público no se comunica bien entre las diferentes formas.
91. Áreas con más dinero tienen más servicio y *Trolleys* nuevos, pero áreas como San Ysidro no tienen dinero y reciben menos servicios.
92. Los horarios de los autobuses no son suficientes - siempre hay que esperar mucho.
93. El tipo de transporte público cerca de la frontera está en condiciones malas, pero los *Trolleys* hacia el norte son más nuevos y están en mejor condición.
94. En los fines de semana, el servicio de transporte público no cumple con la necesidad y no es suficiente.
95. Se necesita más seguridad y comodidad en los *Trolleys* - andan muy llenos.
96. Hay muchos lugares donde no hay transporte disponible como el SR 905, Otay Mesa y por la Mirada.
97. Los operadores de los autobuses no tienen paciencia con los adultos mayores.
98. Se debería haber mejor trato por parte de los operadores.
99. No hay espacio en el *Trolley* o autobuses durante la hora pico. Necesitamos *Trolleys* y autobuses de doble piso como hay en Europa.
100. Poner pasos a desniveles en los *Trolleys*.
101. Quiero que los vagones sean un poco más bajos porque están muy altos y son peligrosos.
102. El *Compass Card* no es adecuado y gasto mucho. Una familia de cuatro personas sin carro no puede pagar el costo para cuatro pases mensuales.
103. Los operadores no cumplan con los horarios.
104. Se necesitan baños en las estaciones.
105. Se necesita mejor calidad y mejores servicios como en San Diego. No somos ciudadanos de segunda clase.
106. Deben prohibir la entrada a los sin hogar en los *Trolleys*.

- 107. En las escuelas se necesitan banquetas. No hay la seguridad para caminar.
- 108. No hay rutas disponibles para bicicletas para los adolescentes.
- 109. En las escuelas no hay suficiente transporte para los niños.
- 110. Cuando se atardece, es peligroso para los niños que caminan y no hay suficientes autobuses.
- 111. Se necesita más transporte público para los niños porque la distancia a la escuela es larga y no es posible caminar. La información (mapas de las rutas de los autobuses) no es clara.
- 112. La información es confusa y difícil de entender; llamando al 511 por teléfono es mejor.
- 113. Necesitamos mejor información y acceso a la información.

Healthy Communities: English Table

Round 1 Participant Comments

- 114. Encourage free public transportation for seniors, children, and low-income people, especially to health centers (ex. San Ysidro Health Clinic). It is important to be able to walk to the health center – need access to a hospital within our neighborhood; need to address immigration issues; need more communication between the government and the community; health starts in your house.
- 115. San Ysidro is near the border and the border causes lots of traffic; the community looks dirty. Need to feel safe.
- 116. Need more clean areas.
- 117. Need more access to organic products; Northgate, other grocery stores but nothing organic. Not enough options or access to organic products; no farmers market.
- 118. San Ysidro is very calm – lived here more than 15 years.
- 119. National City – air quality issue; a lot of pollution, kids get asthma, not enough public attention to the issue of asthma; No access to healthy food – only liquor stores; Lots of industrial uses next to homes; this combination causes a lot of impacts – low income homes are next to the freeway – breathing toxins from freeway and industry.
- 120. Need more focus on public transit and more bike paths.
- 121. More lighting, pedestrian environment is not attractive; no places to sit; no shaded areas, not a lot of trees.
- 122. To improve air quality, create more green, more trees; natural buffer between homes and freeways.
- 123. Security; More trolley service – dirty – they send the dirtiest trolleys to the border; it seems that they send the cleanest nicest trolleys to the north around Old Town; lots of trash in train cars.
- 124. The trolley is the busiest in this area so the funds should be focused more on this area because it's used so heavily.
- 125. Need more landscaping, lighting, and security.

Healthy Communities: English Table

Round 2 Participant Comments

126. San Ysidro is very pedestrian-oriented, the alleys are well used.
127. Real community - Not Scripps Ranch or Rancho Bernardo.
128. Areas such as La Jolla Village Drive have lots of students, but very automobile-centered.
129. Healthy community means having access to education, libraries, resources, and transportation; if you don't have good access to transportation, long commutes affect quality of life.
130. Dirty and ugly areas impact health.
131. Encourage people to be active; having a sense of community – it is good to have people walking around and talking to each other; need communities that encourage people to walk places and get out of their cars.
132. Denser streets, larger sidewalks, amenities that promote that interaction, open park spaces.
133. Healthy community is physical – less carbon dioxide – ex. in Mexico City, odd # licenses aren't allowed to drive on certain days.
134. Healthy community is emotional – encourages quality of life – ex. in Mexico City, they close their main boulevard to cars (which creates less pollution and improves air quality) and open it up to bicycles; families are encouraged to get out and walk the main street.
135. Pollution issues in San Ysidro.
136. Cars that are idle from the border crossing wait times pollute the area.
137. It's difficult to garden because there are high levels of toxins in the soil.
138. Maybe invest in special paint that attracts carbon to the walls – subsidized by government.
139. If I have to walk half an hour to it, it's not accessible.
140. If I have to wait 45 minutes or longer, it's not accessible – limits activities on the weekend.
141. Where you can work – it's difficult to work in North County if you live in South County.
142. UCSD and University City have long roads that are difficult to cross.
143. SDSU Students from San Ysidro take two hours to get from home to SDSU.
144. Travel times affect educational choices – students can't get to Southwestern College, so opt for San Diego City College.
145. If you can't drive, there are places where you just can't live.
146. Can't get to places of entertainment – causes you to stay home and do nothing.
147. How can we address those issues?
148. Improved crosswalks; design streets and communities for people, not cars; promote more ways to connect.
149. Dial-ride services.
150. It's economics - No one wants to invest in San Ysidro; Not enough economic incentives for businesses to invest.
151. Lack of sidewalks, parks, dirty.

152. No bar, bakery, tortillería, but two Jack in the Boxes.
153. Think about other forms of transportation instead of big buses – what about smaller vans? Not as expensive.
154. Different transportation agencies need to work together and coordinate services – the COASTER should be more connected to the buses.

Healthy Communities: English Table

Round 3 Participant Comments

155. Being active, being able to walk to get my groceries. Time is very valuable and I don't want to waste it on driving.
156. Not enough infrastructure for pedestrians within some of the newer housing in San Ysidro; not enough safe places to walk – sidewalks too narrow.
157. Not enough places to walk to. Closest grocery store is down a steep hill – not user friendly.
158. Public transportation is far and it's not connected enough.
159. I would take public transportation if it were closer.
160. Concerns with safety of children when there aren't enough sidewalks near schools – they have to go thru paths in canyons – no lighting, maybe dangerous wildlife.
161. More open spaces – maybe not HUGE park, but pocket, small little thing that can be within the neighborhood for families to stop by; Place to socialize, to be with neighbors, and family.
162. A healthy community is one that can provide access to the community – when there is a project, it normally takes forever to build or there's not enough access to it.
163. The trolley at the Beyer Stop has too many people trying to get on.
164. No flexibility in policy decisions for community – ex) libraries – San Ysidro needs a 25,000 sq ft library according to projections for population growth, but if city can't afford that, why not compromise and build a smaller facility? – communities need to be able to tailor facilities to their needs.
165. Don't feel safe taking kids to the Casa Familiar because there's not enough lighting on the street, no sidewalks in some area – vision for San Ysidro is that I can feel safe having my kids at the library or in the community without me. Having grocery stores close to schools so that mothers can walk to take their kids and go straight to the store afterwards. Would be nice to get out of the house and exercise.
166. Downtown Library has perfect location, school – joint use between parks, schools, libraries.
167. The library is not used for a few months when school is not in session.
168. No grocery stores east of the I-805 near the SR 905; too many people have to drive.
169. Need more areas for small parks.

- 170. No farmers market – closest thing is Suzy’s Farm. Need to make that connection between the farm and the community ex.) every Saturday of the month, there could be a community garden program.
- 171. No access to The Tijuana River Valley – beautiful; no trails.
- 172. Maybe closing down a street for a street fair or farmers market (every other Sunday).
- 173. From San Ysidro to Western Chula Vista, more entertainment and open space would help the region – a project that connects the bayfront.
- 174. No incentive for people who cross the border to take their bikes; should have a shared bike program.
- 175. Not pleasant to walk between different schools; it’s dangerous for that mother who has the stroller and her 5-year old and cannot feel safe walking on the sidewalk because it’s so narrow; safe routes between the schools – routes that connect the San Ysidro Health Clinic, schools.
- 176. Should build a Class 1 Bicycle path from border to Bayshore Bikeway.
- 177. Working with skaters so that they’re allowed to have access to skate parks, use their skateboards for transportation, exercise.
- 178. When new school opened, they required one neighborhood across from the Canyon to attend the school – causes safety issues for children.
- 179. Need data on air pollution.
- 180. Possible grant where people can use iPhone to check which paths have the most pollution.
- 181. Getting air monitor station in San Ysidro.
- 182. New funding for Sidewalks from San Ysidro to Communities.

Comunidades Saludables: Mesa en Español

Comentarios de los Participantes de la Primera Ronda

- 183. Construir clínicas con acceso dentro la comunidad.
- 184. Construir o atraer mercados que ofrezcan comidas y productos orgánicos.
- 185. Ofrecer clases para educar a la comunidad sobre comidas saludables.
- 186. La comunidad busca acceso a un “mercado abierto” (como *Farmer’s Market*) que ofrezca comida saludables.
- 187. La promoción del ejercicio dentro la comunidad.
- 188. Ser parte de o promover programas como “*Walk San Diego*” en la región.
- 189. Mejorar la promoción del uso del transporte público a la comunidad.
- 190. Mejores calles; arreglar los hoyos que existen en las calles; construir más banquetas para la seguridad del peatón y la juventud.

191. Construir baños públicos en parques públicos.
192. Deben de haber rutas seguras a la escuela para los alumnos.
193. Deben de haber caminos seguros a la escuela y caminos públicos seguros.
194. Se necesita mejor vigilancia alrededor de escuelas públicas y en la comunidad.
195. Implementar un programa en el cual la comunidad participe en un programa de vigilancia.
196. Crear/Construir mejor acceso para el peatón al transporte público.
197. Es peligroso andar en bicicletas; la comunidad no es segura; hay muchos asaltos y robos.
198. Debe de haber acceso para andar en bicicleta por lo largo de las vías del tren.
199. Crear áreas específicas para el uso de bicicleta donde el ciclista este fuera de peligro de ser atropellado por un automóvil.
200. Crear caminos seguros donde el usuario no corra el riesgo de ser atropellado.
201. San Ysidro ha sido olvidado.
202. Invertir más en San Ysidro.

Comunidades Saludables: Mesa en Español

Comentarios de los Participantes de la Segunda Ronda

203. Necesitamos ser más conscientes sobre la comida saludable.
204. Necesitamos campañas sobre la salud para la comunidad; construir clínicas.
205. Limpiar la basura en el vecindario.
206. La basura alrededor de las viviendas se ha convertido en un gran problema.
207. Debe de haber promoción de ser más activos y minimizar el uso del carro.
208. Influir a la comunidad que camine más /use la bicicleta; minimizar el uso del carro dentro de distancias cortas.
209. No hay seguridad para el ciclista. Los conductores no respetan a los peatones.
210. La comunidad le tiene más respeto al peatón que al ciclista. Promover caminar para la salud.
211. Es una incomodidad usar el transporte público.
212. El transporte público se demora demasiado, es una inconveniencia.
213. Agregar rutas de transporte público los fines de semana. Hoy en día, los domingos no hay transporte público.
214. Crear acceso para bicicletas sobre las carreteras que sean seguras.
215. Los horarios del transporte público y el acceso al transporte público se tienen que mejorar.
216. Reglamentar el uso del aire acondicionado sobre el transporte público (camiones, *Trolley*).
217. Mercados que sean más económicos, saludables y sustentables.
218. Más inversión en la comunidad.

- 219. Una comunidad más completa – tener acceso a lo que otras ciudades tienen.
- 220. Combatir y eliminar el uso de drogas dentro de la comunidad.

Comunidades Saludables: Mesa en Español

Comentarios de los Participantes de la Tercera Ronda

- 221. Necesitamos comunidades limpias y seguras.
- 222. Minimizar la contaminación.
- 223. Contaminación – el *smog* ha causado el incremento de casos de asma; se debe reducir el uso de carros para reducir la contaminación.
- 224. La contaminación que se ha creado en la frontera está impactando a la comunidad de San Ysidro.
- 225. El cruzar la frontera es una “Tortura Moderna”. El tiempo que se toma para cruzar la frontera es demasiado. La demora causa una “tortura” y causa un estrés muy grande.
- 226. A la comunidad le gustaría que SANDAG sea la voz que se escuche cuando se hable sobre la frontera y como mejorar el cruce fronterizo.
- 227. Los precios para usar el transporte público han incrementado y han causado que la comunidad no lo use tan frecuentemente.
- 228. Necesitamos más rutas del autobús alrededor de la comunidad.
- 229. No hay suficiente seguridad para el ciclismo alrededor de la comunidad.
- 230. Necesitamos educación para el ciclista, el conductor, y para la comunidad para mejorar la seguridad de todos.
- 231. Se debe ampliar los carriles para ciclistas sobre la calle para mejorar la seguridad.
- 232. El transporte público tiene que mejorar.
- 233. A la hora pico, que hayan más rutas y más unidades públicas para la comunidad.
- 234. Mejorar la calidad de los autobuses.
- 235. Necesitamos la promoción de clases para educar a la comunidad sobre la comida saludable.
- 236. Necesitamos sembradillos locales – se debe usar lotes vacíos para la educación y para mejorar la comunidad.
- 237. Promover más “*Farmers Markets*”.
- 238. Eliminar comida “chatarra” en la escuela y substituir comida “chatarra” con comida orgánica.
- 239. Crear programas para educar a la comunidad sobre los efectos de no comer de una manera saludable.
- 240. Es más caro comprar comida saludable.
- 241. La comunidad apoyaría el concepto del uso mixto.
- 242. No hay hospital en San Ysidro.
- 243. Necesitamos mejores parques y que estén bien cuidados y seguros y que cuenten con baños.

- 244. Necesitamos mejor planificación del uso del suelo – construir parques que estén lejos de carreteras y vías del tren.
- 245. Necesitamos gimnasios con precios económicos.
- 246. Construir cines y lugares de entretenimiento familiares dentro la comunidad.
- 247. Necesitamos agua potable y limpia.
- 248. Crear un programa como “*Park and Ride*” en la comunidad y aumentar el acceso a “*van pools*”.
- 249. Mejorar el césped del parque; hay muchos hoyos.
- 250. Agregar más luces sobre todos los parques para mejorar la seguridad.
- 251. Agregar más banquetas y luces alrededor de las escuelas.
- 252. Necesitamos más vigilancia y participación de la policía para mejorar la seguridad.

Healthy Environment: English Table

Round 1 Participant Comments

- 253. Cars, smog, and pollutants at the border and the trolley line are a problem. The trolley begins at San Ysidro and is very congested at peak arrival times causing gridlock, but then the trolley idles at other times.
- 254. As the population expands, cities need to be prepared and keep in mind the walkability of neighborhoods and transportation options. Wildlife and parks need to be preserved. It needs to be made feasible to walk and bike and if there are not sidewalks in certain areas, then people are going to drive.
- 255. Safety is a big factor when planning for active transportation and there needs to be accommodations for people with all abilities.
- 256. Environmental justice needs to be considered. Where does the funding for infrastructure come from? People in all areas of the county pay the taxes, but not everyone receives the beneficial impacts. Who suffers from the health impacts from pollution from freeway construction? The communities in the south do. Parts of San Diego have received failing grades from the American Lung Association, but citizens do not hear about that.
- 257. Clean water is important.
- 258. Need better lighting in local parks for people’s safety.
- 259. In Chula Vista, there used to be open space, where up to a couple years ago, you would be able to see cows grazing. Now, large amounts of homes are being built and it makes the commute more difficult.
- 260. Seniors have to commute from very far away and the air quality impacts them more severely than others. They are also more sensitive to the sun and waiting at a bus stop without an overhang can be dangerous for them.
- 261. Concerned that the shoreline is losing sand and it will need to be replaced.
- 262. We need to manage water runoff better since the water eventually goes out to our beaches.
- 263. The beaches in Imperial Beach smell bad, so it is difficult to enjoy them.

264. There needs to be a productive dialogue between San Diego and Mexico that discusses water runoff and how it affects the environment.
265. SANDAG should work with Wildcoast since they are a bi-national organization that focuses on clean water and water quality runoff in the Imperial Beach area.
266. There was a report that rated all of San Diego beaches and they all rated well, so there is hope but there needs to be continued vigilance.
267. As a binational region, SANDAG is a model and should include the neighbors to the South in the plan. Water flows where it wants regardless of borders and that means that it needs to be controlled on both ends. San Diego can only do so much on its side without Mexico's help with planning efforts.
268. There is a new global climate law in Mexico, so the Government may want to work with San Diego to achieve certain goals.
269. The wait times at the border drastically affect the air quality in South San Diego. The cars are from both Mexico and San Diego, so there need to be regulations on both ends.
270. People who cross the border daily suffer from the negative health impacts caused by the cars.
271. The San Ysidro trolley line is overcrowded and one of the highest operating trolley lines in the country.
272. In other metropolitan areas, trains move every six minutes during peak hours. There needs to be increased frequencies of the trolley trains.
273. SANDAG can model how the cars cross the border, but if people park their cars and/or walk across, it will move a lot faster.
274. There are three or four above-grade trolley stations in Mission Valley, but they probably only have 1/10th the ridership that the Blue line border-to-downtown train. There needs to be increased frequencies and more grade separations.
275. Peak hours on the trolley are packed.
276. Trolley lines are usually along the freeways or commercial corridors, but in San Ysidro it goes right through the community. At the border it gridlocks everything. Trolley station is the only station ...but it is not at the gateway of the community.

Healthy Environment: English Table

Round 2 Participant Comments

277. Air quality in San Ysidro is bad due to traffic, congestion, and the wait at the border crossing.
278. San Ysidro is not a very mobile community and there needs to be more frequent trolley service.

279. In San Ysidro, everything is connected to the Tijuana Estuary, but then there is the Bayshore Bikeway that does not reach all the way to the border. There needs to be more connections so that people can appreciate the natural resources that are available to them and become more active in that area.
280. People who live near the canyons will use the canyons for exercise because they make the natural resources available to the community.
281. The beach that San Ysidro is connected to is Imperial Beach, but it is the most contaminated beach in the county. The health department has to do outreach for Hepatitis B and make sure that people go to the clinic.
282. Trash and sewage flows into the water and onto the beach from Tijuana, so there should be some consideration from San Diego on how Tijuana treats their trash and sewage.
283. The beach is frequently closed due to high levels of contamination and sewage.
284. Politicians have helped to secure millions of dollars for buses in City Heights and Clairemont, but what about San Ysidro? What does San Ysidro have to do to get that going in their city?
285. People use the San Ysidro trolley station a lot. What can the riders do to get a better station created? A petition?
286. How is funding distributed?
287. There needs to be forums, workshops, and other forms of outreach in the community. Many people can only be reached through door to door outreach. That may be what is needed to explain to them air quality issues.
288. Issues are sometimes geographical, but issues are usually connected.
289. Otay Mesa has been affected by past wildfires that have made the air quality even worse. Fires were also a concern since there is only one way in and one way out of the community.
290. The newer communities have limited infrastructure for transportation routes and often back up right to the canyons. The routes that are established have narrow sidewalks and have limited lighting.
291. There needs to be consideration in the areas with limited and poor walkable routes for wild animals. Many students walk home through the canyons and could potentially come across a snake.
292. For the San Ysidro middle and San Ysidro high school, students that miss the public bus often only have the option to walk home. Walking in the community can be very dangerous with the infrastructure that is currently in place. Parents worry that their children will be hit by a car or run into animals.
293. Kids that skip school sometimes smoke in the canyons and can start a fire.
294. Communities in Southeast San Diego are part of a culture that often lives day by day. We need to think forward.
295. More public areas need to be non-smoking. It is a problem that some businesses think that non-smoking will decrease business.
296. Climate change and sea level rise is a concern. Everything is interconnected and sea level rise will make crops harder to grow.
297. Many seals are beaching up due to limited food.
298. SANDAG should work with the Environmental Health Coalition, Wildcoast, and Ocean Force. They look at salinity of the oceans, the levels, tides and effects on ecosystems.

299. The beach is closed once a year for the sand castle competition in Imperial Beach and people are able to ride their bikes around with ease. That should happen more than once a year.
300. Even when people are close enough to bike they choose not to since it is not safe enough. There needs to be safer bike connections.
301. Some areas in San Diego have bike lanes that are painted bright green, but they are only for about 100 feet.
302. The bike lanes need to be widened and the bike destinations need to be considered.
303. San Diego needs to be a more walkable city with more transportation options.
304. There are a lot of people in the community that walk. For the San Ysidro Community Plan Update, a survey was done. There were many instances where people were observed walking in areas where there was no place to walk, no sidewalks. The “build it and they will come” mentality is not appropriate in San Ysidro since people are already there and making their own path.
305. The air quality is poor due to border crossing in San Ysidro.
306. There used to be a bike incentive for crossing the border and that should be reinstated.
307. People sometimes wear masks when crossing the border, but those who live full time in San Ysidro should not have to wear a mask all the time.
308. People biked from Tijuana to San Diego on bike to work day. Maybe there should be an incentive for those cyclists and a bike share program from San Diego to Tijuana.
309. There should be a vanpool program for those that live in Tijuana and work in San Diego. They could park on the Tijuana side of the border and walk across to avoid the border wait.
310. Parking is an issue at the border which means that people are often at the mercy of public transportation.
311. Tourism is affected by the limited transportation choices.

Healthy Environment: English Table

Round 3 Participant Comments

312. One attendee had a son in a school close to the border. He used to wonder why his son’s school started at 9am when all the other schools started at 8 am. Many students started to develop respiratory problems. The school district will not say, but the parent believes that the late start is in order to avoid the smog from the border. Parents want more statistics and want to know what is affecting their children’s health. That information should not be limited to schools though since many people have trouble breathing in the morning in San Ysidro. Residents would like more information on what the federal government is doing to make the border wait faster and what measures they are taking to reduce the pollution. Right now, it heavily affects San Ysidro but it will begin to affect the neighboring communities.

313. More needs to be done to keep traffic moving. The stop signs are not planned appropriately, especially around schools.
314. There needs to be more effort for brush fire prevention. Homeowners need to be responsible to clean up their land and create fire breaks.
315. The pollution is often so bad that it stops residents from walking outside in the morning. The senior population is especially susceptible to pollution. Those with diabetes are also affected more and it can lead to more health concerns.
316. The wait and the pollution at the border begins at three in the morning. There needs to be a way to process and manage the pollution.
317. Pollution affects all ages.
318. San Ysidro has potential, but is still dangerous compared to the nice developments in East Lake and other neighboring communities. There are some very dangerous areas in San Ysidro because of drugs. Crime is easy to get away with in certain areas since there is a shortage of police. It is an aspect of healthy environment, because people cannot go out on walks around their neighborhood since it is not safe.
319. People do not go to the parks, because they are not safe and are full of drug addicts.
320. Some parents do not let their children out of the house after 5 pm because it is not safe. That limits their activity level and their participation in their community.
321. Litter and graffiti affects the cleanliness of a community and when it looks like that, people are more apathetic and lose hope. That is why safe and clean streets are first in mind before enjoying the natural environment. In order to enjoy open space, other things first need to be taken care of. Safe lighting, dog parks, and more trash pickup would be nice.
322. There should be a communication system to get information to the community on the level of air quality that day. Sometimes it is in the paper or on the news but it needs to be every day and in a way that people hear it.
323. There is a cultural sense that there is nothing that the community can do about it. There is an overall lack of awareness and many residents do not know who their public officials are. That aspect of the culture needs to change so that there is more participation at meetings. Schools would be a good place to start.
324. Community members can have more of an impact on government action than staff sometimes, but they need to first understand how government and community meetings work. Meetings make residents empowered and they can become the biggest resources.
325. There needs to be more community events to help the children stay out of trouble and be in a healthy place. A youth club is a good example of such a place.
326. Parks are not safe and people often have things stolen there.
327. It is not traditionally a cultural thing to enjoy the environment. It is not a natural first interest to people, but that can change. People need to be educated on the outdoors in order to enjoy it.
328. It is difficult for residents of San Ysidro to get to the beaches.
329. There are often competing priorities when it comes to environmental health.

- 330. The water runoff is an issue and parents want to know that their children will not get sick by going in the ocean water.
- 331. The nice beaches are far from San Ysidro and gas is too expensive to drive there.
- 332. Education programs focused on the outdoors are great. Once children experience or enjoy the sports or activities involved with the outdoors, it will be a higher priority. Unfortunately, many people are not going outside in the first place due to the air quality, water quality, safety, and access.
- 333. There are many trails and places to ride around the Tijuana Estuary, but the smell is too much for some residents. A lot of the smell has to do with the runoff and effluent coming from Mexico since they do not have the right treatment of water. They do not have a separate storm and sewage system. Something should be implemented to stop that pollution from coming up to Imperial Beach. There is a lot of potential for Imperial Beach and the Tijuana River Valley for farming, horse riding, and commercial businesses, but it is impossible for government to keep cleaning the river.
- 334. Dairy Mart Road becomes stacked with trash after the rain.
- 335. Drivers in the US get smog checks on cars and pay for permits, but the US allows so much pollution to come in from Mexico and is quiet about it.
- 336. Is the treatment plant used in Tijuana?
- 337. Volunteer groups need to be created to do clean ups. The government can assist with these clean-ups by providing boots, gloves, bags, masks, etc.
- 338. Residents don't just want to be heard, they want action on the comments.
- 339. There were not any fliers out about the event.

Medio Ambiente Saludable: Mesa en Español

Comentarios de los Participantes de la Primera Ronda

- 340. Queremos que nuestra comunidad no esté contaminada.
- 341. Se necesitan más árboles.
- 342. Queremos más baños públicos y fuentes en los parques.
- 343. Hay demasiado concreto.
- 344. Hay que conservar el agua y usarla en forma más restringida.
- 345. Los aparatos de agua deben ser más eficientes.
- 346. Hacen falta programas de disminuir la contaminación.
- 347. La ciudad de San Diego debe proteger los recursos públicos de agua.
- 348. Hacen falta más baños en los parques.
- 349. Los bebederos están en mala condición.

- 350. Hacen falta más áreas protegidas.
- 351. No hay buen acceso a los parques.
- 352. La contaminación del aire en San Ysidro es cuatro veces peor que en otras comunidades de San Diego.
- 353. La calidad del aire nos impacta a todos.
- 354. No hay equidad social; las demás comunidades reciben mucho más beneficios que San Ysidro.
- 355. El *Trolley* está siempre lleno y los residentes no pueden usarlo porque está demasiado lleno con turistas.
- 356. La línea azul paga por el sistema; es la línea que funciona mejor.

Medio Ambiente Saludable: Mesa en Español

Comentarios de los Participantes de la Segunda Ronda

- 357. La Marina (en Chula Vista) tiene pista para correr pero el aire está demasiado contaminado.
- 358. El agua potable no es seguro.
- 359. No se puede tomar agua de la llave; el agua es caro porque uno tiene que ir a un servicio para comprarlo.
- 360. El agua huele a contaminación.
- 361. Muchos autos de México no cumplen con las restricciones de contaminación de los EE.UU. y cuando están esperando en la línea fronteriza, contaminan más.
- 362. Hay una escuela (*Willow Elementary*) muy cerca de la frontera y los chicos tiene problemas respiratorios por la contaminación de la frontera.
- 363. Hay una planta que procesa agua que parece contaminando.
- 364. Algunas ciudades no cuidan a sus playas.
- 365. Hay agricultura en San Ysidro que produce fertilizante y en los meses de verano el olor es insoportable.
- 366. Sería bueno tener un tren como el *COASTER* que fuera hasta la frontera.
- 367. San Ysidro debe ser un centro de transporte; mucha gente se va hasta Los Ángeles.
- 368. Hacen falta campañas de educación para que la gente entienda como sus acciones impactan al medio ambiente.
- 369. Se necesita una campaña dirigida a las empresas también.
- 370. Los parques de la ciudad deberían ser bien cuidados.
- 371. Hay que controlar a los sin hogar que frecuentan los parques.
- 372. Hay poca seguridad en la marina.
- 373. El parque de Otay Mesa es un ejemplo de buen mantenimiento.
- 374. El parque de *Border Friendship* necesita más vegetación.

Medio Ambiente Saludable: Mesa en Español

Comentarios de los Participantes de la Tercera Ronda

- 375. Necesitamos un parque con un lago para recreo.
- 376. No hay confianza en el agua potable.
- 377. Arroyos cerca de la ruta 905 están contaminados durante el verano.
- 378. El agua es caro; no se puede usar la de la canilla.
- 379. Debe haber usos distintos de agua (agua de riego versus potable).
- 380. La desalinización es el futuro de agua; hay que invertir en esta tecnología.
- 381. Promover en las escuelas la protección de la playa.
- 382. Mucha contaminación viene de Tijuana.
- 383. El gobierno debe mantener la tubería; cuando se rompe, se pierde el agua que es precioso.
- 384. No se toman en serio los problemas de contaminación del aire de los cuales sufre la comunidad de San Ysidro.
- 385. Las vías de bicicleta deben ser mejor mantenidos.
- 386. Hace falta más vegetación (*landscaping*) en la frontera.
- 387. Necesitamos más arborización de las calles.
- 388. Hay proyectos que se anuncian en carteles, pero nunca materialicen. Si fuera La Jolla, no pasaría esto.
- 389. Hay proyectos de las calles que nunca terminaron; fueron anunciados pero no se hizo.

Energy & Climate Change: English Table

Round 1 Participant Comments

- 390. Traffic requires a lot of energy, which is a big contributing factor to climate change.
- 391. Traffic has impacts on a holistic level, no impact is isolated.
- 392. Greenhouse gas emissions cause climate change.
- 393. Regardless of how we reduce emissions, there are lasting impacts from climate change that need to be addressed.
- 394. There is a lack of awareness and understanding how climate change relates to the average person.
- 395. Sea level rise is an issue that will have direct impacts in San Diego.
- 396. It is important to tailor the message to different population segments, taking factors such as language and culture into consideration.
- 397. It is important to identify the people that are affected the most by climate change.

- 398. Identify how community services can help address adverse effects of climate change.
- 399. Look at other cities, such as San Francisco, and require mandatory “green” measures in San Diego.
- 400. More green space can help address pollution and climate change.
- 401. SANDAG should take part in a program that works on creating/capturing alternative fuels from waste.
- 402. Cost is a large barrier to many transportation methods that are more climate friendly.
- 403. Car2Go car-sharing should be expanded throughout the region.
- 404. Demonstrate benefits of making individual changes that we need to reduce GHG emissions.
- 405. Publicize tax credits that are available for electric vehicles.

Energy & Climate Change: English Table

Round 2 Participant Comments

- 406. Invest more in sustainable energy.
- 407. A better transportation system will also benefit the environment and economy.
- 408. San Diego needs a transportation system that mirrors those in Europe.
- 409. Increase gas prices to encourage alternative forms of transportation.
- 410. Stoplights and stop signs used strategically can help reduce idling, traffic, and pollution.
- 411. Recycling programs and other “green” behaviors can help with climate change.
- 412. Better parking and traffic flow can help reduce GHG.
- 413. A transit center with parking would be very beneficial in encouraging people to take other forms of transportation (buses, trolley, carpooling).
- 414. We need to be proactive about naturally reducing fuel for wildfire, for example, with goats.
- 415. It is important to regulate certain industries, especially those that contaminate in residential neighborhoods.
- 416. Hold businesses accountable for the waste that they release.
- 417. Find other sources for water such as salt water conversion or recycling water.
- 418. Building codes should be changed to allow gray water to drain directly into gardens/landscaping.
- 419. Collecting rain water could be another sustainable way of conserving water.
- 420. Educate people on climate change and why conserving water is important.
- 421. City programs should be utilized to educate people on ways to conserve in their household.
- 422. Providing EV charging stations, raising gas prices, and offering incentives will encourage people to use alternative fuel vehicles.
- 423. Demonstrate cost comparisons and provide education on the benefits of electric/ alternative fuel cars.
- 424. Better bike lanes and dedicated lanes will encourage people to ride.
- 425. More local businesses and dense communities will help to reduce traffic and GHG.

Energy & Climate Change: English Table

Round 3 Participant Comments

- 426. The traffic and pollution at the border has significant adverse effects on the region, not just the border areas.
- 427. Education is a very important part of the solution, these concepts need to be related to the household level.
- 428. Reduce single occupancy vehicles through active and mass transportation.
- 429. Focus spending and investment on sustainable forms of transportation.
- 430. Spend less money on highways and more on public transit.
- 431. Promote investment in new sustainable ideas; we don't spend enough time on new ideas and processes.
- 432. Money needs to be invested on rapid transit systems.
- 433. Cars require the use of a lot of land, which is wasteful.
- 434. Electric vehicles are expensive and there is a large segment of the population that cannot afford them. For example the median income in San Ysidro is \$26,000.
- 435. Change funding priorities, trolley line is an efficient solution.
- 436. Be more eco-friendly, provide transportation options, that are accessible, handicap access on streets.
- 437. Transportation is one of the greatest needs for the lower income population.
- 438. Invest more money into each individual community, not just transportation but infrastructure so that people don't have to leave the community in order to find medical services, grocery or meet other basic needs.
- 439. San Ysidro needs solutions that make it easier and safer for kids to ride the bus or walk to school.
- 440. Walking and biking and public transit can help to solve climate change problems and address other issues such as public health.
- 441. Solutions need to be tailored to each individual community.

Energía y Cambio Climático: Mesa en Español

Comentarios de los Participantes de la Primera Ronda

- 442. Controlar el agua en toda la región, buscar más maneras de hacer agua potable.
- 443. Promover el uso de paneles solares.
- 444. Implementar más sistemas de energía eólica.
- 445. Implementar estacionamientos accesibles.
- 446. Reducir la contaminación en San Ysidro.
- 447. En la frontera, hay más contaminación que se siente más por la cercanía a la garita.

- 448. Revisar las emisiones de vehículos que cruzan la frontera.
- 449. Se necesita una educación general a los conductores para que regulen el aire acondicionado en los vehículos de transporte público.
- 450. Informar a la comunidad anualmente presentando gráficas estadísticas sobre niveles de contaminación.
- 451. Educar más a los niños acerca del cambio climático.
- 452. Aumentar la cobertura de *Trolley*; no es suficiente y la comunidad exige más *Trolleys* y transporte público.
- 453. Informar a qué hora del día se puede salir y no se le afecta el aire contaminado.
- 454. Publicar los horarios de la escuela y qué relación tienen con los niveles de emisiones.
- 455. Informar cuales medidas están tomando en cuenta para agilizar la línea fronteriza y reducir la contaminación por emisiones y ruido.
- 456. Simplificar la información para que gente entienda.

Energía y Cambio Climático: Mesa en Español

Comentarios de los Participantes de la Segunda Ronda

- 457. Dotar a todas las casas con aire acondicionado.
- 458. Mejorar el servicio del *Trolley* y el transporte público, ya que otras partes del condado se benefician con mejores sistemas de transporte.
- 459. Reducir la contaminación por emisiones que resultan de las largas líneas de espera en el cruce fronterizo.
- 460. Agilizar el cruce fronterizo para los peatones.
- 461. Ordenar las condiciones de los carros en el cruce fronterizo para reducir las emisiones.
- 462. Implementar paneles solares y sistemas eólicos.
- 463. Difundir la información de planes y programas de desarrollo en lenguaje coloquial.
- 464. Reducir los desperdicios, siendo más frugales en casa y cocinando una menor cantidad de comida.
- 465. Sembrar más áreas verdes y jardines para respirar aire más puro.
- 466. Desconectar aparatos eléctricos cuando no están en uso.
- 467. No tener muchas luces prendidas.
- 468. El agua se está acabando; hay que cuidarla y reusarla.
- 469. La mejor opinión es la opinión informada.
- 470. SANDAG debe explicar mejor los temas a la comunidad previamente a los talleres.

Energía y Cambio Climático: Mesa en Español

Comentarios de los Participantes de la Tercera Ronda

471. Se ha dado el cambio climático por contaminación.
472. Apoyar el cambio de focos ahorradores.
473. Aprovechar de la energía solar.
474. Mejorar la calidad del agua potable.
475. Mejorar la eficiencia de los vehículos y reducir las emisiones.
476. Gestionar el aprovechamiento del agua.
477. Ahorrar agua, reduciendo el uso de la regadera a cinco minutos.
478. Ahorrar luz y energía eléctrica.
479. Sellar bien las ventanas para regular la temperatura.
480. Apoyar los programas de acceso a nuevos refrigeradores.
481. Caminar y andar en bicicleta como medio de transporte.
482. Promover el uso de combustibles alternativos.
483. Usar transporte público y compartir carro para reducir emisiones.
484. Mejorar la frecuencia y puntualidad del transporte público.
485. Facilitar el acceso a paneles solares.
486. Aumentar las campañas de reciclaje y reúso.
487. Hacer programas para eliminar el desecho de los medicamentos.
488. Reciclar el agua en casa, como agua de la lavadora.
489. Reducir las emisiones de los vehículos en la garita del cruce fronterizo ya que afectan a la salud.
490. Revisar los vehículos que cruzan la frontera para reducir emisiones.
491. Establecer contactos a quien nos podemos dirigir para informar o preguntar sobre estas temas.
492. Organizar más talleres y trabajar con las promotoras comunitarias.
493. Conectar a SANDAG más con los líderes comunitarios que hablan español.
494. Informar a la gente acerca de cómo reducir el cambio climático y la contaminación, usando impuestos de negocios contaminantes.
495. Reciclar las televisiones de caja que son obsoletos.
496. Atender los casos de alergias provocadas por el cambio climático.
497. Plantar más áreas verdes en San Ysidro y promover campañas de forestación.

Economic Prosperity & Borders: English Table

Round 1 Participant Comments

- 498. Live Well San Diego initiative – health, safety, striving – is something that needs to be taken into account when discussing economic prosperity.
- 499. Example - in 1990 there was no commerce, one contract in the shipping docks created many jobs and since then business has grown. Now an RV park is considering locating near the marine terminal; this threatens the good paying jobs of the terminal. This is an example of the challenges from colocation of businesses.
- 500. Trade is an important part of economic prosperity; connect to borders.
- 501. San Ysidro is currently lacking a business district; it would be good to bring more “mom & pop shops,” to the San Ysidro.
- 502. San Ysidro is currently suffering due to delays in border crossing, this leads to economic loss for the city which is also affecting the Tijuana economy.
- 503. There is a lot of talk about the issues affecting the border and but that’s it...talk. Need to go further—need action.
- 504. Everyone is currently living on real time now and time is money.
- 505. Ease up on borders, should be able to cross border faster. San Ysidro border crossing should be fixed first. Now with the closure of Camiones Way there is only one South-North bound lane and that leads to border crossing delays.
- 506. Lengthy border wait times affect prosperity, health, pollution, & the environment. The pollution is affecting the students in the nearby school and many businesses whose merchandise is being transported between borders are also being affected due to the long waiting times to cross the border.
- 507. Need to invest more in border infrastructure as this can lead to more jobs and a healthier environment.
- 508. SR 905 interstate was a great addition.
- 509. Need to create a vision that will help people get more involved with these plans.
- 510. Ideas for connecting Tijuana and San Diego include plans for a trolley that will cross the border.

Economic Prosperity & Borders: English Table

Round 2 Participant Comments

- 511. There is currently no trickle-down effect in regards to money, jobs, access & opportunity amongst other things; everything stays at top, doesn’t go down to smaller communities.

512. There is a need for a new policy process that facilitates from bottom up; many of the processes for establishing a business are very cumbersome. There needs to be a process that is easier for small entrepreneurs to be able to start their own business which will lead to micro economic development.
513. There are a lot of people in our communities with many talents that if given the opportunity could have a great business but they don't know about all the options available to them.
514. Many people don't believe they have the access to these opportunities. There are many people lacking confidence that they could successfully navigate through process, or think that they have the capability to do it. We need to educate the community about their options.
515. Need to get rid of the bureaucratic loops that make people turn around and create ineffective, underground businesses.
516. A commercial zone in San Ysidro that can start micro business needs to be identified. Casa Familiar is currently working on pilot model where kiosks could be opened & lead to micro/small businesses that would be easier for community members to manage because commercial space, although available, is sometimes too difficult for small business owners to deal with.
517. Pay closer attention to Senior, working community. Currently it is difficult for many Seniors to find work since finding ways to commute can be a challenge. They also have difficulty having access to social services, groceries & medical care. The senior population needs to be taken into account when it comes to housing; housing should include support services with proximity to public transportation.
518. Mismatch between skills of individuals and skills needed in jobs is another challenge for economic prosperity.
519. Proximity to border usually results in lower quality of housing, but many people continue to live in these areas due to community, cultural & language ties.
520. Difference in quality of living from the areas in Central San Diego Region and areas like Chula Vista to San Ysidro communities.
521. Fewer services for people in San Ysidro. People who show up (public meetings, etc) and speak up get the resource, San Ysidro doesn't have too many of those people. May be due to people in these areas do not like to speak up due to their culture, majority of people in this area Latinos and many of them believe in "don't bite the hand that feeds them." A lot of times people are also fearful of speaking up because they don't know how much they can do or ask for. In some occasions, they may have family or friends that are undocumented which causes more fear to speak up.
522. Culture – people who think things aren't going to change, why speak up?
523. In some instances health issues such as depression, or family responsibilities such as being a caregiver, may lead to not working, which may affect economic prosperity.
524. Lack of parks and facilities for lower income population, children in particular.
525. What does your vision of economic prosperity look like:
526. More housing – HUD, affordable
527. Greener.

- 528. Outreach for seniors.
- 529. Access to education.
- 530. More local services.
- 531. More investment in schools.
- 532. Motivation for students.
- 533. Border has great opportunity; hopefully Otay Mesa East will be developed correctly, should have much open space.
- 534. Work on policy that allows for better quality of housing, not overly burdensome in terms of having to deal w/various business processes and red tape.
- 535. There should be more investment in south bay infrastructure.
- 536. Leadership in cities need to invest more in those communities that haven't received as much; social equity.
- 537. There needs to be a stronger focus on education & school achievement. Allocate more resources towards schools. In San Ysidro create more STEM (science, technology, engineering, math) programs similar to those in Hoover High. We need to prepare the children because they are the future. A college in South Bay would be good too.

Economic Prosperity & Borders: English Table

Round 3 Participant Comments

- 538. San Diego at large turns its back on the border even though there are a lot of chances for development & growth; lack of interest in border can lead to loss of opportunity.
- 539. Many people own business in Tijuana but live in San Diego, they are contributing to both economies and this is something that needs to be considered.
- 540. San Diego & Tijuana are really a Mega-region and need to start being seen in this way. Doing this could translate into many benefits such as economic and design.
- 541. The opportunity to learn & collaborate with each other needs to be taken advantage of. For example, poverty in Tijuana has led them to make the best of the few resources they have, using tires to make fences or living dwellings; could learn from them.
- 542. Energy is another example of something that could be collaborated on – let it go back and forth between borders.
- 543. Transportation, another area where collaboration is possible. It would be good to see a continuation of rail service south of the border, integrate rapid transit from Baja to Alta California, with no need to transfer at the border.
- 544. Encouraging to see the new pedestrian crossing in the border, that's a good start.
- 545. Realize that if that the border wasn't there we wouldn't be as prosperous as we are; much of the businesses in US exist because of the people south of the border.

- 546. Trade here affects many states. Example, items in maquiladoras don't just stay in San Diego, what happens if they are delayed due to border crossing waits?
- 547. Negative perception & discrimination towards people who live near the border, in regards to job market, language & way of life. Need to be able to get along and learn from each other regardless of language or cultural barriers.
- 548. Need to have business owners who care about the community. Las Americas – successful, retail outlet managed to survive recession, but the current owners don't care for community and that's not good.
- 549. Need people to think, what's the highest and best use for land near proposed new border crossing? How can we incentivize land owners to make it become accessible for people who want to invest there?
- 550. Issue of design. Consider smart parking; build up instead of across.
- 551. Connectivity & collaboration between the two countries.
- 552. A lot of bad publicity for Tijuana. Negative perception of the border affects Tijuana's economy because you have San Diego citizens not wanting to go down to Tijuana – but things are much better now but people are only hearing the bad news.
- 553. Issue in this border – public image & perception; need some type of campaign from the people themselves to actually go down to Tijuana and experience how it really is. Tijuana has a lot of design opportunities, a lot of talent. Shouldn't allow the separation of the border eliminate the opportunity.
- 554. Need a marketing campaign with San Diego & Tijuana ambassadors; tours, educate people on how Tijuana really is. Should be able to say "Lets go to Tijuana to grab dinner, see a show and come back," it's done in other borders throughout the world, why not this one?
- 555. There is a need for more:
 - a. Understanding of diversity.
 - b. Community action to bridge the border.
 - c. Blur the separation, as we move forward it seems like the division gets stronger and we need more collaboration.
 - d. Easier border crossing system – enhances the regional economy & better relations.
 - e. Concerted campaign to engage everyone.

Prosperidad Económica y Fronteras: Mesa en Español

Comentarios de los Participantes de la Primera Ronda

- 556. Es una tortura cruzar la frontera porque hay que esperar demasiado tiempo haciendo fila y hay una gran falta de coordinación de servicios.

557. La frontera y la prosperidad económica son profundamente vinculadas porque hay mucho comercio entre las comunidades de San Diego y Tijuana.
558. Muchos residentes de San Diego tienen necesidad de cruzar la frontera hacia Tijuana para recibir servicios médicos y medicamentos económicos, y a veces hay que dormir ahí para no tener que esperar en la línea de nuevo por horas para regresar a San Diego.
559. Por los altos costos de vida en San Diego, mucha gente se va a vivir a Tijuana. Rentar una casa puede costar \$300 dólares, lo que en San Diego no existe.
560. Las personas que cruzan la frontera están obligadas por alguna necesidad. Muy poca gente cruza sin necesidad, pero si cruzaran mejorarían las condiciones para ambos lados de la frontera.
561. No se puede cruzar la frontera para ir de visita o de compras debido a las demoras actuales, y eso está impactando de manera negativa la economía fronteriza; muchos negocios están cerrando porque no hay suficiente comercio.
562. Los oficiales federales no comparten la realidad de las personas que cruzan, entonces hay una gran desconexión entre ellos.
563. SANDAG debería interceder para comunicar a los agentes federales las opiniones y deseos de las comunidades usuarios de las garitas.
564. Hay que hacer la gestión de la frontera una prioridad.

Prosperidad Económica y Fronteras: Mesa en Español

Comentarios de los Participantes de la Segunda Ronda

565. La frontera es un lugar importante por ser la más transitada del mundo y por su multiculturalismo, por ser un lugar donde se juntan los dos países.
566. Mucho tiempo de la vida se malgasta esperando en la frontera.
567. Hay que ampliar el cruce fronterizo abriendo más garitas por toda la frontera entre Baja California y California.
568. Hay que minimizar los tiempos de cruce para que se pueda cruzar cuando sea conveniente- no solo a una hora específica cuando no hay tráfico.
569. Los tiempos actuales de espera impactan de manera negativa la salud mental y física de las personas quienes tienen que cruzar.
570. El gobierno federal debería invertir más fondos para entrenamiento de operación para los agentes federales de las aduanas para que tengan un mejor entendimiento de las comunidades que cruzan la frontera por las garitas.
571. Hay que asimilar e invitarlos a los agentes federales a eventos comunitarios para que participen en las discusiones sobre cómo mejorar el funcionamiento de la frontera y para que escuchen las preocupaciones de la comunidad, pues ellos viven aquí, van a nuestras escuelas, usan nuestras calles, etc.

- 572. Por la interdependencia de las economías, debería ser más fácil poder cruzar la frontera para obtener servicios y bienes en cualquier lado de la frontera.
- 573. Los servicios de transporte público deben de ser equitativos.
- 574. Se deberían enfocar más recursos en las instalaciones públicas para la comunidad en lugar de invertirlos en el turismo.
- 575. Tendría que haber un marco legal/ fiscal para que la gente pueda salir del yugo de los préstamos y las hipotecas y poder así progresar en la vida.
- 576. El marco de desarrollo económico debe de ser más promotor de la comunidad.
- 577. Se debe generar más trabajos mejor renumerados para que la gente pueda salir adelante económicamente.
- 578. Habría que atraer más inversión para tener más atracciones turísticas en San Ysidro.
- 579. Tiene que haber un esquema que promueva el desarrollo económico a través de becas y concesiones.

Prosperidad Económica y Fronteras: Mesa en Español

Comentarios de los Participantes de la Tercera Ronda

- 580. La contaminación ambiental y la calidad del aire son cuestiones ambientales importantes relacionadas con la frontera.
- 581. Necesitamos sistemas de transporte con salidas más frecuentes en la frontera.
- 582. Se deben aumentar las opciones o alternativas de transporte público en la frontera.
- 583. Debe haber más atención a las necesidades de la gente que cruce la frontera.
- 584. Hay que mejorar la organización de los cruces fronterizos y los servicios de transporte público.
- 585. Hay que ampliar las instalaciones en la frontera para que haya más espacio para moverse.
- 586. Deben de haber más carriles para peatones que cruzan la frontera.
- 587. Debe de haber un lugar más conveniente para ascenso y descenso de pasajeros de vehículos después de cruzar la frontera en San Ysidro.
- 588. Se tiene que desarrollar un centro de transporte y comercio en la frontera de San Ysidro que inspira orgullo y brinda a la gente los servicios que necesita.
- 589. Deben mejorarse las condiciones de seguridad para los peatones al cruzar las calles en la zona fronteriza de San Ysidro.
- 590. Debería ser más accesible el cruce fronterizo.
- 591. Se debería crear una cultura binacional en la región fronteriza para atraer más turismo.
- 592. Para lograr la prosperidad económica hay que atender también la educación y la salud pública de las comunidades fronterizas.
- 593. Necesitamos mejores banquetas y parques.
- 594. Las rutas del transporte público deben de ser más seguidas.

- 595. Debe haber más espacio en los vehículos de transporte público para subir bicicletas.
- 596. Los parques públicos en la comunidad deben de ser mejor acondicionados.
- 597. Debería de ser más fácil poder circular a diferentes destinos una vez que se cruza la frontera en San Ysidro.
- 598. Deben haber mejores conexiones de transporte público con otras regiones como Los Ángeles.
- 599. La ciudad de San Diego junto al sector privado debe de invertir fondos para construir un nuevo centro de transporte en San Ysidro
- 600. SANDAG debería facilitar la conversación entre los diferentes grupos interesados con relación al diseño de un nuevo centro de transporte público en la garita de San Ysidro
- 601. San Ysidro debe de ser un ejemplo y un símbolo de la relación tan interdependiente entre los EE.UU. y México
- 602. Hay una gran oportunidad para prosperidad económica en la región fronteriza de Tijuana-San Diego, pero solamente se podría aprovechar de ella si se mejora la organización del cruce fronterizo.
- 603. El aire acondicionado está demasiado fuerte y frío en el *Trolley* y el autobús
- 604. San Ysidro debe de ser un punto de llegada internacional reconocido.

Written Comments / Comentarios Escritos

- 605. **Comment 1**
Energy & Climate Change— what does SANDAG have to do with any of this?

- 606. **Comment 2**
 - Keep traffic moving.
 - Suck up emissions at Border Crossing.
 - More busses to beaches.
 - More parking at beaches.
 - More dog beaches.
 - Clean Tijuana River.

- 607. **Comment 3**
RV's park in National City Tidelands. Remember the (BNSF) train works all hours and a lot early A.M.s. RV's will be complaining of noise and shaking. Trains are heavy and make noise.

- 608. Comment 4**
No smoking in all public places in San Diego County.
- 609. Comment 5**
Better paid jobs. Decrease of everyday necessities (i.e. gas, food, school, etc.)
- 610. Comentario 6**
Yo comento que lo número uno que se tiene que remediar es el cruce fronterizo, que sea más rápido de 10 minutos mínimo; crear empresas donde uno vive para desempeñarse en alguna actividad y construir un futuro transporte público de precios accesibles no tan caro como el *Trolley*, más aquí en San Ysidro que mucha gente vive de la beneficencia pública.
- 611. Comentario 7**
Vigilar los vecindarios donde uno vive. Hay vecinos que parquean carros donde no deben; vienen los parientes de ellos y se tiene que parquear afuera del vecindario donde hay un solo carro por familia, no como en donde vivo que por familia parquean como 5 carros.
- 612. Comentario 8**
En 15 años me gustaría ver mejores trabajos con mejores sueldos.
- 613. Comentario 9**
Para tener comunidades saludables hay que tener parques apropiados para los niños y jóvenes; en el del ALA no hay luz y está lleno de hoyos y en el de ICU los niños quienes practican y juegan fútbol se lastiman.
- 614. Comentario 10**
Una comunidad mejor como el norte del condado.
- 615. Comentario 11**
Transporte binacional interestatal.
- 616. Comentario 12**
Sería importante hacer más rutas del bus a sectores donde no hay acceso ya que en muchas ocasiones se tiene que caminar hasta 20 minutos desde la parada del bus para llegar al lugar donde uno necesita ir. Nota: También que pongan más buses y *Trolley* en la hora pico.

617. Comentario 13

Acceso a más rutas de los autobuses
Ampliar horarios los días festivos en rutas de autobús
Acceso con banquetas para caminar
Puentes para ciertas calles en las horas pico respecto al *Trolley*

618. Comentario 14

Opino que si el tiempo de cruzar de Tijuana a San Ysidro fuera con afluencia, eso beneficiaría al comercio de San Ysidro en gran manera y como consecuencia todos prosperaríamos en todos los sentidos; hasta nuestra salud se mejoraría, y nuestro estado de ánimo; también causaría o generaría más empleos.

619. Comentario 15

Es necesario empezar hacer puentes peatonales en diferentes lugares estratégicos para agilizar el tráfico.

San Diego Forward: The Regional Plan: Draft Transportation Project Evaluation Criteria Public Workshop – August 5, 2013, Summary of Comments

Active Transportation

General Comments:

- Access to food, medical care, recreation on weekends/summer
- Affordability
- Criteria to identify benefits for bike & pedestrian separately
- Explicitly from houses to transit stops
- Safe access, comfortable waiting areas
- Public facilities/parking at major transit stations, shopping centers, entertainment centers
- Access to colleges/universities & military bases
- Project education
- Minimizes travel time
- Employment/employer's involvement/support
- Pedestrian friendly signals
- Does the project provide access and/or improvements to locally-adopted community trail plans?
- There should be a criterion that includes public wants; i.e., if SANDAG presents a projects and a vast majority of the community living within the project area does not want the project to be constructed, there should be points against it. However, if the public was for the project and wants to see it built, then I think more points should be given to that specific project.
- Weighting: #1 (10 pts), #4 (10 pts), and 10 (25 pts)
- Active transportation – proposed calculations should be based on Federal Transit Administration catchment area guidance – 0.5-mile walking radius; 3-mile bicycle radius
- Bike lanes at Virginia Avenue
- More weight for smart growth areas

Criterion 3: Consistency with Local Plans

- Does it include consistency with community plans or city plans? What about community support?

- Description should also include “community demand”

Criterion 4:

- Make changes as “located in a high-crash area and poorly designed corridors”
- It may be more useful to use 0.5-mile radius for bike/pedestrian crash, etc., if the proposed facility is expected to consolidate trips from adjacent corridors due to improved facilities

Criterion 8: Physical Activity

- Add – does the project support multi users?

Criterion 9: Range of Users/Skill Levels Served

- Modify the description to “balance needs of all users”

Criterion 10B: Accessibility

- Does the project support access to the county’s regional trail system (per county-adopted general plan)?

Criterion 10D: Accessibility

- Define more clearly; and break community of concerns into different groups – low income, disability, etc.

Freeway and HOV Connectors:

General Comments:

- Storm water re-use
- Consider life-cycle costs and operations
- Prioritize “bang for the buck”
- Consider health impacts in the area where the project is built, in particular with communities of concern
- Connectors should address jobs access for Communities of Concern
- Emphasize goods movement and cost-effectiveness
- Facility design should encourage active transportation users (pedestrian/bike)
- Add attractive bike/ped crossings and access to all connectors (High Occupancy Vehicle [HOV]/Freeway) projects
- Include bike parking at stations

- Consider combining the HOV and Freeway connector criteria

Freeway Connectors:

General Comments:

- Increase “Healthy Community & Environment” weighting
- Emphasize greenhouse gas (GHG)/pollutant emissions

Criterion 1: Provides Congestion Relief

- Ensure model looks at surface streets (key corridors) and how can we prioritize projects to alleviate congestion on these vital corridors for transit and active transportation

Criterion 4: Minimizes Habitat and Residential Impacts

- Calculation does not specify if success will be defined by increase or decrease in percentage of people accessing Smart Growth Areas using Hwy. Criteria should rank Hwy. projects that promote sprawl and easy vehicle access to these areas lower than projects that reduce vehicle trips

HOV Connectors:

General Comments:

- Increase “Healthy Community & Environment” weights
- Emphasize GHG/pollutant emissions
- Consider safety in ped/bike access to HOV connectors and secure bike parking at those transit stations and park-and-ride lots

HOV Connectors continued:

Criterion 3: Facilitates FasTrak/Carpool and Transit Mobility

- #3 is most important (and automatically impacts #1, #5, #6)

Goods Movement:

General Comments:

- Otay Mesa truck routing – treat truck route as “route”. Like Cesar Chavez in Barrio Logan. Treat La Media as trade
- Consider emissions from diesel
- Route trucks from I-15 via 805/163 (avoid City Heights)

- Keep trucks off narrowly constrained I-15 through City Heights
- Otay Mesa – doorway to nation – congestion dangerous for people – carbon monoxide particulate matter
- Flooding in October: Caltrans contributing - Otay Mesa
- Projects that have community support get more points
- Desert line – looking for benefits/planning + analysis for freight – existing/future (potential)
- Mountain Empire region – look at potential for rail – three tribal areas in rural east
- Include “excursion” line on Desert Line
- Consider multimodal evaluation criteria
- Was there a report done about this? (on multimodal criteria) – make this available
- Invite Otay Planning group and property owners
- Restricting trucks during certain hours
- Cleaner trucks in urban areas
- Encourage/incentivize smaller electric vehicles – charging stations
- Air quality impacts/Port of Entry (POE) drift, particulates – private industry
- Freight train impacts (pollution) to communities – noise, vibration, at grade crossing impacts)
- Sound walls/quiet zones
- Recuperate revenue from commercial users on freeways (via commercial license)
- FasTrak for trucking movement
- Include active transportation projects in project development
- More bikes on Trolley/bike lockers (no inspection needed)
- Bike lockers at stations
- Expansion of Desert Line
- Quit fighting the 2050 Regional Transportation Plan and its Sustainable Communities Strategy lawsuit
- Improve La Media Road

Goods Movement Air Cargo:

Criterion 4: Minimizes Community Impacts

- Residential buffer – more points for bigger buffers

Criterion 6: Minimizes Communities of Concern Impacts

- Attention to communities of concern

Goods Movement Maritime:

Criterion 4: Minimizes Community Impacts

- Residential buffer – more points for bigger buffers

Criterion 6: Minimizes Communities of Concern Impacts

- Attention to communities of concern

Goods Movement Rail:

General Comments:

- Goods movement – rail: “pedestrian benefits” and “accident history” should be added as criteria if there are crossings that intersect with local streets, arterials, or highways

Criterion 4: Minimizes Community Impacts

- Residential buffer – more points for bigger buffers

Criterion 6: Minimizes Communities of Concern Impacts

- Attention to communities of concern

Highway:

General Comments:

- Rank Healthy Environment greater than Innovative Mobility/Planning
- Increase the weighting for the Healthy Community goal
- Safety for all users and ranked highways
- Where is system preservation?
- Highway Regional Comprehensive Plan (RCP) Smart Growth Areas not clear, on transit focus on Smart Growth

- Highway construction induces sprawl & each project should be analyzed on this
- Highway projects reduce viability of transit
- SR 905 storm water issues need more consideration
- Consider a 'FasTrak' like fee/charge for trucks on highways (commercial users). Also charge trucks by time (more time = higher fee charged)
- Pay attention to sensitivities of the Mid-City community for I-15 projects in the area
- Thank you for meeting and lunch. Please study the impact of lead from airplanes, especially Gillespie Field. Planes run their engines on "full rich" when practicing touch and go's in El Cajon, Santee, Lakeside; install monitors in Santee, Lakeside
- Whether planes are hauling cargo or teaching student pilots. The planes are putting out emissions, please study emissions, heavy touch and go's put emissions in one spot. Lead does not dissipate
- Please give me more information on the status of the Bradley exchange from Highway 67. Also what criteria will be used for that exchange?
- The HOV's freeway criteria should include an overriding criterion that provides greater service to low and moderate income areas, even if that means continued congestion for middle and upper-middle class commuters. In particular, the HOV lane project proposed for SR94 from downtown San Diego to the I-805 connectors should be abandoned. The money not spent - \$450 million or so – should be spent in the surrounding communities instead
- The highway corridor criteria must have an overriding criterion to propose only projects that conform to the community plans of the communities within which the projects are proposed
- A new criterion: Community demand and consistency with local plans
- Highways facilitate sprawl. That should be reflected in a criteria
- Highways take away from transit ridership, which reduces resources for adequate transit. That should be a criterion

Criterion 1: Provides Congestion Relief

- Should be weighted 10 points

Criterion 1A: Provides Congestion Relief

- Maximum score should be 5 points
- Decrease weight

Criterion 1B: Provides Congestion Relief

- Should be removed because these increases the likelihood that freeways will be located in communities of concern
- A criterion should be “minimize impact to community of concern”

Criterion 4: Facilitates FasTrak/Carpool/Transit, Pedestrian and Bicycle Mobility

- What does “facilitate” mean? How is bike/pedestrian access considered? The criteria is not clear
- Should be weighted more
- Remove “Fastrak”
- Should be weighed 10 points

Criterion 7A: GHG and Pollutant Emissions

- Should be at least 15 points
- Increases in GHG emissions should get negative points
- Highway and connectors criteria include how much GHGs and pollutants are avoided. But they should actually get negative number.

Criterion 8: Serves RCP Smart Growth Areas

- Should be 10 points
- Should be at least 15 points

Criterion 9: Physical Activity

- Should be weighted higher. Also because it relates (replaces) to #5, #7, #9, #10, #12
- Should be weighted 10 points

Criterion 10C: Accessibility

- Current criterion is not clear how success will be measure to positively impact of community of concern
- Make criteria “what is increase in trips by communities of concern” - similar to criteria under transit
- Should be removed because these increase likelihood that freeways will be located in communities of concern. A criterion should be “minimize impact to community of concern”

Criterion 11: Serves Goods Movement and Relieves Freight System Bottlenecks/Capacity Constraints

- Should be weighed 5 points

Criterion 12: Project Cost-Effectiveness

- Proposed calculation should be expanded to be multimodal and address how many jobs are accessible by transit, walking and bicycle too

Rail Grade Separations:

General Comments:

- Incorporate transfer speed – station design
- Top 4 hours for bikes? Cars?
- Convert Bus Rapid Transit (BRT) to Rail in future
- Add criteria: improvements in rail efficiency
- Rail under-crossings: coastal access should be weighted as it is a statewide and statutory goal. Rail under-crossing encourages mode splits to the beach, reducing parking demand and exacerbated traffic. Reductions in auto mode shift with positively influence economy and give business more ability to attract patronage.
- The points awarded to Board Policy No. 033 for undercrossing should be low as it does not relate to propensity of undercrossing use. Also, the incentive for housing element compliance should be reconsidered since the state has stepped up the risks to local agencies for noncompliance, and for jurisdictions in San Diego that don't satisfy Board Policy No. 033 – grant funding is not the silver bullet.

Criterion 3A/B: Bicycle and Pedestrian Benefits

- Weight of pedestrian/bike = 11 points, take from Peak Period Exposure Index factors
- Higher weight for pedestrian and bike
- Move to Healthy Environment
- 3B should be separate from 3A

Transit:

General Comments:

- Under mobility – add in connections to other transport services (e.g. Amtrak, medical shuttles)
- Consider ferry services

- Take into account access to transit stops/centers (walk, bike, park-n-ride). First mile concept
- Shade and benches at transit stops
- Restrooms at transit centers
- Better bus feeders (local bus) to large transit centers (Trolley, BRT long dist.)
- Promotional fares (e.g., Sunday transit for shopping)
- Lower transit fares, tiered for seniors, students etc.
- All buses should have racks for 3 bikes (like in North County) – especially ones going to beach areas/Coronado
- Peer panel should include person w/expertise in public/population health
- Neighborhood integrity – potential impacts
- How a transit projects decreases auto trips/vehicle miles traveled should be considered
- Serving areas of high senior population
- Increase access for seniors (also children) that are dependent on transit
- More direct service, fewer transfers should score higher
- Service – more service to rural communities
- Degree of connectivity w/local/feeder bus
- Weighting (total max score = 125): #1 (5), #2 (10), #3 (15), #4 (1), #6 (5 pts), #7 (20 points)
- This format was confusing and difficult to get more suggestions and we could not hear ideas of others
- I am interested in better access to transport from neighborhoods where people live
- Safe bike routes
- Streets and roads that are safe and convenient for pedestrian
- Cheaper fares for public transportation
- Trees for shade and beauty at transit stop centers
- Thanks for having this. I understand better the complexity and magnitude of the issues
- We need more buses in East County

- Saturday and Sunday routes in the rural areas
- Lakeside and further out need buses to add pick-up times
- The “transit services” require two overriding criteria: (1) to provide services that take low and moderate income workers to the better jobs north of Clairemont Mesa Blvd, and (2) the transit planning agency should ask people who don’t use transit to say where they might want a bus trip to begin, to end, at what time(s) of which days. Then we can design an intelligent public transit system.
- Focus on design – easy connections between transit and active transportation modes
- Could there be a criteria for minutes served in transfer between modes/buses?
- Accommodate bikes
- Transit concerns: Affordability (low-income); accessibility (seniors and disabled); connectivity to food, healthcare, education, and employment
- There should be a criterion that connects to other transit/bus lines. The more connections, the higher the points. (Side comments: (1) interior of buses are often dirty and MTS needs to clean the bus at the end of the route at-least once a day, (2) many people on the bus do not follow the rules. The bus driver should enforce the rule; i.e., people putting both feet on the seats, (3) more signs to advise transit riders to respect elders and keep the bus clean, similar to disabled sign, (4) many people, who are not using a trained aid dog, bring their pets on the bus and Trolley in El Cajon. The dogs sit in the seats allocated for regular riders. There should be some regulation about dogs sitting on the floor of the buses and Trolleys.)
- Discuss and develop assessments for transitioning from BRT (fossil fuel) to rail/electric buses

Criterion 1: Provides Time Competitive/Reliable Transit Service

- Consider higher weighting

Criterion 2: Serves Daily Trips

- Redundancy between #2 (daily trips) and #7 (accessibility)? Should #7 be a substitute of #2?

Criterion 3: Daily System Utilization

- Include weekend and after hours

Criterion 7A: Accessibility

- Access – add in affordability (fares), medical care & food
- Connectivity to major job centers (not covered enough with increase in work trips criteria)
- Give more points to this criterion

- In “access” category, add access to beach areas and transit destinations - airport

Criterion 7B: Accessibility

- Proximity to recreational spaces should also consider the intensity of that space (example: lagoon w/no active recreation vs. major destination beach)
- Proximity to recreational spaces should also consider: a. the intensity of the potential mode split resulting from project

Criterion 7E: Accessibility

- Clarify that this means bike/pedestrian facilities allow bike/pedestrian access

Criterion 8: Cost-Effectiveness

- Cost-effectiveness should also consider: (a) Long-term effectiveness, not just short; (b) Maintenance assumed over the life of the project

Additional General Comments:

- I live in Talmadge (zip code 92115) and it is practically impossible to get to the airport or train station or Trolley, without a private car or taxi...and then there is no parking. What a mess! I suggest more buses, north to south, and vice-versa, going into residential neighborhoods.
- SANDAG should give highest project priority to bicycle transportation projects! Use recreational dollars for recreation projects. These are transportation dollars. Thanks!
- The list of candidates for the expert review panel should be available to the public. Please include an email address to which comments should be returned. Finally, please include a link to the meeting dates/times/locations for the expert review panel. Some of us would like to attend.
- Overlapping criteria. Too many criteria. Private/public match of funds should be considered.
- Increase maximum available points for active transportation and transit to 125 and leave highway corridor projects at 100.
- Active transportation criteria should be more comprehensively incorporated into criteria for other modes such as Highway Corridor.
- Thank you for lunch. The format of this workshop was not conducive to soliciting public input. The cramped quarters made it difficult to hear comments/responses or give feedback. The criteria sheets should have been distributed first to all participants to digest before proceeding to the boards. The presentation should have summarized content of the criteria, rather than more general information, to prepare and engage the audience. The pens don't work.
- This format was not very productive. I would have preferred whole group and small group input. The tables were too crowded and the lead person at each table was overly occupied. Perhaps there were more people here than expected.

- We did not like your format today.
- Question: How do we evaluate varying factors in ranking future transportation projects?
- The San Ysidro Trolley Terminal, currently under project expansion study, has the highest ridership volume, by far, in the entire MTS Trolley System. It is reportedly the only light rail platform in the United States serving an international border. Accessibility and mobility surrounding this station has deteriorated due to the largest POE expansion in U.S. history. The San Diego Trolley is an icon at the San Ysidro Pedestrian Port of Entry.
- Important criteria in planning and ranking future transportation projects must involve a measure of overall benefits to society. An evaluation needs to undergo a comprehensive assessment of all interrelated factors, including intended functions, goals and further reaching issues.
- Public Safety, Mobility & Accessibility: is project readily and conveniently accessible to its users and community? In high volume locations, does it increase public safety and eliminate vehicle-pedestrian conflicts for efficient flow of public transit-pedestrian-vehicle travel?
- Economy: how can the project help create jobs, directly and indirectly, and spawn new economic growth? Can public-private collaboration play a key role in beneficial development?
- Environment: will the project promote mass transportation as a strong alternative to help reduce traffic congestion, concrete highway sprawl and improve the quality of urban life?
- Public Health: the project should be instrumental in reducing vehicle use/gas emissions by utilizing alternative mixed-uses such as smart parking structures, people movers and pedestrian friendly open spaces in order to encourage non-motorized healthy activity.
- Social Equity: In underserved communities and regions, does project incorporate new public infrastructure and large scale transit oriented development to stimulate the local economy? Is public infrastructure needed, or is community adversely impacted by public right-of-ways?
- Smart Growth Planning: It must build on previous research, related studies, reports and modern transportation culture to utilize global best practices that yield future social benefits.
- National & Local Security: Intelligent design should promote high security technology and surveillance measures in prioritizing law and order for public safety.
- Binational Mega Region: The project should facilitate crossborder travel and access to jobs, business centers, school, shopping and tourism.
- International Symbolism: The project should showcase our diverse San Diego – Tijuana culture and symbolize our unique reputation as home of the world's busiest border crossing.
- Historical: The current San Ysidro Intermodal Transportation Center Study involves a historic window of opportunity. It should focus on how best we can celebrate our closest international alliance and brand for the first time a meaningful historic footprint on a cornerstone of the Americas, right here in San Diego, as the world's finest international gateway.

ECONOMIC DEVELOPMENT STAKEHOLDERS WORKSHOP SUMMARY- AUGUST 23, 2013, AT SANDAG

Regional Growth Forecast

- Is there any interest in getting cross border data to measure job growth? There are a lot of links and growth between manufacturing and R&D.
- In the future there will be 4 million people in San Diego and 5 million people in Tijuana, traffic will impact corridors, land use, traffic, etc. Cutting off the regions doesn't show the real picture and we need to plan for more binational coordination, especially with jobs.
- There is a strong push to have better rail connections with the east coast and Tijuana but we need better rail facilities. There are huge supply chain opportunities between San Diego, L.A., and the rest of the state.

Challenges in the Regional Economy

- The quality of life isn't good in San Diego. There is a large gap in salaries versus the cost of living, especially compared to the Bay area. Tourism is strong in San Diego and is not going away. Tourism is important but without it, other industries would prosper more.
- There aren't the same number of Nobel Laureates as other areas (for example, the Bay Area). Universities need to expand. How do we attract a more talented labor force?
- Carlsbad has been actively pursuing talent-attraction branding by telling stories of hospitality and travel and other industries and corporations. Marketing and telling businesses what Carlsbad has to offer across the board has been a successful strategy. The Regional EDC is currently doing a great job. San Diego needs to continue sharing its story on what we have here (Ex. second largest Life Science Cluster). Carlsbad is working with consultants and is in the process of recruiting a higher education university and emphasizing that the infrastructure exists to the business community.
- Biocom says the Medical Device Cluster in San Diego is the largest cluster in the world (larger than Boston and Silicon Valley). We need to work together as a group more to emphasize this.
- We are doing this but need to keep building relationships.
- A few suggestions: Why aren't the jobs here? People don't consider San Diego a good place to build a career. Not sure why but that's the perception. This is the difference between Boston and Silicon Valley. How do we emphasize people can build a career here?
- Before moving here, didn't originally think of San Diego as a place to go and build a career.
- Didn't realize the strength of the region. There are a lot of job opportunities in San Diego that people don't realize. These jobs could be marketed and broadcasted to the World.

- Perhaps this is due to the Philadelphia complex where Philadelphia is in the shadow of NY and San Diego is in the shadow of L.A.
- L.A. has a different economy than San Diego. L.A. is focused more on entertainment and San Diego is focused more on technology. Austin, Denver, Boston, and Silicon Valley are San Diego's competition.
- We are going to grow by births so we need education and training to fill the needs of companies that are here. Scientists, manufactures, but also technicians and other jobs. Many people will be from across the border. How do we train these people and the local-born workforce? How do we encourage these companies and talent to stay here?
- Manufacturing as a general concept is on the decline but San Diego will continue to be a leader in dye manufacturing and precision manufacturing.
- We need to advertise and capitalize on working with the entire supply chain between San Diego and Baja California.
- There is a discrepancy between education and jobs. There is growth in South Bay and the Baja California region. Recruiting talent needs to tie in education policy with discrepancies. Our universities are competitive. We need more universities in San Diego County, not just North County. We should tap into local San Diegians, minorities, and attract new talent. We have the need for skilled people but need more training programs since many high schools with these training programs have waiting lists.
- How do we bridge these gaps? For example, nurses and IT professions in the future? For culinary arts, many programs have wait lists. We are assuming some of these jobs go to China so we have no training program.
- The mindset should be that it's not just about jobs. We need to highlight successful companies that are globally competitive. Jobs are an outcome, not an objective. How do we convince tourists to come? Belgium brings in tourists because they have a great medical system. Why don't we have a hospital that attracts talent, jobs, revenue, and tourism? We should focus on industries that aren't export-oriented and other opportunities. We need other decision-making tools in the region.
- If we are attracting people here for healthcare, we need to take advantage of it.
- We are at an interesting point in the RCP and in scenario planning. Infrastructure decisions help to move people and jobs. Housing is a main driver for planners and economic development. People who work in households (construction, daycare, etc.) think that scenario c (multiple dense corridors) will play best in concepts. We need to help the less affluent communities. Downtown works because the rents drive high rise prices but most other places don't have the rents to drive housing construction. How are we going to provide economic incentives in the corridors that have lower rents? We no longer have redevelopment funds so we need new tools and incentives.
- The big issue is the cost of living compared to incomes. In studies, the cost of housing here makes us drop to the bottom of the many rankings. There is an affordability issue of the economy's ability to generate jobs that can pay for the housing. These issues relate to two different approaches.
- We have comparable living costs to Dallas and Houston but housing is so much more expensive here. We need jobs here where people can afford to live.

Redevelopment Funds and Challenges. Is there Private Market Momentum?

- The funding that was going into construction and affordable housing is not being replaced. Money is going into education and public safety facilities. Redevelopment and infrastructure is receiving less funds. Money is going to general fund to support cops, teachers, etc.
- There is a big gap with affordable housing and keeping this type of construction going. The City of San Diego is competing with other areas in the region for federal dollars. We need to shift policy into alignments (TODs, subsidies with housing around rail). We should focus on all three growth scenarios but we can do better. There are lots of cross-opportunities with federal and state government. TIGER grants provide a lot of opportunity for cross border funds in the region.
- We have the ability to accommodate the units in our region but if housing affordability prevents that, units will go to Baja and Riverside and affect our transportation system.
- In Oceanside, the City Council doesn't like multifamily housing. They want to attract younger people but keep building more expensive housing.

Does Smart Growth constrain or encourage economic development?

- Depends on the details and the saviness of the planners, economic developers, and council members in the city. In some cases, they couldn't sell the smart growth concept and the developments weren't well-planned. A good example of a well-planned development is where people could walk, shop, and work next to each other (such as at Bressi Ranch). High planning standards, understanding Smart Growth, and understanding that the industry and economics are there to support the Smart Growth is important for Smart Growth to be successful.
- We need to plan for new dynamic housing related to Brownfields and redevelopment. For one TOD project, a big difference in its success is parking requirements (essentially the project has no parking but uses other modes: ride shares, some visitor spots, etc.). The San Diego development mentality is that zoning codes don't allow for less parking and developers need more parking because they think they need it to sell/market apartments. Trolleys are good but don't help unless it is right there. If a trolley station is planned right, it works (it needs safe and well-designed sidewalks).

How do we address housing issues for families and bridging the next stages in life?

- There are opportunities for growth and infill along transportation corridors. How do we address this notion that growth is home grown? How do you address young professionals and baby boomers moving into multifamily units?
- San Francisco planned for this well. Professionals and older people want more TOD, which will open up single-family homes for growing families.
- We should have a diversity of housing options and jobs to attract young professionals (millennials). There's some animosity toward owning your home. It's a hot topic but we are working on addressing this in the General Plan.
- The more that SANDAG could do to provide incentives for Smart Growth, the better in terms of replacing redevelopment funds. We need to accommodate affordable housing as part of RHNA. Some other suggestions are for SANDAG to plan on setting aside subsidies for RHNA and Smart Growth. People don't trust the City to do this (they took away redevelopment funds). Money gained in a city should stay in the city.

There is a general theme of cooperation in the region at this meeting. How can SANDAG and infrastructure help this? We're not just talking about highways, but also trolleys and bicycles to build the "infrastructure of great places". How can infrastructure improve accessibility to jobs and prosperity?

- During the Bay Area boom, there wasn't time to add freeways because of funding. Instead, they focused on taking trips off the freeway by using other multimodal means (bike, pedestrian, carpool, telecommute, and other technologies).
- Does SANDAG do anything related to telecommunications infrastructure? Could SANDAG have anything to say as to support San Diego as a major telecommunications hub? SANDAG could help coordinate with other telecom companies (small and large) and industry associations. There are lots of individuals that care about this but not enough to pool together (for example, the big and little telecom companies).
- SANDAG could build fiber optic cables through highways and trolley ROWs.
- There are already fiber optic cables being put in along the Mid-Coast route near UC San Diego and the super computer center.
- Companies cluster and want to be near other companies and interact more. They need sidewalks, other things that interact people and company synergies, and the economics of neighborhoods. This will help attract millennia's and promote Smart Growth concepts.
- For Smart Growth criteria, are you laying fiber optic cable? We should think about this and how it works with other infrastructure.

SANDAG Peer Panel Review Discussion – August 23, 2013

Key Strengths of SANDAG Approach

- Goal structure
- Data-driven, rather than qualitative
- Moving towards cost-effectiveness approach, while still recognizing value of Board priorities

Recommendations for Improvement

Overall Comments

- Fewer measures would be better
 - Suggested measures for removal include: measures of existing or new volumes (already captured elsewhere), superfluous accessibility measures (such as access to beaches or Native American reservations)
 - Removal of volume-based measures would avoid potential bias towards low-benefit projects on high-volume facilities
- Ranking approach: ranking based on top project is flawed
 - Could pursue alternative approach to avoid “outlier introduction bias”
- Adverse impacts should be considered whenever applicable
 - Doesn’t highlight drawbacks of certain modes
 - Could consider both positive and negative point scale for some criteria

Modal Silos

- Need to have consistent criteria across modes
 - Reduce modal silos, particularly between highway and transit
 - Even within highway category, too many categories, consider combining highway corridors, High Occupancy Vehicle (HOV) connectors, and freeway connectors into one list
 - Improved criteria could simplify approach
 - Merged criteria would help to minimize mode-specific criteria’s excessive weights
 - If you start measuring the right things, do you need the FasTrak/HOV/transit criteria for highways?
 - Active transportation and rail grade crossing excluded

- Need to consider corridor improvements, regardless of mode
 - Can't see which project is best for corridor, regardless of mode
 - Benefits from all modes, not just mode being analyzed
 - Broad concept of mobility, rather than hours of auto time saved
- Remove congestion - instead mobility
- Add or remove consistently for both highway and transit projects
- Have consistent weightings for criterion that are featured in multiple modal categories

Cost-Effectiveness and Benefit-Cost

- Scale benefits in points system based on cost
- Differences between benefit-cost and cost-effectiveness for identified metrics
- Need benefit/cost ratio if cost-effectiveness for each measure?
 - Folks will want to see this
 - Business folks will want to see benefit/cost ratio return to analysis
 - Need to fix cost-effectiveness weight (make the same across modes)
- Pull benefit/cost ratio out and display in conjunction with points score

Land Use

- Need more emphasis on smart growth/land use; need to prioritize smart growth areas
 - May not be at the point to incorporate land use/Regional Housing Needs Assessment across them
 - Focus on improved accessibility for focused growth area
 - But need to encourage live/work in same areas – improve their ability to travel
 - Projects should be regional-serving in Regional Transportation Plan
 - Internal capture not important
 - Smaller smart growth areas have lower numbers of people/jobs, lower scores

Arterials

- Lack of inclusion of arterials is shortcoming for road-based smart growth

Reliability

- Add reliability measure
- Qualitative measure for now
- Transition to quantitative measures next time
- Lack of Intelligent Transportation Systems in analysis recognized as shortcoming

Design Elements

- How to deal with this via policies
- Transit has better impacts on smart growth via design
- Need to consider these categories but recognize shortcomings when reporting results

Lower-Cost Projects

- Time intensive for minimal analysis
- Don't separate multimodal elements from major projects; e.g., highways

Safety

- Relates to urban design issue
 - Behavioral, not engineering, challenge
 - Current approach and weight is satisfactory
 - Data source is decent
 - No satisfactory solution
- Vehicle technology is also critical
- Active transportation adequately captures traffic safety issues
- Collision forecasting is difficult

Accessibility

- Sub-measures should not be equally weighted
- Native American tribes should be communities of concern

Peer Review Panel: Public Comments and Questions

- Why does the Active Transportation category have an evaluation criterion for consistency with local plans but other modes do not?
- Would the panel's recommendation be expected to result in a significant shift in the currently projected transportation mode use for the population?
- Could you please elaborate on the comment related to superimposing highway projects and subtracting transit projects and how this will help create better performance measures?
- Will the cost/benefit (cost-effectiveness) analysis consider health impacts?
- You said adverse impacts are not considered, please define "adverse impacts" or how should SANDAG define.
- The criteria currently awards a highway corridor project points for proximity in communities of concern. Would it be more appropriate for a highway corridor project to be awarded points for minimizing impact on communities of concern? What is the reasoning behind incentivizing highway corridor projects in communities of concern where air quality is the worst?
- You recommended fewer measures so which would you take out and which would you leave in?
- We support the panel's recommendation to combine the highway corridor, HOV connector, and freeway connector criteria into one category. We'd appreciate it if the recommendation would be accepted by SANDAG.

Summary of Input on Transportation Network Development – August, 2014

Public Workshops – August 4, 2014 (lunch time and evening)

- Support for Trolley/SPRINTER and streetcar projects
- Accelerate bicycle and pedestrian projects
- Expand BRT and Rapid Bus to more job centers and neighborhoods
- Preference for phasing 2 Managed Lanes first
- Increase transit frequencies and hours of service
- Concern with GHG emissions related to transportation
- Improve transit access to beaches, airport, and tourist destinations
- Requests for an additional scenario

Joint SANDAG Working Groups Workshop – August 6, 2014

- Some support for a more widespread network of transit services
- Some support for investing in existing Trolley/SPRINTER corridors
- Advance Active Transportation projects
- Advance Airport Express buses
- General support for 2 Managed Lanes earlier to provide more connectivity
- Access to jobs is important
- Connectivity between transit modes and to Active Transportation projects is desirable

Online Comments through August 25 2014

- Support for Trolley, COASTER, and SPRINTER projects
- Accelerate implementation of transit projects
- More investments in North County
- Improve transit access to job centers, beaches, airport, and tourist destinations
- Support for Managed Lanes in some corridors
- Requests for an additional scenario

Economic Competitiveness Focus Groups - August 4-8, 2014

- Wide support for the balanced approach taken in both scenarios
- Support for transit projects, especially Trolley and COASTER, as the existing transit system is not seen as robust enough to offer a real alternative to car travel
- Improve transit access to job centers, health care, beaches, airport, Mexico, and tourist destinations
- Local street and infrastructure updates are needed
- Parking challenges are experienced at hospitals, universities, and the Port of San Diego
- Interest in Mobility Hubs, active transportation, and greater density supported by transit
- Support for freight capacity, including rail

November 4, 2013

Public Workshop on the Regional Plan: Summary of Comments and Suggestions From Each Roundtable

Between May and November 2013, SANDAG held a series of public workshops to engage the community and stakeholders on potential ideas and policy objectives that could be considered in the development of the regional plan. The workshop summarized below was held on November 4, 2013, at the Balboa Park Club in San Diego. The workshop focused on topics addressing issues of mobility, environmental health, and the economy. The workshop contained tables at which discussions were hosted by SANDAG staff members, including Spanish-speaking staff members. The discussions at each table revolved around three focused themes listed below. Participants rotated tables three times, providing their ideas and opinions at each table they attended.

1. *Innovative Mobility and Planning (Two Tables)*
2. *Healthy Environment and Communities (Two Tables)*
3. *Vibrant Economy (Two Tables)*

The following is a list of the comments, questions, and suggestions made by community members and stakeholders who participated in the workshop, as recorded by the note-takers. Feedback is organized by table themes which reflect the San Diego Forward: The Regional Plan goals of innovative mobility and planning, healthy environment and communities, and a vibrant economy.

Public comments that were submitted in writing are also included. The feedback collected at the workshop will help guide the development of the San Diego Forward: The Regional Plan.

Innovative Mobility and Planning

Participant Comments

- We need a modern and comprehensive system that uses good technology, dynamic pricing based on congestion, and energy efficient vehicles
- Options, both paid and non-paid are important
- Bicycle facilities are important, health cost savings, and environmental benefits
- Cater to “smaller” scale transportation options
- Key criteria - VMT reduction per dollar spent
- Affordability – it is cheaper to drive than take public transportation
- Connectivity – having multi-transport nodes to link different transit systems, also filling gaps in the system
- Reducing greenhouse gas emissions has to be the number one priority, identify projects that reduce greenhouse gas emissions
- Increasing density along land use corridors
- Identify the number of collisions and dollar impact on the economy
- Level of Service concerns, multimodal delays, cost benefit scenarios
- Increase in walk, bike, transit and carpool mode share is an essential component
- Look at the demographics of income class on each mode of transportation, VMT per passenger, per income level
- Interested in much more biking and pedestrian use, measures of success - 10%? Bike mode share by 2020, reduction of serious injuries, specific deliverable on bike mode share at schools and universities, and deliverable timeline on project implementation
- Transit is not being integrated as well as it should be, there are gaps in the system there needs to be better links between Trolley and bus.
- There needs to be more options for first and last mile
- Different modes of transit need to better accommodate bicycles
- SANDAG should offer some kind of incentive for people to give up their car and encourage multi-modal travel
- Have “share” or rental options to fill in transit gaps
- Bus to rail is a very important connection
- Fiscal efficiency should not be a major criteria, being effective should be the ultimate goal; this will have residual benefits with the economy and the environment

- There should be ways to measure and value alternative options such as telecommuting
- Look at charging people to drive, especially with lower gas prices
- Good public transportation is the key, without effective transit people will not be inclined to switch modes
- Cost of transportation based on different modes
- Consumer cost and efficiency are the ultimate criteria
- How much energy/pollution is being produced in different modes
- We need to look at real data to make informed decisions
- How walkable and how ride-able are communities
- Bike and pedestrian infrastructure is important in multi-modal links
- Poor communities often get overlooked; safety is essential and should not be overlooked
- Have social justice listed as specific performance measures
- Safety should be considered as a key measure
- Look at the different demographics of users
- How to make the best use of new technologies, such as car-share and other carpooling programs
- Consider the change in demographics and accommodate all ages as well as people with disabilities
- Ensure that people aren't left behind with technological changes, look at ways to incorporate technology into low-income transit strategy
- Look at ways to incorporate both public and private sectors in meeting needs
- Some communities do not report crashes, additionally there are roads that are so dangerous that people will not bike or walk. Quality of infrastructure should be included a performance measure.
- Make sure that multimodal trips are valued
- Evaluate mode share in various communities as part of the process
- Remove daily vehicle delay per capita, speed of car travel is overrated and should be worth less when rating
- Bicyclists may want to travel from suburbs to downtown to commute from work; measuring how many people are biking in the system is an important aspect to consider in evaluating the transportation system
- Public transportation takes hours to get from where I live to where I work, therefore measuring travel time (especially by bus or other transit method) is very important
- It is shocking that it takes two hours using public transit to get from the San Ysidro Trolley station to San Diego State University
- Offering an Express Service route for the Trolley to key locations would be a good idea
- Having more travel mode choices is important
- It is also important to take environmental consequences into account

- Looking at the increase in ride sharing and non-single occupancy vehicles with competitive travel times is very important. More people biking and walking and ride sharing is needed, but most transit system choices take longer than driving.
- It's important to reduce the reliance on single occupancy vehicles by encouraging people to use innovative transit methods
- Refueling and servicing of Amtrak trains at the Santa Fe station is a problem for residents in the area due to noise and environmental pollution
- Average travel time to work destinations by mode is a helpful performance measure to evaluate transportation systems
- San Ysidro has infrastructure for many different modes of transportation that is lacking in mobility and is poorly organized. Transportation networks do not stop at the border. Trolleys that begin their route at the San Ysidro station are often too full to stop at the next station because so many people get on in San Ysidro. There need to be more organized mobility choices so that modes of transit are segregated. There should be grade separations at the new San Ysidro Intermodal Transit Center.
- Measuring delay vehicle times at the border and idling time is very important
- Increasing the frequency of the Coaster is important because I prefer not to drive since I see an advantage to my health, stress levels, the environment and the community
- I live in the Spring Valley-Lemon Grove- San Diego corridor and I wouldn't bike or let my children bike in that community because it is not bicycle friendly. Safety is very important in measuring performance of the networks, so annual projected number of bicyclist/pedestrian injury/fatal collisions per bicycle and pedestrian miles traveled is an important measure of performance.
- Personal safety is important. Designing transit stations so that they are located in safe areas, or so that they at least feel safer by installing more lighting, would be a good idea.
- Trolley fares are quite cost prohibitive, especially for families wanting to take public transit down to Las Americas from North County, for example. Therefore, discount family fares should be offered.
- Frequency and affordability are important measures to use in evaluating public transit
- Offering Compass cards that could be attached to key chains would be a great incentive for people to purchase Compass cards who tend to lose them and have to continually replace them
- There is nothing worse than sitting in traffic on the highway, therefore daily vehicle delay per capita is an important performance measure
- It would be helpful to broaden the "average travel time to work" category to encompass recreational destinations as well

- Aside from the traditional work commute times, the after school commute period of time is also important to consider for families and children, especially in terms of personal safety and transportation.
- The bottleneck at the border is a big problem. Get people out of their cars and into public transportation by providing more parking at the San Ysidro POE
- Find a way to evaluate how much people are encouraged to use ride-sharing, and electric vehicles or Cars-to-Go.
- Regarding the "system wide vehicle miles traveled (VMT) per day" measurement: It would be better to use time as a measurement since time is the most important factor in evaluating the networks
- "Average travel time to work destinations by mode" is a helpful performance measure to evaluate transportation systems because it is one of the main factors I consider when deciding how to travel to my destination
- Daily vehicle delay per capita is less important to me than it used to be; I personally would rather plan on using my car some times, despite the delays. However, it is more important to move more people in an efficient, environmentally sound manner. "Throughput" is the greatest priority, especially in terms of social justice so that areas where residents depend most on public transportation have more mobility choices, and ones that are environmentally clean and do not negatively affect public health.
- Vehicle delay and reducing VMT are at odds; if we are going to reduce our GHG emissions, VMTs need to be reduced by 15%, meaning daily vehicle delay should not even be considered as a performance measure.
- Looking at transportation and housing costs as a percentage of family income makes a lot of sense; both of those factors should be kept low. This will help get away from the model of having to live further and further away to afford housing, and then having to commute a far distance to work.
- If jobs are closer to where people live, that will improve all of the externalities of transportation in our communities
- Because of population growth, looking at the cost of transportation and housing for families and how far they have to travel to work is important
- Giving priority to projects that serve those with greater need, such as San Ysidro, is very important. One example is the over-capacity of the Trolleys for the commuters at the border. For this reason, it would be good to give priority to creating Express routes and active transportation such as bike lanes in that community.
- In order to measure the performance of the network, we have to consider the land uses that affect them; having a higher share of mixed land use will help increase multi-modal transportation use
- You have to recognize the inter-relatedness of all of the performance measures
- Focus on innovation rather than old-school use of one-car-per-person mode. Don't add more lanes to roads and freeways – that only puts a bandage on an existing hemorrhage.
- Performance measures should be used to evaluate overall funding allocations not within the modes of transportation.

- Safer commutes: better utilization of major streets like Fairmount Ave. that is unsafe and under-utilized for pedestrian and bicyclability. And consider the “safety” of major streets and collector streets to allow smoother and safer utilization for bicyclists and pedestrians.
- There appears to be an over-reliance on outputs, rather than outcomes. The outputs are things like VMT and CO2 emissions per capita. Outcomes are more quality-related. Outcomes should be much more specific. More than just ridership, performance measures should specify who is using which type of system, such as per capita income/mile of Trolley/light rail transit or average calories used/mile of transportation.
- Innovative mobility planning: daily vehicle delay is a less important aspect/performance measure. Possibly congestion of vehicles should be compared to transit time.

Healthy Environments and Communities

Participant Comments

- The performance measures seem comprehensive
- Geographic location may shape the types of performance measures SANDAG is looking at for this analysis. While transit may not be available/appropriate in areas such as the Mountain Empire, access to active transportation facilities (biking and walking) are needed to connect to the available social services.
- Smaller scale projects, such as painting crosswalks near schools, should also be considered in this analysis
- Safety is a big concern, especially when promoting transit usage, walkability, bike-ability; how is safety (which includes law enforcement) considered in this process
- The performance measures should include multimodal measurements that encourage safe and healthy communities
- A measurement should be included that encourages people to reach a minimum transportation-related physical activity level
- A First-Mile, Last Mile measurement is needed, which also takes into account what the first and last mile look like
- A reduction of freeway traffic measurement is needed (which would reward transit projects by encouraging SOVs to convert to alternative transportation modes). (The CO2 emissions measure can similarly relate to this concern.)
- Safety should also be considered in the performance measures, which would include quality pedestrian environments around major transit arterials/corridors
- A water quality measurement is needed for this analysis. Transportation projects can affect the amount of water-polluted run-off from creeks and streams in urban areas. Standing water can also accommodate mosquitoes and can disproportionately impact communities.

- Economic justice should be addressed in the measurement tool. The older communities (such as San Ysidro) have not been considered for LRT grade separation; however, in newer transit projects (Mid-Coast), grade separation is being considered.
- High Density needs to be considered. (This concern is addressed in the existing performance measurements.)
- Consider a sidewalk measure that encourages biking/walking. (First-Mile, Last-Mile)
- The constrained lands measurement is too overgeneralized. There are too many effects on protected agriculture lands versus protected sensitive habitat lands. These two items need to be differentiated.
- What is the average calorie per hour that people expend getting to and from places? Walking? Taking Transit? Total time engaged in transportation related physical activity is a measure that begins to get at this point.
- Consider identifying which types of populations are being served by which services? A new measurement could make sure that we are serving all income brackets.
- Consider localized air pollution impacts in the measurement analysis. Poor air quality is a safety and health concern.
- Consider a measurement that works to reduce greenhouse gas emissions by means of Vehicle Miles Traveled (VMT). A cost-effectiveness measurement that needs to be considered is VMT per dollar spent.
- Consider a measure that sets a target goal to increase the number of individuals who bike to school, with a goal to reduce childhood obesity in mind. We need to be able to quantify these health effects.
- A potential measurement could include setting a target of achieving a 10 percent bike mode share by XXXX year
- Consider a measurement that captures a reduction in pedestrian/cyclist related injuries. (Safety)
- For a mega-region, such as San Diego, consider measuring the air pollutants with a goal to reduce emissions near major transit hubs
- Consider looking at a quarter mile for high frequency transit; consider an eighth of a mile for population/employment within X miles of a bike facility
- The revenue formula needs to be revisited to encourage transit ridership. The conversation has shifted from what the major issues were 10 years ago and what appears today.
- SANDAG needs to work on not only getting information out to underserved communities, but also providing the appropriate staff at these meetings.
- Need to determine if transit modes are accessible for those with strollers, wheelchairs, and the visually impaired. Is there a way to track that? For major transit stops GIS should be used to determine if that last mile is walkable.
- It is recommended that people get in thirty minutes of walking a day, and transportation-related activity can count for that. However, for people that are visually impaired that may not be an option. Routes may be ranked higher for physical activity, but that might be more difficult for the visually impaired.

- The more mass transit available, the more people will use it. The Trolley is a great transit option, yet there is still a small number of San Diegans that use it. There aren't any Trolley stops at the high sought after destinations such as Balboa Park and the beaches.
- Higher intensity units and mixed use units need to be emphasized to make neighborhoods as walkable and bikeable as possible
- The consolidation of trips should be encouraged to help improve air quality
- Public transit is not a low-income or minority thing and should be encouraged across the board, regardless of income level
- The frequency of buses or Trolleys at a stop is important. The wait time between buses should be included in time of travel. When the travel time isn't practical people use their cars. If you have a job you aren't going to be able to rely on public transportation if you have to wait forty-five minutes between buses.
- The pollution in the air is evident by the amount of dirt/soot on our cars
- People want easy mobility and will not give up their cars without it
- One attendee took the train into San Diego from Los Angeles. She then took the bus route-7, which comes every twelve minutes, to the workshop. She felt that those transit options were practical. She also commented that the SANDAG performance measures were similar to those used by other communities.
- Google maps does a good job providing transit routes and options; better than MTS
- San Diego has been going backwards with transit. Bus routes have been cut back. When routes are cut, less people use public transit making it harder to keep the existing routes. A destination that may have taken two bus changes may now take four. The funds need to already be in place to create a great system. The system may eventually be profitable, but profit should not be what initially drives the system.
- People need/want high frequency and dependable service for buses and Trolleys
- Bus/Trolley stops also need time and money put into them, not just the main transit facilitates. The stops in La Jolla are really nice and lit up, but in other areas of the county they are not lit up and that can lead to crime.
- There is not enough seating as the bus stops and, sometimes, the only seating that is available puts the rider right near the street. At some stops people lean against walls or sit on the grass of nearby houses when waiting for the bus.
- Sidewalks should be required in all neighborhoods
- Access to healthy foods is very important. In many communities, there is not a nearby supermarket, and the ones that are near are not healthy
- Great public transit rates are available if you are a senior or disabled, but if you are a single mom with four kids the rates are too high. It makes it difficult for riders to take public transit to part-time jobs when they have to spend a large amount of the money earned at that job just getting to their job.
- Some cities have free public transit or offer free transit in certain corridors near commercial areas

- Are the criteria going to be used to distinguish where the billion dollars gets spent?
- It means many interactions between modes. Citizens should be able to drive and park at the light rail stations, take that transit, and then arrive at a destination where there are more transit options. People want many options to get from point A to point B.
- Multimodal means moving away from inefficient systems. People want to be able to attend meetings, like the SANDAG workshop, without having to drive. Public transit options need it to be efficient with time and costs
- The costs of poor health should be a factor in the performance measures
- San Diego hasn't been up to date with health costs. Studies have come out recently on the effects of poor air quality on asthma development rates and other health effects, yet none of that information is included in the planning documents.
- The last mile question is very important in a multimodal system. People can travel long distances with mass transit, but it is important that they are really able to arrive at their destinations with public transit options in the last mile
- A bike sharing program in San Diego would certainly address some of these issues. It would improve the health of riders, address the last mile issue, and lower the pollutants in the air
- Trains are releasing huge amounts of fumes that aren't being addressed the way that they should be. Cars seem to be making headway with cleaning up, but transit vehicles need to clean up.
- Some downtown residents are affected by the overnight parking of the trains at the Santa Fe Depot. The trains run throughout the night, even when they are not in use. The noise is terrible and the health issues from the pollutants are even worse.
- The maintenance of the transportation vehicle needs occur in an appropriate area and not in residential areas
- A healthy community spends less time in cars. Being sedentary in general is bad, and the emissions people breathe in when they are in traffic is very bad.
- Increasing the amount of people that will be able to walk or bike to their destinations is needed
- A bike share program would be a great addition at high frequency transit stops
- As more options become available, hopefully even those who drive cars will begin to use other transit options
- Citizens need options for different mode shares. Right now mode share for bikes is 1% and transit is between 3-12%. In order for San Diego to reach any of its goals, the mode shares will need to increase exponentially. Portland has 40% walking mode share in an urban corridor.
- The refusal from SANDAG to do mode share projections is very troubling. The health benefits of additional transit options can't be assessed without those projections.

- Incidents of asthma can be projected using the current mode trends of the City. If mode share changes, how much will those asthma rates change? SANDAG should come up with a plan that at least gets the City a passing grade from the American Lung Association instead of its current failing grade.
- The network needs to connect attractable and high-density destinations
- Ways to make public transit more appealing with improvements to aesthetics, safety, and other measures need to be considered
- Downtown San Diego is a great place to live with its great weather, cultural activities, and ease of access between point A and point B. That ease of access is possible because of the high-density in the downtown neighborhood, but how can other areas be turned into the downtown model?
- The airport doesn't have a train or easy transportation. That is something that can be improved.
- Places like the airport are planning on building larger parking lots, but that money should be invested in better transit options
- For many people who are looking for jobs, taking the Trolley to work would be a huge draw. Unfortunately, some people need to drive to the Trolley station due to the lack of easily accessible bus routes.
- People pay more for transit in San Diego than in other communities. That means there are reduced lines and the bus lines don't integrate well with the Trolleys.
- Would be healthier for people if they could walk a quarter mile, or so, to the bus or Trolley
- Connectivity and interconnectivity seems important to everybody. There should be a way to measure the density between transit options; similar to a neighborhood's walk score. The score would help to measure the improvement of a city's walkability over time.
- Walk San Diego did a study similar to that transit options. It has some issues, but it is a great step.
- The distance to transit isn't always a good measurement of a neighborhoods transit score since there may be impediments like railroad tracks. A transit stop may be 200 feet away, but people may need to walk a mile to get to it.
- Measuring the efficiency of the transit system would be great. Fewer lines make it more efficient fiscally but it may draw in fewer riders, so there is a fine balancing point.
- Quality of life should be an important measure. Carbon based modes of transportation tend to pollute more. Commuter times and distances also affect quality of life.
- Carpooling used to be an emphasis at the City of San Diego many years ago. That seemed to fade away over time since there wasn't an appropriate conduit to share that information. Now, social media may be able to push carpooling once again.
- The hours that people work don't seem to work well with others, so carpooling is difficult
- Jobs with rigid work hours, which may have worked best for carpooling in the past, may be disappearing

- The occasional carpooler or telecommuter should be captured in studies. There should be a service that makes carpooling convenient.
- There is the fear with carpools that something might come up in the day that makes carpooling difficult. However, it might help if there was a bigger pool of people to choose from.
- Telecommuting should be encouraged and San Diego should help build the infrastructure for that. The COASTER has Wi-Fi which allows commuters to work on the train and still leave work at a decent time.
- Regional intermodal activity should be measured in some way, especially to promote bridging gaps in existing facilities.
- Bicycle, think Transit Oriented Development

Vibrant Economy

Participant Comments

- How are the scenarios determined?
- Are there restrictions on where the monies can be spent – freeway, etc.? It seems we have constraints put in place already from the beginning unless we can address that. Should focus only on the flexible funds then.
- Does the \$214 Billion include actual construction costs through the full networks
- Are we just here to discuss the 3-5% of flexible funds then?
- Jobs generated by transportation investments may be a real short term measure that is not that important
- Quality of life issues need to be addressed, commute times/distances, air and water quality
- Ship movement of goods from Mexico is not being discussed. Could help on the border issues.
- Lacking the healthy region points – reducing freeway traffic – there are too many cars. Too many single passenger vehicle trips.
- How to get transit options spread further across the region
- Need many different route options for improving traffic related to goods movement
- The benefit/cost ratio measure may double count issues found/measured in other measures
- Add housing costs to this, including access to more affordable housing options
- Don't see anything about quality of jobs – we need to be encouraging more higher paying jobs
- Access to education and jobs training needs to be addressed. Retraining for those with obsolete skills also needs to be addressed.
- It's important to recognize that greater investment provides more jobs

- When you talk about a vibrant economy, communist countries perform poorly. Pay for what you use, don't force people to pay for things they don't use. Make driving a vehicle reflect the true market cost – a free market system for roads. We should incentivize other modes and be more comprehensive. Subsidize mass transit as much as we can subsidize mass transit. We need comprehensive pricing program for vehicles.
- Like how the freight related measures are worked in and parallel with vehicle passenger trips
- Just because freeways are full does not mean we need to build more of them
- Integration and coordination of modes to minimize travel time and increase productivity. Coordinate modes! Key transfer point coordination, etc.
- Housing costs and affordability not addressed in the current measures. It is extremely relevant. Measure together with transportation costs or as a separate measure.
- Travel time should be considered in travel costs in the percentage of income consumed by transportation costs
- How are we addressing the potential for gas prices to sky rocket? It makes our economy vulnerable if we are so reliant on gas/vehicles.
- Don't invest in options that encourage longer commutes/travel time/vehicle miles traveled
- Will these be weighted?
- Need to make sure you capture all the direct and indirect benefits in the cost/benefit ratio measure
- Homes near freeways – freeways devalue quality of life (air quality, noise, property values). Would like to see a metric that addresses this.
- Freeways encourage long distance travel, which is not desirable
- There should be a Tijuana representative on the SANDAG Board
- These seem well thought out. Relation to the smart growth projects and areas. It is important that the network includes the smart growth areas and is focused in the smart growth areas. Connectivity between smart growth areas and connectivity among modes in these areas. Investments should focus in the smart growth areas.
- Measure increases in population/employment density within a certain distance of major transportation investment. Measure how it increases land value, tax benefits, etc. you can correlate it with specific populations, etc. who gets the value from the investments. Wants a fine grain measure that can understand localized area benefits of investments/choices, etc.
- How does this capture goods movement?
- What does the travel time to tribal lands measure get us?
- How do we measure response times for emergency vehicles to needed areas such as tribal lands or special needs populations?
- Specify average travel time to Mexico includes train, Trolley, freight movement, and tourism trips

- The value of time should be considered in user transportation costs
- Congestion costs cause great loss to our economy – wasted fuel, pollution, value of time. Measure how many billions of dollars/hours did we lose to congestion this year.
- EJ impacts/costs of freight movement need to be addressed. Pollution, need to look at localized impacts.
- Are we evaluating different projects altogether or separately?
- System of evaluating projects is flawed from the very beginning
- Benefit/cost ratio – if people are biking or on foot, they are more likely to spend money on businesses
- Need more bike and pedestrian infrastructure, and that would benefit the businesses versus building highways
- Express lines that get travelers to destination would be most effective. Residents in San Ysidro cannot get to their destinations.
- Blue Line Trolley improvements are helping residents and travel times
- Fairmont Avenue could use more pedestrian enhancements, improvements
- Increased bus lines to Trolley centers
- Major streets that are geared towards vehicles are under-utilized
- Grade separation on Trolleys
- Need infrastructure improvements in San Ysidro – need more development. More pedestrian bridges, ramps.
- More connections to Mexico as a “mega-region”
- Economic justice – need to address inequity
- Invest in lesser-utilized parts of county, encourage growth, redevelop urban core – done cheaper.
- Benefit/cost ratio of transportation investments – need more elaboration, need to go deeper, mention economic justice on that criteria
- Look at focusing investments on poorer areas
- Convenience – without that, people are not going to use it
- Impact on the environment, emissions
- Cost that user pays
- How much time it takes to get from place to place; efficiency
- What should a future transit network attempt to accomplish
- Linking communities across the region
- Giving people options – walking, biking, public transit, cars
- Give people a safe option; make it safe for people to use mass transit
- Has to be an incentive to get people out of their cars
- Financial, money, time – depends on which you have less of
- People need to feel safe; there’s a stigma of people being scared because of scary-looking people, or people try to steal valuable items

- Mass Transit is seen as something you have to take, not choice
- Need more controls of access to board the Trolley to improve safety
- Stops need to be more convenient to access
- Need more grade separations of trolley
- Need more dedicated bike paths separated from cars
- Too much focus on freeway projects, need to invest more money in other transit options
- If you add more choices of transportation, people use these different modes and it will improve congestion on freeways
- Environment needs to be considered when evaluating projects
- Need to extend Trolley to the airport
- Our current transportation system forces people to use cars and doesn't provide enough alternatives
- Making more safe, connected Bike Routes
- Need to connect bike paths to Trolleys, buses
- Have more shared bike programs in the city
- Doesn't seem like there's enough emphasis on connecting the San Diego region to North County, Orange County, Los Angeles. There should be more thought to putting more mass transit lines.
- Not enough mass transit
- SANDAG should think bigger when it comes to mass transit projects
- Example: in 2050 Escondido will be connected to Downtown only by bus rapid transit, but shouldn't there be a rail line as a goal instead?
- Instead of building more lanes of traffic, why not just add a lane of rail or bike path
- Can't have piecemeal mass transit
- Other major cities have subway
- Not enough connectivity between communities
- Should focus transit investment on all people, not just low-income & minority populations
- Some explanation of how past performance measures have affected current plans and projects would have helped us understand what we are discussing. For example trying to reduce commute time for auto users can encourage more driving, thereby increasing VMT.

A-P-P-E-A-R-A-N-C-E-S

- Colleen Clementson - SANDAG Facilitator
- Phil Trom - Senior Regional Planner
- Elisa Arias - Principal Regional Planner
- Carl Morgan - North County EDC
- Dahvia Lynch - NCTD
- Stan Miller - Childhood Obesity Initiative

1 SANDAG PUBLIC WORKSHOP, TUESDAY, MAY 12, 2015
2 ESCONDIDO CITY HALL - MITCHELL ROOM
3 201 NORTH BROADWAY, ESCONDIDO, CALIFORNIA 92025
4 6:15 p.m. - 8:30 p.m.

5 * * *

6
7 MS. CLEMENTSON: I'm going to ask that each of
8 them introduce themselves a little bit more about the
9 organization they represent and why they and their
10 organization actually care about the Regional Plan, and I
11 think that's one of the challenges we all face for
12 putting together a plan like this for looking out to
13 2050, most people are thinking, "Well two years out,
14 three years out, maybe ten years out ..."

15 But look at 2050, a lot of changes between then
16 and so, I appreciate all of you being here tonight
17 because obviously, a lot of you are thinking further out
18 into the future.

19 So first of all, we have Carl Morgan and Carl
20 is with the "North County Economic Development
21 Corporation."

22 And then we have Dahvia Lynch and she is with
23 the "North County Transit District."

24 And then, we have Stan Miller who's with the
25 "San Diego County Childhood Obesity Initiative."

1 And Stan had previously been involved with one
2 of our community-based organization assisting with
3 outreach here in North County, so some of you may know
4 him.

5 Anyway, so with that in mind I'm just going
6 to -- we're kind of just go down in order here.

7 So Carl, tell us a little about your
8 organization, so we all kind of know what it is that you
9 do and tell us about what interests you and your
10 organization have about a regional plan like this.

11 MR. MORGAN: Well, good evening everyone, just
12 getting used to this microphone.

13 I'm CEO of the San Diego Development Council
14 and we also have a separate North County Economic
15 Corporation. They're both non profits.

16 The San Diego North EDC has been in place since
17 1996, and it was put in place in cooperation with the
18 County Board of Supervisors to really provide a place for
19 North County and for the business community.

20 Our organization represents 26 cities in the
21 incorporated community in North County from the 56 North,
22 so that's from Del Mar along the 5 to the northern
23 boundary, Rancho Bernardo, Poway from the 15 North.

24 There is 1.2 million people, 159,000 jobs in 26
25 cities in unincorporated communities.

4

♀

1 And our organization really is about working
Page 4

2 with our community partners and our policy makers to
3 ensure that there's proper planning for not only our
4 current workforce, our current companies but to also be
5 mindful of the future and planning for the future, not
6 only from just a job standpoint but from an employment
7 standpoint, from a housing standpoint, from an
8 infrastructure standpoint and so, we're really all about
9 spearheading those strategic initiatives and working with
10 partners like SANDAG and North County Transit and others
11 to fulfill those goals.

12 I really appreciate SANDAG inviting me to be
13 here to represent our organization and to give that
14 perspective from the business community and from the
15 communities.

16 And I thank you guys for the opportunity to be
17 part of the conversation.

18 MS. CLEMENTSON: Thanks Carl.

19 Dahvia?

20 MS. LYNCH: Thank you; good evening.

21 Being height challenged is not as easy to do.

22 I'm Dahvia Lynch with North County Transit
23 District. We run those blue-and-white buses that you see
24 driving around in your communities.

25 We also own and operate the right-of-way and

5

♀

1 operate the Sprinter here that's in your neighborhood,
2 the Coaster.

3 And we also have some, what we call, "Lift
4 Paratransit Service" for folks who have disabilities, so
5 we own right-of-way. We operate those four different
6 modes over about 1,000 square miles here in the North
7 County area through nine jurisdictions, so we're really
8 the primary Transit agency up here in North County.

9 We're very excited about the plan and I look
10 forward talking a little bit more about that tonight.

11 When you're talking about other people who use
12 Transit today and people who are thinking about the next
13 10, 20 plus years of your life and thinking maybe Transit
14 is right for me, so we look forward talking with you
15 about that.

16 MS. CLEMENTSON: And so Stan, tell us a
17 little -- tell us who you are, what you've done before
18 and done -- okay, you don't have to tell us everything
19 about yourself.

20 MR. MILLER: I'm here wearing two hats tonight.
21 I'm Stan Miller.

22 I was the former Executive Director for North
23 County Community Services and Fiscal agent for the
24 "Reliance for Regional Solutions," which has been the CEO
25 contract with SANDAG to do some outreach community to

6

♀

1 communities of concern, folks who are hard to reach. The
2 ones that don't show up to these things and the young
3 moms and dads that got jobs and kids, they don't have

4 time. They got to go home and fix dinner.

5 My agency operated seven pre-schools in North
6 County.

7 And so, one of the ways that we gather input is
8 to do some surveys, namely, have them send us their input
9 in that particular way, that was one of the ways that I
10 was engaged the last three years.

11 My current role is the "Senior Director for the
12 Childhood Obesity Initiative. San Diego Childhood
13 Obesity Initiative."

14 And that's a public private partnership that
15 aims to reduce County obesity Countywide and so, my
16 perspective tonight is to build an environment and its
17 impact on health, and that's one of the things that I
18 hope to share.

19 MS. CLEMENTSON: So why don't we start there.

20 Tell us what you think about this plan, how
21 could it impact health and the Childhood Obesity Program
22 that you work with.

23 MR. MILLER: Well, first of all, tonight before
24 the start of this, Carl and I talked about and expressed
25 one of the biggest challenges that we had getting people

7

♀

1 talk about this. I was just thinking about the year
2 2050. I just turned 50 last week, so I'm going to be 85
3 years old when that rolls around and you want me to think
4 about mobility of different choices, and when I think of

5 riding a bike at that age, it frankly frightens me.

6 So that was one of the first challenges, but
7 getting people to understand that environmental impact on
8 health is more than asthma, you know, if you live near
9 the border, it's more than car exhaust; sometimes it's
10 access to healthy food, that happens a lot, that's the
11 big driver of obesity issues are some of the social
12 determinants of health are, I guess, inherently not
13 unfair things but overlooked communities that are
14 underresourced and I was delighted to see this plan
15 include a section on social equity where they really talk
16 about, you know, we're not investing in some communities
17 as much as we are in others.

18 And at least I know locally working with the
19 City of Escondido, the School District here, there have
20 been some major strides made in the Mission District in
21 particular, some of the active transportation grants that
22 have been offered through SANDAG, the safe routes to
23 school. The District here has had one of those for two
24 years and wrapping that up, and more of those dollars
25 that all come about from this process.

8

♀

1 And I think one of the other frustrating parts
2 about the plan, at least from the constituents I talked
3 with, was again the frame of reference is today. "I need
4 more bus stops on my line now in 2025."

5 And so that, wanting to pull everything back to
Page 8

6 current day, that was a big challenge. I did like the
7 fact that you guys revisit this every four years and I
8 think that goes a long way towards helping to mitigate
9 some of that right stuff now and also, Carl and I again,
10 we're talking about how the economy tanked.

11 And I think back in 2006, I don't know if you
12 guys, which plan you guys were working on by then, but a
13 lot of the projections that you were making, probably
14 just kind of fizzled and no one expected all the
15 redevelopment boundaries to go out the window and it's
16 been wonderful.

17 MS. CLEMENTSON: Those are really good examples
18 and maybe Dahvia can definitely keep some of those
19 additional ideas going.

20 But I'm thinking it's true what you say, some
21 of the things being long-term and we show the long-term
22 concept map that you pointed to, so it will take some
23 time to implement. The City have plans and we've matched
24 that up with the Transportation Network, but it's going
25 to take time for those plans to be implemented.

9

♀

1 Now Dahvia, I know at NCTD, you've been working
2 on some projects, maybe you want to share with the group
3 some of the maybe short-term projects that you're
4 thinking about now and then, sort of how the plan helps
5 guide your future investment.

6 MS. LYNCH: Sure.
Page 9

7 I do want to build a little bit, if I could, on
8 some of the comments Stan made. I think from your
9 perspective, Stan, I think you're talking about a lot of
10 less obvious, maybe less direct benefits of health
11 benefits you need to get out, walk around, where you
12 might think that North County Transit, we'd be really
13 interested primarily in really obvious stuff, right?
14 Money for more buses, great, you know, faster service,
15 those kinds of different things we can talk more about.

16 But I did want to touch on the fact that all
17 these different things integrate. We're really
18 interested in better places to walk, better places to
19 bike, because a lot of our folks who ride our buses, who
20 ride the Sprinter, they need a way to get there and, you
21 know, if you're planning to use Transit as your primary
22 mode, you really are concerned about an innovative
23 network, you need to be able to get to Point A and Point
24 B in the most efficient, safe cost-effective way.

25 So that kind of leads up into what Coleen was

10

♀

1 mentioning. We are looking at a lot of our stations
2 today. A lot of, you know, the Sprinter stations here in
3 Escondido; different stations along the Coaster and we're
4 looking at those pieces of land right in the center of
5 your communities and saying, "Hey, these are parking lots
6 right now, right?" More or less. "How can we make these
7 a better part of the community? How can we help improve

8 the return of the taxpayer dollar by building on those
9 sites, and making this a place a more interesting place?
10 A place to go to. A destination along the different
11 transit routes. A place to stop and get a meal if you're
12 using transit all day."

13 So we're looking at what's called,
14 "Transferring a development," some of you are very
15 familiar with that in a lot of those locations.

16 And I think that probably feeds fairly well
17 into the economic development component of the community.

18 MS. CLEMENTSON: Go ahead, Carl, you want to
19 jump in?

20 MR. MORGAN: Yeah.

21 I just -- What I like about the plan is that,
22 you know, first off, it is a long range plan but it's
23 also like any good business plan, it has, you know, quick
24 updates every four years updating the plan.

25 If you think about where we were in the great

11

‡

1 recession that we've all lived through since September of
2 2007, essentially, a lot of projects got shelved and
3 didn't get built right? In that downturn.

4 And so, if you were SANDAG doing those
5 projections at that time in 2006, the world, your world
6 got turned upside down in that four-to-five-year period,
7 and it was pins down. I was in Economic Redevelopment at
8 that time and I can tell you, that there were dramatic

9 change and developers just walked away from sites.

10 From an economic development perspective, it's
11 really not just about jobs. It's about open space. It's
12 about connectivity. It's about parks and connections to
13 the Transit and, you know, different multi-model options.

14 Another thing about this plan, which I think is
15 really cool, is having the technology, the current
16 technology at your fingertips, so that you don't get
17 confused and dazed when you're trying to figure out to go
18 from this route, to this place, to that place, right?
19 It's very handy. It's on your smartphone and you've got
20 it at your fingertip. I think that's really important.

21 The other thing is, clearly there needs to be
22 some changes made and some improvements at the 78
23 corridor, you know, I spent a lot of time on that freeway
24 and improper notice today because I had meetings from
25 Point A and Point B and I had to go that way.

12

♀

1 And then of course, the 5 where we hit a
2 stoplight, you know, at the end of the 78 which almost
3 got me killed the first time I came to North County.

4 So with that, I'll stop and let the other
5 Panelists chat about some of the other things.

6 MS. CLEMENTSON: Well, one of the things -- are
7 there certain things about the plan, Carl, just to kind
8 of get your perspective, that could be better?

9 So you talked about some of things you like.

10 There are things that you think that could be better?

11 MR. MORGAN: Well, you know, in a perfect world
12 I'd love to see the 78 corridor imagine be fixed
13 tomorrow, right?

14 But I realize that it's a process and it's a
15 big price tag, and we have to figure out a way to pay for
16 that, right?

17 But at the end of the day, you know, moving
18 that up in a timeline would be a good thing, because we
19 got eight of the fastest growing cities in North County,
20 eight of the fastest growing cities in the County in
21 North County.

22 And we got a lot of economic development, lot
23 of new development, lot of new people coming in. I mean,
24 your plan is saying a million people like 2050, a half-
25 million jobs and a third, you know, of housing and we

13

♀

1 need to find out, or figure out a way to move people
2 around in an efficient manner, give them great
3 neighborhoods to live in, multiple housing choices and
4 good jobs.

5 And I think that's what we all want at the end
6 of the day. We want a really nice neighborhood, you
7 know, with good jobs, good schools and open space and
8 quality of life, and that's what our organization does.
9 We're a champion of creating that in North County.

10 MS. CLEMENTSON: So Dahvia or Stan, either of
Page 13

11 you want to build on those comments? Add something?

12 MR. MILLER: I think that's echoed in our
13 constituents that I talked with the last two years, it's
14 just everybody wants in their neighborhood. I don't know
15 if any of you have ever been to a SANDAG Board meeting.
16 There are 19 chairs in that table, 19 representatives and
17 so, you know, this conversation plays out in 19 different
18 communities, and so it's about the, you know, if you
19 really dig into that -- thank you for making it brief by
20 the way, that's a joke -- when you look through the
21 pages-and-pages of projects that it talks about and
22 the -- yeah, she holds up a copy -- the pages --

23 MS. CLEMENTSON: The last one was four times
24 this size. (indicating)

25 MR. MILLER: Right.

14

♀

1 The preferred scenarios where outlines, "we can
2 do it this way. We could do it this way or we could do
3 it that way."

4 I think the timing that Carl was talking about,
5 we're getting it fixed as soon as possible and making
6 strong arguments about having two largest or fastest
7 growing cities in the County, you know, will that carry
8 some weight sitting around those 19 seats when it comes
9 time to make a decision about where those dollars are
10 going to go? Maybe; maybe not.

11 Having worked in North County for the last
Page 14

12 eight years, I've been very frustrated sometimes when I
13 go to meetings down South. I hear the word "city," which
14 I know there are people here from Oceanside and Escondido
15 and probably San Marcos and maybe some Vista folks here
16 tonight.

17 But that's a general comment about North
18 County, that I love the way we work as a region.

19 MR. MORGAN: I think from a perspective, you
20 have 1.2 million people in North County from the 56 North
21 and there's 1.3 million people in the City of San Diego,
22 so we're not that much smaller.

23 And I can tell you, that the companies that we
24 have up here and the resources are phenomenal, and we are
25 where a lot of that new growth is going to happen. It's

15

♀

1 just a matter of planning properly for it.

2 MS. CLEMENTSON: The question I just want to
3 ask the audience, if you don't mind raising your hand.

4 How many people here are from Escondido and
5 live or work in Escondido?

6 How about from San Marcos or Vista? Vista?

7 (Some Audience nod their heads.)

8 Anywhere else? Oceanside? Oceanside? Good.

9 Any other communities that I've left out, just
10 so we can have the --

11 PUBLIC SPEAKER: The City of San Diego.

12 MS. CLEMENTSON: Pardon me? You're from the
Page 15

13 City of San Diego?

14 PUBLIC SPEAKER: Yes.

15 MS. CLEMENTSON: Okay.

16 And are you from the Northern part? Central?

17 Or --

18 PUBLIC SPEAKER: Well, I represent the "Back
19 Country Coalition Environment Group."

20 MS. CLEMENTSON: Okay.

21 PUBLIC SPEAKER: I have some comments for you
22 and the Panel.

23 MS. CLEMENTSON: Okay.

24 So we'll get to those comments. I just kind of
25 want to understand who's here and kind of how this

16

♀

1 relates to some of the things you're working on.

2 I understand that we may also have a Planning
3 Commissioner from -- okay, and you're from Escondido?

4 PUBLIC SPEAKER: City of Escondido.

5 MS. CLEMENTSON: Great; okay. All right.

6 So I know Dahvia, you were going to make a few
7 comments on some of the things that NCTD is working on,
8 some of the projects.

9 You want to share some of that with the group?

10 MS. LYNCH: Oh, sure.

11 I touched a little bit on the Transit and
12 Development. I did want to talk -- you had asked
13 previously about what we like about the plan, what could

14 be better about the plan and I think those two things
15 actually go hand-in-hand.

16 I think what we like about the plan, are some
17 of the great projects. The increased frequency on the
18 Sprinter, 20 minutes, you know, at peak times, you go out
19 there and know there's going to be a Sprinter every 20
20 minutes, 10 minutes from Oceanside to Escondido, Coaster;
21 same thing.

22 All of these improvements are really great
23 things, knowing that there will be bridges over and
24 tunnels under; some of our railways that you can cross
25 safely and comfortably. Those are great things and we

17

♀

1 want them to have and faster, so it's timing and money,
2 you know, it's so great that we think that we are going
3 to be able to, based on SANDAG's historically good
4 projections in terms of budget, we think we're going to
5 be able to see these things built.

6 The big question for us, we want it now, we
7 want it faster, but the big question for us becomes
8 operating it.

9 How are we going to be sure that we have the
10 money to operate it? I know the projections do account
11 for that, but it's never as attractive. It's never as
12 exciting to cut a ribbon off operating costs, so for that
13 we think about the long-term and we think about if you
14 build these things faster and you got buses and trains

15 and, you know, running all day long.

16 Are they going to be empty? Are the people
17 going to come first, or is the Transit going to come
18 first?

19 And for us, you know, we're shooting high, if
20 we're getting 20 percent of our revenue back, our
21 operating costs back from those tickets you buy for the
22 bus, so our services is very heavily subsidized as it is
23 across the Nation and Transit, not just us.

24 So that really matters to us, how many people
25 we have on those buses because that's where we get our

18

♀

1 subsidy revenue from, so it's being able to figure out
2 how to balance. I don't know that the plan could have
3 done that any better but it's something we think about
4 when we are setting projects for the -- fix the
5 long-term.

6 MS. CLEMENTSON: Okay.

7 So the audience probably has a good perspective
8 where each of you come from, what some of your thoughts
9 are.

10 So if there are specific questions that any of
11 you want to ask the Panel members, you could do that now.
12 Yeah?

13 PUBLIC SPEAKER: So you kind of touched a
14 little bit on resource allocation.

15 How are the resources actually allocated? 19

16 people sit in the room and debate and come to agreement?

17 MS. CLEMENTSON: So I don't know if any of you
18 kind of know how that all works. If --

19 MR. MILLER: That's a Colleen question.

20 MS. CLEMENTSON: I think that's more kind of a
21 SANDAG sort of question that we can address.

22 I'm wondering if there's anything specific for
23 any of these Panel members, but definitely that's just a
24 technical long answer that I want to talk to you about
25 more.

19

♀

1 PUBLIC SPEAKER: I have a question for
2 Ms. Lynch.

3 So how much time does the current ridership
4 statistic influence this plan?

5 MS. CLEMENTSON: That's a great question.

6 MS. LYNCH: Yeah; maybe we can sort of tag-team
7 on this with SANDAG.

8 There are projections made both about the
9 population growth and what percentage of that population
10 is estimated to use Transit based on where they live, on
11 where new population centers will be.

12 So a lot of the projections are based on that
13 aspect, not necessarily the current ridership but I think
14 the current ridership drives the percentage of the
15 individuals that we see will be using transit, and I
16 think that kind of goes up as we look at more dense

17 community and population centers around the different
18 Transit centers.

19 I don't know if you want to talk to that,
20 Coleen or Phil, about in terms of specific projections,
21 but that dialogue is there. It's all projections.

22 MS. CLEMENTSON: Yeah.

23 In general we look at what the projected land
24 uses are and then, match it up with the Transportation
25 Network, look at how well everything performs and then

20

♀

1 project that ranks based on their performance.

2 So that's really how -- and that's one of the
3 reasons that the plan gets updated every four years
4 because Barb, who's working on the City of Escondido
5 General Plan, if that gets updated then land use changes
6 happen, we need to know about as we change the
7 Transportation Network to help us support that to
8 continue to provide transportation options, that's -- do
9 you have a follow-up question?

10 PUBLIC SPEAKER: Well, I guess the question
11 may be more general than I asked it, which is, how
12 statistic-based is this plan?

13 So current ridership shows that the existing
14 system is underutilized, so let's add more buses, that
15 doesn't really seem to make sense to me, regardless of
16 what the projections for land use or employment if people
17 are choosing not to ride the bus, either taking their own

18 cars or their bikes, even walking, then why add
19 additional bus routes.

20 How does the plan help them?

21 MS. CLEMENTSON: So maybe, Dahvia, the question
22 is, what do you do in the short term?

23 And how does that help inform the long-term in
24 the Transportation? In the Transit Planning world?

25 MS. LYNCH: Yeah; I think I see where you're

21

♀

1 getting.

2 I mean, it's all assumption-based, right? And
3 there is a statistical methodology there and we're
4 looking at current use under, for instance, Transit use
5 as well as lack of transportation, who's walking, who's
6 biking to our different modes.

7 There are also assumptions made, that again, as
8 things get more dense, as it gets easier to use Transit,
9 as there are different types of uses, you know, more
10 economic centers and residences and certain need, but
11 those numbers will increase. It's, you know, you can
12 always debate I think all day long about if that five
13 percent or 10 percent, if you build it will they come?

14 Or is it the other way around?

15 I mean, I think it's a valid question but those
16 things are certainly asked.

17 PUBLIC SPEAKER: Have you seen them?

18 MS. LYNCH: Have we seen the increase?

19 PUBLIC SPEAKER: Yes.

20 MS. LYNCH: We have definitely seen it.

21 I can't give you a number on this, but we see,
22 for example, where a lot of the new development has
23 occurred in Vista, as an example, a lot of new housing.
24 We see increases in ridership at that station based on
25 that, so I think anecdotally we can say, "Yes, that does

22

♀

1 happen."

2 I can't tell you the exact number of what that
3 means, but it's a fundamental question we get asked a
4 lot.

5 And I ask myself, again, if we build it will
6 they come?

7 MR. MORGAN: Yeah; I'm not a Transportation
8 Planner, but just going up to the 30,000-foot level and
9 looking at North County and thinking about where are the
10 development patterns going to go take place?

11 And you saw based upon the general plans from
12 the various communities, where those are going to take
13 place.

14 If you build high quality places where people
15 want to live and particularly the millennials that don't
16 necessarily want to drive. They want to live near Transit.
17 They like to take multi-modes. They don't necessarily
18 want to lock themselves in the car and drive from Point A
19 to Point B.

20 If you create a nice neighborhood like you've
21 got in Vista and some of the stuff in San Marcos and in
22 other areas where there's Transit, then people gravitate
23 to those and that ridership will increase.

24 If you build not so nice areas around that
25 Transit mode, then it won't work.

23

†

1 So the quality of that development, that is
2 based upon the individual communities and the Planning
3 Commissions and the counsels that make that land use
4 policy, ultimately feed into this plan.

5 And my crystal ball is a bit murky, but I'm
6 always, you know, I think we all know nice areas and nice
7 neighborhoods and to a degree that we can look at those
8 best practices and ensure they get incorporated in those
9 plans and developers that come in and build them, then
10 you wind up with a really nice plan and projections work
11 and everything just runs smoothly.

12 MS. CLEMENTSON: Other questions?

13 PUBLIC SPEAKER: I heard a number of people
14 refer to the plan as "not San Diego forward" but "San
15 Diego backwards," because it looks very much like the
16 last Regional Transportation Plan, so I really haven't
17 heard what's different about it.

18 I know one thing that was a very big concern,
19 was land use transportation connection was really relying
20 on those 200 Smart Growth sites and in 10 years of having

21 200 Smart Growth sites, I've not really seen much happen
22 and I'm hard-pressed to understand how without some major
23 other things happening, that that's going to make a
24 difference in short terms. I know like in Oceanside, we
25 have seven Smart Growth sites. The only thing moving

24

♀

1 forward and that's still years away is the Transit
2 Center.

3 Carlsbad, one out of three doesn't have
4 anything going on. I think the same story everywhere.
5 It takes years for those things to come to fruition and
6 yet, the plan is relying very heavily on that land use
7 connection happening in the way we haven't been able to
8 make it happen so far.

9 MS. CLEMENTSON: So do you have suggestions? I
10 think that's a really good question.

11 How do we make it happen faster?

12 PUBLIC SPEAKER: Is it reasonable to expect,
13 that so much of our growth is going to be centered around
14 those 200 specific locations in this entire region?

15 MS. CLEMENTSON: So thoughts on that.

16 How do we make this happen faster? Because I
17 think that's a question planners, all of us have, you
18 know, a lot of it we have to rely on the private sector
19 to implement the plan. We can build the infrastructure,
20 but you're the business guy.

21 How do we make this happen faster, Carl?

22 MR. MORGAN: The -- the gun is just pointed on
23 me; that's fine.

24 You know, I think that really, if you look at
25 those -- did you say "200 sites"?

25

♀

1 MS. CLEMENTSON: Yeah, there's about 200; yeah,
2 Diane is right.

3 MR. MORGAN: I think if you look at their plan
4 four years ago, clearly there were some challenges
5 because as I said before, the money dried up and it was
6 pins down and nothing was happening and developers were
7 running away from sites.

8 And so, cities had pent-up-expectations in
9 communities that those sites were going to get developed
10 and so, there was no private sector money to go in there.

11 I think we're at a point right now that things
12 are starting to turn. We are seeing some of these larger
13 companies coming in. They're building housing. They're
14 building projects, and as long as our economy holds up,
15 knock on wood, my crystal ball is very murky in that
16 regard, because we're seven, eight years from the
17 downturn and usually every 10 years we hit another bump
18 on the road.

19 I think the only thing that we can do is work
20 collaboratively with the City in the communities to reach
21 out and in a targeted way, to quality developers and tell
22 the story about North County and why it's a great place

23 to invest, live and work and I think that will help from
24 that standpoint and that's something that our
25 organization is prepared and willing to do and continue

26

†

1 to do on a daily basis.

2 But in terms of, you know, making those a
3 priority, that's really up to the individual communities
4 that make up the 26 cities in the incorporated
5 communities in North County, because they have their own
6 governing body.

7 MS. CLEMENTSON: And Stan, do you have thoughts
8 on this?

9 MR. MILLER: Well, I agree. It's taken a long
10 time to get much done.

11 I had a project here in Escondido, just wanted
12 to put an extra classroom on the back lot of a
13 pre-school. We had to partner with the City of Escondido
14 because we didn't have enough money for the offsite,
15 stretch of cost, but we ended up widening Woodhill Drive,
16 putting in a sidewalk, making the area more walkable.

17 I got approval from the State to start that
18 project in 2009, and it finished a "Certificate of
19 Occupancy" in 2013, so it takes a long time.

20 And as Carl was saying, a lot of the cities
21 were reeling from losing redevelopment dollars when the
22 Government was looking for money to call back up to the
23 State to cover the deficits, and a lot of cities were

24 left holding the bag, so to speak, because they had
25 invested in property that they were going to redevelop, a

27

♀

1 river ballpark. It's supposed to be somewhere up here,
2 you know, deals like that happen not just here but
3 everywhere. I think San Marcos is the largest Landlord
4 in this City.

5 Now, I mean, they've turned that into lemon-aid
6 I guess, by only when the economy turns around, so
7 it's -- I think it's just a matter of time but, you know,
8 that doesn't, I know that doesn't help. It doesn't help
9 the fact that things haven't changed in the last decade.
10 They have, just incrementally.

11 MR. MORGAN: Just to amplify on that.

12 I think there's an opportunity if communities
13 get creative and look at partnerships, so to get
14 development take down and around the Transit center,
15 you're going to need, you know, to get creative about the
16 dollar, about the offsites and structure for that
17 project, the open space and connectivity and so, if you
18 can bring the public sector and the private sector
19 together, you know, the Cities can contribute some
20 dollar, sometimes you can offload some fees; you can work
21 with the Transit Agency to do some things and go after
22 some grants to pay for other pieces, and when you get
23 into those layers of funding, you wind up with a much
24 better project and a quicker time frame.

Page 27

25

It takes from the time that you envision a

28

♀

1 project to the time it comes out of the ground, minimum
2 it's five years. It's a minimum of five years and that's
3 if everything lines up perfectly from the time you
4 conceptualize it, take it through the Planning
5 Department, through that process general plan and the
6 zone change, get your -- do your construction drawings,
7 you have to go through CEQUA, through the Planning
8 Commission, that's a minimum of a ten-month process.

9 And so, by the time you get to that five years
10 that's it, so 10 years out is not unthinkable if you hit
11 a bad economic cycle, right? Because they're not going
12 to build it if the economy is tanking.

13 MS. CLEMENTSON: So I'm thinking Dahvia may
14 have some thoughts and then Barb. I'm just going to give
15 you a time to prepare, you've had some success in
16 Escondido with some recent development in the area and
17 maybe you can talk about a couple of those projects.

18 Planning Commission can talk about those couple
19 projects and maybe what are some lessons learned that, of
20 course, that has been expedited.

21 MS. LYNCH: I think it's a really good question
22 you asked and obviously, a lot of that is market-driven.

23 We talked about redeveloping a number of our
24 signs and we kind of -- it helps us to choose which site
25 goes first by how many developers we have as property

♀

1 owners calling us on that particular site. It kinds of
2 tells you a little bit about the market readiness.

3 What I wanted to mention also, though, is that
4 SANDAG has been working on a Transit-oriented development
5 strategy, and it's something that I mention not just to
6 pitch that on behalf of partnership with SANDAG, but
7 because we've really been looking to that to help us
8 understand what those things are that can be done to
9 address the regulations that Stan and Carl are mentioning
10 to help us look at different public, private financing
11 opportunities to really leverage those dollars, so that
12 we as a public agency bring some money to the table for
13 public infrastructure components.

14 And so, I'm looking forward to that coming from
15 SANDAG. There's been a lot of research done on exactly
16 that. I think all jurisdictions are wondering that, you
17 know, and communities are wondering as well, whether they
18 want to fight it or because they want to support it.
19 People do want to understand that better locally.

20 MS. CLEMENTSON: So Barbara Redlitz, your role
21 heading up planning in Escondido.

22 Do you want to talk a little bit about some of
23 the projects and successes you've seen and maybe what you
24 think some of the strategies to make those happen?

25 MS. REDLITZ: Barbara Redlitz, "Community

♀

1 Development Director" for the City of Escondido.

2 And we have seen a significant increase or
3 interest primarily residential, I will say, but in our
4 downtown area, is one of the 200 Smart Growth areas
5 identified. We have the benefit of our Transit station.
6 We have the benefit of some grant programs, you saw Maple
7 Street Plaza there. We have been able to attract
8 educational uses downtown.

9 One of the things that we really focused on, is
10 creating opportunities for greater density in our
11 downtown environment and we have been very successful and
12 have seen some very key projects in-and-around City Hall
13 here.

14 Some residential developers that have built at
15 higher density than we have seen and continue to be
16 interested, so we're pretty busy right now and I think a
17 lot of that has to do with the fact that we do have these
18 good opportunities for Transit and we did focus very much
19 in our downtown Planning efforts primarily, and along
20 some of our Transit corridors. Claudia is helping us
21 with one of our plans down south "Escondido Boulevard,"
22 so we have seen a great increase in development
23 opportunity in the City.

24 MS. CLEMENTSON: Are there other questions for
25 the Panel?

♀

1 PUBLIC SPEAKER: A lot of what I'm hearing is
2 very exciting and forward-thinking, I feel. I do have a
3 concern as a resident of Oceanside. The trains literally
4 run behind my building and so, I have concerns about
5 environmental impact getting cars off the road, and you
6 know, more train access, more train traffic coming in the
7 future and buses in densely populated areas.

8 MS. CLEMENTSON: So that's a question?
9 Anyone can respond. I don't want to point to
10 just you, Dahvia, but it sounds like you might be able to
11 address and if the others want to chime in.

12 MS. LYNCH: Yeah; so we've had this
13 conversation before and I think, you know, obviously it's
14 not a very specific location but it's reflective of
15 concerns and questions people have from Oceanside down to
16 Downtown San Diego. It's, you know, there are lots of
17 synergies with Transit in these exciting multi-use
18 communities but there are also potential conflicts,
19 right? Noise, environmental issues, being able to cross
20 safely, so I think a lot of these things we have to look
21 at holistically, comprehensively. The operations are
22 still going to be there and the residences are still
23 going to be there.

24 There are big infrastructure projects that can
25 help by, for example, separating the grade like they did,

♀

1 for example, in Solana Beach, train is down below, those
2 are very expensive.

3 There are less expensive opportunities, even
4 some technologies that are pilot technologies to help
5 address things like that, but I don't think there's any
6 fast answer. I think there's a public process that needs
7 to happen with each of these developments and just an
8 array of strategies that need to be implemented to
9 address that.

10 MS. CLEMENTSON: Any of the other two Panelists
11 want to respond?

12 MR. MILLER: I'm curious where the track
13 crosses.

14 PUBLIC SPEAKER: I live -- are you familiar
15 with Oceanside?

16 MR. MILLER: I am.

17 PUBLIC SPEAKER: I live a block from the
18 Transit and the train literally runs right behind their
19 building.

20 And also, in the future that platform is going
21 to be extended and will probably be right under my
22 bedroom window so we have concerns, those of us that live
23 in that area, have concerns about the air quality.

24 MS. CLEMENTSON: I mean, these are the
25 challenges that we face, is the region continues to grow,

33

♀

1 so those are really good questions.

2 PUBLIC SPEAKER: So I hope they're being
3 addressed.

4 MS. CLEMENTSON: Other questions for the Panel?
5 Okay.

6 And then we can move into the Open House where
7 you can ask more specific questions.

8 PUBLIC SPEAKER: I'm George Courser, Back
9 Country Coalition, and I'd like to ask the Panel and then
10 kind of toss it up to all the staff here:

11 How is it possible that we're moving north of
12 the Trolley? There's going to be 100 miles north, yet
13 not one person in this building, in this City or this
14 County, can take a Trolley to the most dense areas of San
15 Diego? I'm talking about Lindbergh Field.

16 How is it we missed that planning?

17 Or, let's try this one:

18 How about the San Diego Zoo, or Balboa Park?

19 How did we not go into that density? How did
20 we miss that? Just a thought.

21 And I'll ask the staff later; thank you.

22 MS. CLEMENTSON: So your question really is,
23 how you feel we're missing some major destinations with
24 Transit, if I'm understanding, Airport, the Zoo and other
25 locations like that?

1 Any comments from the Panel?

2 MR. MILLER: Basically, you can't get there
3 from here, is that what I hear?

4 I was actually excited when they opened up the
5 Escondido bus this year, because gasoline was itching up
6 about above \$4 a gallon when that happened and then I
7 bought a ticket, and -- sorry, it was, yeah, and I don't
8 know if operating costs are going to be going down
9 eventually once all of this gets worked out, those ratios
10 will work somehow, but that was one of the things the
11 constituents that I work with suggest. It's five bucks a
12 gallon of gas is what it cost to drive down but it's five
13 bucks to take the bus and so, yeah, I agree, you know, if
14 you study the history of San Diego County, you'll see
15 that most of the developers came in and they put street
16 cars up, so they built that in, that structure first and
17 so it's a tough question.

18 PUBLIC SPEAKER: I just had a question about
19 the format. So I understand now we're asking questions
20 to this State Panel.

21 When will we ask questions about the plan
22 itself?

23 MS. CLEMENTSON: So that, we thought the
24 detailed questions about the plan you can.

25 PUBLIC SPEAKER: Well it was something in

1 5-12-15 Court Reporter Discussion_Escondido
detail, even general questions about the plan.

2 Are you prepared to answer those now, as one of
3 the Panelists?

4 Or would you prefer they be asked sort of
5 independently?

6 MS. CLEMENTSON: Yeah.

7 I think our hope was, that that could be done
8 independently and this is just to kind of have a broad
9 discussion, reaction to kind of, you know, the plan is as
10 a whole and various perspectives.

11 If there are specific questions that you have
12 and you want to ask them now, we can definitely, you
13 know, I don't want to take up time with the whole group
14 if they're more specific, but let's hear.

15 PUBLIC SPEAKER: Well, tying off to the
16 destinations.

17 I noticed that Palomar Airport is not included
18 in the plan. If the objective is improvements in the
19 regional economy, is Palomar Airport off the table then?

20 MS. CLEMENTSON: So we can go to some staff
21 responses. I know that Dave Schumacher could be able to
22 answer questions like that, so I mean, if the group is
23 amenable, we can definitely do that, if there are other
24 questions like that.

25 Do you want to respond Dave?

36

♀

1 MR. SCHUMACHER: All right.

5-12-15 Court Reporter Discussion_Escondido
Can I hold the microphone?

21

22

23

24

25

MS. CLEMENTSON: I'll come to your other

side.

MR. SCHUMACHER: Good evening. I'm Dave

Schumacher, one of the Principal Planner's for SANDAG and

I get a couple of the questions that were asked there

about land uses and how does that make a difference.

I've been around for about 30 years and we used

to kind of take Transit Planning and kind of do it like a

peanut butter sandwich, spread it all over and grab a

little piece. We found that over time that doesn't work

very well, because there are a lot of areas that just

simply aren't Transit-friendly. There could be in the

future, but what we try to do is to focus our efforts

around areas either existing, supportive of Transit or

in the future of working with local jurisdictions and

some of that higher density Transit redevelopment occur,

so that's one thing. We actually have an urban area

boundary for Transit. It's in the planning and we'll

show you after we break out here.

But in the second part is, we've done market

research that tells us how people use Transit and I hear

a lot of people come back from Europe saying, "Why can't

I have that?"

37

♀

1

2

They go out on the street and there's something

that comes by five, ten minutes to pick them up. That's

5-12-15 Court Reporter Discussion_Escondido
3 what we're trying to have by focusing in on these areas
4 with Transit support land uses, justify putting transit.

5 Right now Transit is oriented where you have to
6 have a schedule, you have to orient your day in a
7 conference. It's if you flip that equation and say, if
8 we can get there in 10 minutes throughout the day, we're
9 shooting for the plan, one of key improvements of the
10 plan, so key routes, both in North County and South
11 County in those areas where half of it is Transit, if we
12 get to 10 minutes already, it really does flip the
13 equation, now you don't need to use schedules, you simply
14 go out to the street.

15 And where we're seeing that work is some of our
16 new rapid lines. One down, we have one down in
17 Escondido to downtown. It runs every 15 minutes in the
18 peak hour. We hit our first year projections within the
19 first six months. We have another Rapid Line that runs
20 up the Zoo, you mentioned you can't get to the Zoo, well
21 this goes downtown straight to the Zoo. It takes you
22 about five, ten minutes to get up there.

23 PUBLIC SPEAKER: That's not a Trolley?

24 MR. SCHUMACHER: It's a Rapid.

25 PUBLIC SPEAKER: Oh.

38

♀

1 MR. SCHUMACHER: It's a rapid, so it's this
2 Bus Rapid Transit. It's not exactly a local bus and it's
3 not exactly a Trolley. It's something in the middle,

5-12-15 Court Reporter Discussion_Escondido
4 but it's a higher speed; higher amenity-type of service.

5 So try to enter these new types of products and
6 higher frequency and make it a lot more convenient and
7 that's what we've seen in other cities that do have
8 Transit that works. So we're trying to learn lessons
9 from that, that's what we're working towards.

10 MS. CLEMENTSON: Thanks Dave.

11 I'll come back to you, Diane, since we're
12 answering more specific questions.

13 I think you had had a question at the very
14 beginning that I said we would answer later and that --
15 let me see if I remember correctly -- but it was the
16 funding, how is the funding allocated?

17 And when we're talking about how is it
18 allocated when we're talking about to what types of
19 projects?

20 MR. SCHUMACHER: What types of projects and
21 planning those projects are happening.

22 MS. CLEMENTSON: I think Elisa has that all
23 memorized.

24 MS. ARIAS: All right.

25 So in terms of funding, you know, we have a

39

♀

1 projection of about approximately 200-billion dollars
2 that will come to the region between now and 2050, so at
3 least next 35 years. We don't have all that money in the
4 bank today, so it will be coming, you know, throughout

5-12-15 Court Reporter Discussion_Escondido
5 the different phase of the plan.

6 Just for simplicity, we basically make out the
7 funding in three periods from now to 2020, from 2020-to-
8 2035, 2035-to-2050, we have those kind of three big
9 periods.

10 So we say, basically do projections of Federal,
11 local and State dollars that we would be getting in those
12 time periods.

13 Now, those dollars that we get are sometimes
14 limited into how we can use them; what Ms. Dahvia was
15 talking about, it's great to have more Transit service
16 and how we're going to operate, and Transit operating
17 dollars are very tough to come by, so we have to look at
18 corridors able to be used for a Transit project or for a
19 highway project.

20 Can we use them for bike projects or pedestrian
21 projects? Can they be used to operate the Transit
22 service? So we have to look at all those different
23 pieces to see based on a ranking project in terms of how
24 they will perform, how many uses they will have, how many
25 vehicles or people they will carry, so we have to look at

40

♀

1 how the project will perform, the dollars that we're
2 projected to get and what those dollars can be used for
3 and then look at all those together to come up with this
4 rank list of projects by a time period.

5 That's -- did I get you confused?

6 PUBLIC SPEAKER: No. No. No. That's fine;
7 thank you.

8 MS. CLEMENTSON: Like these are the projects of
9 the plan.

10 MS. ARIAS: Yeah, so we have in the plan --
11 yes, Appendix A, if you go to our plan. Appendix A has
12 all list of projects. The cost of each project and the
13 timing of the projects.

14 MS. CLEMENTSON: Any follow-up questions for
15 Elisa on that, or a different question? Okay.

16 PUBLIC SPEAKER: As I understand that the big
17 picture allocation, regardless of when the funds come in,
18 the big picture allocation is 30 percent highways, 30
19 percent local streets and roads, 30 percent Transit and
20 then the other 10 percent for everything else.

21 Is that changing?

22 MR. ARIAS: So I think what you're referring to
23 is mostly the local sales tax Transnet? The first
24 Transit ordinance.

25 Now, we're working on basically from

41

‡

1 2008-to-2048 is the Transit extension, so the dollars are
2 really not allocated 30-to-33rd but they're most major
3 corridor which includes Transit and highway corridors of
4 those projects in the Transit ordinance and Transit
5 project, basically we're implementing now the Mid-Coast
6 Trolley extension, other than that there's only a single

5-12-15 Court Reporter Discussion_Escondido
7 Transit project that hasn't been started, although rapids
8 have been implemented recently, those are Transnet
9 projects, same with the South Bay Rapid that's going to
10 be connected from Otay Mesa so Chula Vista downtown,
11 that's also a Transnet project.

12 So the local sales tax are allocated to a list
13 of the projects that the voters approved and then, we
14 have to match those local dollars with the State and
15 Federal dollars. The local dollars are not sufficient to
16 build all those projects, so roughly we need about half
17 State million dollars to match the local dollars.

18 PUBLIC SPEAKER: So the end result ends up
19 being what?

20 MS. ARIAS: So the end result, is
21 implementation of the Tansnet. The list of projects that
22 the voters approved, plus new projects that we're
23 introducing in the plan and those projects are not solely
24 tied to Transnet. There are other kind of resources
25 going to be used in the future for new projects.

42

♀

1 MS. CLEMENTSON: Just to break it up a little
2 bit.

3 MS. ARIAS: Okay.

4 So this is a bit of a quiz; so I think we have
5 some candy here if somebody wants to play the game. So
6 maybe if you just do the game here, you have a pie chart.
7 It's about how the plan -- should we take it up to the

5-12-15 Court Reporter Discussion_Escondido
8 front?

9 MS. CLEMENTSON: Let's take it up to the front.

10 (Brief pause.)

11 So this is a proposal allocation that we have
12 in the draft plan, and we can play a game or I can just
13 tell you the answers, so it could go either way.

14 So what would you guess this big blue slice of
15 the pie is? You think it's highways? You think it's
16 bicycle? You think it Transit projects? It's
17 technology?

18 What might you guess this is, the big blue
19 slice?

20 PUBLIC SPEAKER: Smart growth?

21 MS. ARIAS: Helps with Smart Growth, but this
22 big blue slice is actually the Transit capital side and
23 as you can see, it's more than third. I mean, it's close
24 to a third, but when you look at what it takes to operate
25 a system, it's half of the plan.

43

♀

1 So the Transit capital investment, plus the
2 dollars needed to operate the Transit service, that's
3 half of the plan.

4 Then in here, I guess, we don't need the --
5 then the red slice is about 15 percent of the plan would
6 be allocated towards managed lanes and connectors. Here
7 we're talking about projects, such as the I-15 Express
8 Lane of the I-15 corridors. The carpool lanes on the 805

5-12-15 Court Reporter Discussion_Escondido
9 and the 5. The carpool lanes on the 78 corridor that we
10 built. The additional lanes on I-5 North Coast, so those
11 are the types of projects that would be here in this red
12 slice. (indicating)

13 Then we also have local streets and roads, you
14 know, the local jurisdiction also needs dollars to
15 maintain streets. The red/gray separations we're talking
16 about that Dahvia was mentioning about that expensive
17 project, how do we go under/over the railroad tracks to
18 avoid, you know, some conflicts with vehicle or
19 pedestrians that's built here in this 13 percent?

20 If you're talking about Smart Growth, the Smart
21 Growth part and the accurate transportation is this three
22 percent slice.

23 And the technology piece is this one percent
24 and we are left with the managed lanes and highway
25 operations, and then connectors basically at the

44

♀

1 different interchanges where you have either managed
2 lanes or freeways. How do we connect those highways?

3 And some general purpose lanes or mix flow
4 lanes that, for instance, the completion of the 76
5 corridor here in North County, those are general purpose
6 lanes.

7 So this is how the allocations of the funds is
8 proposed in the plan and as you can see, it's definitely
9 more than a third for Transit Planning.

10 MS. CLEMENTSON: Who wants chocolate? Fast
11 bowl.

12 MS. LYNCH: May I make a comment about Transit
13 and highways?

14 I understand, you know, people have either very
15 supportive of -- or highway growth where they're really
16 opposed to it oftentimes for riding on both ends. I just
17 want to make a comment, not pushing one way or the other.

18 But from a Transit perspective, I think people
19 think of this too as really separate Transit and
20 highways, but for us, we have over 12-million boardings a
21 year, over eight-million of those are on the bus system
22 and we need highways and local roads to be in good shape
23 for that bus system and a lot of our bus riders are not
24 what we call, "choice Riders." These are people who need
25 the buses. It's their only option to get to work, to get

45

♀

1 to healthcare, to get to schools, social services;
2 whatever it might be. I just kind of want to make that
3 point, that this is actually a really important component
4 of the Transit Network as well, for whatever that's
5 worth.

6 MS. CLEMENTSON: Okay.

7 Are there other questions?

8 Is anybody surprised by this, what they say
9 here? Yeah, other questions?

10 You got lots of good questions.

11 PUBLIC SPEAKER: So I like this pie with candy
12 or without.

13 But what I understood in your explanation, was
14 that the timeline is driven by the funding. What other
15 factors drive the timeline?

16 Is there urgency and how is that established?

17 MS. ARIAS: So the projects, you know, how can
18 we allocate for the projects depends on when those
19 dollars come to the region.

20 Now, we start basically with a picture of the
21 population that we're expecting in the region. The
22 employment that we're expecting in the region. The
23 houses that will be needed to house that population and
24 we look at what the transportation needs are, so we start
25 what we call, an "unconstrained least of projects," so

46

♀

1 it's basically this map of all the transportation needs
2 to meet the mobility needs of the population and the jobs
3 that we're projecting, that's more money than we plan, we
4 project we will have by 2050, so roughly what this plan
5 is able to accommodate is about two thirds of those
6 needs.

7 So there's a third of the needs that there
8 still are a list of projects that are not part of what we
9 are able to fund. So because we can only do two-thirds,
10 not in the projects but persons in need, we have this
11 methodology, this process that our Board goes through to

5-12-15 Court Reporter Discussion_Escondido
12 say, "Okay. How do we determine priorities"?

13 So we're looking at how, you know, the usage of
14 the projected usage of the particular road, bus route or
15 Trolley system. How does it support Smart Growth?

16 And --

17 MS. CLEMENTSON: How it's coming out now?

18 MS. ARIAS: Yeah; how does it improve air
19 quality.

20 So we look at many, many factors so we rank
21 those projects and then, we also look at, as I mentioned,
22 what the dollars that we'll receive can be used for and
23 we have to draw a line at some point, so we have a list
24 and the Board looks at the list and looks at the
25 different priorities, at the rankings, at the ability of

47

♀

1 dollars, the readiness of the project. There may be
2 projects that have done some environmental work that are
3 ready to go to construction than others, so all those
4 factors are, you know, considered when we're coming up
5 with that list that then the Board says, "Okay. Go ahead
6 and build your plan around this list of project that we
7 plan and we should be able to afford in the next 35
8 years."

9 MS. CLEMENTSON: Okay.

10 PUBLIC SPEAKER: I have a question.

11 MS. CLEMENTSON: I'll bring the microphone so
12 everyone can hear you.

13 PUBLIC SPEAKER: So if I understand correctly,
14 this pie chart is for by 2050, the total of everything
15 that's been spent.

16 Does this pie chart look different by 2035?

17 Are the ratios different before 2035, than by
18 2050?

19 MS. ARIAS: Yeah; that's a good question.

20 I don't have, you know, the percentage in my
21 mind, but we know that, you know, the projects between
22 now and 2020 are, you know, they're just a few, where
23 we're only five years out so the main Transit projects
24 are going to be the South Bay Rapid, which is going to
25 provide a connection between Otay Mesa Border crossing to

48

♀

1 Downtown San Diego via Chula Vista. We're also going to
2 have the Trolley system mid-Coast connecting the Blue
3 Line, Old Town to University of San Diego and UCSD area.

4 And when we think of highways, it's mainly the
5 completion of 76 here in North County. The widening of
6 76 and some carpool lanes on I-5 North of Manchester, so
7 those are kind of the key projects that you will see in
8 the short-term.

9 MS. CLEMENTSON: And then that number?

10 (indicating)

11 MS. ARIAS: Yeah.

12 And then, we have the Board also allocated for
13 the next 10 years starting in 2013, so through probably

5-12-15 Court Reporter Discussion_Escondido
14 2025, 200-million dollars that is being allocated to buy
15 some population projects.

16 MS. CLEMENTSON: Okay.

17 So I'm thinking now maybe is a good time for us
18 to break and have some more specific questions.

19 You're saying just one more question?

20 PUBLIC SPEAKER: One more, because you didn't
21 answer my earlier question:

22 Was if you can highlight the key changes? The
23 key changes between the last RTP and this one, because it
24 feels to me like there's a disconnect. I haven't heard
25 changes articulated really, and yet I know the Greenhouse

49

♀

1 Gas projected it went down 2020 and then it went up and
2 now it's just this nice straight line. (indicating)

3 So I'm trying to understand what changed so
4 dramatically for that, because it feels like there's a
5 huge disconnect.

6 MS. CLEMENTSON: Yeah; well, I can tell you
7 some of the things that have changed.

8 One of the things that changed, is we worked
9 very closely to match our planning assumptions with the
10 other regions in the State, so we worked very closely
11 with the Planners in Sacramento, for the Sacramento area,
12 the Los Angeles area and the Bay area to make sure we
13 were all making the same assumptions and we found that
14 some of our assumptions that we made in the last plan

5-12-15 Court Reporter Discussion_Escondido
15 were a lot more conservative, far more a conservative
16 than the assumptions that they had made, so that's one
17 factor.

18 The other factor is, that we have been able to
19 do more detail Transit planning that Dave Schumacher has
20 had an update talked about earlier, and by doing those
21 more detailed planning studies for the Transit projects,
22 we're able to do a better job of timing those with what
23 the land use projections are.

24 So, for example, something that's a big -- from
25 our perspective -- a big change in this plan, there's a

50

‡

1 line, a new Transit Line that will go from San Ysidro to
2 Kearny Mesa and up to Carmel Valley. It's known as the
3 "Purple Line" and it will drastically improve
4 connections, especially for the lower income communities
5 up to various job centers where the cities are planning
6 for job growth and housing growth.

7 And by moving that up sooner in the plan, we're
8 able to realize those benefits longer throughout the life
9 of the plan. Those are a few examples.

10 Other examples, include a really more serious
11 look at the innovations in technology and this whole idea
12 of mobility hubs and how are we taking advantage of where
13 we're making public investments for the private
14 investments to be part of that.

15 So bike share, "Lyft, Uber, Car-to-go," really

5-12-15 Court Reporter Discussion_Escondido
16 thinking about the role that those types of services play
17 to help compliment our plan.

18 So those are a few of the highlights that have
19 really contributed to where we're seeing greater
20 reductions in Greenhouse Gas Emissions, so we can talk
21 about that in more detail. There are probably four
22 40-to-50 different assumptions that go into all of that.
23 We work with peer groups throughout the State to come up
24 with all of those and we're really working hard so that
25 when the SANDAG plan gets matched up to the Sacramento

51

♀

1 plan, to the Bay area plan, to the L.A. plan, that you're
2 looking at something that we've made consistent
3 assumptions and you can actually compare them; okay.

4 So with that, I see one more little finger
5 going like this. (indicating)

6 PUBLIC SPEAKER: It was a really quick
7 question. Has there been any change in the
8 Smart Growth concept?

9 MS. CLEMENTSON: Oh, that's a good point.

10 So Carolina had a network on the updates to the
11 Smart Growth concepts maps. There were few adjustments,
12 nothing really significant. I think probably the most
13 interesting one is in East County, where there are three
14 jurisdictions that came up with a plan around Gallepsi
15 Field and so, that's the new Smart Growth area that
16 wasn't on the map previously; everything else we've seen

5-12-15 Court Reporter Discussion_Escondido
17 have been more refinement. The general plans have been
18 updated, some of the areas came off and others were added
19 but the same number of Smart Growth areas are roughly
20 there; okay.

21 I think we're ready to break. I want to thank
22 our Panel so much for coming together and giving us your
23 best efforts, of course, we really, really appreciate
24 that.

25 I heard things about you tonight that I haven't

52

♀

1 heard before. This is a new sort of approach for us to
2 bring folks to react to our plan, unscripted and you guys
3 really did a great job and we appreciate that.

4 Thank you all for being here. We're going to
5 move now to the Open House portion and then we have
6 Gloria who's still excitedly waiting here to hear your
7 official public comment you would like to put in the
8 record regarding the plan.

9 So thank you, we're going to conclude this
10 part; you're welcome to stay as long as you'd like. I
11 think lights go out at 8:30; anyway, thank you again.

12 * * *

13

14 PUBLIC SPEAKER: My name is Diane Nigaard.

15 My concern is having detail backup behind the
16 Greenhouse Gas Emission reduction number.

17 I talked to Coleen earlier and she stated that

5-12-15 Court Reporter Discussion_Escondido
18 it's part of the computer model; computer model doesn't
19 give people the access to understanding the numbers or
20 being able to verify that the assumptions that went into
21 it are valid or not, so it's really critical that that
22 information be presented in a way that the public
23 understands it and has a way to validate that the
24 assumptions are correct.
25

53

♀

1 PUBLIC SPEAKER: I'm George Courser.
2 And my address is 3142 Courser, San Diego 92107
3 and my phone number is 858.273.2426.
4 And my thoughts are -- what I was looking for
5 was the -- I was looking for an asterisks on that Board
6 that says "SB375 Greenhouse Gas." It is presented as an
7 accepted statement of fact that these are the projections
8 for San Diego forward -- well, I have to disagree.
9 These projections are in dispute with the State
10 Supreme Court of California who have rejected SANDAG's
11 Climate Action Plan and related environmental documents,
12 unfortunately SANDAG has put forth items for
13 consideration for reducing pollution but only through
14 2030 instead of the 2050 that was prescribed by Governor
15 Schwarzenegger in 2005. He said that, yeah; yeah.
16 So that was back -- so the Supreme Court had
17 stated that this plan is not accepted. It's going to be
18 an article of review for the Supreme Court on their new

5-12-15 Court Reporter Discussion_Escondido
19 agenda. They have also rejected the County of San Diego,
20 CAP or "Climate Action Plan" outright and this has to be
21 completely redone, so it's amazing that SANDAG is moving
22 forward with these plans for the RTP 2050 and making
23 these -- these are presumptions. These are not factual.
24 The County of San Diego is a huge component of
25 the SANDAG area that they are planning for with the

54

♀

1 inability of the County to have a recognized and improved
2 Climate Action Plan. It destabilizes all that SANDAG can
3 do. It has to be in conjunction with, without that,
4 SANDAG will again be vulnerable to litigation. I don't
5 need litigation; what we need are actual concrete plans
6 that reduce Greenhouse gas and they're under "AB32" and
7 "SB375" and the implementation has to be realistic. It
8 has to be doable and there has to be financial plans that
9 go to achieve it. Hot air is not that factor. It's not
10 a factor that can be counted on. This is make believe
11 right now; thank you.

12 (Whereupon the SANDAG Workshop concluded.)

- Michael Beck - Endangered Habitats League

1 SANDAG PUBLIC WORKSHOP, WEDNESDAY, MAY 13, 2015
2 LA MESA COMMUNITY CENTER
3 4975 MEMORIAL DRIVE, LA MESA, CALIFORNIA 91941
4 6:30 p.m. - 8:30 p.m.
5 * * *

6
7 MS. CLEMENTSON: Now we come together to ask
8 our Panel to say what they -- and I'm sorry you actually
9 couldn't see this. Hopefully you memorized everything.

10 So I'm really thrilled we have the Panel that
11 we have here this evening, and I'm going to ask them each
12 to introduce themselves.

13 So we have Jo Marie Diamond who's from the
14 "East County Economic Development Council."

15 We have Bill Chopyk who is the "Head Planner"
16 with the City of La Mesa.

17 And then, we have Michael Beck who's with the
18 "Endangered Habitats League."

19 And so I'm going to pose to the Panel, and I
20 think we'll start with you, Bill, since this is the City
21 in which you work and ask you to tell us about what you
22 do and why you or the organization that you work for or
23 cities in general, should care about a plan like this.

24 Mr. CHOPYK: Okay, great; thank you, Coleen.

25 And I want to welcome everyone to the City of

1 La Mesa as the Planning Director for the City of La Mesa.
2 It's really exciting to have a SANDAG workshop here, and
3 good to see you all here from all over the East County.

4 Both the Cities of El Cajon and La Mesa were
5 incorporated in 1912. We're 100 years old. La Mesa had
6 a population of 700 in 1912, now, we're at 59,000 so it
7 makes me, as a Planner, think about the next 100 years
8 and what do we have to look forward to, and this workshop
9 is exactly around along the lines of what we can envision
10 for our future and what we see for our future.

11 So tonight is a really great opportunity for
12 public input for you to share your ideas with SANDAG
13 about their Regional Plan; every City is required to
14 prepare a general plan, so the City of La Mesa general
15 plan is this book is about twice as thick as SANDAG's
16 Regional Plan, throughout the Regional Plan.
17 (indicating)

18 And the reason is, though, is because there's a
19 lot of detail. There's a lot of detail you'll find in
20 the City's general plan, that you don't really find in
21 SANDAG's Regional Plan.

22 For example, there's a list of projects in the
23 Regional Plan, one of them calls for grade separations
24 through Lemon Grove, through La Mesa, through El Cajon,
25 but doesn't really specify much detail about grade

1 separation. Is it above grade? Is it below grade?

2 So when La Mesa was incorporated in 1912, it
3 was incorporated around the railroad train. It's that
4 same line that runs along Spring Street. The line that
5 we have has been coined, raised by some of our residents
6 when they're trying to drive across University Avenue or
7 Alison or Lemon Avenue.

8 And there's a term that they get "Trolled"
9 meaning, they're trying to cross Spring Street but along
10 comes the Trolley and stops everything, and that's a
11 little bit unique to La Mesa, so the grade separation is
12 a really nice thing for this plan for the future of
13 La Mesa.

14 And we've had a lot of discussion among the
15 community about the grade separation. There's actually
16 some discussion of it in our general plan that we would
17 really prefer to see it as a low grade separation, rather
18 than above grade primarily because of the noise that the
19 Trolley makes.

20 And we do get a lot of complaints about, you
21 know, living along the rail line. I think you have to
22 make a choice if you're going to live here.

23 Transit, you're making a choice if you're going
24 to live near Transit, you have the benefit of utilizing
25 the Transit system but they're also the negatives that go

1 on with it. The sound of the crossing arms. The sound
2 of the trains coming through and so, there's been a lot
Page 5

3 of discussion in our community about quiet sense as well
4 and that's a whole separate issue that has to be
5 addressed very well, but these are some of the things
6 that I really like about the plan.

7 I -- there's a lot in it for all of us and, you
8 know, there's a lot of money at stake; what's in it for
9 East County? I think you've been presented with some of
10 the things in the Regional Plan in East County that are
11 going to provide work mobility and choices, more options
12 for getting around.

13 I use the Trolley. I like to ride my bike. I
14 like to walk around, not everyone wants that and in some
15 of the communities like, in Crest or Lakeside, it is more
16 difficult for you to use Transit because you're not
17 within proximity to Transit and so, maybe those are some
18 of the things that you like to see in the plan.

19 How can you get around better in the region?

20 How can you avoid sitting around in less
21 sitting in traffic and getting to work and getting your
22 jobs done and being productive?

23 MS. CLEMENTSON: Okay.

24 Those are just a few ideas from a really
25 enthusiastic person from La Mesa.

1 Just in terms of La Mesa, don't we have a
2 couple Council Members here from La Mesa?

3 So Council Member Baber?

4 MR. CHOPYK: Bill Baber and Diane Quarter and
5 Kristine Alessio are here. So these are public meetings,
6 so thank you all for coming.

7 MS. CLEMENTSON: Are there Council Members from
8 any of the other cities that you don't recognize? Okay.
9 Great; thank you so much for being here.

10 So, Jo Marie, when you're thinking about the
11 plan from -- first of all, tell us who you are, who you
12 represent and we're really kind of thinking of your
13 viewpoint of economic perspective, what you see in a plan
14 like this?

15 MS. DIAMOND: Great.

16 I'm Jo Marie Diamond. I'm CEO of East County
17 Development Council.

18 Our mission is to have a vibrant economy in the
19 East County, counting the four cities of El Cajon and La
20 Mesa, Lemon Grove and Santee and the contiguous urbanized
21 areas, at least unincorporated areas in East County like
22 Spring Valley, Rancho San Diego, Lakeside and Alpine.

23 Our influence will go on all the way to the
24 border, but 99 percent of the people in East County live
25 in those unincorporated communities that surround our

♀

1 cities, so we know that you got to go for that group to
2 include water and also while you are thinking about the
3 areas and elsewhere.

4 The word "economic" in our title pretty much
Page 7

5 sums up in the three things there. The one I care about
6 the most, is the vibrant economy but you cannot do a
7 vibrant economy without the other two there at the
8 community. It's three.

9 MS. CLEMENTSON: It's three.

10 MS. DIAMOND: Yes, I did see it. First I heard
11 three, then I heard four; yes, you can't do it without
12 the other three. All of those things are important.

13 I like the fact that this plan tends to do a
14 monumental difficult job, which is try to balance all of
15 these things in ways that make a difference to our
16 communities.

17 I would like to say, that you heard the mention
18 of aerotropolis, that the idea of a special use center or
19 employment center around Gillespie Field Airport, while
20 we're showing where the growing population is going --
21 that the population is still going to grow in our cities
22 that are along 8, 52, 94. I'd like to have seen a little
23 more of that, you know, that density and what we're going
24 to do about that. Here's what we think about the idea of
25 growing jobs where people live.

♀

1 If you want to get reduction in vehicle miles,
2 then make the infrastructure be there, so people can work
3 where they live.

4 Does our Trolley Line need to be more
5 integrated with the industrial properties around that

6 airport?

7 Is the housing going to have to come from La
8 Mesa and Lemon Grove, or is there going to be more jobs
9 than people who live just in El Cajon and Santee can
10 build?

11 Where are they going to live?

12 How are they going to get there?

13 All of those pieces have to go together to be
14 able to have that kind of increase investments in growth
15 domestic or regional product, that will let people work
16 closer to where they live and not sitting on those
17 freeways going West in the morning and East in the
18 afternoon, so all of those pieces are important in more
19 detail. I'm not a planner by either inclination or
20 training, so I'm just going to talk to you about the
21 larger picture of how these pieces have to fit together.

22 And please remember, that when we're talking
23 about "mobility," that we're not just moving people,
24 we're also moving goods and, you know, things that come
25 out, filler guitars and endearing banjos cannot get to

♀

1 their customers on a Trolley, so please remember that.

2 MS. CLEMENTSON: Thank you, Jo Marie.

3 So now, thinking about the other perspective,
4 the environmental sort of the preservation open space.

5 Michael Beck, I know you've had a long history
6 in working in that arena, so from your perspective from
Page 9

7 where you come from, your thoughts on why a plan like
8 this is important to the work that you do?

9 MR. BECK: Sure; thank you for the opportunity.

10 Can you put that one slide up, I'll reference
11 here again in a moment. (indicating)

12 So just by way of background, my organization
13 works in the five Southern California Counties and for 25
14 years, we've been working on large ecosystem level
15 conservation plans. These are plans that intend to
16 preserve the biodiversity of Southern California and
17 perpetuity so it's not a small task. I'm the San Diego
18 Director.

19 And did that slide come on? (indicating)

20 MS. CLEMENTSON: The slide is up, can you kind
21 of see here?

22 MR. BECK: That's okay. I know how it looks
23 like.

24 So this is an image of about 25 percent of San
25 Diego County. This is the Southwestern, if you will, the

♀

1 upper area of that dark green portion of the slide is
2 basically the San Diego area and then the Eastern
3 boundaries are Ramona, Alpine.

4 And this is what eventually is going to be an
5 ecological preserve. It's being assembled now. I won't
6 go into all the details, but there's a significant
7 parallel with transportation planning and this map, of

8 course. This map basically represents two different
9 biological notions. One, are corridor areas and those
10 are the larger green areas.

11 And then, the linkages between them both of
12 which have to be assembled to make the system work and to
13 function independently and self-sustainability all the
14 time, which is pretty challenging in Southern California.

15 The transportation planning and the
16 transportation systems and interrelated land use planning
17 also has to have the interconnections to make it work and
18 function, you heard somebody already mentioned the first
19 and last mile that has to be dealt with in these
20 transportation systems and you have to make the systems
21 work in a way that can compete effectively with a single
22 car commute, that's what -- so those obvious challenges
23 that we will be talking about for years, have to be
24 addressed in this Regional Transportation Plan.

25 So I thought what might be interesting is, at

‡

1 least what comes to my mind, as some thoughts about the
2 plan relate to a couple of topic areas, one of them is
3 just financing, because so far everything that everybody
4 said and the content of this plan as it starts in the
5 bullseye in those objectives of that graphic that was
6 presented probably on the first slide, talks about the
7 vision and the vision is an idea. It's a picture of the
8 future what could be, but it is not a picture of what

9 will be. It's what could be, you may disagree with the
10 content of that.

11 But generally, a lot of these forces that are
12 in play here in terms of multi family housing in the
13 direction that that's going, in terms of general plans,
14 the progressive general plans that some of the cities are
15 doing, National City, City of San Diego, caveat, the
16 County of San Diego.

17 And so, those are the real drivers.
18 Transportation is not going to drive these decisions, the
19 land use is going to drive these decisions and it's
20 already been noted and it's almost a mantra that SANDAG
21 doesn't make land-use decisions. Well, that's not a
22 small issue because it's a huge issue because you have to
23 implement this plan, you have to have the right land
24 decisions and those decisions have to be, I guess, joined
25 at the hip, if you will, with the transportation system.

♀

1 The Transit Transportation System and efficiencies of it.

2 So in order for this all to work, you have to
3 have the money to pay for it. It's as simple as that and
4 right now we don't have the money to make this plan work,
5 and if you look at the financing element of the Regional
6 Plan, you'll see that there's a lot of discussion about
7 what the needs are, those are quantified and it's clearly
8 laid out. There's a comment, a brief comment about the
9 quality of life initiative, which is something that I

10 would prefer to highlight rather than just imbed. That
11 is one of the mechanisms by which we're going to fund
12 whatever transportation plan we have in the future.

13 As a matter of fact, without additional funding
14 we can't even pay for our existing RTP. The transit
15 operations within the existing RTP. So as much as we
16 want to and encourage everybody to engage in trying to
17 envision a future that is progressive, that is, this
18 world where we have vibrant, alive open spaces and
19 commuting system that are interesting and fun and
20 downtowns' and built communities that are visionary which
21 is our potential, we can't do without the funding.

22 And so, maybe we'll get into it, the Q-and-A
23 and I won't take too much time right now, but this whole
24 question of funding is so fundamental to this, that I
25 think we need to take this opportunity in advancing the

♀

1 regional plan to really focus on this challenge of
2 funding and how we're going to get there, because I've
3 got my own agenda with freeways related to that and it
4 has to do with the habitat side of it.

5 But in our world, you know, a biological
6 principal that is not going to surprise anybody in the
7 room, is that, everything is connected; pick up one thing
8 and it's connected to something else, that's how it works
9 in biology and human beings have successfully separated
10 themselves in their minds from biological systems, but in

11 fact we are not.

12 And that reality, that interconnection is
13 something that is, if you will, kind of imbedded in our
14 strategy to address all of these things and it's the
15 reason the HL, by the way, works on transportation
16 planning, land use planning and regional plans because we
17 know that unless these built community strategies are
18 visionary, progressive and funded, that everybody is
19 going to go out and go after the open space because that
20 is an easy place to go and build one, that dynamic and
21 that paradigm is shifted or is shifting right now and
22 this is maybe the final Segway or Segway into my final
23 comment about the County General Plan.

24 The map that was shown that went back from the
25 1990 version of what San Diego was going to look like to

♀

1 the future of what it could look like, based on the land
2 use plans that have been conducted to the County's
3 general plan, those plans have to be implemented for that
4 map to become real and to the degree that they are
5 amended, to the degree that they are changed in ways that
6 are inconsistent with this strategy or with the already
7 adopted Regional Smart Growth map, that's a challenge to
8 this vision as much as financing the implementing of this
9 vision has.

10 And I would say, that one of the weaknesses of
11 the plan even though there's a very good incentives

12 program, it's not enough incentive and there's no
13 disincentive program for long land use decisions or poor
14 land decisions, and that is hugely significant. It's in
15 the achilles, potentially an achilles heel to this
16 regional visionary plan and the County's general plan.

17 So, you know, wanting to go somewhere and
18 putting it in the plan and talking about where we're
19 going to be in 50 years, is an important part of what
20 creating our future is all about and it's something that
21 engages people because you get to be visionary, you get
22 to be critical too; you get to say, "That's not good
23 enough. It needs to go this way ..." there's a lot of
24 that sort of criticism that is valid in moving the bar in
25 one direction or another.

♀

1 But keep in mind, that the plan doesn't work
2 without the financing, that SANDAG does not make land use
3 decisions and those land use decisions have to be
4 consistent with this plan.

5 MS. CLEMENTSON: Okay, great; well, we heard a
6 lot; thank you all and for bringing some more water
7 there, Michael, because I think maybe you drained the
8 pitcher during that ...

9 So following up on, there's several really good
10 points that were raised here and I think I'm going to ask
11 another question of you, Bill Chopyk, just on the land
12 use side, you've got your general plan. The general plan

13 is what then SANDAG uses to try to match that up with the
14 Transportation Network, and obviously many of your City
15 Council Members are here to.

16 So tell us how, you know, how you come up with
17 land use decisions that you do and, you know, what how
18 that is or is not connected with what's happening in the
19 region and incentives that are out there to.

20 Do they work, do they not? You know, just
21 getting to some of Michael's points from sort of the
22 jurisdiction perspective.

23 MR. CHOPYK: Well, of course.

24 Under "California Statute Land Use," the Land
25 Use Authority lies within the local jurisdiction, and the

♀

1 property in this case, is the City of La Mesa, the City
2 of El Cajon, City of Lemon Grove, City of Santee are the
3 incorporated Counties. Those land use decisions are made
4 by the City -- ultimately the City Council of those
5 cities and that's where land use authority lies.

6 And so, in order for us to work with a regional
7 plan and achieve some of these regional goals like the
8 Smart Growth concept map that you see with SANDAG and
9 some of the things that we're trying to achieve
10 regionally, require some cooperation and thought among
11 the Planners and the Councils, the Planning Commissions
12 of your cities and your County.

13 And so, it's not uncommon that you'll have a
Page 16

14 development project that's proposed in your jurisdiction.
15 It's going to go through a Planning Commission process,
16 so ultimately it's going to go to the City Council for
17 approval, denial, modification. It's up to those
18 decision-makers who you elect to represent you, to make
19 those land use decisions, so we -- SANDAG serves an
20 important function in terms of bringing those cities all
21 together. There's a Board of Directors. There's
22 meetings of the Planning Directors of the Public Works
23 Directors, various aspects of these cities to work
24 together, so that our bicycle lanes are connected, you
25 know, if you got a bike lane in La Mesa, you want to make

♀

1 sure it connects to San Diego and to El Cajon. If you've
2 got, you know, air quality issues in which SB32 and
3 SB375, air quality doesn't stop at the border and that's
4 why it's important to have a regional plan that addresses
5 the air quality issues.

6 So really, Land Use Authority lies with the
7 cities. The cities are very strong and very adamant
8 about that.

9 MS. CLEMENTSON: What about the land incentive?
10 So what incentivizes the land use change?

11 Do the transportation investment -- I think
12 getting certainly to Michael's point -- so is it the land
13 use first?

14 Is it the transportation first? You have a
Page 17

15 perspective on that as well.

16 And maybe actually, Jo Marie, you want to
17 respond to that?

18 What influences the economic development? The
19 infrastructure, the land use?

20 MS. DIAMOND: Well, we did a piece availability
21 study for the idea of the employment center or Gillespie
22 Field Airport. The reason we did it, because that
23 airport is an asset and it happens to have, thanks to all
24 of you, a really good infrastructure around there
25 already, right? Could be a little better, but the lack

♀

1 of bridge -- there might be a few people in this room who
2 might want to talk about that bridge.

3 But what's really encouraging to us, is that
4 when the three jurisdictions got together that touched
5 the area adjacent to that airport when they wrote that
6 update to the Smart Growth concept map, they said right
7 off the top, "We're going to work together to figure out
8 and we're going to look at every land use and every
9 zoning stipulation and it's all on the table. We're
10 going to figure out what we're going to do to fill those
11 jobs."

12 So we are trying to maximize the transportation
13 infrastructure we have already and make it meet the needs
14 of companies and jobs they produce and the people in the
15 community who are there.

16 So what I want to say, is that, the two things
17 have to go together, right? You have to have those
18 pieces together and where they're living and working,
19 they have to have, you know, a quality life as well, so
20 all those pieces have to work for us and start what we
21 have and think about what we can change that makes the
22 most sense in the near term.

23 MS. CLEMENTSON: That's great.

24 And Mike, I want to follow up on the other
25 questions, you talk a lot of what the needs are and the

♀

1 challenges. There's a lot that's been done for habitat
2 preservation and the region that you've been involved in
3 a lot of that, and I wonder if you might want to
4 highlight some of what you have been able to accomplish
5 and if we are thinking about a new funding measure for
6 habitat, what have we done that would, you know, make us
7 want to do more of that?

8 MR. BECK: Sure.

9 I (inaudible) want last question, but when
10 Transnet 2 -- Transnet 1 was 1987. Transnet 2 is 2004,
11 and there would be another one at some point.

12 MS. CLEMENTSON: Can everyone hear? I know
13 this is probably ...

14 MR. BECK: Okay.

15 By the way, I want to mention, I also live in
16 East County. I live in Crest.

17 So one of the components that is imbedded
18 in the map that I showed earlier, is an obligation to
19 actually fund acquisitions and management, monitoring
20 over those habitat lands once they're conserved and
21 towards that end, we got very involved in negotiating a
22 portion of the Tansnet 2, Habitat sales tax be dedicated
23 towards those purposes and it was alluded to and actually
24 in the regional plan \$850, actually 80 million dollars
25 that is dedicated to those purposes. It's in several

♀

1 different pots, advance mitigation, which is a very
2 important concept, where the local transportation and the
3 Caltrans/SANDAG will actually mitigate for a project that
4 may take 10 years to build but they'll mitigate it for us
5 today, land prices are cheaper; important habitat lands
6 are being lost every minute, so this is a very important
7 concept. It saves money. It creates efficiencies and
8 saves very important habitat lands and that program has
9 been implemented now since Tansnet passed very
10 successfully and it's not just the land acquisition, it's
11 also funded one of the most important conservation
12 initiatives probably anywhere in the country.

13 With state of the art science-based monitoring
14 programs to monitor viability of probably 100 animals and
15 plants and the ecosystems that they reside in and the
16 linkages between those ecosystems and the level that goes
17 from genetic transfer all the way to functions of Golden

18 Eagle flying areas and habitat area, so that's called the
19 "San Diego Regional Management Monitoring Program."

20 But any rate, these are things that are funded
21 out of that Transnet effort and the conservation
22 component of it. It's incredibly critical and very
23 impressive.

24 We also are pursuing, and SANDAG has made a
25 commitment to a significant pouring to finish that

♀

1 regional funding through the "Quality Life Initiative,"
2 which is the agenda that I alluded to early that I have,
3 and I don't disconnect that agenda from the rest of the
4 initiatives at all. We work on all these aspects of it,
5 but that's what it's going to take to actually preserve
6 the biodiversity of this region, perhaps it would -- and
7 the really significant thing is, that SANDAG is not a
8 permit holder. These plans are written by permits,
9 SANDAG is not a permit holder and yet, SANDAG is the only
10 regional entity that exists that can actually have the
11 initiative and has everybody around the table that is
12 going to say, "Yes, we're going to move forward with
13 this," thus far, kudos to the SANDAG Board in not trying
14 to -- and the Director and all the staff, Executive
15 Director Gary Gallegos, to actually maintain their
16 commitment for this region of funding, that is not
17 insignificant and it has implications up-and-down the
18 State.

19 So I kind of elaborated on your question a
20 little bit, but that's the level of content; that's just
21 top layer of it.

22 MS. CLEMENTSON: Thank you.

23 And so, now I have a question for you, Bill.

24 So going back to our three goals, and I'll read
25 the one that I wanted you to comment on, but from your

♀

1 perspective working for the City of La Mesa, what's a
2 healthy community to you? What's a vibrant, healthy
3 community? What does that mean?

4 MR. CHOPYK: A healthy community provides
5 choices to its residents, choices to walk safely to
6 school, to not be afraid of getting run over when you're
7 riding your bicycle through the community, having
8 choices, safer Transnet, safer routes to school, so
9 that's all along the line of healthy community and so
10 providing these mobility choices are along those lines.

11 We've seen an increase in childhood obesity,
12 significant increase in East County and, you know, I look
13 back at my childhood. I rode my bicycle to school and I
14 walked to school and it seems today that most kids are
15 being driven to school and so, not getting the exercise
16 that they need to be active. I would play baseball. I
17 would play tennis. I didn't play on an X-box 360. I
18 actually played on the sports school. I think those are
19 things that can be healthy as a young man. I think we're

20 kind of going back to that kind of -- some of those
21 principles of ways to keep kids active and kids and
22 adults active and thinking about other ways than just
23 always getting in your car to go where you want to go and
24 sit around and play video games.

25 Having choices and alternatives I think it

†

1 leads to a healthy community and leads to people making
2 healthy choices for themselves and we can't force people
3 to get out of their cars and ride a bicycle. We can't
4 force people to eat broccoli and we can't force people --
5 we can't, that is, outlaw fast food restaurants but we
6 can do things to encourage that and to end, of course,
7 demand fuel supply so you're buying healthy foods that
8 are going to be healthy foods available.

9 MS. CLEMENTSON: Okay.

10 And then, I have a question for Jo Marie.

11 And then, if any of you want to ask each other
12 questions based on what you heard great, and then I want
13 to see if any of you in the audience have a question
14 you're thinking about that you'd like to pose those for
15 the Panel.

16 But, Jo Marie, you've talked about the
17 importance of economic development in the East County,
18 bringing the jobs to East County, bringing jobs to the
19 housing.

20 What is your sort of vision for a vibrant East
Page 23

21 County economy and how does that sort of connect with the
22 regional economy?

23 MS. DIAMOND: Well, can you hear me?

24 Is that working?

25 MS. CLEMENTSON: Yes.

♀

1 MS. DIAMOND: Well, my vision is that the
2 investment in East County to bring jobs here, to grow the
3 companies we have. We have many, many companies that
4 grow here that would like to stay here, so we need to
5 have places for them to grow and reasons for them to grow
6 and we also want to make it attractive for companies to
7 be here, but it also means to have the work forcefully
8 trained and skilled. I don't know if you know that Fox
9 Factory is consolidating its commercial footwork for
10 shock absorbers with the defense unit that's already in
11 El Cajon and they did it primarily because of the work
12 force in East County.

13 So we need to maximize that as well, and so the
14 people in East County who have the skills have jobs to go
15 that don't sit them on freeways for 30 minutes each way,
16 that's a good day by the way, 30 minutes, but I know
17 SANDAG calculates those community numbers but I mean, how
18 long -- there's a big rig turned over.

19 So I see all of those pieces coming together, a
20 place where people can live and get home and maybe
21 exercise in the evening because they're not going very

22 far. They're taking two Trolley stops to get back to
23 where they live or to the park, so all of those things
24 coming together what I see is the investment happening.
25 The people being put to work with the right skills to get

♀

1 there, and the infrastructure that will allow the
2 movement of goods-and-services to accommodate all of the
3 services.

4 MS. CLEMENTSON: That's great.

5 So do any of you, did you hear anything from
6 each other that you want to comment on or respond to?
7 Okay.

8 So questions for the Panel, thoughts from the
9 audience?

10 So I'm going to, just because we are tied here,
11 if you want to ask your questions and I can repeat on the
12 microphone so everyone can hear. I wanted -- okay.

13 PUBLIC SPEAKER: I wanted to know from Jo
14 Marie, what bridge is a problem for some?

15 MS. CLEMENTSON: Okay.

16 Jo Marie, what bridge is a problem for some?

17 MS. DIAMOND: Well, I said that the "last
18 bridge," we've done a pretty good job of advocating for
19 the Transportation Network. Remember, we had the Trolley
20 in our backyard for a long time, that we've done really
21 good things about making 67 one way, 125 and 52
22 connecting each other, but there is a bridge that goes

23 over from the County into El Cajon, the Bradley 67
24 Interchange, that's a failed intersection and if we need
25 to do all the things we have to have to make this vibrant

†

1 economy work, we're going to have to fix that bridge one
2 of these days and the longer we wait, you know, all this
3 happens in transportation, right? The longer we wait,
4 the more it's going to cost. I'm hoping that the reason
5 we fix that bridge is because it's fallen down. I know
6 it's been qualified as safe, but we've got to figure out
7 a creative way to deal with it because it's going to be a
8 bottleneck. Think about what I'm talking about with
9 regard to this aerotropolis.

10 Well, what if there is a big rig turnover on 67
11 or 125 and the only way goods-and-services can get to
12 that employment center is across that bridge? They're
13 going to be a backed up. What if we're having a
14 disaster? What if there's a fire on places that would be
15 the, quote, "freeways?"

16 How are the staging areas at Gillespie Field,
17 how are those emergency vehicles going to be able to get
18 there and help the people?

19 So that's what I mean. That's why I call it
20 the "last bridge," because it's been there forever. It's
21 essentially the albatross around my neck. So ...

22 MS. CLEMENTSON: Other questions for the Panel?
23 Right here.

24
25

PUBLIC SPEAKER: Yeah.
You talked about the growth in the County, and

♀

1 I think 70 or 80 percent, if I remember correctly,
2 65-plus population in the County, and that's typical. In
3 L.A., it's 120 percent of the growth in L.A. County.
4 There's too many people who will be over 65. It's not
5 me, that's everybody over 35 while this plan rolls.

6 And those people have a lot of money. I think
7 you said it's 17.2 trillion dollars spent and tens of
8 thousands of dollars in construction. I mean,
9 unfortunately most of the great stuff, if the plan works,
10 not the same stuff works for all ideas.

11 And so, it is great but in view of that, I
12 wonder if SANDAG ran out of eight maps of monopoly, I
13 know that's going to change and how it affects that plan.
14 I just wonder if that was done at all.

15 MS. CLEMENTSON: Well, maybe first ask a
16 question for the Panel. It's kind of your thoughts on
17 age of population. That's a trend throughout the State
18 that definitely as we look after 2050, more than half the
19 regions' residents will be senior citizens, so that's a
20 fact.

21 And so, just thinking from an economic
22 planning, you know, environmental preservation
23 perspective, how --

24 MR. CHOPYK: The City of La Mesa has the
Page 27

25 highest percentage of real properties in the County and

♀

1 the region. We do have a high elderly population and as
2 people get older and they move out of their houses,
3 homeowners will come in and purchase that home, and you
4 have a family there now they own the property that's
5 reassessed when that occurs. So people don't live
6 forever.

7 And as we age, we make room for new families to
8 come into that housing and we've got to then provide
9 housing for our seniors. So this is a big, you know,
10 this is a big issue. There is a big need for senior
11 housing in this region.

12 MS. CLEMENTSON: Jo Marie, you want to comment
13 on that?

14 Are businesses thinking about that?

15 MS. DIAMOND: They are.

16 As a matter of fact, I can tell you in the five
17 priority sectors that the San Diego workforce partnership
18 has identified as well as the sub sectors for the
19 regional economy, all of them have an aging workforce,
20 and the pipeline has not been refilled. That's why I'm
21 glad people from our Community College, while they're out
22 there, we've got to be able to fill that; how jobs I'm
23 talking about at the employment center that radiate out
24 to our other communities, some people have to fill them.

25 I also want to say, that people are working

♀

1 longer and we need that experienced, older workforce to
2 help transition their knowledge to the incoming workers.

3 But where are they going to live? How are they
4 going to get there? All of those things matter, so
5 that's why this is important to me. We absolutely are
6 thinking that altogether. We did a packet from
7 demographics in the East County because it's really
8 difficult to connect the unincorporated areas to the
9 incorporated areas and incorporated cities and just try
10 to look at it as a subregion, and in all of our
11 communities there's an increase in demographic in the
12 older population.

13 So how do we make our older population, as far
14 as their economic investment and contribution over their
15 life, work lives, contribute to the next generation of
16 workers that are going to keep us and our children's
17 children. I didn't have a child, but, you know,
18 gainfully employed and contributing to society.

19 MS. CLEMENTSON: Michael, did you have any
20 comment? I don't want to leave you out.

21 MR. BECK: No, that's okay. I'll wait.

22 MS. CLEMENTSON: You'll have to wait.

23 Other questions for the Panel?

24 Yes?

25 PUBLIC SPEAKER: Yeah.

♀

1 Southern Californians, as we all know, love our
2 single car commute, and if there's, you know, really a
3 concerted effort to change that -- I think Michael Beck
4 said something about how mass transit has to compete with
5 that single car commute. If there's a way to make it
6 advantageous to take mass transit or the bike or walk,
7 can we do that? Because I think there's still an
8 emphasis in our City, the East County, to make it -- make
9 the roads for cars and secondarily for bikes and
10 pedestrians and with mass transit, you really need to put
11 more effort into fewer lanes, make it so that the people
12 on the Trolley are looking out at that congested traffic
13 and say, "I'm so glad I'm on that Trolley instead of in
14 that car ..." because right now we're saying just the
15 opposite, and so we really need to squeeze those traffic
16 lanes and put more emphasis on mass transit, biking and
17 walking, just to get healthier communities and better
18 air.

19 MS. CLEMENTSON: So, I don't know, Jo Marie, if
20 you want to take a stab at that or --

21 MS. DIAMOND: Yes; Michael took the mic --

22 MS. CLEMENTSON: Michael took the mic, okay. I
23 didn't see that.

24 MR. BECK: I would like to --

25 MS. DIAMOND: -- I want it back.

♀

1 MR. BECK: You can't.

2 So one of the comments I made, had to do with
3 funding all of these based ideas that we have.

4 And the funding challenges are monumental and
5 when you, in particular, start looking at what it costs
6 to fund the kind of transit system that you're
7 describing, one that is going to outcompete a single car,
8 which is really the threshold, if it doesn't, people
9 aren't going to use it. At least commuters aren't going
10 to use it, and we all know that that's consistent with
11 what we've got right now.

12 So I would say that unfortunately for the East
13 County, the transit money is going to go to the areas
14 that have high-dense populations. At least the first
15 expenditures of money are going to go to places where
16 most people are, which is, you know, Golden Triangle,
17 Downtown and down National City, in that neck of the
18 woods, Chula Vista, where there's high population growth
19 there and it is high existing populations and a lot of
20 the infrastructure already in place.

21 So it's important. It's kind of a reality
22 check, you know, somebody has to -- proponents for East
23 County Transit, and I would be one of them -- proponents
24 for East County Transit have to crunch the numbers and
25 say, "Is it possible to get an interconnective first

♀

1 mile, last mile transit alternative to the car in East
2 County and what does it cost"? That's the question that
3 has to be asked before you start doing the planning in my
4 view.

5 MR. CHOPYK: Unless the microphone comes over,
6 I just want to say that the State of California agrees
7 with you, that the passage of "AB 1358," that California
8 "Complete Streets Act of 2008" requires all cities,
9 counties, jurisdictions to clean their streets, not only
10 for the automobile but also for bicycles, pedestrians and
11 transit users.

12 MS. DIAMOND: And La Mesa is doing a great job
13 there too.

14 I just want to say -- you heard all my comments
15 already -- I wasn't -- not once did you hear me say, "we
16 need bigger, wider, faster freeways," right?

17 What I said was, let's maximize the investment
18 where there's already land use and infrastructure where
19 we can grow jobs so people are taking the Trolley to work
20 around the aerotropolis or riding their bikes.

21 Now again, we're not going to be able to move
22 goods that way, so they're going to have to use some
23 other means of movement, but what we're trying to say is
24 where people already live in East County, we want to grow
25 the jobs there so if somebody in Crest needs to go to

♀

1 work, they're not necessarily driving down to SPAWAR, the
2 Navy Lab down on Point Loma, maybe there's an R & B
3 Center for unmanned land, sea and air vehicles in and
4 around the Gillespie Field Airport, okay? We're talking
5 about all these things working together.

6 And again, one of the reasons I'm glad Bill is
7 sitting next to me and we're here in La Mesa, is that,
8 those workers are going to have to come from somewhere
9 else, and you don't build houses next to an airport,
10 right? You have to have the housing Plan B elsewhere,
11 and where better can it be than on transit lines.

12 MS. CLEMENTSON: Great; thank you.

13 Question right here.

14 PUBLIC SPEAKER: I had the pleasure last year
15 when I moved into this area, of reading the Regional
16 Transportation Plan, and I've had a lifelong interest in
17 transit and alternate transit, and I encourage everybody
18 to take just a look at, say, the gondolaproject.com, and
19 a lot of cities across the world are starting to use
20 high-speed, detachable, aerial Gondolas, like
21 eight-passenger gondolas that act as people movers to
22 address that last mile.

23 I have the pleasure of riding the Trolley every
24 day to work-and-back and see the cars on Highway 8 as I
25 wave at them, and I thank the Lord that I'm not there,

1 but I acknowledge them. I drive that mile between my
2 house and the Grantville Station, and if there was
3 another means of feeding the existing Trolley system, you
4 would increase its ridership quite a bit, and aerial
5 Gondolas take much lower land use footprint. They are
6 much lower cost per mile to build and have a lot of other
7 energy efficiency advantages.

8 So if you -- I wrote a 45-page proposal up in
9 the Lake Tahoe area. If anybody, after the meeting,
10 would care to give me their email address, I can send
11 them a copy of the research I've done on the efficiencies
12 of the cost per mile and so forth, that I researched on
13 that front.

14 MS. CLEMENTSON: That's great.

15 And make sure that you get your official
16 comment over here with Gloria when we break.

17 I want to see if there are any thoughts here on
18 First Last mile, you know, what the importance of -- no?

19 MR. CHOPYK: Thinking outside the box, that's
20 the first one I heard connecting to the Trolley with
21 Gondolas. I think that's very creative; probably be
22 scored by SANDAG.

23 MR. BECK: Well, I think it's always been the
24 weak link in the transportation system, and I think --
25 it's interesting, again, there's another parallel with my

1 conservation world, that is, the focus is usually on big,
2 sexy acquisitions. The big, important land areas that
3 are hundreds of acres or thousands of acres, but
4 eventually they don't function. They don't exist unless
5 we have the linkages between them.

6 I do land acquisitions for conservation. I did
7 a 1.2 acre acquisition last year, simply because it was
8 critical, at least parcel. We also did a thousand-acre,
9 1500-acre acquisition.

10 So the last mile, first mile, those are hugely
11 significant to the effectiveness of this system and the
12 willingness of people to actually use the system.

13 It also relates to the demographic question
14 posted earlier. I mean, elderly people have their own
15 needs in terms of mobility, and this plan needs to
16 actually be customized to the demographics in the
17 direction that the region is going.

18 So that's as critical an issue as any of them.
19 It's one that needs a lot of attention, and it needs
20 money to implement a plan, whether it's a shuttle service
21 or something for neighborhoods to allow people to
22 actually effectively and in a timely fashion, get to the
23 transit system.

24 MS. CLEMENTSON: In the -- just kind of
25 thinking about how this plan addresses first-and-last

1 mile. I know this plan has advanced some of that.

2 Maybe Elisa Arias who's worked a lot with the
3 plan might come up here and please describe some of what
4 San Diego Forward is including that hasn't been in the
5 past plans with respect to the first-and-last mile.

6 MS. ARIAS: Phil showed a slide that we'll term
7 "mobility cost," and there's a big display back there
8 that we can talk about and maybe we can show you in a
9 little closer detail when we break up for the openhouse.

10 But here the concept is to look at transit
11 centers and provide different means of getting to the
12 transit center from home, or once you arrive close to
13 your workplace, how to reach your final destination, so
14 what examples do we have?

15 For instance, maybe there's a bike share
16 station, maybe there is a Car2Go, maybe there is a Uber
17 available, maybe you can bring your bike on the transit
18 system and continue on. There's also information systems
19 in ways maybe as a place where you can, you know, pick up
20 your packages from Albertson, so look at all those
21 different services that make that transit service more
22 convenient for the public. So those are some of the
23 concepts we're working on.

24 We were able to get some grant funding from
25 Caltrans to start looking at these concepts, and again,

1 there's not one size fits all because areas are going to
2 have different types of mobility house, but that's the

5-13-15 Court Reporter Discussion_La Mesa
3 concept that we really want in our plan and come out with
4 this strategic plan that would be implemented in the
5 future for different areas in the region.

6 MS. CLEMENTSON: And I think there was another
7 question.

8 I wanted to also bring up the comment that I
9 think, Bill, you made earlier related to complete
10 streets, and I know the City of La Mesa and other cities
11 are also looking at incorporating more bike-and-ped
12 improvements in all the projects that you're working on,
13 and to the extent that those can include connections to
14 regional transit. I know that's something that the
15 cities have been trying to incorporate, you know, with
16 part of the local tax and sales tax the cities get
17 through your local streets and roads program.

18 I think there was a question here and then
19 we'll go back.

20 PUBLIC SPEAKER: Yeah; one concern I have is
21 housing.

22 Looking at San Diego City is a poor example.
23 There are all kinds of service jobs in that area, people
24 working in hotels-and-motels and all the junk food
25 places, et cetera, and yet there is no or very little

1 cheap housing so that they can live downtown where they
2 work, and I think that's a huge problem for all of us.

3 I mean, there are a lot of working poor that

4 have to commute long distances, that can't live where
5 they work.

6 So "affordable housing," I think that term is a
7 Band-Aid around the portable home. It's usually not
8 affordable for the working poor.

9 MS. CLEMENTSON: Panelists, do you want to
10 respond to that? That's definitely something we hear,
11 how you match -- how do you try to match the housing near
12 the jobs that are created in that area?

13 I think you brought some of that up, Jo Marie,
14 and then how do you connect people? If they can't live
15 that close to their jobs, how can they be connected
16 through transit easily to get to their job?

17 Any thoughts from the Panel on the affordable
18 housing comment?

19 MR. CHOPYK: Well, there is a process that
20 SANDAG oversees, and it's called, the "Regional House and
21 Needs Assessment," or the "Regional Housing Needs
22 Allocation," and so every jurisdiction in the San Diego
23 region is assigned a number of housing units. A goal to
24 achieve a certain number of affordable housing units
25 for very low income; low income, moderate income and

♀

1 above income housing.

2 So these are -- this is mandated by the State.
3 The State requires every jurisdiction to have a housing
4 element. It has to be certified by the State of

5-13-15 Court Reporter Discussion_La Mesa
5 California, the Department of Housing and Community
6 Development. Affordable housing is a huge issue in this
7 State, and it's addressed through legislation and laws
8 and we set goals to achieve that affordable housing.

9 The real difficulty, is getting the funding to
10 build that affordable housing and subsidize affordable
11 housing; just the term "affordable housing" requires the
12 subsidy that bring the housing down below market rate so
13 that it is affordable to a very low-income family. Where
14 do those funds come from? They're very scarce.

15 And things have happened real recently in the
16 State with the dissolution of redevelopment that has
17 taken away a lot of the funding that cities previously
18 had to subsidize affordable housing.

19 So it really comes down to a funding issue, and
20 I think that lies within the State of California to come
21 up with some legislation that's going to replace that,
22 that funding that has been lost since the dissolution of
23 redevelopment in 2012.

24 I'm sorry about that sort of bureaucratic
25 answer, but the fact is, you have to have money to build

1 affordable housing and we don't have any.

2 MS. CLEMENTSON: That is part of being a
3 healthy community, is being able to have housing that's
4 affordable to the people who -- to a variety of income
5 levels.

5-13-15 Court Reporter Discussion_La Mesa
Do you have something to add, Michael?

6

7

MR. BECK: Yeah.

8

9 There actually is an example of a land-use
10 decision that can dramatically affect us in certain
11 circumstances. So there's some State legislation several
12 years ago that's now being implemented in the County
13 wherein -- or whereby, mobile home parks can actually
14 sell those spaces and those units as individual,
15 privately-owned homes, and that has made a huge
16 difference for people who were previously renting, didn't
17 have enough money to get over the hump, because I agree
18 with the comments you made about affordable housing and
19 what is used to quantify that, is a pretty big number in
20 terms of home ownership.

20

21

22

23

So it's maybe a small example but not small
for the people that it affects; that's a lot of people
that actually have a home ownership situation where they
live.

24

MS. DIAMOND: I think --

25

MS. CLEMENTSON: Oh, comment?

SANDAG WORKSHOP - SAN DIEGO FORWARD

41

♀

1

2

3

4

5

6

MS. DIAMOND: -- my comment is a little bit
different. I'm going to take a slightly different spin
on this.

The fact that -- and the number I'm quoting is
based on a number that came out of the "Greater San Diego
Vision Project --" but it may be -- it's probably pretty

5-13-15 Court Reporter Discussion_La Mesa
7 close. The fact that 37 percent of a person's -- a
8 working person's income goes to their housing, whether
9 it's rent, probably a little higher now with what rents
10 look like right now.

11 One of our solutions, is that, we make that the
12 career path and training to go with it to make those
13 working poor have better jobs with higher incomes,
14 because I don't care what we do with affordable housing,
15 this is an area of the country where it's never going to
16 be like Indiana or Alabama. It's just never going to be
17 that, so we need our population to have better jobs.

18 And there are probably even better jobs in the
19 tourism and service industry, but what I'm just trying to
20 say, is that the opportunities that were available to
21 people 30 years ago to have these kinds of jobs that
22 would give them a sort of path to personal wealth aren't
23 there anymore, but we're going to put them back, that's
24 why advanced manufacturing is coming back to the region.
25 We know that there are training and other skills from

♀

1 life science to help guarantee, to clean energy types of
2 jobs, that we can give opportunities to people who have
3 not had them in the past, and that's one of our
4 commitments.

5 MS. CLEMENTSON: All right.

6 And then, I know you had a question; thank you
7 so much for your patience.

8 PUBLIC SPEAKER: I was going to turn it in, but
9 I guess I'll just read it.

10 In a place like Southern California where
11 there's so much urban sprawl, given the negligible effect
12 things like bike lanes, et cetera, will have on traffic
13 congestion and ultimately on carbon emissions, why are we
14 wasting so much time and money on things like this, these
15 ineffectual policies and projects, when our own space is
16 managed so poorly? Wouldn't it be better invested in
17 concrete investments, things like land acquisition, the
18 Daley Ranch that was recently purchased by SANDAG just
19 east of Cuyamaca. They're wonderful lands. I know, I've
20 used them there. They don't work so well if you're
21 trying to get to work from Santee to National City.

22 Why don't we put our money in better things?

23 MS. CLEMENTSON: So that sounds like more of a
24 comment.

25 I don't know if you wanted any responses from

♀

1 the Panel, but that's definitely a comment and again,
2 something you probably want to register with Gloria, and
3 you've written it down so I guess it's officially
4 registered; thank you.

5 MR. BECK: Well, I think it's important. I
6 think a lot of people would not realize how many hundreds
7 of millions of dollars have been spent on land
8 acquisitions, without a doubt, since they were adopted

5-13-15 Court Reporter Discussion_La Mesa
9 with hundreds of millions of dollars, probably
10 800-million dollars in land acquisitions, and many of
11 these places that were acquired were rural lands that
12 were slated for 70s-type developments, so I had a final
13 map, poked around and those projects would have been at
14 the pinnacle to what we've been talking about today.

15 So there's been a phenomenal amount of land
16 acquired and managed for habitat purposes and open space,
17 recreational uses, open trails, that sort of thing, so
18 it's not the kind of thing that gets in the paper very
19 often; occasionally there's a feature story, that sort of
20 thing, but it's going on constant, day in-and-day out.

21 MS. CLEMENTSON: It seems to me, if I
22 understand your comment, it was that you appreciate land
23 acquisition more so than some of the other investments,
24 and why not put that into open space acquisition.

25 Or did I miss that?

SANDAG WORKSHOP - SAN DIEGO FORWARD

44

♀

1 MR. BECK: No, I think you've got it.

2 I've worked with groups like, "Save Our Horse
3 and Ranch Lands" in the past, and I approve of what
4 they're doing. I wish there was more of it and when I
5 see the kinds of resources that a group like say, SANDAG
6 has, as far as I can tell, not really want to really
7 solve any problems. It's frustrating to see that instead
8 of it going towards things like the acquisition of the
9 "Lucky 5 Ranch," that to me was just an outstanding land

5-13-15 Court Reporter Discussion_La Mesa
10 of real estate and I wish we'd do some more.

11 MS. CLEMENTSON: Okay.

12 Okay, one of the things I just -- I want to
13 take a quick time check here. I want to give everybody
14 plenty of time to get around and ask staff specific
15 questions about some of the things that were raised here,
16 get a better understanding of what's on the maps. I do
17 see there are a couple more questions.

18 What's the sense of the group?

19 Do you want to take a couple more questions or
20 should we break, and we can answer some of these
21 questions one-on-one?

22 PUBLIC SPEAKERS: Break.

23 MS. CLEMENTSON: Okay; we'll do two questions.
24 Speed questions.

25 We have one question here and one question

♀

1 here. (indicating)

2 You can go first.

3 PUBLIC SPEAKER: Okay.

4 My question is on funding on "2011 RTP," over
5 75 percent of transit expenditures occur after the year
6 2030. So why are we delaying transit when we need to
7 reduce, reduce and get mobility options to have to have
8 our car?

9 Why is it that Transit expenditures occur after
10 the year 2030, and how is that update going to fix that

11 5-13-15 Court Reporter Discussion_La Mesa
12 problem?

13 MS. CLEMENTSON: Okay.

14 And then -- so we'll take that question, and I
15 think what we'll do is have one of the staff members
16 respond to that, and then the other question so we can
17 prepare.

18 PUBLIC SPEAKER: Well, apparently SANDAG is
19 more of a vehicle for city than it is for everybody in
20 the County, because I live in an unincorporated area.
21 There are five new Trolley lines and not a single one of
22 them goes into my community, and I live in Spring Valley,
23 and we have a very, very large suburban population, close
24 to, I'd say, 80 percent of the people drive away to work
25 in the morning because we don't have a lot of businesses
there that employ a lot of people. They go to El Cajon.

SANDAG WORKSHOP - SAN DIEGO FORWARD

46

♀

1 They go to San Diego and we contribute a lot to traffic.

2 But I really think that perhaps, rather than
3 spending all of my tax dollars to do things for the
4 cities, building more infrastructures for them, perhaps
5 it should come out to the people that actually pay the
6 taxes. Spring Valley pays more in property taxes than
7 any other community that is not incorporated in the
8 entire County, and we get nothing from you guys.

9 MS. CLEMENTSON: Okay.

10 So two really good questions to wrap up the
11 conversation on it.

Page 45

12 Maybe Elisa, do you want to respond to kind of
13 the question we had on phasing of Transit and why we have
14 Transit later in the plan, how can it be moved up, what's
15 different about this plan?

16 So I think we could do a summary about that --
17 or should we bring the Board over? I don't know if that
18 will reach.

19 MS. ARIAS: Let's see how close I can get.

20 Okay; close enough.

21 So we have this chart that it shows where the
22 draft plan proposes the different investments by the
23 types of multimodal that we're talking about, and this is
24 a game, a plan to get people, you know, engaged in
25 talking about where this -- where these investments are

♀

1 proposed.

2 So here you have this pie chart and, you know,
3 you've been hearing about investments in Transit,
4 investments in managed lanes, express lanes, investments
5 in highways, local streets and roads like here in La Mesa
6 or the other communities, active transportation,
7 technology.

8 So if I were to ask you -- we have candy for
9 correct answers, and I know you give incorrect answers
10 too. If I were to ask you this big blue slice of the
11 pie, what would you guess that 29 percent of the dollars
12 that would be invested in the plan would go toward, based

5-13-15 Court Reporter Discussion_La Mesa
13 on what you heard today?

14 PUBLIC SPEAKER: Transit.

15 MS. ARIAS: Good.

16 Now, how -- that's what Transit has. We're
17 going to build Trolley lines. We're going to build rapid
18 bus stations, all those routes. The current route. We
19 have the new Transit service that we are going to be
20 implementing. It will be operated.

21 So what piece of the pie do you think is needed
22 to actually operate the Transit service? The small
23 piece? The medium-size piece? The large piece?

24 What would you think?

25 PUBLIC SPEAKER: 21 percent.

SANDAG WORKSHOP - SAN DIEGO FORWARD

48

♀

1 MS. ARIAS: All right.

2 So I must start giving away the candy.

3 So you're looking at the right half of the pie.
4 So this is 29, plus 21 and 50 percent of the investment
5 in this plan will go either towards building new transit
6 services and to also operate-and-maintain them, so half
7 the investment in the plan are planned for public
8 transportation.

9 We've also talked about the need for managed
10 lanes, the coastal routes for rapid service. They're
11 also going to provide a capacity for carpools and in some
12 cases, some people have to pay a fee to use those lines,
13 like the I-15 corridor.

Page 47

14 So that's this red piece of pie between the
15 percentage for this managed lanes and the connectors
16 towards the freeways.

17 We talked about active transportation.

18 What piece of the pie do you think goes toward
19 active transportation?

20 PUBLIC SPEAKER: Why don't you just tell us.

21 MS. ARIAS: I can tell you that; yeah.

22 So if you are thinking about active
23 transportation and the Smart Growth incentive programs
24 that connects the Trolley Station here in La Mesa, that's
25 the 3 percent of the investments. So the rest of the

♀

1 investments are 8 percent for highway and connectors, and
2 then the rest is to also operate-and-maintain the highway
3 system.

4 So as you can see there's, you know, big
5 investment. The public transportation, both to build it
6 and to operate the current system that we have plus the
7 new system, and the rest of the pie is for the other.

8 If we look, this is a 2050 view. If we look at
9 the 2035 view which is a plan, it's a similar type of
10 breakdown. (indicating)

11 PUBLIC SPEAKER: This is kind of a follow-up
12 question.

13 First of all, I had a question on timing. It
14 seems like the large blue area or comment was latter part

5-13-15 Court Reporter Discussion_La Mesa
15 of the plan, rather than upfront.

16 And then the bigger question, though, is if
17 we're going to reduce the MT, we could take the red, the
18 yellow and the orange and put it into blue so we don't
19 have to have a "Quality of Life Initiative," like
20 progressive tax form.

21 MS. ARIAS: But the second --

22 PUBLIC SPEAKER: So the question is:

23 Is that kind of alternative being thought of?
24 Because if we're going to reduce the MT, we don't need
25 the red, we don't need the orange or the yellow, and we

SANDAG WORKSHOP - SAN DIEGO FORWARD

50

♀

1 put that into blue.

2 MS. ARIAS: Well, in reality we need it all.
3 We need the red. We need the blue. We need all the
4 transit. We need it all.

5 PUBLIC SPEAKER: You're going to reduce the MT,
6 we're going to have fewer cars on the road in the future
7 than we have now. So why do we need more roads if you're
8 going to have fewer cars on the road?

9 MS. ARIAS: So that --

10 MS. CLEMENTSON: Excuse me, but I think that
11 sounds more like a comment that you're making.

12 PUBLIC SPEAKER: No, it's a question.

13 Why are you going to build more roads, in the
14 billions of dollars, when we've had fewer cars on the
15 road than in the future? Why do you want to do that?

16 MS. ARIAS: The plan doesn't reduce the roads
17 in the region because of the way of the growth in the
18 future. We are talking about the projection of the
19 million more people in the region between now and 2050.

20 PUBLIC SPEAKER: No. No! The fewer cars.
21 Why have more roads, if you can have fewer cars
22 on the road?

23 MS. ARIAS: Well, I don't think the map works
24 that way, with a million more people crossing the roads
25 but that's a comment, I guess.

♀

1 But going back to the phasing of the plan, this
2 is a 2050-look at the investment, but it's a similar
3 proportion to answer your question earlier on, by 2035
4 the plan also will have a similar proportion.

5 And part of this transit capital investment, is
6 the high-speed rail that's in the project of the State of
7 California and it's the phase between Los Angeles and San
8 Diego that is going to be built, and that is the last
9 part of the plan because of funds that SANDAG doesn't
10 control and that project, and we will have that project
11 in the last phase of the plan.

12 MS. CLEMENTSON: Okay.

13 And so thank you, Elisa.

14 And I think, you know, the points that you're
15 making about investments in East County that you have
16 suggestions about specific investments, that would be

5-13-15 Court Reporter Discussion_La Mesa
17 great for us to get your comments and where those should
18 happen, and we have maps back here that you can write on
19 and draw on for us.

20 So at this point, we'll wrap up the group
21 discussion. We're happy to answer any question. Staff
22 will be going on to these various display boards.

23 And I really want to take this opportunity to
24 thank our Panel for coming here.

25 I know, Jo Marie, you've been up since 4:00

SANDAG WORKSHOP - SAN DIEGO FORWARD

52

♀

1 this morning in meetings, and so thank you for sticking
2 it out with us here tonight.

3 Thank you, Bill.

4 And thank you, Michael, so much. We really
5 appreciate it.

6 * * *

7

8 PUBLIC SPEAKER: My name is Jeff Sparksworthy.

9 I lived in San Diego in the '80s and then moved
10 back here last year and have been interested in seeing
11 the last mile issue solved.

12 I take the Trolley. A lot of people every
13 morning have to get to the Trolley stations in a variety
14 of ways, and I look at all the little canyons that come
15 down from the neighborhoods in San Diego and think that
16 there could be Gondolas, that would be feeders for the
17 Trolley system, just like a Trolley Line could run from

5-13-15 Court Reporter Discussion_La Mesa
18 the Airport up Maple Canyon and get to the Trolley, the
19 Traml ine could run from the Airport up Maple Canyon and
20 get to the existing Trolley and to the Zoo.

21 It's a little silly that our Trolley system
22 doesn't serve the Airport or the Zoo in Balboa Park and I
23 know there are reasons for that, and aerial Trams get
24 around a lot of those reasons by not having a
25 right-of-way of issue, not having a land footprint of

SANDAG WORKSHOP - SAN DIEGO FORWARD

53

♀

1 having to build more roads and places that there aren't
2 available routes, and can move six thousand people an
3 hour with one 500-horsepower motor instead of every
4 single car having 200-horsepower. That's my comment.

5 If anybody wants a copy of my proposal, which
6 is tailored for the Lake Tahoe, Truckee area but has the
7 same type of research, they can contact me at
8 Jsparkworthy@gmail.com come and I could send them a
9 flyer.

10 My paper has been embedded by Caltrans, by
11 Regional Transit Agency, people up North, by engineers,
12 by architects, by Trolley operators and so it's not just
13 smoke-and-mirrors. It's been fairly well researched;
14 thank you.

15 PUBLIC SPEAKER: My name is George Courser, and
16 my address is 3142 Courser Avenue, San Diego, 92107. And
17 my phone number is 858.273.2426, That's a cell and it's a
18 home phone; 858.273.2426.

Page 52

19 5-13-15 Court Reporter Discussion_La Mesa
And my thoughts representing the Back Country
20 Coalition are concerning the aspects of the RTP
21 Transportation Plan. Regional Transportation Plan.
22 The Regional Transportation Plan has aspects of
23 it that are incomplete, unplanned or frankly, an error
24 and I'm -- there's some very clear examples of this
25 beginning in the meeting that I was attending today from

SANDAG WORKSHOP - SAN DIEGO FORWARD 54

♀

1 SANDAG. There's an example of the 78 Freeway going west
2 and intersecting the I-5 North and South, and it
3 intersects it like a T-bone so it actually is a stoplight
4 there. It's a signal instead of being a transition for
5 traffic, and it's a very dangerous intersection and it
6 could -- you mentioned of two major arteries for San
7 Diego, yet we really don't have an effective
8 transportation ability at that point. We don't have the
9 capability, or at least the drive to make the correction.

10 Another example, further down south, is that
11 there's not an actual exit, a prescribed, dedicated
12 freeway exit from the I-5 Freeway to San Diego's
13 Lindbergh Field.

14 We're still taking various side streets,
15 different routes that are uneconomical, unsustainable.
16 Frankly, we're putting huge bounds of traffic in the
17 neighborhoods that would have been planned for, yet we
18 have a clear visual shot right from the I-5 Freeway into
19 the airport that can easily be accommodated. But,

5-13-15 Court Reporter Discussion_La Mesa
20 Likewise, we don't have the ability for anyone to take
21 the Trolley to the airport or leave the airport.

22 The biggest transportation hub in the County of
23 San Diego doesn't have transportation that is viable for
24 saving vehicle miles traveled, for convenience of the
25 ratepayers, the taxpayers or even the tourists. We do

♀

1 not have an ability for the tourists that we have, to
2 take the Trolley to or from the airport or say, from the
3 Airport to the world Famous San Diego Zoo or to Balboa
4 Park. They can't do that. It's impossible. It's
5 amazing because of the infrastructure we've already
6 developed in these areas and we put enormous amounts of
7 resources, money, so-called planning into this, yet
8 somehow, we missed the plan. We didn't get the 78 to the
9 I-5. We didn't get the dedicated road to the Airport.
10 We didn't get the ability of the Trolley Line to be able
11 to travel right to and from there.

12 And it's about all I have to say. I thank you
13 for that.

14 (Whereupon the SANDAG Workshop concluded.)

6
7 MS. CLEMENTSON: I don't know if that's a
8 question for the Panel or if there's anyone here in the
9 room that wants to try to answer that.

10 MS. NALLY: You know if SANDAG has program --
11 or don't you want like, grade consulting services for
12 companies that want to start an iCommute or work from
13 home program for their employees?

14 MS. CLEMENTSON: I think what we're hearing,
15 there definitely are programs.

16 There's an iCommute program and I thought Ray
17 Trainer was here, but maybe I'm like, blurring everything
18 together to -- there's Ray; okay.

19 Do you want to -- you can mention something
20 about "iCommute" and also the programs that are offered.
21 I think the question here is, could that be mandated?

22 Do we want State Legislation that requires
23 employers to do this and you probably have heard
24 something like this before.

25 MR. TRAINER: Yeah; a mandate would certainly

1 be possible; yeah. I'm just not sure how practical it
2 would be for companies to have to comply.

3 But we offer a program that really offers
4 consulting services to the regions and borders and a lot
5 of success helping them to develop programs. They're
6 really based on choice, so really getting back to the
7 point here, but we try to provide an opportunity for
8 people to get to work, get home on a variety of ways,
9 vanpooling, carpooling, bicycling and these really tend
10 to be an effective way to do it voluntarily, so we're
11 going to continue in that effort, in fact, the plan has
12 quite a bit of investment in that regard.

13 MS. CLEMENTSTON: And then, there was also the
14 question about requiring or not allowing trucks at
15 certain points in time on the freeways? I don't know. I
16 think I heard that before.

17 Is there anybody here who wants to respond to a
18 question like that?

19 MS. MARABIAN: I mean, anything is possible;
20 start talking to your elected officials.

21 MS. CLEMENTSON: Okay.

22 So let's see, I skipped Colin. I'm sorry, I'll
23 come back to Colin.

24 MR. COLIN: Thanks Colleen.

25 My name is Colin Perry on Policy Counsel that

4

♀

2 accommodating land uses, so we really love that all like
3 the whole spectrum of Transit and Transportation choices
4 that are in this plan. I think it's really comprehensive
5 and wonderful. I think our hesitation that circulates
6 that we think a lot of Transit infrastructure that's
7 being invested, it's a little late in the game, you know,
8 we have secret of that -- obviously, that's a comment.

9 But I really wanted to ask too, compelling I
10 guess, particularly with Linda, you know, the City of San
11 Diego's Climate Action Plan is really dependent on a lot
12 of these mode shifts, people walking and biking more and
13 taking Transit more, but the City doesn't control a lot
14 of those things. A lot of those things are in SANDAG's
15 responsibility, so I'm really just kind of curious how you
16 guys are thinking about that, that sort of mismatch of
17 sort of goals and the resources to accomplish those
18 goals.

19 MS. MARABIAN: Thank you.

20 MS. CLEMENTSON: Linda, your thought on that?

21 MS. MARABIAN: Yeah; absolutely.

22 We work very closely with SANDAG and SANDAG is
23 helping us through this plan to achieve those goals. I
24 also wanted to expand on what many people are saying
25 here. It is a balancing act, and what we need to do is

5

♀

1 we're all going to have to help out and I'll tell you
2 what I mean.

3 City of San Diego, we have an alternative work
4 week schedule, so we offer that to employees. They work
5 nine-hour days and then get a Friday off or a Monday off,
6 and typically it's a Friday.

7 The City of San Diego also offers significant,
8 significantly discounts of Transit passes, 90 percent and
9 so, there's incentives and the disincentives are stuck in
10 traffic. I mean, that's somebody who said there's not an
11 incentive and I think there is, and I think you either
12 get a significant discount in Transit or you sit in
13 traffic. Those are your two choices, or now they're also
14 alternatives.

15 So the City of San Diego is working closely
16 with SANDAG, you see these big projects that are coming
17 along. I talked a little bit about the bike projects,
18 that's going to help. I think in this plan is the first
19 10 years, you're going to do all the early action
20 projects, am I right? Yeah; the first 10 years, that's
21 not a long time. Ten years is very, very close.

22 I mean, I tell you I'm older than -- 10 years
23 go goes by like that and so, the combination of what's in
24 this plan, businesses can do this too. The alternative
25 work week, businesses can give their employees discounts

6

♀

1 on Transit, so we all have to do it together; don't just
2 always look at Government, but we look at each other to
3 see what we can all do because it's not one thing. I

4 guarantee it. It's not only Transit, the busses and it's
5 not only bikes and it's not only culture. It's all of
6 it; sorry.

7 MS. CLEMENTSON: Okay.

8 So I think what I'd like to do, is just are
9 there any final comments from the Panel? Because I think
10 it's -- we're going to wrap up and we can go into more
11 detail. They're definitely were some questions about
12 funding and we have information about that, so if you're
13 interested in sort of how the phasing works, there's a
14 pie chart back there and Elisa is available to talk about
15 that.

16 But any final comments from the Panel?

17 (No verbal response from audience.)

18 Let's really thank the Panel for coming out and
19 we really appreciate it.

20 One of the things we really try to do, is bring
21 folks out who have ideas about how the plan could be
22 better and who are critical or have ideas of how it can
23 improve.

24 And I just, without putting you on the spot,
25 I'm just wondering if our Board Chair wanted to make a

7

♀

1 any final comments.

2 This is your first workshop, how did it go?

3 And then he's going to fire me.

4 MR. DALE: I thank you very much for everything
Page 7

5 that you've done. I thank the Panelists. Mike, I think
6 you've been to every one of them so far, thank you for
7 doing that. I thank everyone in the audience for
8 participating. If you'll take the time to visit with
9 some of the best people in Government who work for
10 SANDAG, they'll answer your questions. If they don't
11 have answers to your questions, they'll get them for you.

12 We have been working on this for a long, long
13 time. We were here and parts of a year ago to see what
14 your concerns were. We're trying to address them. We
15 have not given anybody everything that they want in this
16 plan. There's some that think we should do nothing but
17 mass Transit, you go to my City, and they think we should
18 do nothing but highways, but we're trying to take care of
19 what we think we're here hearing from you, but we're also
20 trying to take of what we think is going to be happening
21 in the future.

22 So often we have to make other irreversible
23 decisions with inadequate information.

24 Who can absolutely tell me what's going to be
25 going on around here in 20 years from now? That's what

8

♀

1 we're trying to figure out, and it's also part of the joy
2 of this job.

3 But we so very much thank you for participating
4 in this process.

5 Colleen, great job.
Page 8

6 MS. CLEMENTSON: All right.

7 We're done with this part, so stand up, stretch
8 your legs, or if you want to sit and talk with your
9 neighbor for a while that's fine; grab something to
10 drink; thanks again.

11 Okay, Gloria is here. Gloria is one of the
12 fastest typers I've ever met, so if you have an official
13 comment, make sure you can get to Gloria.

A-P-P-E-A-R-A-N-C-E-S

- Colleen Clementson - SANDAG Facilitator
- Phil Trom - Senior Regional Planner
- Elisa Arias - Principal Regional Planner
- Mike Strong - City of Encinitas
- Carl Morgan - NCEDC
- Regg Antle - Buena Vista Lagoon Foundation

1 SANDAG PUBLIC WORKSHOP, WEDNESDAY, MAY 20, 2015
2 OCEANSIDE CITY HALL COMMUNITY ROOM
3 300 NORTH COAST HIGHWAY, OCEANSIDE, CALIFORNIA 92054
4 6:30 p.m. - 8:30 p.m.

5 * * *

6
7 MS. CLEMENTSON: All right. Thanks, Phil.
8 I'm going to invite our Panel up now, and while
9 they're walking up I'll tell you who they are, but I'm
10 going to ask them to each introduce themselves and
11 incorporate into their introduction why they care about
12 this plan or why the agency organization that they work
13 for care about this plan.

14 So we have Mike Strong who is a Planner with
15 the "City of Encinitas."

16 We have Carl Morgan who's with the "San Diego
17 North County Economic Development Council."

18 And we have Regg Antle who is with the "Buena
19 Vista Lagoon Foundation."

20 So one of the things we did in trying to
21 assemble the panel is think about the different
22 perspectives relating to the goal area. So innovative
23 mobility, vibrant economy and then healthy communities.
24 And so when you think about the perspectives that these
25 folks come from, they definitely integrate sort of all of

1 these goals.

2 So with that, we'll just kind of go in order,
3 and we'll start with you, Mike.

4 So tell us, you know, what you do with the City
5 of Encinitas and why a city would care about a plan like
6 this.

7 MR. STRONG: Good. Thank you; yes.

8 Mike Strong, City of Encinitas. I'm in the
9 Planning Department, and I think I saw two hands here
10 from the City of Encinitas, and there's likely a few more
11 sprinkled in the back. So it's good to see your
12 participation and including in this event.

13 But as the function of planning, really it
14 comes down to determining public interest, right? What
15 is the public good in it, and I'm not the one that makes
16 that determination. It's our elected body, our City
17 Council members, and this is true obviously with every
18 jurisdiction.

19 But my job as a Planner is to help inform to
20 make more prudent, wise decisions about making those
21 transportation or land-use decisions. So in terms of my
22 role, it's really done as a supportive function to
23 support the people that you elect to these positions to
24 represent your interest.

25 So I am also sitting as Chair of the Public

2 responses later tonight wearing two hats, but the Public
3 Health Stakeholders Group was formed initially by SANDAG
4 through grant funding, actually, through its Center for
5 Disease Control and Human Health Services agencies, to
6 work on the community transformation grant.

7 And most recently, SANDAG Board of Directors
8 made a commitment to see this group through that in this
9 process. So when there's several different topic
10 areas -- vibrant economy, healthy communities -- SANDAG
11 has done a really good job at including public health
12 interest, and I'll give a little more detail about what
13 that is in several responses later.

14 But that is pretty much my perspective today.

15 MS. CLEMENTSON: So why does the City of
16 Encinitas, or why should any city care about a plan like
17 this?

18 MR. STRONG: For the North County Coastal
19 region, as you may or may not know, there was an
20 extensive effort to engage the community in a public
21 works plan, North Coast Corridor Public Works Plan, which
22 is a freeway expansion project. I was the Planner
23 working on it and reviewing the document and presenting
24 it through a staggered series of meetings with our local
25 officials. But these are significant transportation and

♀

1 infrastructure improvements that will ultimately help
2 redefine to build the environment in the community. Not
Page 5

3 only is it transforming how people get around in the
4 community by different mode choices, but it is greatly
5 changing how man uses interact if there's a symbiotic
6 relationship between how people build around roadway
7 infrastructures or freeways or Transit stops.

8 So it is very important for cities to be
9 involved in implementation of these projects, because
10 freeways come with sound walls, they come with ten-foot
11 high sound walls, obviously that's going to impact
12 people. So there is a natural connection between the
13 infrastructure itself where it meets the people in a way
14 that it's sensitive to the community context throughout,
15 so that goes with the infrastructure and interchanges.

16 There was a slide earlier that showed the
17 freeway expansion project, but it also showed all the
18 interchanges that were going to improve bike and
19 pedestrian access and for the people that do live on
20 coastal communities, east/west connections between the
21 freeway and the rail corridor are significantly
22 constrained.

23 And so, when there's opportunities to augment
24 or expand east/west connectivity, that's obviously a
25 greater benefit for the whole group.

♀

1 MS. CLEMENTSON: Okay, great; thank you.

2 So, Carl, tell us about your organization, and
3 the same question that I just asked Mike:

4 Why would your organization care about a plan
5 like this?

6 MR. MORGAN: Well, good evening everyone, and
7 thank you for the opportunity to be a part of the Panel
8 and be a part of this process.

9 Carl Morgan, CEO San Diego North Economic
10 Development Council. We're a 501(c)(6) nonprofit. And
11 essentially our focus is on the 56 North, so it's all of
12 North County. It's 26 cities and unincorporated
13 communities, 559,000 jobs and 1.2 million people and
14 growing. We have eight of the fastest growing cities in
15 the County of San Diego and our organization focuses on,
16 really, looking out for keeping our business community
17 thriving and so we focus on that by, essentially, doing
18 an annual report on all of our key industry clusters in
19 North County. We keep top of mind, the infrastructure
20 and making sure that that infrastructure is being
21 supportive of that to essentially move people about the
22 County and to see that those jobs continue to thrive.

23 We also focus on the need for additional
24 housing in the County, and that's a key economic link
25 in the chain, if you will, in terms of creating housing

♀

1 that is going to serve the increased population and, you
2 know, housing is where jobs sleep, and if you don't have
3 appropriate housing across all of the spectrums, then
4 you're really going to have a hard time attracting

5 talent.

6 And the reason this plan is important and why
7 I'm here is that, you know, we're very supportive of
8 making sure that these infrastructure projects are, you
9 know, funded and put in place. We also are, you know,
10 supportive and wanting to see additional housing in the
11 County and we see that there's key opportunities around
12 our Transit lines and we want to be a champion of those
13 so that those housing units are put in-and-around those,
14 rather than peppered all over the County.

15 And that's why I'm here.

16 MS. CLEMENTSON: Thank you.

17 So then moving on to Regg. Tell us a little
18 bit about yourself.

19 So again, same question, tell us who you are,
20 what you do and why your organization or you care about a
21 plan like this.

22 MR. ANTLE: Thank you.

23 My name is Regg Antle, and I'm president of
24 something called the "Buena Vista Lagoon Foundation,"
25 which is a 501(c)(3) nonprofit organization dedicated to

♀

1 preserving and restoring Buena Vista Lagoon, and in the
2 40 years or 30 years -- 34 years that I've been involved
3 in all this, I have watched the population of San Diego
4 grow.

5 In 1915 when they built Balboa Park, there were
Page 8

6 only 40,000 people in San Diego. That's amazing to me,
7 now there's 3.1 million. There's going to be another
8 million by 2050. These people have to live and work in
9 this area.

10 Our major concern as an environmental
11 foundation, as the preservation of the environment and
12 open space and for many years, the model was to build
13 10,000 square-foot lots with a single family house on it
14 and chew up the real estate in San Diego County, that has
15 to end somewhere.

16 And finally, SANDAG is doing something
17 about it. Their plan actually makes a lot of sense for
18 the environmentalists in the crowd. I know some of you
19 will be against this because it's building things and
20 there's freeways and all that, but this is done in a very
21 clever way. There's a lot of transportation that doesn't
22 involve the freeway. There's a lot of transportation
23 that involves people power. And the idea of building
24 where people sleep and live close to transportation
25 centers is very clever; you don't have to chew up the

♀

1 whole environment to do all this. There's actually going
2 to be more open space in the future than there is today.

3 I mean, it's -- the amount of open space is
4 going to be preserved in the future. It keeps going up,
5 or we see the mountain is going to be converted into
6 housing; you've got to put a million people somewhere. I

7 think this is a good plan. This provides the
8 transportation to get those extra million people to their
9 jobs and not necessarily riding alone in a car.

10 So there's a lot of good things for the
11 environmentalists in all of us in this plan. We hope
12 this trend continues and that's why I, as an
13 environmentalist for the last 30, 40 years support the
14 plan.

15 Thank you.

16 MS. CLEMENTSON: All right. So those are some
17 ideas about some of the things that you like about the
18 plan.

19 One of the things we do want to be able to talk
20 about, is how you think the plan could actually be better
21 as well, and maybe we'll just -- I don't know if you want
22 to go first, Mike, or Carl, just -- what do you think are
23 things in the plan that could really help improve the
24 economy or things that could be better, if we could
25 strengthen certain parts of the plan?

♀

1 MR. MORGAN: You know, I think the plan is -- I
2 think the plan is a good plan, you know, what I like
3 about it is it's a big picture. It's evaluated every
4 four years so it stays current. I, you know, I'd like to
5 see -- things don't happen fast enough. So for me, when
6 I'm parked on the 78 as I'm going about my business in
7 North County, frustrated at not being able to get from

8 Point A to Point B, I mean, I'd really love to see the 78
9 Corridor Freeway improved sooner than later.

10 And so I would say that, you know, it's all
11 about funding, and we certainly will be champions and
12 supportive of any effort that you have relative to, you
13 know, generate that funding. But that's really the only
14 thing that I see in it that really needs to be improved
15 is a matter of, you know, where's the money and how
16 quickly can those things get done because that's going to
17 impact our ability to grow our businesses in the
18 communities.

19 And, you know, we have a site selector and a
20 company coming up here, and we're trying to get them to
21 occupy a building and move here. The quality of life
22 isn't a problem. The schools, the environment, the
23 weather, all of that's great, you know, all of the things
24 that we do, you know, living, and working in a vacation
25 destination, but when you get caught on that freeway and

♀

1 they're talking about, you know, how are people going to
2 get to-and-from my company, you know, it's really
3 important to be able to identify how quickly that's going
4 to be remedied.

5 And when you tell them 30, 40 years, you know,
6 their eyes usually roll back in their heads.

7 MS. CLEMENTSON: All right.

8 And then sort of going back to some of your

9 comments, Mike, you talked about how it's difficult for
10 people, bikes and peds in Encinitas and probably a big
11 part of some of the North Coast cities to be able to get
12 through where we have the Transit line. So I don't know
13 if that's something you wanted to expand on as a -- you
14 know, an area of the plan that you think can be improved
15 or --

16 MR. STRONG: Sure.

17 I believe the plan shows nine-rail separated
18 facilities being proposed as part of the starter, or
19 maybe throughout the whole thing, so that is obviously a
20 significant improvement that would greatly address
21 connectivity, especially from east-to-west in coastal
22 communities like I was mentioning earlier.

23 But there's also significant improvements
24 proposed in this plan, and -- oh, probably the largest
25 shift for an MPO like SANDAG is shifting from, you know,

♀

1 the single occupant lane and improving more freeways to
2 the vantage point to the HOV, so when there's talk about
3 the freeway expansion, it is addressing high-occupancy
4 vehicle travel.

5 But in terms of some of the connections, some
6 of the connections that were being addressed in RTP,
7 especially across the freeway, there currently is not
8 any sidewalks or bike/ped facilities and if there are,
9 they are high-stressed areas where the cyclist or the

10 pedestrian is adjacent -- nearly adjacent to that
11 high-speeding motorist. So there are going to be some
12 enhanced opportunities to address community mobility in
13 that sense.

14 Beyond that, though, there are new light rail
15 lines being proposed to this project, which obviously
16 addresses Transit.

17 And probably one of the neater things I think
18 about this plan, is also addressing how people are
19 accessing, waiting in boarding areas. The safer access
20 Transit concept is relatively new for MPOs. There's not
21 too many agencies that have done that. Say, for example,
22 school obviously is something that's in motion. I think
23 there's like 75 million dollars allocated to that through
24 the duration of the next, you know, 30 years.

25 But the mobility hub concept, that's a really

♀

1 neat thing, and it will be interesting to see how that
2 plays out.

3 But some of the comments by the other
4 Panelists, they talked about how this is not just a
5 transportation plan, right? This is connecting land use,
6 and we are an aging population. We're going to be
7 doubling in the senior-age population, those older than
8 65, between now and 2035. So it's hard to take a
9 perspective of where we're at now and try to figure out
10 where we will be tomorrow or in the future, and the

11 reality is that not a lot of seniors can drive, so
12 they're going to need to rely on other services.

13 And so when we look at the plan, I think we're
14 all guilty of looking at our immediate City, what is
15 exactly going on near us. You have to have the concept
16 of this being a regional -- or this is being produced for
17 a regional matter. There's three million people that
18 it's serving.

19 So, I don't -- I don't know if I --

20 MS. CLEMENTSON: No; that's great. I'm also
21 thinking.

22 Is there anything from your perspective, right,
23 that you think could be improved? Because you're all
24 being really positive and really nice, and it's okay to
25 get some other ideas out there.

♀

1 But I don't know if there's anything you want
2 to add, Regg, and then we'll start -- I'm imagining that
3 some of you have some questions that you might want to
4 ask the Panelists.

5 MR. STRONG: Oh, I'll finish, I guess, on that
6 thought.

7 MS. CLEMENTSON: Okay.

8 MR. STRONG: So 200-billion dollars, that's
9 like silly money, right? Like, I could buy everyone in
10 this house a five-million dollar house -- or everyone in
11 this room, a five-million dollar house and dinners for

12 the rest of the year and I'd still have two-billion
13 dollars. I mean, it's just unreal. So it's a very
14 important plan to get right.

15 And so, in terms of the things that I see that
16 are potential issues, transportation, you need a
17 management. There's a lot of money being funded into
18 that, but I don't know if there's enough accountability
19 of what exactly that is, so that's something that I saw
20 when I was reviewing this document. But, you know, we
21 all have different perspectives.

22 Like I said, there's three-million people that
23 this is serving, and so it's really hard to come up with
24 a common goal or a common vision for it, and I do think
25 that this has been a valiant effort in achieving that,

♀

1 but it's not going to get everything right and it's not
2 going to benefit everyone equally; when you talk about
3 money, there's always going to be winners-and-losers.
4 Naturally, you're going to wonder when the improvements
5 are going to be made and how is it going to benefit me
6 first.

7 But yeah, it's just tons of money and probably
8 the transportation management is one of the things that I
9 flag as something that probably need more
10 accountability.

11 MS. CLEMENTSON: Regg, what would you like to
12 add to that?

13 MR. ANTLE: Briefly.

14 I was so happy when this plan came out to see
15 how it treated the open space and environment, but I
16 don't have a lot to add.

17 I do have a lot of people that wonder how
18 you're going to get young people to live in multi-family
19 housing close to transportation modes. If you look
20 around this room, you see mostly middle-age to older
21 people that probably own a single family home.

22 But the millennials, the younger people,
23 they're going to be the biggest generation pretty quick,
24 if they aren't already. They don't necessarily want a
25 single family home out in the suburbs. They're perfectly

♀

1 happy living in multi-family housing close to
2 transportation modes, walking to work, living in a loft
3 and doing all kinds of things like that. I don't think
4 it's going to be as difficult as a lot of people
5 envision. Not everybody's going to want to live in a
6 single family home in the future, which is good for the
7 environment. It's good for open space and it's good for
8 organizations like mine.

9 MS. CLEMENTSON: Okay.

10 So I think maybe I'm going to see if there's a
11 question or two from the audience, but maybe it's
12 something we come back to, Mike, as, you know, somebody
13 who works for the City or a city and really encouraging

14 this higher density development close to Transit. We all
15 know there will be some challenges with that, and maybe
16 that's a good question for you to think about too, Carl,
17 how are we really going to make that happen? It's one
18 thing to have it in the plan, it's another thing to
19 actually make that happen.

20 Okay. I'm trying -- I can go to you. I kind
21 of know what you're going to say.

22 MR. ANTLE: Well, I'm consistent, right?

23 PUBLIC SPEAKER: All right.

24 For each of the Panelists, I would like you to
25 describe your idea of a climate stabilizing set of

♀

1 targets because SANDAG was found to be in violation of
2 the law in the last Regional Transportation Plan and I'm
3 sure they'll be found to be in violation of the law this
4 time because they don't talk about a climate stabilizing
5 target.

6 Now, they talked about those two DMT targets,
7 2020-and-2035, that came from SANDAG to car, from car
8 back to SANDAG, and there was no explanation as to
9 whether or not that would stabilize our climate and, in
10 fact, they're not close.

11 So I'd like you to -- and my target happens to
12 be 80 percent below 1990 levels by 2030, but I can
13 explain why I came to that conclusion.

14 What -- you are leaders, and you are
Page 17

15 representing our chance to give this planet to our
16 children and not suffer destabilization, which would be
17 the end of most life on the planet, so it's important.

18 And so, I know you thought about that. I know
19 you're worried that SANDAG was found to be in violation
20 of CEQUA law. I know you all believe in obeying laws, so
21 I'm surprised you didn't talk about that.

22 So anyway, those are my questions; thank you.

23 MS. CLEMENTSON: Okay; your question was a
24 little different this time, so thanks.

25 I don't know if any of the Panelists want to

SANDAG WORKSHOP - SAN DIEGO FORWARD

18

♀

1 comment on that. I mean, I must say that we didn't bring
2 together folks who are necessarily experts in calculating
3 Greenhouse Gas Emissions reductions; some of the things
4 that you mentioned are pretty technical to most folks. I
5 don't know if there's anybody -- if you want to respond
6 to that or we --

7 PUBLIC SPEAKER: If we're going to stabilize
8 the planet where we are, we have to know how to do these
9 things.

10 MR. MORGAN: Well, I think -- first of all, I'm
11 not a climatologist. I'm an expert in analyzing
12 Greenhouse Gases and looking at where we were and where
13 we're headed, what that's going to be do in terms of
14 impacting our overall environment and our planet.

15 PUBLIC SPEAKER: If You're headed over to

16 planet (unintelligible.)

17 MR. MORGAN: Understood.

18 However, from an economic development
19 standpoint, which is the box that I'm in and my focus,
20 you know, it's really all about creating really quality
21 neighborhoods where people want to live and raise their
22 families and live their lives.

23 PUBLIC SPEAKER: (Unintelligible.)

24 MR. MORGAN: Well, I can't -- I can't answer.

25 I already told you I can't answer your question

♀

1 because I don't have the expertise.

2 PUBLIC SPEAKER: Ask me another question; get
3 another question.

4 MR. MORGAN: But, you know, from the standpoint
5 of doing a quality development where people are going to
6 want to live and raise a family, that's important.

7 And the rest of that, I'll leave to the other
8 experts that study that kind of thing.

9 MS. CLEMENTSON: There's a question over here.
10 (indicating)

11 PUBLIC SPEAKER: I think this is probably for
12 Regg. It seemed like 3500 acres in a County the size of
13 San Diego, is a little bit small as far as funding open
14 space and I know the '99 plan compared to today's plan,
15 is a humongous difference in a positive way for open
16 space planning and open space development.

17 And I'm wondering if there's enough resources
18 put in this plan for open space conservation.

19 MS. CLEMENTSON: Okay.

20 So I think you're referring to what you saw
21 in the PowerPoint presentation, that a little over 3,000
22 acres have been purchased and preserved and then, the
23 plan indicates a large number of acreage would be
24 preserved, just based on the local plans.

25 So you're wondering, are there enough resources

SANDAG WORKSHOP - SAN DIEGO FORWARD 20

♀

1 in the plan in order to preserve that big part of the pie
2 chart that we saw.

3 I don't know if you want to respond to that,
4 Regg.

5 MR. ANTLE: I'm not sure I can give you a
6 complete answer to that; 3500 acres is what SANDAG
7 participated in. The Coastal Conservancy, various
8 Government agencies, the various environmental agencies
9 have for years been acquiring, and with the help of
10 others, other acreages that don't have anything to do
11 with what SANDAG's been involved in. SANDAG buys acreage
12 because they have to to mitigate their projects when they
13 cross land or destroy wetlands or something like that;
14 that's the law.

15 But that's not all that's being preserved in
16 the County. Trust me on that, and I can't give you exact
17 figures, so I'm sorry. But I do know that, for example,

18 we helped Buena Vista Audubon Society pick up the
19 McCutchin property on the edge of Buena Vista Lagoon, and
20 that was all done with private funding and things like
21 that.

22 So there's a lot of effort going on in small
23 organizations like ours, all the way up to the County and
24 State Governments, and even the dependents are involved
25 in all this.

♀

1 So I think there's a lot more going on than
2 just SANDAG.

3 MR. STRONG: So the TransNet sales tax that was
4 approved quite a while ago, I think allocated 800-million
5 dollars for the MT program, which, to answer your
6 question, is not enough; that land acquisition process
7 requires a willing seller and sometimes they want money,
8 right?

9 As a good, recent example of our support of the
10 direct access ramp, which is a part of the freeway
11 expansion project that you're familiar with, it's an
12 important upland potential habitat and it obviously has a
13 very scenic resource value to the community property, and
14 rightfully so, but to spread that across between all the
15 land that is slated for acquisition, it probably isn't
16 feasible.

17 But the important thing about this strategy, is
18 that it develops a process and a vision to achieve it and

19 eventually the money will eventually get there.

20 MS. CLEMENTSON: Other questions?

21 PUBLIC SPEAKER: Yeah.

22 I've noticed that Carl made a comment in
23 describing how he's interested in having most of better
24 living conditions, better living quality of life and so
25 forth, and yet when he talked about bringing businesses

♀

1 in, the first thing he wants to do is blow the hell out
2 of the 78, instead of looking for alternative ways of
3 getting to work or how you travel in your own life,
4 instead of looking for alternative methods and building
5 alternatives to riding on the 78 and being stuck in
6 traffic, the first thing that comes to your mind is to
7 just blow it out again. Now we've blown it out three
8 times so far in the last few years, and that usually
9 lasts from three-to-six months and then it's choked up
10 worse than ever.

11 So we know that's not really ever going to
12 work, so what we need to do is actually focus on the
13 alternative ways to transport people before we start
14 putting more money into freeways because that eliminates
15 the money. We need to build the alternative systems
16 because you're throwing it into the freeway, which just
17 creates more-and-more-and-more congestion; that's been
18 proven over the last few years.

19 So my question is:

20 When are you going to like, get it and start
21 personally looking for alternative ways to get around and
22 not just jumping in your car and getting on the freeway?

23 MS. CLEMENTSON: So I think there's a comment
24 wrapped into that as well, which is great.

25 Responses from the Panel on the -- on that

†

1 question?

2 MR. MORGAN: I focus on the 78 for the purposes
3 of the conversation that I was having, in that, it is a
4 daily problem. But when I look at transportation and
5 multimodal transportation, I'm looking at the 30-and-
6 40,000-foot level down in North County.

7 And certainly, there's a lot of different
8 things that are being done by SANDAG and others, and the
9 nine cities and the 20 -- the 17 unincorporated
10 communities --

11 PUBLIC SPEAKER: (Unintelligible.)

12 MR. MORGAN: Well, I completely get that piece
13 of it.

14 But from the standpoint of the 78 freeway being
15 an issue, you know, it's a community choice as to whether
16 the freeway is going to get fixed or whether people are
17 going to get out of their cars and into other kinds of
18 transportation modes, that I don't control.

19 PUBLIC SPEAKER: Well, I agree. Here's the
20 problem:

21 Your way of getting around and being a leader
22 and using other --

23 MR. MORGAN: Well, trust me, I find ways not to
24 get on the 78 freeway. I found my way around North
25 County without getting on the 78.

♀

1 PUBLIC SPEAKER: So obviously from your
2 perspective, we don't need to fix it, right? We don't
3 need to fix it. We don't need to build it out any bigger
4 because you found a way around it.

5 So why are we building bigger freeways?

6 MR. MORGAN: Fortunately I'm not a dictator, so
7 that's really more of the overall community's choice.

8 MS. CLEMENTSON: Okay.

9 So I think, you know, that's -- oh, there's a
10 question back here. (indicating)

11 PUBLIC SPEAKER: Yeah.

12 MS. CLEMENTSON: Okay.

13 PUBLIC SPEAKER: One moment.

14 (Brief pause.)

15 My family's been in this County about 100
16 years, since the time of the Great White Fleet. So we've
17 seen a lot of changes.

18 And I'm surprised on the Panel tonight or
19 people that are here that I see, that there is no
20 representative of North County Transit District, and
21 they're an 800-pound Gorilla in the room, and at the same

22 time they're also, in a lot of respects, a big
23 obstruction in a lot of different aspects.

24 My personal point that I'd like to make, is
25 that the rail trail, I believe, is dead on arrival. It's

♀

1 a failure. If you look at the way the rail trail is
2 designed and the maps that I've seen, it's piecemeal. It
3 will never, ever be a safe way to travel from Oceanside
4 to San Diego.

5 And everybody that I've talked to in the
6 various cities, staff members, different people, they all
7 say, "Well, whenever we try to talk to North County
8 Transit, they just say no," and these people take their
9 -- they just walk away with their tails between their
10 legs and nobody is really willing to fight North County
11 Transit, the rail, and say something to the effect of,
12 "Look, we're going to get together and we're going to
13 have eminent domain. We're going to seize X-amount of it
14 and we're going to create a real true safe rail trail;"
15 otherwise, everything that's being created is just
16 piecemeal and it's just -- it's nice but it's not really
17 what was promised 30-something years ago.

18 And when I look at the amount of money that
19 goes into the infrastructure, you know, we're talking 200
20 billion, but if you were to look at probably the overall
21 value of the infrastructure, the right-of-ways,
22 everything else, we're talking probably two or three

23 trillion dollars and the amount that's being put into the
24 rail trail and into really quality, Class 1 bikeways is
25 pathetic.

†

1 MS. CLEMENTSON: Okay.

2 So your comment -- when you're talking about
3 the rail trail, you're talking about the Coastal Rail
4 Trail, the bikeway along the coast. I don't know if any
5 of the Panelists want to respond to that.

6 I will say, that NCTD has been to some of our
7 meetings, and they're not here tonight but we do work
8 closely with them.

9 So we'll make sure that we forward your
10 comments.

11 But thoughts?

12 MR. STRONG: So in a lot of ways, I would agree
13 with that comment.

14 It's been an extremely hard time working with
15 NCTD for the improvement of not only those facilities but
16 also addressing quiet zones and so forth, and I see a lot
17 of heads shaking, so you know what I'm talking about.

18 But that's the nature of the beast, right?
19 You're working and consulting with other agencies in this
20 process and it's a top-down plan, and when it gets to the
21 local levels, there's just not the authority or weight to
22 push these projects through easily.

23 Tonight, coincidentally, the City of Encinitas,
Page 26

24 we are presenting the options of having the coastal rail
25 trail and right-of-way as planned and envisioned years

♀

1 ago or having it on Coast Highway 101, and Scott's
2 recommendation is to do what was intended in the corridor
3 area, even though the costs have increased since it's
4 originally been envisioned.

5 But you're right. It's a difficult process,
6 and I do know that NCTD has been a better coordinator of
7 having these conversations lately, so I'm trusting the
8 process that things will continue to move forward and be
9 positive to reach an outcome that the community will be
10 happy with.

11 But it's not at the local level, each city
12 needs to work with NCTD.

13 And it's been a very difficult, challenging
14 process; so I agree with your comment 100 percent.

15 MS. CLEMENTSON: I'm going to just follow up a
16 little bit on that; this is great. We're getting some
17 more questions, and then I'll come over to you.

18 The regional plan does advance quite a bit of
19 funding for regional bikeway projects, and the piece that
20 you're talking about in Encinitas is one of those. It's
21 been advanced for funding and hopefully through that
22 process, that could start to be more of a catalyst to
23 really put together the project the way it was
24 envisioned.

25

MR. STRONG: Yeah.

SANDAG WORKSHOP - SAN DIEGO FORWARD

28

♀

1 And a good distinction is, this is essentially
2 a program document for budgetary priorities, right?

3 And so, there's four coastal rail trail
4 segments in the City of Encinitas and this is funding
5 three of them and ultimately when it'll be completed,
6 that there will be connections. There's going to be a
7 suspended bridge that will be connecting South Encinitas
8 to Solana Beach. So there will be some connectivity,
9 ultimately, but this is a funding document and it is
10 funding three of those four segments.

11 So between now and the next several years,
12 hopefully there's some sort of resolution to that and
13 NCTD is at the table with us.

14 MS. CLEMENTSON: Thank you.

15 PUBLIC SPEAKER: Good evening; thanks for being
16 here.

17 I went through the 140-page vision plan and
18 it's obviously very one-sided. The comments that you
19 have from around the County, I didn't see one negative
20 comment, and I'm just wondering where those go; probably
21 more than not, to you guys on the panel.

22 That would be my comment, is if I am not in
23 favor of this program, where does my comment go?

24 No. 2, if my family wants to live in the
25 suburbs and drive my car, and I like being on the freeway

♀

1 but not running around, this doesn't address my quality
2 of life because that's how I want to live.

3 So I'm just pointing out, there's no room for
4 any other opinion in this. I've been to many SANDAG
5 meetings and they're not welcome.

6 So that's my comment.

7 MS. CLEMENTSON: So is that -- do you have a
8 question in that, or you're just --

9 PUBLIC SPEAKER: It was more to you --

10 MS. CLEMENTSON: Yeah.

11 PUBLIC SPEAKER: -- where the negative comments
12 go. There wasn't one negative comment; not one comment
13 was negative.

14 MS. CLEMENTSON: You mean from the Panel?

15 PUBLIC SPEAKER: No, I mean from the report.

16 MS. CLEMENTSON: Oh, from the -- so online
17 comments?

18 So the online comments that have been posted so
19 far, we are posting the comments that we're receiving.
20 So if someone has made a comment and they're not seeing
21 it, that's -- have you posted comments or have you made
22 comments you haven't seen reflected?

23 PUBLIC SPEAKER: (Unintelligible)

24 MS. CLEMENTSON: You have?

25 PUBLIC SPEAKER: No. That's what I'm saying.

♀

1 I read the report. I read the public input.

2 MS. CLEMENTSON: Okay.

3 So you're talking about the public input that
4 was provided to help develop the plan and there were
5 pages-and-pages of that and --

6 PUBLIC SPEAKER: Yes.

7 MS. CLEMENTSON: -- Lots of input there was
8 about how to develop the plan, what the ideas were.

9 And your sense, is that it doesn't show
10 anything negative?

11 PUBLIC SPEAKER: Not one; not one.

12 MS. CLEMENTSON: Okay.

13 Well, that may be --

14 MR. STRONG: So that's typical with any
15 comprehensive planning effort when there's a visioning
16 effort in the very early stages, everyone has a grand
17 vision of how things should be, but it's when the draft
18 document is released and there's something to react to,
19 that's when you start getting the negative comments.

20 So there is a court reporter here tonight, so
21 if you want to record your opposition or support to
22 various elements of it. It sounds like that's what the
23 intended function was; correct.

24 MS. CLEMENTSON: Okay.

25 So there's a question here. Comment?

♀

1 PUBLIC SPEAKER: Our concerns have to do mostly
2 with the dual tracking proposed between Oceanside and Del
3 Mar.

4 And the plan's lack of dual, or excuse me,
5 grade separation along that path. A big portion of this
6 is going to have to do with a lack of funding, but we a
7 have question about it about their lack of grade
8 separation.

9 PUBLIC SPEAKER: Yeah.

10 And so I'm a long time San Diego resident,
11 North County resident, just moved to Cardiff about a year
12 ago but I've been going to Encinitas, Cardiff area for a
13 long time.

14 And there's already a big problem with -- at
15 grade interchanges throughout North County, not just in
16 Cardiff but especially bad right there at the
17 Chesterfield crossing. It's a huge mass of traffic and
18 frustration and lots of cars running the red lights and
19 homeless city pedestrians, which I've been close to being
20 hit myself several times now, because they run the red
21 light because they're waiting in a long line of traffic
22 because you have a short separation between the 101, the
23 Coast Highway and San Elijo Boulevard and the short
24 section, there are tracks going through it with a rail
25 crossing. If you put double tracking in there, you're

♀

1 going to make this system just much worse.

2 And I think there are issues with many other
3 crossings along the route and if you put dual tracks,
4 it's going to be a huge mess.

5 And I didn't see the right priority level for
6 grade separation in this document. It's way down at the
7 bottom of the priority list. There are three in Carlsbad
8 and I think only one in Encinitas and Leucadia.

9 Well Leucadia, yes, it's bad but what about
10 Chesterfield? What about other crossings over the whole
11 route? So I just don't understand.

12 Is there a vision for that?

13 Is there a funding for that? What is the plan
14 for that, and why does the plan show dual tracking,
15 starting first before grade separation? That doesn't
16 make any sense to me. Why would you do that?

17 We need to do the grade separation first, so
18 when you put the dual tracks in there and start running
19 all that traffic through there, you have a safe
20 environment.

21 Right now to me, this plan for the heavy rail
22 on the coast is not a safe plan.

23 MS. CLEMENTSON: So those are really good
24 comments and we definitely want to make sure that those
25 get reported.

♀

1 I think that kind of what you're talking about,
2 is a project and phasing of projects, maybe I could ask
3 our SANDAG staff, Dave Schumacher, who does a lot of our
4 Transit rail maybe can help address that. I do think
5 what you're raising in terms of what's the priority of
6 grade separations compared to other things in the plan,
7 that's the kind of feedback we're looking for here and
8 so, that's --

9 PUBLIC SPEAKER: I mean, part of the question
10 is where's the funding? I've had conversations with the
11 Encinitas County Council, they don't have money to do
12 this. They don't have money to do grade separations, so
13 where is that going to come from?

14 MS. CLEMENTSON: So those are good points.
15 Do you want to respond, just provide comments?

16 MR. SCHUMACHER: Yes, just real quickly.
17 I don't know the specifics of the Coaster
18 corridor. I can't remember which street.

19 PUBLIC SPEAKER: This street is at the very
20 south end of --

21 MR. SCHUMACHER: Yeah, I know, but I mean in
22 the plan. We have a number of grade separations.

23 What we've heard from the communities, we work
24 closely with the cities and the Sprinter corridor, bus
25 route corridor to identify high priority projects for

1 grade separation.

2 Yes, it's a challenge, money is a challenge
3 for everything we do, but we work closely with local
4 jurisdictions, NCTD, Amtrak and as part of the double
5 tracking, try to include grade separations in the overall
6 plan for the corridor.

7 So I can, you know, get you some more
8 information on the specifics, which I can't recall off
9 the top of my head, but I know they are in the plan.
10 They are fairly very high priority.

11 MS. CLEMENTSON: But I think the specific needs
12 you're talking about, those are really important comments
13 on the plan.

14 And I think one of the things I really want to
15 make sure are clear about the plan, but by no means do we
16 say the plan is perfect today. This is our first cut at
17 the plan, based on comments that were received so far
18 through public input and that's why we're here tonight,
19 so if you think more --

20 PUBLIC SPEAKER: Where is all this money coming
21 from? Two hundred million dollars?

22 Is that money secured? Or is that --

23 MS. CLEMENTSON: Well, so okay, so maybe we can
24 spend a little bit on funding. I think that's a good
25 point, when you talk about that dollar amount, that's

1 between now and the year 2050, so it's really important
2 to know that not all that money is in the bank today.

3 In fact, very little of it is available today,
4 much more of it becomes available later and later and
5 later years, so when you look at the plan, we have a
6 whole -- all the projects that are proposed in the plan
7 are in this Appendix and they show how much they cost and
8 by what phase year they would be built and so, certain
9 projects are done by 2020, other projects are done by
10 2030, others by 2040 and others by 2050, so they're done
11 by decade and it really comes down to the amount of
12 funding that's available and the type of funding that is
13 available.

14 So there's only certain types of funding that
15 are available for rail grade separations and different
16 funding available for rail improvements and different
17 funding available for bikeway improvements.

18 So if the group would like, we could actually
19 kind of go through sort of how the money is invested, if
20 that would be helpful, we could do that

21 Elisa, do you want to help me do that? We can
22 pull this up to the front. (indicating)

23 (Ms. Arias complies.)

24 And I think we need to let -- let's see, you
25 got it.

1 (Brief pause.)

2 So this had been set up as sort of an
3 interactive game to do, but we can kind of -- we've been
4 asked this question in previous meetings and rather than
5 asking you to answer the questions, we actually go
6 through and sort of give the answers.

7 But I'll give you the microphone, Elisa, if you
8 want to go through this.

9 MS. ARIAS: Maybe a little bit backup first, in
10 terms of where this source of funding comes from.

11 We talk about the two hundred billion dollars
12 in the region, what we have is the Transnet sales tax
13 that is one of our main local funding source. The local
14 funding source is about 48 percent or about say half of
15 the plan and then we rely on State funding, about a third
16 and then Federal funding is less than 20 percent, so
17 those are kind of the three big pots of funding that we
18 expect in the region in 2050.

19 And as Coleen was saying, you know, this pie
20 this first orange slice represents about five years worth
21 of revenue which is from now through 2020 and then, you
22 can see revenues grow over time. This chart has shown
23 in the year how dollars are invested, so there's some
24 inflation built into those numbers.

25 Now, when you look at what the plan proposes in

♀

1 terms of where the funding will be invested, here you can
2 see this half of the pie represents Transnet investment.

3 The blue slice is the transit capital, so these
4 are the bus lines, the Trolley lines, the vehicles that
5 require to operate the service.

6 The gray is with local streets here.
7 (indicating)

8 And then, we need a lot of funding also to
9 operate the system and the funding to operate Transnet.
10 It's the hardest funding to really come by because we can
11 get some Federal dollars and some State dollars from the
12 capital side, but the funding of the operation of the
13 Transit system is mostly local dollars.

14 And when you are talking grade separations,
15 that's here in this gray area with the local streets and
16 roads. The local jurisdictions get some of the Transnet
17 funding for the local streets and roads and there's also
18 other funding sources that make up this portion of the
19 pie.

20 And then, the managed lanes, like the I-5,
21 I-15, 805 corridor are shown here in this red slice and
22 then, we also need some funding to -- this is for the
23 highways, like highway 67 or 76 and then we also need
24 some funding to maintain the highway system.

25 So that's roughly how, you know, the proposal

♀

1 for investments is; when we look -- if you can put maybe
2 here the active transportation, please. (indicating)

3 (Ms. Clementson complies.)

4 The projects that we're talking about, the
5 bicycle project, the pedestrian projects, safe route to
6 school, safe route to Transit, Smart Growth incentives,
7 those are here about three percent of the investments in
8 the plan. (indicating)

9 MR. STRONG: So if I could also just finish
10 some of the conversations about the Cardiff Community.

11 So there is a five million-dollar undercrossing
12 project proposed at Montgomery, and as part of the City's
13 review of the public works plan and the freeway expansion
14 project, we also looked at the concerns raised on
15 double-tracking, public safety and increased noise.

16 And we requested that the additional concession
17 for undercrossing also be provided at Chesterfield, which
18 would include partial trenching, and SANDAG did perform a
19 project summary report for that and it costs one hundred
20 and five million dollars.

21 PUBLIC SPEAKER: (Unintelligible) that whole
22 thing, 27 million today, so I don't understand that.

23 MR. STRONG: So well, I didn't put together the
24 report.

25 So when it gets down to the point of priorities

♀

1 and selecting when the other issue beyond just
2 expenditure by mode is by year, when is this happening?

3 And a lot of these are 2035 range.

4 PUBLIC SPEAKER: Yes; well, that's

5-20-15 Court Reporter Discussion_Oceanside
(unintelligible) or lanes, which is key committee --

MS. CLEMENTSON: Okay.

So these are --

PUBLIC SPEAKER: -- 20 years.

MS. CLEMENTSON: -- really good points and you definitely should make them, and we can definitely talk with you in more detail about the specifics, because I think you're raising some really good points and rail grade separation are really popular and we hear a lot from people who think those are really important, so thank you for those; okay.

You've been waiting for a long time and then I'm going to come over to you next. (indicating)

MR. STRONG: All right; thank you, Colleen.

PUBLIC SPEAKER: My question is directed to the SANDAG Board overall.

Where in the plan, what year, what decade are you going to put direct rail that goes right into the Airport, Lindbergh Field?

We're looking at massive amounts of transportation costs and savings to the population in

SANDAG WORKSHOP - SAN DIEGO FORWARD

40

♀

1 general, versus how many people transit through Lindbergh
2 Field.

3 What is it right now yearly? It's 20, 25
4 million? 30 million people? I know LAX is up to 50
5 million people per year. If rail went directly into

5-20-15 Court Reporter Discussion_Oceanside
6 Lindbergh Field, that would mean -- and not only the
7 railing going in there, but also having the Coastal
8 Service available expanded to cover early morning
9 flights. If I want to go on -- if I have to go to the
10 Airport and get on a 6:00 a.m. flight, I have to drive my
11 car, because I can't get an early Coaster that will get
12 me to my flight that leaves at 6:00 or 6:30 in the
13 morning.

14 And on the flip side, if I come back in on a
15 late night flight that gets me in at 10:00, 11:00 or
16 12:00, I have no transportation back to Oceanside and my
17 friends, my family, we're looking -- all of us -- we're
18 in our cars driving down and parking our cars and the
19 overall cost is expensive, whereas public transportation
20 should be tailored to direct the public into the high
21 transit and density areas and the Airport is one of
22 those major areas, so where is that in the plan? When
23 can we get it fixed?

24 And the sooner we get that fixed, I think the
25 better off the quality of life is going to be for

‡

1 everybody.

2 MS. CLEMENTSON: Okay.

3 So I think we hear that and there's some heads
4 nodding too, so Dave I know you've been working on that.

5 Where is the connection to Transit and Airport?
6 Where are we with that?

7 MR. SCHUMACHER: I'll come over to this side,
8 so everybody turn all the way around here. (indicating)
9 This is a question we get a lot and we're
10 working on it. There's two parts to your question. One,
11 frequency service and one of the key aspects of the
12 plan is not just building new things, but doing more of
13 what we already have so more Coaster, more Sprinter, more
14 bus service. Our plans are to work toward 10 minutes all
15 day, if not better on most of our lines so that solves
16 one of the problems.

17 The other point, how do we access the plan or
18 access the Airport? Long ago, the old Metropolitan
19 Development Board, the agency that built that first
20 Trolley Line to the Airport, it just didn't rank as high
21 priorities as others.

22 What we talked about doing now, is we've got
23 that rail corridor right on the east side, north side of
24 the Airport along I-5, you got the Coaster, you got
25 Trolley, you got buses, you got the Amtrak and it is

♀

1 better to connect that with the Airport terminals. Long
2 range, we have an intermodal center plan just south of
3 the Washington Street Trolley Station, if you know where
4 that is, right by that rental car facility that's being
5 built today, and what that is it will be a multimodal
6 station there where Amtrak, Coaster, Trolley could stop
7 and walk over an elevated walkway over to the Airport and

8 then there would be a free shuttle that would connect you
9 over to the terminals.

10 We're working on the first phase project to
11 connect on the existing Palm Street, Middletown Station
12 to that shuttle. It'll start in early 2016, so we're
13 improving the pedestrian environment it's about 400-foot
14 lot from the tallest station over there, so that should
15 be ready in operation by 2016.

16 So we're working on it, short-term and have
17 long-term management as well.

18 PUBLIC SPEAKER: And early morning and late
19 night service to get us all back?

20 MR. SCHUMACHER: That's the idea, yeah;
21 frequent frequency is a high priority in this plan and
22 it's something we probably don't emphasize enough. It's
23 one thing to build things, but if everything runs every
24 hour well, that's pretty useless, right? You got to
25 operate much higher frequencies and getting every 10

♀

1 minutes throughout the day really provides a lot more
2 convenient service.

3 PUBLIC SPEAKER: Thank you.

4 MS. CLEMENTSON: So anything just on, so sort
5 of the funding for that?

6 PUBLIC SPEAKER: Timewise?

7 MR. SCHUMACHER: The funding we're using right
8 now, the project we're building the first phase, is a

5-20-15 Court Reporter Discussion_Oceanside
9 pretty low cost project. I can't even remember the color
10 of the money, but it's pretty inexpensive. It's a
11 couple, not even -- I don't think it's two million
12 dollars to do it; longer term, the intermodal center is
13 probably one million dollar range to provide that
14 station.

15 But the idea is to try and make these short
16 improvements and then work towards the longer term in
17 case somebody becomes --

18 PUBLIC SPEAKER: You remind them that it's a
19 very short period of time, but it's going to use the
20 shuttle, the rental car facility.

21 MR. SCHUMACHER: Right.

22 So we work with the Airport Authority and
23 they're going to be running the shuttles from the rental
24 car facility and that long-term parking over to the
25 Airport. We parked at terminals. We worked out with

SANDAG WORKSHOP - SAN DIEGO FORWARD

44

♀

1 them that they'll allow Transit to use these shuttles for
2 free.

3 So if you hop on the Trolley or walk four
4 hundred feet, hop on the shuttle for free and take you to
5 all three terminals.

6 MS. CLEMENTSON: Okay; all right.

7 So I know you were waiting and then, we'll get
8 back to the other questions.

9 PUBLIC SPEAKER: Yeah; regarding grade

10 5-20-15 Court Reporter Discussion_Oceanside
separations.

11 I come from an area -- I went to high school in
12 college up in the San Francisco Bay area and they rarely
13 spearheaded grade separations with the park or the Bay
14 area Rapid Transit System, where there are no -- there
15 are no pact street on level crossings. All of it is
16 either above or below ground.

17 MS. CLEMENTSON: Yeah; that's true; that's
18 true.

19 Let's see. We'll go here because you're closer
20 and then, I'll be right back over there. (indicating)

21 PUBLIC SPEAKER: The budget is placed on
22 today's dollars?

23 MS. CLEMENTSON: Which budget?

24 PUBLIC SPEAKER: The budget for the whole
25 thing.

SANDAG WORKSHOP - SAN DIEGO FORWARD

45

♀

1 MS. CLEMENTSON: No.

2 So the way the budget works, is it's in the
3 year of expenditure.

4 So part of when you see this chart here
5 (indicating) and it shows the funding available, part of
6 the reason this is bigger, is also because it includes
7 the inflation in those later years so we call it, "year
8 of expenditure" that we do that; okay.

9 PUBLIC SPEAKER: I was at the meeting last week
10 and brought up this issue, but I'm bringing this up

5-20-15 Court Reporter Discussion_Oceanside
11 again, because there's new people here.

12 And so, while I'm very much in support of what
13 much of what I'm hearing, I already live in what's going
14 to be a high density area. The trains run right behind
15 my building so I hear them every day, every night, and my
16 concern is getting cars off the road is a great idea, and
17 it will help the environment.

18 But what about the high density areas and the
19 air quality and noise pollution in the future for me and
20 all of those other places?

21 MS. CLEMENTSON: Not to put you on the spot,
22 but we had an NCTD person on the panel at that particular
23 meeting.

24 And do you want to share with the group some of
25 the response that you've urged?

SANDAG WORKSHOP - SAN DIEGO FORWARD

46

♀

1 PUBLIC SPEAKER: They pretty much are telling
2 me -- they're not addressing that issue with me. We're
3 addressing other issues around that particular Transit
4 center, because there's development that's coming in the
5 future with the parking area and the bus station, so
6 those are the things that I'm speaking to them about.

7 MS. CLEMENTSON: So I think part of what I
8 heard in that -- and, Dave, if you want to help with this
9 in any way -- was that we recognize those are some of the
10 sort of the growing pains of this kind of Smart Growth
11 Transit oriented department that we really have to work

5-20-15 Court Reporter Discussion_Oceanside
12 on. I think those are just some of the challenges we
13 face.

14 And, Dave, I don't know if you want to add
15 anything to that?

16 PUBLIC SPEAKER: I just want to add, I guess,
17 my hope is that becomes as much a priority as all of the
18 other things, because if we can't breathe, you know,
19 everything else can be erased.

20 MS. CLEMENTSON: That's a good point. I think
21 I was referring more to the noise, not the air quality,
22 but that's -- yes; thank you for that part.

23 Did you want to add something?

24 MR. SCHUMACHER: Well, just make sure you
25 understand, whenever we do a new project or expand an

SANDAG WORKSHOP - SAN DIEGO FORWARD

47

♀

1 existing project, we always do an Environmental Impact
2 Report that's all potential impacts, noise, visual,
3 whatever it might be, so those kinds of issues you
4 address at the project level and we look for mitigations
5 to address any impact that we can to mitigate so we can
6 take that into account.

7 But verily when you build things, there are
8 going to be impacts, so we try to minimize as much as
9 possible.

10 MR. STRONG: There's a section in the RTP, I
11 think it's on "Page 86," it talks about the "Air Quality
12 Index," so that might be a good thing for you to look at

5-20-15 Court Reporter Discussion_Oceanside
13 and it states a number of years that a certain threshold,
14 a particular matter in the air was encountered in San
15 Diego.

16 But putting on my public health perspective now
17 or plans, when I looked at the California Health
18 interview survey, it's the largest Statewide survey
19 that's conducted. It's done through UCLA and some other
20 partners. I looked at data for North County Coastal,
21 because that's how it's tabulated, so it jumps -- or
22 aggregates the data by, you know, sub region -- but if
23 you separate those that are older than 65, the asthma
24 rate is like only eight percent.

25 Citywide, it's like 10-to-12 depending on what

♀

1 you're looking and then, the children are actually 15
2 percent; so things are getting worse or they have been.

3 One thing that I saw that was actually nice to
4 see, and I don't know if it's coincidental or whatever,
5 but in RTP it does show the air quality in terms of the
6 measurement has been getting better but, you know, we
7 need to see progress in that, you're absolutely right,
8 because that is a huge indicator to health and that
9 affects public life.

10 So absolutely, it's something that you should
11 make comments to and make sure it's reported.

12 MS. CLEMENTSON: Okay.

13 Well, I think we are -- oh, there's still a

5-20-15 Court Reporter Discussion_Oceanside
14 couple questions.

15 What I'd like to do, is just take a couple more
16 questions and then wrap up this part of the meeting
17 because we want to make sure for those of you who have
18 specific questions, we're able to talk with you about
19 those individually.

20 And so, where did I see -- okay.

21 PUBLIC SPEAKER: Can you give us some idea,
22 about how much of that two hundred billion dollars is
23 future year tax increases?

24 Because there's an increase in tax surge taxes,
25 but I couldn't pull out a plan how much it is.

SANDAG WORKSHOP - SAN DIEGO FORWARD

49

♀

1 MS. CLEMENTSON: Okay.

2 So just very quickly on that.

3 In the expenditure plan, there is an assumption
4 that there would be another quarter cent sales tax and in
5 the plan right now, all of that quarter cent is going
6 right here to this green area for Transit operations,
7 yeah. Okay. (indicating)

8 Is there another question over here? Okay,
9 Mike.

10 PUBLIC SPEAKER: Yeah.

11 I really liked the question that the woman
12 asked about air pollution close to rail terminals and/but
13 what I didn't hear anybody mention, is the fact that we
14 really need to electrify the Coaster Service and for

15 5-20-15 Court Reporter Discussion_Oceanside
several reasons.

16 One, is that these exhaust is Greenhouse Gas
17 diesel, No. 1.

18 No. 2, diesel exhaust is a known carcinogen.
19 It was a suspected carcinogen for decades in California,
20 carbon was patented, but they finally came around about
21 four years ago and it is classified as a known
22 carcinogen, so we're putting buses and we're putting
23 buses up here on these managed lanes relying heavily on
24 buses and we are giving ourselves cancer, which is very,
25 very expensive.

SANDAG WORKSHOP - SAN DIEGO FORWARD

50

‡

1 And so my question is, what is SANDAG doing to
2 reimburse those of us that pay health costs, you know, I
3 have a monthly payment for health cost and because
4 increases in cancer are very, very expensive and we can
5 do that math or we can ignore the math.

6 When somebody asks a question like that, we can
7 ignore the fact that diesel develops carcinogen, as if we
8 don't know it but of course, these people do know.
9 They're leaders and they understand it's a known
10 carcinogen.

11 But this is not going to be mentioned,
12 electrification that need or --

13 MS. CLEMENTSON: Okay.

14 Just to -- okay, so just to wrap up with that
15 point. I know that we're converting a lot of our system

5-20-15 Court Reporter Discussion_Oceanside
16 to other types of energy and maybe you just want to touch
17 on that and then we can wrap up.

18 MR. SCHUMACHER: I think the Coaster and
19 Sprinter, there is no plans to electrify so that'd be the
20 comment made.

21 Lastly however, we've been many years working
22 towards compressed natural gas on vehicles we've been
23 buying for the last probably 10, 15 years are compressed
24 natural gas vehicles, and as the old diesels are recycled
25 to the end of their life cycle, they end up to be 100

SANDAG WORKSHOP - SAN DIEGO FORWARD

51

♀

1 percent. I think we're up around 80 percent, CNG right
2 down, so whole bus fleet, which is the most of the
3 vehicles, transit vehicles out there today. The Trolley
4 is electrified, of course, and most of the transit fleet
5 is using alternative sources.

6 MR. STRONG: So I also spoke to someone with
7 NCTD recently, since they're not here, I'll provide
8 comment.

9 But an electrical bus that's rehabed that's
10 converted from diesel or CNG, it costs about six hundred
11 thousand dollars for a brand new one. It's like 1.4 or
12 something like that, so NCTD is a very small operator and
13 currently they cannot take that risk because they just
14 can't afford to, but there are some grants that are
15 available nationwide that some of the bigger timed
16 Transit operators are taking advantage of, you know, like

17 5-20-15 Court Reporter Discussion_Oceanside
San Francisco or Chicago.

18 So there is emerging technologies and it is
19 emerging discipline, hopefully over time we start to see
20 that.

21 MS. CLEMENTSON: Okay.

22 So I want to take this opportunity to thank our
23 Panelists. Thank you so much for joining us here
24 tonight.

25 Thank you all for coming and we do have several

SANDAG WORKSHOP - SAN DIEGO FORWARD

52

♀

1 SANDAG staff members available to help answer any
2 additional questions that you might have.

3 Please, please, please, if you have comments go
4 make sure that they're recorded with Gloria or write them
5 down on a comment card. We'd love to keep in touch, so
6 make sure that we have your email address so we can keep
7 you up-to-date on the progress of the plan; thank you.

8

9

* * *

10

11 PUBLIC SPEAKER: My name is Jeanette White. I
12 live in Oceanside.

13 I was disappointed that everyone on the panel
14 was pro, the whole plan. I expected that there would be
15 some Devil's advocate people, professionals, people
16 in the know who would be speaking on the side where there
17 would be maybe raising more objections that the community

Page 51

5-20-15 Court Reporter Discussion_Oceanside
18 could think about. Most of the comments that came from
19 the community were just average citizens. I thought
20 maybe there would be some other organizations that were
21 presenting some of the other -- at least the cons to this
22 plan/program.

23

24 PUBLIC SPEAKER: My name is Judi Potter.

25 So my concern is regarding clean air in the

SANDAG WORKSHOP - SAN DIEGO FORWARD

53

♀

1 high density areas. The high density housing areas. I
2 live right next to the Coaster and Amtrack and metro
3 lane lines. It runs right under my bedroom window and I
4 knew that when I moved in, so it's not a problem. I'm
5 concerned about, you know, the future because that
6 platform is going to be extended right under my bedroom
7 window. I'm worried about air quality going forward and
8 what's going to be done to mitigate any issues or try to
9 making that situation better in the future.

10 In addition to that, I guess the noise quality
11 is also a concern, but my biggest concern is air quality.
12 Obviously the trains make a lot noise; when my doors are
13 closed, it's not too bad. I sleep through it. My guests
14 sleep through it, but it's loud, so noise is the concern
15 but I'm more concerned about the quality of the air that
16 I breathe and everybody else.

17 And that's going to be an issue, you know, in
18 other high density areas and there are quite a number of

19 5-20-15 Court Reporter Discussion_Oceanside
them that are coming in the future.

20 So, make sense?

21

22 PUBLIC SPEAKER: It's Mike Bullock, that's my
23 last name, and it's really "Michael," is my, you know,
24 birth certificate M-i-c-h-a-e-l, Michael.

25 My first concern is that the plan cannot lead

SANDAG WORKSHOP - SAN DIEGO FORWARD

54

♀

1 to an Environmental Impact Report that is consistent with
2 California Environmental Quality of Act Law, CEQUA. It's
3 called "California Environmental Quality Act Law."

4 And I say that because it does not have clear
5 climate stabilizing targets and the reason that is true,
6 is that, Cequa California "Environmental Quality Act Law
7 requires that all negative environmental impacts be
8 considered.

9 So an important negative environmental impact,
10 is climate destabilization, and to obey CEQUA, there
11 needs to be a clear explanation of what climate
12 destabilization is, and it is when the positive feedbacks
13 take over in our climate system, such as melting
14 polarized caps, which reflect light now they're melted
15 not as large and so there's me black water which absorbs
16 heat, so that's a negative impace, -- I'm sorry, it's a
17 negative impact but it's a positive feedback in that the
18 worse it gets the worse it gets.

19 And the other example often stated is the

5-20-15 Court Reporter Discussion_Oceanside
20 freeing of methane gas from the permafrost which is
21 melted, that's methane is also a greenhouse gas.

22 So these positive feedbacks can drive the
23 climate to a very, very different climate than what we
24 have now and we'll have no ability to slow it down.
25 These effects will be larger than our greenhouse gas

♀

1 emissions from the combustion of positive fuel and
2 methane gas from agriculture, those kinds of things and
3 this destabilization will result in the loss of most life
4 forms on planet, including our own species and so, that's
5 what the literature on climate and climate
6 destabilization. It's also called "going over the
7 tipping point," tells us and so that must be avoided at
8 all cost.

9 And certainly, in an Environmental Impact
10 Report you have to describe what that is and describe
11 what the targets are that you have to hit to not be
12 contributing to that, you know, clearly San Diego County
13 can't all by itself stabilize or destabilize the climate,
14 but we cannot contribute to it by hitting those
15 greenhouse gas targets and those targets have to be
16 described and then those -- and then, the measures and
17 projects, transportation projects, various types of
18 measures that could be done here to achieve those targets
19 also have to be described because the decision makers
20 have to say, "That's something we definitely want to do

21 5-20-15 Court Reporter Discussion_Oceanside
and we can do and those measures will work."

22 Or, I guess, they could say, "That's too hard.
23 We will just let the climate destabilize knowing that at
24 some point, maybe our grandchildren or their children
25 will suffer a devastating collapsed of the human

SANDAG WORKSHOP - SAN DIEGO FORWARD

56

‡

1 population," that's a phrase from "Scientific American
2 2008" devastating collapsed of the human population, so
3 that's a description of climate destabilization.

4 So SANDAG has to explain that and they have to
5 have a plan/option, which will achieve those targets but
6 they have to get their own targets. They can't just use
7 the State mandates and they can't use SB375, which isn't
8 even about climate stabilization.

9 Governor's Executive order S-3-05 was about
10 climate stabilization in 2005, but things have gotten
11 worse and that's not obeying CEQUA to just start using as
12 S-3-05, the old '05 because it was in 2005, Governor
13 Schwarzenegger who signed that.

14 And in 2005, that was thought to be -- those
15 targets were thought to be climate stabilizing, those
16 three targets. If SANDAG still thinks they are, they
17 have to rationalize that and they have to come out and
18 say, "We're going to use those targets. I believe that
19 would be incorrect from a technical standpoint, and the
20 targets need to be more aggressive you might say, you
21 they have we have to have greater reduction sooner

5-20-15 Court Reporter Discussion_Oceanside
22 because what's happened between 2005 and 2015 is this 10-
23 year period that's gone by is not what was supposed to
24 happen in the world as describe by Governor Executive
25 order S-3-05.

♀

1 But that's the primary concern that I have and
2 I have had and I've expressed many times to the SANDAG
3 Board that they need to adopt targets to stabilize
4 climate and they have to show how they can achieve those
5 targets.

6 So now, that's at a top higher level. I want
7 to talk about the things that I have proposed to SANDAG
8 that they have ignored. One that's quite easy to
9 understand is the electrification of the Coaster service,
10 and that would not only help a reduction in greenhouse
11 gas emissions, it would also reduce diesel exhaust which
12 is a known carcinogen and they definitely need to do much
13 more in terms of explaining what is needed to protect
14 public health from air pollution, very similar to the
15 destabilization targets. I guess it's called,
16 "significant thresholds. They need to have clear
17 significant thresholds for air pollution and then
18 achieve those significant thresholds, you know, get
19 below those thresholds, so it's not significant so we're
20 not causing causing large apartments of cancer as an
21 example and other health problems.

22 So besides test trains, the other thing that I

5-20-15 Court Reporter Discussion_Oceanside
23 talk about quite a bit, because I have shown them a list
24 of measures that I believe would achieve climate
25 stabilizing targets. I have shown them what I believe

♀

1 are climate stabilizing targets and this is in peer-
2 review report that I wrote for the Air and Waste
3 Management Association, that is a prestigious organization
4 with engineers that peer-review these papers and they
5 invited me to present that paper at their last conference
6 last summer in Long Beach and they've invited me to go
7 this September to a conference in Chicago which is
8 focused only on climate, because they realize that my
9 report is valid and it's called, "The Development of
10 Light Duty Vehicle Requirements to Support Climate
11 Stabilization."

12 And then, the title has a colon because there's
13 two sets of requirements, there's two types of
14 requirements. One set is car efficiency and the other
15 set is per capita driving. Actually, it's one number per
16 capita driving, so there's a lot of requirements that
17 have to do with getting our fleet of cars more efficient
18 than emitting less greenhouse gas per mile driven, but
19 it's not enough. It also requires a reduction of per
20 capita driving.

21 And so, after I get per capita driving, I have
22 a list of measures which achieve that reduction in per
23 capita driving and one of them that's important about

5-20-15 Court Reporter Discussion_Oceanside
24 seven-and-a-half percent I predict out of that 32-and-a-
25 half percent is pretty important, is the widespread

♀

1 adoption of parking policies which would unbundle,
2 unbundle the cost of car parking, in effect, in effect it
3 would unbundle the car parking in effect and that system
4 could be described, or that system is where the parking
5 lot is operated as a business for the people for whom the
6 parking is built.

7 For example, for employees they have an off-
8 street parking lot or parking garage under ground
9 parking, whatever the parking is and that parking should
10 be operated as a business for the employees whereby, the
11 employees get the earnings from the parking lot. It's
12 their business. They get the earnings.

13 Now, the money comes about because like any
14 business, we charge to use the parking. The employees
15 could be their own customers or not; so two employees
16 that work the same number of hours in a day, one never
17 drives, the other always drives, they both get the exact
18 same earnings.

19 However, the employee that always drives will
20 see on their statement, their monthly statement a charge
21 so that's how the business would work and the employees
22 would be very happy if the parking lot is nearly full.
23 Even if it requires people that don't work for the
24 company to park there, because they will pay and that pay

25 5-20-15 Court Reporter Discussion_Oceanside
puts money in the pockets of the employees.

♀

1 So by this mechanism, this system not only does
2 it in effect unbundle the cost of the parking lot and
3 restore the full income that they should have gotten, it
4 also support full sharing of the parking, so ultimately,
5 when this system is in place for all types of parking,
6 anybody can park any place for any amount of times, and
7 it's all automated, like turning on a light bulb, you
8 park your car and you don't have to think about it at all
9 if you don't want to, there's nothing to do, there's no
10 parking meter.

11 However, you will get a bill because the system
12 knows whose car that is and knows when it came and when
13 it left and what the parking rate was; you can have such
14 thing, as instantaneous congestion pricing to ensure that
15 there's always available parking spots, that's important
16 to many cases like around, especially around train
17 station you definitely want to have vacant spots even
18 close to a platform. They would probably be very privacy
19 because you would have blocks of parking that you
20 instantaneously congestion price, so the price is always
21 changing but it's forcing vacancy.

22 So anyway, that's another paper and I have --
23 this paper is now hosted by the City of San Diego in
24 their Climate Action Plan work. They saw the value in
25 this paper that I wrote for the Air and Waste Management

♀

1 Association and so it's -- there's a link and it's hosted
 2 online by the City of San Diego and I have pointed that
 3 out to the SANDAG Board of Directors and but they have
 4 not elected to work towards that system or even
 5 acknowledge that that system has been formulated, even
 6 though, that system was described in Appellate Court in
 7 the Sierra Club lawsuit against the counties Climate
 8 Action Plan.

9 Specifically, one of the three Justices asked
 10 our lawyer, described a feasible mitigation that was
 11 ignored by the County and our lawyer described this
 12 system for employees and when she got done, when our
 13 lawyer got done with this description, the Justice said,
 14 "Yes, that sounds like feasible mitigation ..."

15 Therefore, SANDAG should not be ignoring
 16 feasible mitigation because that also violates CEQUA.

17 I think that's about it; thank you.

18 (whereupon the Public comments concluded.)

- Elisa arias - SANDAG Facilitator
- Carolina Gregor - Senior Regional Planner
- Frank Rivera - City of Chula Vista
- Armando Freire - SONENT
- David Flores - Casa Familiar

1 SANDAG PUBLIC WORKSHOP, THURSDAY, MAY 21, 2015
2 SAN YSIDRO CIVIC RECREATION CENTER - CASA FAMILIAR
3 212 WEST PARK AVENUE, SAN YSIDRO, CALIFORNIA 92173
4 6:30 p.m. - 8:30 p.m.

5 * * *

6
7 I want to thank everybody at Casa Familiar for
8 coming tonight. We have coffee after the break, so
9 please take advantage of this.

10 And now I want to ask the panelists if you
11 could introduce yourselves, give us your name, your
12 organization and who do you represent and if you could
13 tell us a little bit about what you think about the plan
14 and why the plan has any relevance to you.

15 MR. FLORES: Good afternoon; welcome.

16 My name is David Flores.

17 MR. FLORES: I am the Director of the
18 Development Community of Casa Familiar. I've been
19 working for this agency nonprofit for about 15 years now
20 and I am part of the Planning Committee in San Ysidro.

21 I have been part of this for the past 12 of the
22 15 years and I've been trying to make sure about the
23 plan, the Committee Plan has to do with this
24 transportation plan.

25 So it's an important plan for me, San Ysidro

1 and Casa Familiar, because I've been working for a
2 nonprofit that provides services, like many other
3 nonprofits that provide service and other collaborators
4 that work for SANDAG, like Chula Vista "Community
5 Collaborative." They provide service to the connections
6 and the people. We have the position of the people that
7 use the public transportation and this is very important
8 to us, that what are their needs. How do they need to
9 integrate in a regional plan, in a 35-year plan
10 investment that's coming to cities like San Diego, Chula
11 Vista, Imperial Beach, National City that our communities
12 and the organizations have this opportunity. This is
13 important.

14 Finally, Casa Familiar is involved in what has
15 to do with building environments. How do they connect
16 people from their homes? How do they get along with
17 their surroundings, transportation? How do they find a
18 job? How do they get to their job? So it's very
19 important because we work with the community.

20 So at the same time, we're asking people to be
21 part of this and to make sure that the needs, the most
22 important needs are expressed into the plan.

23 So thank you very much, and we hope to have a
24 connection with the rest of the community and this type
25 of workshop; thank you.

4

♀

1 MS. ARIAS: Thank you, David.
Page 4

2 Armando?

3 MR. FRIERE: Good afternoon; thank you for
4 being here tonight.

5 I am Armando Freire, the "President of SONIC
6 Transportation and also, I'm Director of California
7 Trucking Association and the Otay Mesa Chamber of
8 Commerce.

9 For the past 43 years I've been working with
10 the transportation and public transportation that has to
11 do with freight and ports. This is a very important area
12 for us; for us especially. My office is in National
13 City. We have another office and we have in sections as
14 Otay Mesa, Texas in California, Arizona. We work in this
15 area.

16 How do we change things in this area?
17 Twenty-five years ago we had about 200 trucks, right now
18 we have six thousand trucks a day, and when they open
19 Otay 2, it's going to be over 20 thousand trucks a day,
20 so transportation is a very important area for us in San
21 Diego and California, like it is for Mexico is important
22 as well. So Texas has a very, a very complicated -- so
23 does the Tijuana Airport and Long Beach. The Tijuana
24 Airport is L.A. just so you know when it couldn't go to
25 international travel that this is a connection that has

5

♀

1 most of the transportation that goes to Tijuana has to
2 come to San Diego so it goes to Imperial Valley and L.A.
Page 5

3 So Tijuana -- so the six thousand trucks have a huge
4 impact on Tijuana, many of them go north, so for us it is
5 very important to have an important transportation plan
6 that includes a plan for jobs, all of our needs, less
7 cars, more buses. It's a good idea. Obviously, we're
8 hoping for better roads because I'm a trucker, but we
9 have to change this. There has to be a balance.

10 One of the very important factors of this
11 workshop, is that SANDAG has been very open in including
12 everyone. I mean, there's been two years having meetings
13 and going to and this input of all of the Stakeholders
14 have been vital, not only by people and cars and we're
15 talking about buses and trains. This participation in
16 general, I think is really helpful, and I think it's a
17 very integral fact. The only thing, is that we need to
18 have a plan that includes everybody so it's Escondido to
19 Chula Vista, Encinitas all of us involved, so it's a very
20 complex plan that's going to help us all.

21 MS. ARIAS: Thank you, Armando.

22 Frank?

23 MR. RIVERA: Good afternoon.

24 I'm Francisco Rivera and I'm an Engineer. I'm
25 a Civil Engineer. I'm a designer for public

6

♀

1 transportation in Chula Vista.

2 When I started in Chula Vista, when I started
3 in 1984, more than 30 years the City was so little. It's
Page 6

4 was less than one hundred thousand people and today it
5 has more than two hundred thousand people, so I've seen
6 it grow, especially to the east of 805, and we need to
7 plan ahead for more people, another one hundred thousand,
8 maybe one hundred fifty thousand in the next few years.

9 What I like about the plan, is that it's going
10 to improve public transportation. It's going to help us
11 to keep environmental open areas, current areas and it's
12 going to improve the life of everybody in Chula Vista. I
13 would focus on -- before in my career, I've been
14 building, just building roads and now the City Council
15 has moved away from that and has been improving the
16 experience first for pedestrians, cyclists for business
17 industries and they want to get a slower growth. We need
18 to live together and we need to share our same space and
19 we need to slow down on the pace that we are growing and
20 we need to support that; thank you.

21 MS. ARIAS: Thank you very much.

22 You talked a little bit about the importance of
23 the plan for your organizations. We talked about the
24 positive things about the plan.

25 Do you see something that needs to be improved?

7

♀

1 Something that we need to omit? Something that needs to
2 get better?

3 MR. FLORES: Well, yes, of course, there's
4 always something to be improved. I think that for me,
Page 7

5 for a community like San Ysidro, we would like to see
6 more investment and faster because the way that you're
7 doing it, the way that you have to wait to take you to
8 get from San Ysidro to downtown to colleges to San Diego
9 State, it's insane; you can't really compete with the
10 car, with this transportation wait. You really can't
11 compete, so we need a more competitive way of getting you
12 transportation especially to a transit, the hub in
13 Escondido especially to access this, especially from San
14 Ysidro Port of Entry.

15 Of course, we would change the dynamic in the
16 future of how much is spent on the roads and how much is
17 spent on the public transportation, because in San Ysidro
18 it's a place where there is no space to get more roads,
19 there's just no space in San Ysidro, so we need to
20 improve the quality of the current roads. We don't need
21 to expand and we also need to find a way to develop this
22 mobility hub we were talking about at the beginning, so
23 they're connected to other services; many people come to
24 Casa Familiar and really it doesn't have a service that's
25 more efficient so that they could -- so from San Ysidro

8

♀

1 to other places, it is really complicated and we need to
2 make this more efficient and we also feel that we need to
3 add this balance.

4 What investments are going to be within the
5 urban areas, but also that we are at a Border. We have
Page 8

6 Mexico. We need to build the capacity to facilitate the
7 mobility going up north. This is some of the points that
8 we would like to be improved; thank you very much.

9 MS. ARIAS: Armando?

10 MR. FREIRE: I know that as a region we can't
11 solve everything, but the main problem here has to do
12 with bottlenecks, the kind of bottlenecks that we have
13 for the freight that's going right into the U.S. that has
14 to do with the roads. We need to expedite the process of
15 the buses, of cars. The main problem that we have right
16 now, and I'm just going to give you a small example like
17 905.

18 The Federal Government opened the U.S. Border
19 and it didn't connect them with the State interstates, so
20 Otay Mesa. Otay Mesa is using and will be crossing Otay
21 Mesa Road in the next 20 years. There have been so many
22 accidents, really deadly, only deadly accident was six,
23 seven. So there's been a seven-hour wait just to get out
24 of the line which usually would take an hour-and-a-half
25 for years. So we have 905, it's just seven miles. A

9

♀

1 seven-mile highway and right now it saves us about one
2 hour-and-a-half to go to transport and it seems like
3 nothing but when you make it into money, money time, it's
4 a lot of saving. It is very important.

5 So when you expedite this every day, the
6 general, the conflict, the quality of life would improve
Page 9

7 dramatically. The transportation is not interested in
8 just contaminating diesel and the stop and the
9 stop-and-go traffic, we need to address this bottleneck,
10 because it creates great problems not only for the
11 community but for business and the transportation, but to
12 everybody.

13 Well, I think that one.

14 MR. RIVERA: What can be improved by the plan,
15 is that we are just focused on how to improve mobility to
16 south, south-to-north but I think that as time goes by,
17 we need to not lose sight of just like Chula Vista and
18 other cities that population is moving east. We need to
19 start improving the east-to-west and west-to-east,
20 because like the Olympic Center and other places how
21 many -- today we are discussing going north-to-south,
22 going to town, San Diego State University but we have to
23 look into the future, that there's going to be another
24 college in Southeast County and we need to connect it to
25 905 and this was just only recently built, so I think

10

♀

1 those are what I wanted to say.

2 MS. ARIAS: Some of the maps on some of the
3 projects that have to do with transportation, and this
4 takes time to build. We have to go through stages
5 because we really don't have all the finances. We don't
6 have all the money in our pocket.

7 So what about technology? What is the role of

8 technology to expedite this plan and save money and to
9 connect people as we were discussing? That we were
10 talking about how to get more people into Casa Familiar
11 where people -- or to expedite this process?

12 MR. FLORES: Well, listening to a lot of these
13 meetings, probably transport, just that has do with the
14 Compass Card. It's not efficient. It's not flexible.
15 It's not efficient. If you buy a card and you loose it,
16 you have to buy another card. If you don't activate it
17 correctly, then you have trouble going in and you have to
18 buy another one and you have to file a complaint for this
19 card, you have to spend a lot of money like the monthly
20 pass, and try to take it back and try to get the money
21 back if you loose the card.

22 So there must be a way to get this on file.
23 This is very expensive for families that need to use this
24 transportation, so there needs to be a better way, an
25 improved way to get access to this rate, and to this card

11

‡

1 because this is not existent bus stops that need -- that
2 are according to the needs of this community.

3 So we need to reactivate them, get more time on
4 the cards and this I think would be really helpful.

5 MS. ARIAS: As it's really important that we're
6 always trying to improve the technology.

7 MR. FLORES: But this can be done, so thank you
8 for telling me.

9 And San Ysidro, this is what we hear from the
10 people that we are serving, and the Trolley system right
11 now, the person who has some kind of disability has to --
12 has to push the button so that the system is activated
13 and maybe to have an automated system that maybe the
14 driver can see somebody who has the disability and push
15 it and activate it himself to save some time to all of
16 the people, because if it takes time for the person that
17 has some disability, it takes time from everybody's
18 travel.

19 So I think that's important.

20 MS. ARIAS: Armando, you have some ideas?

21 MR. FREIRE: In the -- when we're talking about
22 the freight, there are some things that can be helpful
23 especially in the border crossing, especially when it has
24 to do with the dedicated lane with the fast lane. This
25 type of information that the Border offers already have.

12

♀

1 I think it's important.

2 And SANDAG San Diego, some of the change is
3 that I don't think technology can help the roads because
4 the roads only go so far. There are only so many roads,
5 so this is important, but in the -- now the projects are
6 lacking and I don't see how they can help me.

7 MR. RIVERA: When it comes to technology, I
8 think that to improve technology and services, I think
9 that we need more information about traffic alerts and

10 more information when it has to do with when is the next
11 bus coming.

12 MS. ARIAS: So we're talking about just and
13 improved life-and-travel. When you're talking about
14 communities, South Bay communities and sustainability.

15 What do you think about that, David?

16 MR. FLORES: Before I answer that, I need to go
17 back to David.

18 We have the Border and we have presented
19 numerous proposals that have to do with the Border and
20 this Port of Entry and we need to develop it in a more
21 flexible way, working with the Federal Government so that
22 people can cross, like there's bike lanes. There are
23 people that want to cross the Border with their bikes and
24 it's just not flexible and there's also these ideas that
25 are being integrated at the New Port of Entry when it

13

♀

1 comes with the present road that will be east of Virginia
2 Street guard rail, but make sure they have clear
3 connection with the public transportation in San Diego.

4 So, you know, there's seven miles and so it's
5 not even seven miles. It's less than 500 feet, you know,
6 just to improve the experience of the teller. We have
7 other ideas for San Ysidro, a project that has to do with
8 parking and intelligent parking, because right now the
9 demand for parking in San Ysidro is huge. But this is
10 badly there -- badly organized right now there's not a

11 system that can identify a vehicle that can go into San
12 Ysidro and just give them direction to go to where to
13 park by the Border and that's important and that's people
14 that want to cross this Border and they want to visit
15 Tijuana and just go by foot. They start cycling
16 everywhere trying to find parking and it's just a mess.

17 So just signals, just an idea, a very simple
18 idea that has been developed like smart parking to many
19 of the places but for San Ysidro, I think it will work
20 wonderfully. It could be a solution.

21 When it comes to healthy communities, I think
22 it's important that -- it's important because we're about
23 to finish the San Ysidro Health Program and some of these
24 ideas that have to do with the regional plan and that's
25 how we're going to invest and decide where to invest and

14

♀

1 planning is really, really fundamental so where do we put
2 our resources where we might put our bike lanes? Where
3 are we going to promote walking? Some of the problems
4 that we've been told about by our community advisors that
5 come to Casa Familiar, though they come to take huge
6 classes like start to play sports, exercise, but we need
7 better infrastructure to the rest of the community to
8 make sure that the families could really enjoy cycling
9 and try to use their car less during the weekends, if
10 they can. It's important.

11 Another one, another idea I have is that the
Page 14

12 participants in San Ysidro, we have the great success of
13 having the first SANDAG study to try to connect the
14 investments, the transportative investment with public
15 health. The study that has to do with the quality and
16 the public health for San Ysidro. It's super important
17 because it has a series of recommendations that have to
18 do to -- tells you a guideline of where to invest, so if
19 you invest in bike lanes, there's lanes. There's going
20 to be analysis that it reduced obesity and reduced heart
21 problems, so we were lucky that San Ysidro was chosen as
22 a first community to do that type of study and now we
23 have 16 projects for anyone to try to make this
24 evaluation, and now we have single projects that we can
25 go forward with and one of them that has to do with the

15

♀

1 needs of San Ysidro, that has to do with air quality, but
2 before this, we didn't have a clear measure of the
3 Federal Government. We didn't have a clear guideline to
4 where we should be going and this information is clear.
5 This is going to help us move forward and see where we
6 should invest, how much should we expect to get it
7 running. It's not going to change one day to another,
8 but that's why we were working with the community to
9 identify what can we do in school, is what can we do with
10 living quarters. What can we do with areas that are
11 open, so there's a lot of work. There's a lot of
12 possibilities.

13 MS. ARIAS: Frank, when you're talking about
14 the Regional Plan, how do you think can help Chula Vista
15 to implement, you know, like you said, Chula Vista
16 helping and Bayfront Center and everything else?

17 MR. RIVERA: Well, Chula Vista is about 50
18 square miles, so it's a lot of cities, so the Bay area is
19 going to be developed quite differently from the rest
20 of Chula Vista. There's a lot -- there's going to be a
21 lot of buildings. There's going to be a lot of
22 commercial areas, a convention center, families, so we
23 need to get bikes and it's going to be very different.
24 Downtown Chula Vista, the old part of town, it's going to
25 have less change but when there's going to be change,

16

♀

1 there's going to be a construction of the buildings,
2 families living there, just like East Chula Vista is
3 developed but everything is going to have its place and
4 everything is going to change little-by-little, so
5 there's a lot of projects that are going to be very
6 different than before. The building codes have been
7 different and we have another vision. We're going to
8 improve density in Chula Vista; yeah.

9 MS. ARIAS: Thank you very much.

10 And Armando, when we're talking about economy
11 and the exchange with Mexico, what do you think about
12 this plan and how is this plan going to improve now the
13 difficulty of transportation?

14 MR. FREIRE: Well, Mexico, Tijuana and San
15 Diego Tijuana, and San Diego are just one community. I
16 think that they have a fence but they're actually just
17 one community and that creates a lot of problems and a
18 lot of communication problems.

19 So the most important part of this plan is to
20 expedite this communication. It's thousands-and-
21 thousands of people that are crossing everyday for one
22 reason or another. The majority of these people are just
23 going to be the same going in and so, there's no reason
24 for this wait because we do the same people every day.

25 So in my case, I've had more than 50 of my

17

♀

1 employees that work in the U.S., legally in the U.S. and
2 live in Tijuana and they -- and some of them have to wait
3 three hours waiting to go to the office, so they want to
4 be in the office at 8:00 and they start at 6:00 in the
5 morning and that's just a crime.

6 So we need to expedite the movement. We need
7 to talk to the Federal Government. We need to talk to
8 Border cities and we need to work at it until a problem
9 that started yesterday. It is a problem that's
10 longstanding and, you know, it's time to fix it; thank
11 you very much.

12 MS. ARIAS: Some other questions that I'm
13 trying to get at some Panelists. I don't know if you
14 want to talk about some of the doubts of -- if not we can

15 open up the panel to question-and-answer, just to the
16 community.

17 Mr. Flores, I feel that you have something to
18 say.

19 MR. FLORES: Well, I would ask -- I wanted to
20 ask Armando what is the biggest challenge that you have
21 in when it comes to transportation, because I think it's
22 important that the community also understand how
23 complicated it is to cut a plan forward, put a plan
24 forward; everything that gets into our house comes
25 through the transportation system one way or another, so

18

♀

1 I think what are some of the biggest challenges he was
2 mentioning also, little-by-little there have been these
3 games. I don't know if you wanted to stress there. He
4 gave me an example of the trips that can be done from
5 here to L.A.

6 MR. FREIRE: So basically we're talking about
7 time.

8 And, for example, trucks get out away from
9 Tijuana at 6:00 in the morning and goes to L.A., to the
10 L.A. Port and by the time it gets back to Tijuana it's
11 8:00 p.m. and sometimes he can't even cross the Border
12 with the truck, so he has to leave the truck somewhere at
13 the Border and then go to Mexico by foot and do the same
14 thing again in the morning, 6:00 in the morning to go to
15 L.A. and then go back to Tijuana to start working and the

Page 18

16 first day it's 6:00 in the morning. The second one 3:00
17 in the afternoon.

18 So sometimes the hours just get
19 longer-and-longer and that is a resource in the U.S.
20 side. We have the same problem. A truck gets from
21 Tijuana, it's going to be waiting at the Border for six
22 hours and here we have a U.S. truck waiting for six hours
23 for a Mexican truck to cross, so it makes no sense.

24 Another problem that we have, is that sometimes
25 there's a series of changes, law changes that do not take

19

♀

1 into account what kind of consequences it will have in
2 business, in this case the change. The change of the law
3 in the L.A. Port. So what happened, is that they changed
4 the law and now California, so we could not use trucks
5 that are older than 2008, so there's 16,000 trucks that
6 can't comply with that law because they're older than
7 2008 and from those 7,000, only 7,000 could work and the
8 rest were out because the law didn't take into account,
9 didn't take that into account and that really affected
10 their consequences to what politicians do and have not
11 taken into account what kind of consequences. They don't
12 know who they're helping and who they are not helping. I
13 think that's part of what David and I were talking about.

14 MS. ARIAS: Good observations; thank you very
15 much.

16 I want to open up the panel, so I want to open
Page 19

17 the floor with questions from the audience.

18 PUBLIC SPEAKER: I have a question.

19 In Coronado, the Island of Coronado, the buses,
20 904, it's free from June-to-September. Why do we not get
21 free rides if we're paying taxes? Well, do they get four
22 months of free trucking of free buses like this 2050,
23 2025? And the bus would not (inaudible) going to walk
24 because it doesn't have change for .25 or change and I
25 think that's not fair that the cars are going free.

20

♀

1 Here's a really good question, balance could do -- you
2 could help us with that committee.

3 MS. ARIAS: Yes, balance.

4 Could you help us with this question?

5 PUBLIC SPEAKER: Hi good afternoon.

6 My name is Jesus Salgado Mesas. I am
7 Administrator for MPS Trucks and Buses.

8 And the question is that Coronado, the City of
9 Coronado, they keep this funding and they pay for their
10 own service, so they decide to make it free and they
11 could go directly from the City to the busing, so we do
12 not make that decision, so they are paying for the free
13 rides so the City of San Diego or San Ysidro considers
14 that to be reviewed by use of taxpayers dollars to pay
15 for free rides then we can do that. What I'm saying,
16 that the City of Coronado has decided to do that.

17 MS. ARIAS: Any other questions for the Panel?
Page 20

18 PUBLIC SPEAKER: Yes; good afternoon.

19 I agree with many of the points that are being
20 made and by the Panelists, but my question is more in
21 regards with the transportation plan.

22 How did we get 50 million dollars from the
23 project? I understood it has to be done by 10 years but
24 now it has expanded in San Ysidro. It's not 2050, so I
25 don't know if I didn't understand how the funding was

21

♀

1 going to be allocated or if I didn't understand the
2 timing, and the resources that the numbers are changing
3 constantly and the population in San Diego. It was
4 calculated. It was projected to be 4.5 million people by
5 2050, so I don't -- I haven't seen those numbers and I'm
6 surprised how can we trust that?

7 MS. ARIAS: Oh, yes, if I can answer that
8 question.

9 When it has to do with intermodal it has to do
10 with the two phase program. One of them has to do with
11 2025 and the other in 2050, when it comes to SANDAG, the
12 projections and population projections have to deal with
13 SANDAG has projected -- every four years the plan is
14 updated every four years, so we have a series of review
15 that have to do with the global economy; low economy and
16 so they change.

17 Any other questions? Yes?

18 PUBLIC SPEAKER: Good afternoon.

19 My name is Juan Ramirez. I participated in a
20 nonprofit called, "Circulate San Diego" and we promote,
21 basically what we have to do with active transportation
22 that has to do with walking, cycling and there's been a
23 series of -- there's things that are mentioned by the
24 Panelists, that have to deal with that individual was
25 talking about public transportation. Many times the plan

22

♀

1 they prioritize some things are not, they seem to be
2 balanced, so how could we -- how can we make sure that
3 importance is given to this type of transportation and
4 organization? I think that we need to have public
5 transportation to have some priority and to not put them
6 at the end of a location for funding, so, you know, by
7 2025 we'll get funding for bicycle lanes. I don't think
8 that's needed. I don't think that's fair.

9 And there's another thing that was mentioned.
10 Engineer Rivera, was talking about how to make it more
11 accessible especially for cyclists. I feel the same. I
12 would like to see buses that were financed so that all of
13 the network, the public transportation network is clearly
14 connected and more accessible for all of us all the time
15 because at the same time, we would reduce -- we would
16 reduce our use of car and it would be easier to reduce
17 Greenhouse Emissions and to reduce the time that we spend
18 in the car on mileage, you know, what you were talking
19 about.

20 So basically, if you could expand it more and
21 talk more about financing and prioritize it.

22 MS. ARIAS: It's a little technical question,
23 so they have observations also when it comes to how to
24 balance the equation when it has to do with projects with
25 public transportation, active public of transportation to

23

‡

1 balance. We have information at the back of the room,
2 and how are we going to implement the plan and there's
3 people there that can answer your questions in Spanish
4 and want to talk about the phases and how it's going to
5 allocate funds.

6 So first of all, you wanted to talk to the
7 Panel. If you want to give us any last comments how to
8 balance before we pop it.

9 Yes?

10 MR. RIVERA: Yes.

11 We need to move the project and transfer and we
12 need to push active transportation projects forward and
13 we need to put them as a higher priority, so we need to
14 make sure that we need to have the same, prioritize.

15 So when it comes to Chula Vista, we are
16 currently working for like, for example, for a Third
17 Avenue Downtown Chula Vista and we have a second phase
18 about Third Street and this is our second phase and our
19 third phase will start in a year. So we need to start on
20 F street from the Bay to Third Street.

21 And that street is going to be used to focus,
22 to be focused on cycling and walking, so it's a big
23 street. It's wide enough for this project to take use
24 but the idea to improve main roads is important. It's
25 our main goal, so we are actually prioritizing this every

24

♀

1 year the Council gives us a series of rules of what they
2 need and how do they need them, and we need to listen to
3 what the public is hoping for.

4 We're also hoping for -- I mean it's not just
5 my project and we need to have it prioritized on top of
6 the other ones. We need to keep a balance to check all
7 the time not to change priorities that fast.

8 MS. ARIAS: Another reaction from the Panel?

9 MR. FLORES: Yes.

10 Our community organization is such as Casa
11 Familiar or others that are here and the southern part of
12 the County. I think it's important that we identify how
13 are we going to collaborate. How are we going to work
14 together to make sure that these priorities are going to
15 be implemented at a larger picture?

16 Let's say, that has to do with the network
17 which is not south of the County. We can work to
18 identify what our needs are and we need to prioritize and
19 come in at all levels, so we need to do it at the local
20 level. We need to do it at on a macrolevel like a
21 regional level and even SANDAG and Statewide, but it all

22 starts with this small connections between communities
23 and nonprofits that are working with the community and
24 the communities that we represent to make sure that we
25 create like a chart to start talking to authorities and

25

♀

1 be active in all the different areas of the plan.

2 And so, that every four years when they update
3 the plan, we are there to update it with them. So this
4 is a chance for some projects to have dialog with some
5 board -- to be boarded in these four years update, so we
6 need to make the connection that San Ysidro, National
7 City, San Ysidro to Chula Vista and we have a great
8 opportunity of growth and development in the Bay area,
9 especially east to connect an intermodal center to give
10 more options in Chula Vista, because transportation here
11 we don't have enough options so we have hubs. The hubs,
12 the theories of intelligent hubs all over in our
13 services; that's what I think we need.

14 MS. ARIAS: Okay; thank you very much.

15 Just to keep up the conversation going, or when
16 we open up the floor in each stage of the regional plan,
17 we see it at 35 years in the future, but these three
18 periods that we decided on, we need to look for
19 investment because currently we don't have the investment
20 needed, so we have some funds but we don't have the whole
21 money back, so sometimes it seems that, you know, maybe
22 you didn't understand is clear, maybe we didn't start but

23 in the first five years, we are proposing six thousand
24 and seven million dollars for public transportation and
25 the second part of the project we have 28 million and 16

26

†

1 for the road infrastructure, so the investments and
2 sometimes it's just not very clear with so many
3 (inaudible), so many data.

4 But are there any other information, any other
5 questions from the Panel?

6 PUBLIC SPEAKER: Yes.

7 I know that this is a plan, but I want to see
8 this region more than a region because what's Imperial
9 Beach, San Ysidro, Chula Vista, National City. We have
10 this unique -- we have this uniqueness and so, this area
11 has been as a region, not as just like everybody is the
12 same, we need to be connected but in the next 10 years,
13 it's going to 2050. This area is going to be very
14 diverse and we need to include diversity and I'm -- what
15 I'm trying to say to SANDAG, is that we need to see it at
16 a multicultural region that is very complex and it's not
17 one size fits all. It's very, very important that you
18 need to develop plans that have to include diversity, and
19 see it as a region and try to bind them together in San
20 Diego because it can be a great opportunity for everybody
21 in San Diego if you do it correctly.

22 But if you have to do connections that are
23 simple, simple things that are connected between cities

24 and communities, you know, here to Imperial Beach to
25 National City to here to Downtown San Diego, we need to

27

♀

1 figure out how people need to move and not forget the
2 Border. Do not forget the Border, because the Border is
3 going to grow. There's a huge economic opportunity there
4 just today and in 2050. I'm sure it's going to be a
5 bigger opportunity even if we do it correctly.

6 So I think that we could all recognize this and
7 we need to make sure that we include pedestrians,
8 cyclists and everybody when it comes to more intelligent
9 design. I think that those of us who are here, see an
10 amount of opportunity that is immense. We need to not
11 keep acting as if we're all one size fits all. We need
12 to include diversity and so, we need to start acting like
13 a region now, yeah; yeah. It's an excellent connect.

14 MS. ARIAS: Thank you very much.

15 We are so with you on that one, and we agree
16 and that's how we work.

17 Any other questions? Sorry, I've had in
18 relation with --

19 PUBLIC SPEAKER: So sorry that my -- I don't
20 speak Spanish, so I'm going to have to have -- maybe
21 Alicia, you could translate after I say a few words.

22 (Translator complies.)

23 Do you know all of you are in court, at the
24 highest Court of California against SANDAG for their past

25 regional plan, how many of you know that?

28

♀

1 Through your Attorney General, SANDAG is --
2 well, SANDAG was sued and the Appellate Court found that
3 SANDAG, in at least four-to-five times, mislead and
4 misinformed the public under previous regional plan, so
5 it may be okay for us to be a bit skeptical about what
6 they're presenting to us today.

7 So the question I have asked at two previous
8 SANDAG meetings like this, but I never got an answer is:

9 We know that vehicle miles traveled is going
10 down throughout the country and SANDAG is predicting that
11 within our region in the next 25, 30 years.

12 In fact, it is also the most expensive way to
13 travel per mile is by car. It takes the most amount of
14 public money to do that and it's also the most dangerous
15 and causes the most amount of pollution in our own
16 communities.

17 And I apologize to Elisa, because she's going
18 to have a chart here that shows how much money of the two
19 hundred billion dollars we're spending, we're going to
20 spend on transportation.

21 So I know some of this money SANDAG has the
22 ability to change, has the discretion to shift over which
23 is the fifteen percent for what's in the red and below,
24 plus another six and eight percent for what they call
25 "managed lanes," actually more freeway lanes.

♀

1 So why isn't SANDAG shifting some of the money
2 they have full discretion over to the Transit side, which
3 is the blue part of the chart? That's the biggest
4 question.

5 Why are we wasting money building more freeways
6 when we have fewer cars in the future?

7 MS. ARIAS: It's a brief comment, a very, very
8 long question.

9 SANDAG does not have that -- there's going to
10 be fewer mileage and factors are going to be a lot more
11 times. There's a lot more people living here so we are
12 forecasting that the mileage per person per capita is
13 going to diminish but not the -- actually there's mileage
14 because this is going to be important to people.

15 So right now we are ready for our last part of
16 our event and we're going to do the question-and-answer
17 like an open house, so we invite you to walk around and
18 ask questions and you can see the maps and you can see
19 the money.

20 We have a bilingual persons here at each of the
21 stations and any other detail questions, we are more than
22 happy to answer.

23 Thank you to the Panel for your kind words and
24 for being here. We really appreciate it and we thank
25 you.

5 * * *

6

7 MS. CLEMENTSON: Okay. So I'm gonna introduce
8 this panel. And I'm so grateful that the three of you
9 were willing to be with us tonight. We have Tina Ngo,
10 and she is with the San Diego Workforce Partnership. We
11 have Nancy Bragado, who is a planner with the City of
12 San Diego, and we have Barry Pollard who's with the
13 Urban Collaborative Project.

14 And I know that, Barry, you do most of your work
15 here in this area. And one of the things that we've tried
16 to do is we've had different panelists at each of the
17 workshops and then try to bring in folks who are at least
18 the familiar with the general vicinity or the community
19 where we're actually holding the meeting.

20 So, um, let's see. I'm gonna start out with --
21 you've seen the plan. It's a really big plan. There's a
22 whole lot of projects in it. A lot of projects. Dozens of
23 different transportation projects, and each of the
24 transportation projects, many of them are in different
25 stages of development. In fact, most of them today are

SANDAG WORKSHOP - SAN DIEGO FORWARD

3

♀

1 just a line on a map.

2 So down the road, there will be more detail
3 studies and analysis that take place for each of those
4 lines on the map. But thinking about this from sort of a
Page 3

5 big picture perspective, this is where the panelist come
6 in. From the big picture perspective, and we'll just go
7 down the line. And maybe, Barry, since you're most
8 familiar with the community here, we'll start with you and
9 then Nancy and then Tina, if you can tell us a little bit
10 more about the organization that you represent. And then
11 why you care or why the organization that you're part of or
12 the people that you represent, should care about a plan
13 like this?

14 BARRY POLLARD: Um, good afternoon and good
15 evening. I'm glad there's a pretty good turnout here.
16 And the Urban Collaborative Project is an organization
17 of neighborhoods and community benefit organizations
18 that is situated here in southeastern San Diego. And
19 our focus is on health safety civic engagement in
20 neighborhood art. And this is important to us because
21 we live here.

22 We live in an area that's historically been
23 underserved. We have a motto here that if you're not at
24 the table you are on the menu. So what that tells us is we
25 need to be really involved in a lot of activities that are

SANDAG WORKSHOP - SAN DIEGO FORWARD

4

♀

1 affecting our neighborhoods, as well as our transportation.

2 Some of the -- really quickly, some of the issues
3 that are concerning us is, um, transportation of the work
4 centers. We have a lot of people that need to leave our
5 community to go find livable wage kind of jobs. And when
6 you have no mass transit system that is effective, north,

7 there's problems.

8 Um, a very close friend of mine showed me a piece
9 from Martin Luther King years ago, that indicated that
10 transportation issues and underserved communities is
11 indeed, a civil rights issue. Because what it does is it
12 impacts our right to make a living.

13 That is huge in this community. Um, and I'm sure
14 we'll be talking about other things. I won't hog the mics.
15 I'll pass it along, but I'm grateful that everybody is
16 here. Thank you.

17 NANCY BRAGADO: Good evening. I am Nancy
18 Bragado. I'm the Deputy Planning Director for the City
19 of San Diego. And we're very interested in the regional
20 plan. City of San Diego is, of course, the major city
21 in the region. We have 42 percent of the region's
22 population. And looking through the regional plan, I
23 saw that more than half of the regional growth in new
24 housing will occur in the City of San Diego.

25 Um, that we have major job centers with UTC,

SANDAG WORKSHOP - SAN DIEGO FORWARD

5

♀

1 Sorrento Valley and downtown San Diego. And the Otay Mesa
2 border area will continue to grow.

3 So what happens, um, in the regional plan has a
4 big influence on our communities in the City of San Diego
5 and how we get around and it affects our economic
6 prosperity.

7 So the regional plan aligns in many ways with the
8 City of San Diego's general plan. Our general plan was

9 updated in 2008. Its central theme is called the City of
10 Village Strategy. Which is about focusing growth into
11 mixed use activity centers linked by the regional transit
12 system.

13 So we need the regional transit system to make
14 our growth strategy work. Um, we're excited about the new
15 transit lines being proposed in the regional plan and we're
16 gonna continue to try to have our plan sync up well with
17 the regional plan.

18 The other aspect that we're watching very
19 closely, is the greenhouse gas emissions. We have a draft
20 climate action plan in the works, and we have some very
21 ambitious goals in that plan to have a 50 percent transit
22 ped, bike, mode split by 2035. So obviously we need to see
23 an increased investment in transit. And we need to see all
24 those modes working well together.

25 We need to see attention to the last mile of

SANDAG WORKSHOP - SAN DIEGO FORWARD

6

♀

1 getting people to transit and from transit to their homes
2 and jobs, and we need to see results, because we're going
3 to be monitoring our plan and we need to see those
4 reductions actually occur.

5 We also, I think are pretty much in sync with
6 transit, in terms of the open space protections and the
7 healthy communities goals. We also as a city have, um, our
8 multiple species conversation program that's in sync with
9 the regional program to preserve open space. And we're
10 very interested in how the urban communities, that's made

11 possible through some of these -- expanding upon active
12 forms of transportation so people can improve, incorporate
13 mobility and exercise into their every day lives.

14 So, um, I think with that, I will pass it on to
15 Tina and can answer some questions later.

16 MS. CLEMENTSON: Great.

17 TINA NGO: So good evening everyone. My name
18 is Tina Ngo Bartell. I am the director of business
19 programs and research at the San Diego Workforce
20 Partnership.

21 If you're not familiar with the San Diego
22 Workforce Partnership, what we do is that we basically have
23 funding to train people into skills to help them get into
24 employment.

25 So we've got a majority of career centers all

SANDAG WORKSHOP - SAN DIEGO FORWARD

7

♀

1 over the county. We have one in south county, east metro
2 and north and -- north coastal. North coastal and north
3 inland.

4 And what these career centers do is that, let's
5 say if an individual gets laid off, they go to the career
6 center get they get funding in order to get training for a
7 new occupation and we subsidize up to about 5,000 or \$7,000
8 for that person to get training. Let's say you want to get
9 a project management skills or something.

10 So that's some of the programs we do for the
11 adults, and then we also have job training programs for the
12 youth. And for us, one of our biggest initiatives is

13 trying to get the youth employed. And one of the key
14 issues that we're running into, is that a lot of the youth
15 had difficulty getting transportation from where they're
16 located to the actual internships that we're placing them
17 at.

18 And for us, we work with not only the job
19 seekers, but we also work with employers. So what my job
20 is, is to talk to businesses and ask them what are they
21 looking for in the labor force. What type of skill sets
22 and jobs and occupations. And I share that information
23 with our job seekers that we serve. We serve about 10,000
24 adults and a couple of thousand youth all over the region.

25 But even if they know where the jobs are at and

SANDAG WORKSHOP - SAN DIEGO FORWARD

8

♀

1 what type of skills that employers are looking for, if they
2 can't get to those companies, they won't have a chance,
3 even for the interview.

4 So for us, we want to be able to have a transit
5 available for job seekers, especially if they've been laid
6 off and they don't have opportunities for their own
7 transportation to take transit. Go to our career center.
8 Get some of the resume writing skills or some of the
9 interview skills that they might need in order to find a
10 new job. And then also use transit to go into an employer,
11 once they've got the interview.

12 So for us, all of the transportation is very
13 important for us for both the youth and adult, when we're
14 trying to get them employed and trying to get them skills.

Page 8

15 Even if we pay for their skills training, if they
16 can't get transportation to an educational training
17 facility, that money is wasted. So, again, transportation
18 is within the skills training itself and with the
19 employment that we're trying give San Diegans.

20 MS. CLEMENTSON: That's great. So I think all
21 of you have given us a perspective now on why you think
22 the plan is important or why you care about the plan or
23 why someone, who is part of the organization that you
24 represent, are the jurisdiction that you're a part of,
25 why you should care.

SANDAG WORKSHOP - SAN DIEGO FORWARD

9

‡

1 So, you all had a chance to see the presentation.
2 And my next question for each of you is, tell us what it is
3 that you think you like about the plan, and then we also --
4 what are the things that you think could be improved upon,
5 as far as the plan and what you saw.

6 We're not expecting certainly that you're experts
7 on the plan. We're not expecting that you (indiscernible)
8 the plan, simply just sort of reacting that what you've
9 seen, so far on what you know about it.

10 And who wants to go first? You guys can go in a
11 line or we can continue the same.

12 TINA NGO: So what I particularly like about
13 the plan is we're focusing on dense areas, and trying to
14 get a lot of mobility auctions for people to be able to
15 travel to work or to the areas they need to go to;
16 however, one thing that I had a question about was, how

17 do we get that information to the people who are trying
18 to use the transportation.

19 So for instance, at our job centers -- again, we
20 serve thousands of people, but we don't have workshops
21 available to tell them -- a couple of them might. But here
22 are the transportation lines that you can use to go here to
23 a different employer or here for a job fair or even here to
24 the training facility that he wants to go to.

25 So for us, transparency about the types of

SANDAG WORKSHOP - SAN DIEGO FORWARD

10

♀

1 abilities that are available, as well as some educational
2 programs in for our specific populations that we serve
3 would be very very important.

4 MS. CLEMENTSON: That's great.

5 Okay. Nancy?

6 NANCY BRAGADO: Okay. Thank you.

7 So some of the things I like about the plan are
8 that it does show the greenhouse gas reductions. It does
9 show an increase in investment in transit. And in
10 particular, I think the, um, moving up the purple line,
11 which goes from San Ysidro to Kearny Mesa, is a good step
12 forward.

13 Um, I think the plan does a good job addressing
14 active transportation. I like that it addresses social
15 equity. Our mayor has a vision for a one San Diego that is
16 about providing opportunities for people to improve their
17 lives, and I think that's in sync with that.

18 And I think it's good that it includes an

19 economic analysis so people can see some more hard numbers
20 in terms of return on investment in transit.

21 One thing that I saw that I thought was missing
22 is a better structure for prioritization of the different
23 smart growth opportunity areas throughout the region. I
24 think as it is now, there's a lot of these areas on the
25 map. And I think what we need is a little more analysis of

SANDAG WORKSHOP - SAN DIEGO FORWARD

11

♀

1 what certain corridors or what certain centers mean, you
2 know, mean in terms of significance to the region.

3 Is it a huge economic development corridor? Is
4 it really important for housing? Is it something that's
5 critical to our education center? And then maybe we should
6 prioritize those a little bit. So I understand that's
7 coming in the Regional TOD Strategy, Transit Oriented
8 development Strategy, but I think that's an important piece
9 to look for to, um, in the future.

10 Thanks.

11 MS. CLEMENTSON: Okay. Thanks.

12 Barry, what are your thoughts? What do you like
13 about the plan? What are things that you think can be
14 improved?

15 BARRY POLLARD: I like some things that, um,
16 my colleagues suggested with the social equity, the
17 smart growth, I like that. Um, I was always amazed at
18 how all of the neighborhood and the city and the county
19 plans are all merged within the region that -- that, I
20 like. Um, some of the things that, that, are sort of

21 popping up for me -- um, you know, I'm a big advocate of
22 including the communities and neighborhood and
23 activities that are going to affect them.

24 And I'd like to see more of a dialogue going on
25 between certain groups, um, to try to come to some sort of

SANDAG WORKSHOP - SAN DIEGO FORWARD

12

‡

1 a, an agreement on some of the major issue.

2 You know, we -- 94 popped up. Martin Luther King
3 freeway popped up. You know, does adding a lane to that
4 function make sense? Does it work? If it doesn't work,
5 then what kind of process is going to be in place to
6 address what is a social equity issue involving do we spend
7 that money extending the freeways and getting another lane
8 put in? Or should that money be focused more on local
9 issues. There's a lot of local issue here that we have
10 that we want addressed.

11 So it's the method in which those kind of
12 disagreements are addressed. Um, I think all too quickly
13 we all dig our heels in really, really fast. And it would
14 be nice to get more of a process involved in which the
15 community will have input but input with teeth.

16 MS. CLEMENTSON: So these are great
17 suggestions. Definitely things that we've heard that
18 are different than what we've heard in other areas. And
19 so I'm going to ask you each just one more question.
20 But if some of you have questions that you'd like to ask
21 the panelists, be thinking about those and I can call on
22 you and we'll bring the microphone over and you can ask

23 them questions.

24 But one of the things I'm thinking about is we're
25 really doing a fair amount of emphasis on new technologies

SANDAG WORKSHOP - SAN DIEGO FORWARD

13

♀

1 being part of the transportation network in ways that we
2 haven't done before. And really trying to think about what
3 is the role for the private sector and in this, because it
4 can't always be just the public sector that is providing
5 the transportation. And there seems to be a market for it
6 too where many of us are using Uber and Lyft and we're
7 seeing the bike share.

8 And so just thinking about some of the challenges
9 and then maybe, Tina, from your perspective, thoughts on
10 how the newer technologies might help address some of the
11 issues you've raised and all three of you can just give
12 some -- a response or a thought on that.

13 TINA NGO: Well, I think the emphasis on
14 technologies for transportation is a great
15 implementation for the plan. I mean, San Diego has, I
16 believe, the largest shared fleets of, you know,
17 electric vehicles in the nation. As you can see in
18 downtown, we have the largest fleet. So that's
19 interesting. And that generates a lot of jobs within
20 that sector in looking at clean energy positions in
21 general.

22 And in terms of technologies, we're seeing a lot
23 more individuals. If they can't find employment they do
24 self employment through these Ubers. And we see a lot more

25 demand, basically on demand types of services. So if you

SANDAG WORKSHOP - SAN DIEGO FORWARD

14

♀

1 want food right away, you're gonna hire somebody. There's
2 a ton of apps available for somebody to drive to a
3 location, pick up food and deliver it straight to wherever
4 you're at. Some of the names of the apps escape me, but
5 there's a new, a demand economy going on in the region and
6 it's not just us. So we see not only Uber, we see a lot of
7 delivery systems where a lot of individuals they become
8 their own entrepreneurs and drive and use transportation,
9 and they need to have these modes of transportation
10 available to them to get the work done that they're doing.

11 A lot of employers too, we see a lot of fleets in
12 the region. And, you know, if any of you have ever ordered
13 from Amazon, they have their own fleets to deliver
14 groceries to your door. So we see transportation, an ease
15 of transporting a lot of these goods and services is what's
16 gonna really drive the economy. Because, again, we have
17 such a demand type of society that we have right now, that
18 if we don't have the proper transportation in place, all of
19 these companies and all of these entrepreneurs will not
20 thrive.

21 MS. CLEMENTSON: Nancy.

22 NANCY BRAGADO: I think that all of the
23 advances and technology and how they can use
24 transportation system are very exciting. There's so
25 many things on the horizon, that from an urban planning

♀

1 perspective, I think it's -- because of that, it's
2 equally important that we have great public spaces. So
3 that even if people can do their shopping on line or get
4 their pickup and their Uber or whatever, that they still
5 have a place where they can go and be engaged with the
6 community.

7 So I think that incorporating great public spaces
8 into our planning is a really important component. And I
9 think that's another aspect of, you know, what we call
10 Villages or your smart group opportunity areas that you
11 design them to be walkable to have centers to have places
12 where people can gather, even if they're, you know, doing
13 their own task at their computer, they can still be around
14 other people and have opportunities to inter-relate with
15 others.

16 MS. CLEMENTSON: Thanks.

17 And you had some thoughts too, Barry, on this.

18 BARRY POLLARD: Yeah. Not a lot. I mean,
19 these folks -- I love being the third to share because
20 they talk mostly about some of the thoughts. But, you
21 know, I love the idea and I want to see it expand it a
22 little bit about the mobility hubs.

23 I really think that that is strategically put in
24 certain areas, will help re-enforce the idea of using other
25 modes of transportation, rather than cars. I mean, that is

♀

1 obviously a major goal that everyone, I think, is trying
2 to, um, to implement some sort of a, you know, bike, um,
3 motorcycles. In some cases walking a mass transit, you
4 know.

5 I'm also for outreach. I think there's some
6 technology that we can be used. I mean, I look around the
7 room and there's a fair amount of people here, but how many
8 people are not here, they should be at the table. And, you
9 know, um -- and with that I'm telling you that we are
10 streaming live with Periscope right here. So there are
11 about eight people that normally would not be included in
12 this conversation.

13 So it's those kind of -- more of a communication
14 thing. I got a bunch of folks I work with and we
15 constantly talk about transportation issues. And, you
16 know, creative things, um, electronic crosswalks. Um,
17 using Ballards to sort of guide people across streets. And
18 so I'm jazzed about it.

19 My only -- my only issue is you guys in 2050 I'm
20 not going to be around to see all of this stuff.

21 MS. CLEMENTSON: The good news is we're here
22 and that it's moving so fast. We're seeing things that
23 we probably didn't imagine by 2050. We'll see in a
24 couple years.

25 Okay. So with that, are there any questions from

SANDAG WORKSHOP - SAN DIEGO FORWARD

5-27-15 Court Reporter Discussion_Jacobs Center
1 the audience to our panel members? And I'll start back
2 over here.

3 FEMALE SPEAKER: Okay. Um, this is just a
4 general question about what's going on in our community.
5 Where you're sitting right now is Lincoln Park. We live
6 in the Encanto community. And we have peculiar -- we
7 have more problems than other communities have about
8 certain things. One, one out of three murders happens
9 in our community in all of San Diego. We need fast
10 police protection, we need ambulances that can get to a
11 hospital quickly. We need fire departments that can
12 move quickly. The trolley is new to our community.

13 It's relatively new and when it was put in, we
14 were promised a bridge over Euclid. Euclid is our main
15 (inaudible). If any of you gentlemen have a heart attack
16 tonight, the ambulance will be stuck behind the trolley
17 tracks.

18 That's not fair to this community. You're not
19 thinking about us. This is a health and safety issue. We
20 need a bridge over Euclid because that's our main
21 (inaudible) for emergency vehicles.

22 MS. CLEMENTSON: Okay. So I think your
23 comment has to do with -- we're kind of separating
24 vehicular traffic and trolley traffic. And that's an
25 important comment that you probably should make -- sure

SANDAG WORKSHOP - SAN DIEGO FORWARD

18

♀

1 that you make on the plan.

2 Just thinking in general about kind of, you know,

5-27-15 Court Reporter Discussion_Jacobs Center
3 the importance of being able to have good circulation, I
4 think those are all issues that we care about. And we
5 definitely hear a lot of these similar things in other
6 parts of the region. But, again, I --

7 FEMALE SPEAKER: (Inaudible).

8 MS. CLEMENTSON: I hear you. And so I think
9 that's a really important point again that you'd want to
10 make as a comment.

11 FEMALE SPEAKER: (Inaudible).

12 MS. CLEMENTSON: Is there another question
13 maybe something that can be addressed to the panel?

14 MALE SPEAKER: What I would like to know is,
15 um, as a truck driver, what would you -- where would
16 restroom and truck stops and rest areas for commercial
17 drivers in the area be located? A lot of truck drivers
18 have a lot of problems with crashes, which usually cost
19 about \$7.2 millions each. And there's no rest areas in
20 San Diego right now. And they say that traffic -- truck
21 traffic would be enlarged by the year 2035. And we need
22 some kind of plan that involves us.

23 MS. CLEMENTSON: Okay. So that's another, I
24 think a good comment that you want to make sure you get
25 on the record. I'm just gonna kind of -- I'm thinking

SANDAG WORKSHOP - SAN DIEGO FORWARD

19

♀

1 are there any plans, Nancy, that you're aware of in the
2 City of San Diego for rest stops or anything related to
3 sort of amenities for what the -- for professional
4 drivers. Are you aware --

Page 18

5 NANCY BRAGADO: You know, I'm sorry. I just
6 am not familiar with that. But we can certainly try to
7 find out and get back to you.

8 MS. CLEMENTSON: It's an interesting -- that
9 question I have not heard so far. So that's good.

10 Other questions for the panel?

11 Is yours a question or is yours a comment? Okay.

12 MALE SPEAKER: All right. Let me get to the
13 panel. First of all, a minor comment. Barry Pollard
14 was very correct. That transportation availability
15 limited work.

16 In fact, in a New York Times article, it's a
17 better predictor of success for the families income.

18 Now, the question is about this whole procedure.
19 There has not been very much input from the planning groups
20 ask I would ask you about that.

21 And, also, engineering input. I've been a
22 professor of bio-medical engineering, and these things are
23 very different from the culture I come from. I also can
24 tell you how to save a lot of money on this, but that's
25 another story.

SANDAG WORKSHOP - SAN DIEGO FORWARD

20

♀

1 The question is how important is multimodal
2 transportation to this area? And I think from the point of
3 view of southeastern, it's absolutely important because we
4 have no north access. And I'll be outlined how to make a
5 multimodal station. And you need input and you also need
6 professional peer review.

7 MS. CLEMENTSON: Okay. So a multimodal
8 transportation. How important is multimodal
9 transportation to, say, the City of San Diego and your
10 plans, Nancy?

11 NANCY BRAGADO: Well, I would agree it's very
12 important to the City and to our plans. Our general
13 plan mobility element that its emphasis is promoting
14 multimodal transportation. So we're looking both in
15 terms of how the street network is laid out, so there's,
16 you know, multiple and direct routes for people on bike
17 or walking.

18 We're looking at -- at making sure that all modes
19 of transportation work in our city streets, both in terms
20 of our policy documents, as well as our street design
21 manual, but engineers use when they actually design the
22 streets.

23 And then, you know, we're looking at in terms of
24 retrofit situations. We're looking at focused areas where
25 we can do improvements through either traffic (inaudible)

SANDAG WORKSHOP - SAN DIEGO FORWARD

21

♀

1 or different steps that can be taken to make the streets
2 function better from a multimodal perspective.

3 MS. CLEMENTSON: Other questions?

4 Okay.

5 FEMALE SPEAKER: Hello. My name is Maria
6 Martinez and I just want to ask you if -- is there a
7 possibility to have more shades, you know, especially at
8 the bus stops? Because I have seen a lot of disabled

5-27-15 Court Reporter Discussion_Jacobs Center
9 people that are -- when they're waiting for the trolley
10 or the bus stop, they are, you know, not only trying to
11 push their wheelchair, but, you know, when it's raining,
12 it's kind of hard for them to hold -- to hold some of
13 their things.

14 MS. CLEMENTSON: So I think that's a good
15 comment. Definitely something, again, that you'll want
16 to record as a comment. I think, um -- just thinking
17 about our station areas in general and how we plan
18 around station areas.

19 Barry, you had brought up the importance of, you
20 know, these mobility hubs maybe, you know, that definitely
21 becomes a much nicer place to be in.

22 Um, one of the questions that I have for the
23 panel. As we make these transportation investments and
24 multimodal transportation investment in a really large
25 investment in this region in public transit, we're really

SANDAG WORKSHOP - SAN DIEGO FORWARD

22

♀

1 relying on the growth to occur in the way that Phil showed
2 up on those maps.

3 And oftentimes, as new development is proposed,
4 sometimes it doesn't go through as planned or we don't see
5 the density that we were hoping for or the mixed use that
6 we're hoping for. So how do we make sure, you know, how do
7 we support that sort of development? And I think that's
8 from all perspectives, you know.

9 I don't know, Barry, if you want to respond to
10 that. But how do we start to really realize the vision if

5-27-15 Court Reporter Discussion_Jacobs Center
11 we're making these transportation investment that support a
12 more urban sort of style of living.

13 BARRY POLLARD: Yeah. You know, I -- I, um,
14 somebody mentioned it earlier. And as I was listening
15 to the questions, I'm looking at this happening. And
16 this really to me gets down to a matter of
17 prioritization.

18 Is how is the priorities being made on decisions
19 that affect underserved communities and all communities. I
20 mean, that's really what it gets down to, because there's
21 always going to be -- needs are gonna differ from a
22 regional standpoint with freeways. And that trolley stop
23 that is backing up cars on Euclid.

24 See, from the mentality of where I sit and for a
25 lot of people in the community sit, is we deal with this

SANDAG WORKSHOP - SAN DIEGO FORWARD

23

♀

1 every day. Every single day we wait on Euclid and wait and
2 wait and wait. Every single day we deal with that offramp
3 leaving 94 heading east, getting down on Euclid coming
4 south.

5 There's a community involving up in Webster that
6 is very concerned about that "A" street onramp. And then
7 SANDAG and the City and other ones, they've got priorities
8 to, to look at the SANDAG's case, the whole region. And
9 for the city, the whole city. And so I look at these
10 things and there are gonna be conflicts.

11 And so the question that you ask, is how do we
12 put that forward? I, personally, since I'm an advocate of

5-27-15 Court Reporter Discussion_Jacobs Center
13 civic engagement, is I encourage everyone in here to let
14 their voices be heard. And it's not necessarily one voice
15 or two voices, but there's a lot of people that have
16 light-minded sort of ideas.

17 And my experience is that the squeaky wheel gets
18 greased. And that the more we are not fighting among each
19 other about what's going on in Logan Heights or Barrio
20 Logan and southeastern San Diego and Encanto, but speak
21 with one sort of voice and let that be heard. Because
22 there's nothing more powerful in the world to push
23 decisions, is when you have a bunch of folks that share a
24 vision and that a (inaudible) is what it is.

25 So my wish is to see everybody in here that

SANDAG WORKSHOP - SAN DIEGO FORWARD

24

‡

1 doesn't like some of the things that's going on, plant your
2 butts downtown at SANDAG in numbers, and let people know
3 that we have issues we've got concerns with it. And by the
4 way, we're voters. You guys work for us.

5 So more of a collaborative sort of a concerted
6 effort. I keep saying this, I don't see it often for a
7 multitude of reasons, and would love to see something like
8 that start and ground roots -- I mean, real ground roots,
9 grass roots and go down there and speak your peace.

10 So there's my preaching.

11 MS. CLEMENTSON: I'm thinking maybe Tina, just
12 to -- you're welcome to respond to that question, but
13 I'm also --

14 TINA NGO: Oh, absolutely.

15 Actually, I want to focus back on your density
16 question and whether or not the plan -- so the plan focuses
17 on density in urban areas. And that there is a prediction
18 that it's going to grow in these general areas. And for
19 us, what we've been seeing is that that's typically the
20 case. We've been seeing a lot more multi-family homes,
21 especially in those areas that I guess, in downtown
22 particularly, if you've seen over the past few years, you
23 know, it's been developed a lot more housing there.

24 And they're trying to attract more of a
25 workforce, as well as people to live and work in downtown

SANDAG WORKSHOP - SAN DIEGO FORWARD

25

♀

1 San Diego.

2 So we're seeing that trend as well. And if you
3 look -- even if the projections are off, this is all
4 forecasting. We don't know exactly how much we're gonna
5 grow in our population, but if you looked over the past ten
6 years, it's always been up. It's linear.

7 So we're gonna grow. Whether or not it's gonna
8 be another million or not, there's a plan calls for just
9 growth in general. And so for that, we need to make
10 investments.

11 If we do no building, if we build no
12 transportation, multi-transportation, we won't be able to
13 sustain that growth. We're adding one more million people
14 to the region, and we have the same amount of transit
15 available. That won't sustain all the people that needs to
16 be able to travel in San Diego County.

17 So if -- it's talking about density, I think the
18 density is going to happen, and I think the population will
19 grow.

20 MS. CLEMENTSON: Nancy, what are your thoughts
21 on realizing smart growth, which is really part of this
22 vision, if we're going to support a multimodal
23 transportation network that needs to happen too.

24 NANCY BRAGADO: Well, I think it's important
25 to remember that we're not talking about like a cookie

SANDAG WORKSHOP - SAN DIEGO FORWARD

26

♀

1 cutter approach.

2 So there's lots of ways to work toward the end
3 goals. I think we can be flexible and work with
4 communities and, you know, modify plans or come up with
5 approaches tailored to each community. Um, you know, some
6 of our communities, there's support for increasing density
7 achieving more of an urban excitement, making, you know,
8 capitalizing on the transit system, our draft plan in the
9 Grantville area would be a good example of that.

10 In other communities, there's more hesitation.
11 And in some of those areas, you need to take a more
12 incremental approach and include some of the other
13 strategies in the plan, such as the mobility hub or
14 different, different ways to sort of extend the reach of
15 transit.

16 So I think there's room to be flexible and to
17 continue to build good examples throughout the region
18 than -- you know, each one builds upon the success of the

5-27-15 Court Reporter Discussion_Jacobs Center
19 prior project.

20 MS. CLEMENTSON: Are there other questions
21 from the audience.

22 MALE SPEAKER: Hi, my name is Daniel Castañon.
23 And I'm from Fairmont Park, which is a neighborhood here
24 in the little golden triangle.

25 And my question is really having to do with

SANDAG WORKSHOP - SAN DIEGO FORWARD

27

‡

1 access of transportation -- timely transportation and
2 knowledge of transportation.

3 For example, I recently went to New York. And
4 when you go to New York, you know you use the subway to get
5 to transportation. And one of the cool things they have in
6 New York, is this little bar codes on every bus station on
7 the subway. You get your smart phone, you scan it and it
8 tells you when the next bus is gonna be there, when the
9 next subway train is gonna be there.

10 Um, so in your plan, I didn't really hear much
11 about that timeliness of the transportation, knowledge of
12 the transportation.

13 Like when you come to San Diego, you know, you
14 usually call a family member to come pick you up at the
15 airport. And don't really know that we have the trolley,
16 we have bus services to get from point A to point B.

17 MS. CLEMENTSON: Okay. So I'm not sure that
18 that's something --

19 TINA NGO: Oh, well, I just have a response to
20 that. So that's resonating with my comment earlier,

5-27-15 Court Reporter Discussion_Jacobs Center
21 even if you build it, it doesn't mean that they're going
22 to come. We need to be educated and we need to be
23 trained on what types of modes of transportation are
24 available to us.

25 Again, we deal with tons of job seekers. And

SANDAG WORKSHOP - SAN DIEGO FORWARD

28

♀

1 even myself, I don't know what exact direction to educate
2 them to -- in order to get to the jobs that they need to go
3 to.

4 So for me, marketing is huge. Being able to
5 market all of these ideas and educating community. I mean,
6 if we were able to educate more, this whole room would be
7 filled. I think we need to work harder.

8 I mean, I come from a quasi public government
9 agency. We're nonprofit, but we're also funded by the
10 government. And we don't do enough marketing about our
11 services.

12 I assume maybe half of you didn't know that we
13 give out money for training, and that's what we do. So,
14 again, that's one of the issues that our techs of
15 organizations have to deal with. And absolutely, I think
16 we definitely need to market whatever is gonna be available
17 to us in the next 20 years.

18 MS. CLEMENTSON: And I think just, um, soon
19 we'll be moving to the, to the open house. And I think
20 David Shoemaker just walked out. But Dave has worked a
21 lot on the transit part of this plan and really
22 providing that real time information.

5-27-15 Court Reporter Discussion_Jacobs Center
23 And you're saying how long is it until the next
24 train comes? How long until the next bus comes. And so I
25 think that would be really something good for the two of

SANDAG WORKSHOP - SAN DIEGO FORWARD

29

♀

1 you to connect on. Okay?

2 FEMALE SPEAKER: Yes. This gentleman brought
3 up New York City. In New York City, they actually have
4 train tracks that go to Coney Island. In San Diego, you
5 have isolated communities so the trolley doesn't go to
6 the beaches, doesn't go to the park, doesn't go to the
7 zoo, doesn't go to La Jolla.

8 Some people consider it classism and racism at
9 its worse. You're making these communities densely
10 populated with families but providing no trolley system to
11 allow them to even go to the beach.

12 MS. CLEMENTSON: So I think that's one of the
13 challenges we also face in planning. We didn't go
14 through the details of all the new trolley plans and the
15 buses, but there is a proposed trolley line that will go
16 to the beach.

17 So I think it's --

18 FEMALE SPEAKER: (Inaudible).

19 MS. CLEMENTSON: Okay. So there may be
20 additional places that you want to think about that some
21 of those could go. And, again, that's a really
22 important comment for us to hear.

23 Let's see. We had another -- okay. Back here.

24 FEMALE SPEAKER: Hello. Amelia Castillo from

SANDAG WORKSHOP - SAN DIEGO FORWARD

30

♀

1 (unintelligible).

2 This question is for Barry. Being from the
3 community and knowing that the Euclid station is one of the
4 busiest, the second busiest, um, how are we bringing more,
5 I guess, more services to it. And how are we making it a
6 priority instead of focusing like a highway and -- I mean,
7 focusing on highways is important, but knowing that it's
8 very busy here, how are we making that or how can we unite
9 to get the voice downtown?

10 BARRY POLLARD: Well, I think it starts, my
11 personal opinion from our local planning group. Um,
12 and -- and, again, this is -- this is -- I -- I've seen
13 this work too many times for it not to work.

14 So you gather up data, you go and you go through
15 the Encanto -- in this case, the Encanto Planning Group to
16 voice your concern and seeking the support. So when that
17 time comes when we do get our groups together to go
18 downtown, then, again, we're speaking with one voice.

19 You know, there's always going to be this
20 balancing act going on, because, you know, money drives
21 this whole process.

22 And so, you know, it's gonna take an equally as
23 powerful force to get minds to change in the shift. And
24 like I said, I'm -- I'll sound like a broken record by the
25 end of the night, is that the important part is to get the

♀

1 neighborhoods involved, you know.

2 And I'm not -- and let me be specific. I'm not
3 talking about organizations. I'm not talking about groups
4 of people that claim to represent people. I'm talking
5 about people that ride this transit. I mean, I talk to
6 Eric all the time about the difficulties he has just going
7 from USD back here about -- it takes three and four hours
8 to get to school or to a job, and that's one way? I mean,
9 to me that's not a quality of life that I want, nor would I
10 want my kids and grandkids to have to go through that.

11 And so you realize that all of this stuff is
12 linked. When you talk about the lack of access going
13 north, when you talk about, you know, the shifting
14 priorities of where that money is being spent.

15 You know, there's systematic effects to that.
16 And -- and, you know, I'm not so far as to go that they're
17 all out to get us kind of thing. But I have to tell you
18 that there's a pattern, not necessarily -- and I'm not
19 pointing out at any one organization, but when you have a
20 lot of money going on, the human nature is, you know, let's
21 do what we can -- let's do what we can.

22 I want people to take an organizations and SANDAG
23 as well as the city and the county and these organizations.
24 You know, let's -- let's put a little more emphasis on it,
25 on what the community wants.

SANDAG WORKSHOP - SAN DIEGO FORWARD

♀

1 And like I said, you know, I'll sound like a
2 broken record, but it's really -- it's not rocket scientist
3 stuff. It's getting people organized, getting people on
4 the same page, and the biggest thing is getting people to
5 show up.

6 MS. CLEMENTSON: Okay. We have time for one
7 more question. And then I'm gonna ask the group a
8 question about some additional information that you may
9 want to hear about as a group or you might want to
10 individually, if you're interested, I learn about it.

11 FEMALE SPEAKER: Hi. My name is Jacqueline
12 Lee, and I was born and raised in San Diego. And I'm
13 definitely multimodal. Um, but right now I just got rid
14 of my car so I'm mainly on bike, which, you know, comes
15 with its own sleuth of things.

16 Every morning, you know, I have to figure out how
17 I'm gonna get somewhere and there's 20 options, and you
18 know, lots of things to count for. But -- okay, just to
19 make it quick. This question is about funds for
20 technology. So just in regards to that presentation we
21 just saw, um I was -- this is more of a
22 suggestion/question.

23 I was thinking maybe SANDAG and other community
24 folks can get together, use some of the funds to
25 collaborate with local media organizations, like, um,

SANDAG WORKSHOP - SAN DIEGO FORWARD

33

♀

1 especially Youth Focus.

Page 31

2 People, um, you know, want to be -- not want to
3 be, producers in training, reporters in training and have
4 them go to certain corridors or hubs or whatnot and do kind
5 of like video lab. Because I'm thinking if the problem is
6 marketing or brand name or just an outreach in general,
7 especially to the youth who would be seeing these plans in
8 2050, um, just have them get involved in it. Give them an
9 incentive to be involved, you know, and then have them
10 capture a personal statements from day-to-day people going
11 on their transit activity. Like where are you going? Are
12 you in the shade? Can you get up the sidewalk with all
13 your bags and stuff?

14 You know, just like those things that seem so
15 meaningless, but collectively I think that's what you're
16 talking about, Barry, is that, you know, really organizing
17 and perhaps they can't get down to those SANDAG meetings,
18 you know, but, um, just capturing them in the zone is
19 pretty much the essence of this whole workshop.

20 So, um -- so that's my two cents and is that
21 possible? Is it possible to allocate some funds and
22 quickly get organized with local media organizations that
23 are youth based to be able to do these video logs and
24 promote it on, like, Instagram, Twitter, Facebook, all that
25 jazz.

SANDAG WORKSHOP - SAN DIEGO FORWARD

34

♀

1 MS. CLEMENTSON: So I think there are plenty
2 of grant opportunities to do that sort of thing. In
3 fact, SANDAG does offer a few grant opportunities.

4 Certainly things for -- that are collaborative to think
5 about and also, I think all of our panelist.

6 So thank you for that.

7 So the question I have for the group, tonight we
8 haven't talked at all about funding for the plan. And if
9 you're interested, we can spend just a few minutes talking
10 about the funds for the plan, where most of the funding is
11 going.

12 If instead you'd rather go -- and if a few people
13 want to hear about the funding, we can do that here. And
14 you can disperse to the different areas where you're most
15 interested.

16 So what are the thoughts about.

17 MALE SPEAKER: (Inaudible).

18 MS. CLEMENTSON: (Inaudible).

19 MALE SPEAKER: Actually, I have a question for
20 all of you.

21 This is a public meeting and I ask your
22 permission to have two or three minutes to give a minority
23 opinion with regard to SANDAG on their plan.

24 Can I have that? Is that enough?

25 Thank you.

SANDAG WORKSHOP - SAN DIEGO FORWARD

35

♀

1 And this is -- first of all, let me start.
2 SANDAG has beautiful posters. And for that matter,
3 beautiful people, very nice people. So this is no offense
4 to them. But all of you are in the highest court in
5 California on a case against SANDAG. Did you guys know

6 that?

7 Through the attorney general, you are at the
8 Superior Court of California, under previous regional
9 transportation plan. SANDAG is appealing appellate court
10 decision that was made here in San Diego against SANDAG.
11 And in that appellate court decision, for the last regional
12 transportation plan, four times. Five times it states that
13 SANDAG misled and misinformed the public. Mislead and
14 misinformed the public.

15 The Superior Court said that SANDAG abused its
16 discretion. So we should be very spectacle or speculative
17 with regards to what they're presenting to us today and the
18 information they're providing.

19 So let me break it down a few things that you
20 guys -- if anyone wants me to stop, please let me know.

21 It's a public meeting. It's a public meeting.
22 It's a public meeting.

23 Let's take a look at the budget. You'll notice
24 that SANDAG predicts that vehicle miles traveled is going
25 to be going down. In fact, it is nationwide. We're going

SANDAG WORKSHOP - SAN DIEGO FORWARD

36

♀

1 to have fewer cars on the road than we have now. No,
2 disguise it with per capita, et cetera.

3 However, 40 percent or 40 billion dollars at
4 least 20 percent of SANDAG's budget is going towards new
5 freeways.

6 Does that make sense if we're going to have fewer
7 cars on the road, why are building more freeways? When all

8 of us here, in fact, all the comments so far and many of
9 the other (inaudible) meetings, ask for more transit.

10 Now the first thing SANDAG is going to say, the
11 color of money. That money is (inaudible) for freeways.
12 Oh, excuse me, a part of that is our local tax and we can
13 move that. And if we move that, we have a greater chance
14 of moving both state and federal money to build transit.

15 So all the complaints about transit stops, about
16 frequency, bus security, all those issues, we can better
17 address if we moved that money.

18 It's not about one small project, it's about
19 \$40 billion right off the bat. The other is timing. When
20 are we spending (inaudible).

21 If SANDAG disguises, is their blue area, which is
22 for transit, the one that explores and make it look good,
23 part of that is pretty high-speed rail for the State. It
24 has no effect on us and it's way down the line.

25 It just makes that blue area a little bigger, to

SANDAG WORKSHOP - SAN DIEGO FORWARD

37

♀

1 make it look like at least 50 percent of the money or more
2 is going towards transit. It's a disguise. It's a
3 misleading statement.

4 You know what this -- also missing is that the
5 cost of transportation also includes Caltrans. That's not
6 on there. We don't have enough money to run our freeways.
7 Was have a real big problem with that.

8 MS. CLEMENTSON: Okay. So I think that it's
9 time -- it is time to wrap up. We've given you your

10 time. Please --

11 MALE SPEAKER: (Inaudible) -- and that's why
12 they said that SANDAG is misleading.

13 MS. CLEMENTSON: Okay. Please have a seat. I
14 will tell you, there are various opinions on all of
15 this. So with that, I think we will wrap up. If any of
16 you do have specific questions about the funding, we
17 have staff available there.

18 Um, if you have specific questions about the
19 greenhouse gas emissions and the targets, the economic
20 benefits, we have information there. I think there was a
21 lot of interest in the mobility hubs and, um, on the new
22 technologies, which you can find those two posters there.

23 And if you have specific questions or comments
24 on a project or the timing of a project, what's happening
25 in the community, we have the various maps back here, we

SANDAG WORKSHOP - SAN DIEGO FORWARD

38

♀

1 have staff who are well aware of the different projects
2 going on in this area.

3 So, with that, I would really like to ask you to
4 thank our panel for being here tonight. We really
5 appreciate your time and your insights and thank you so
6 much.

7 So we'll wrap up here. Again, if you do want to
8 provide public comment, the court reporter is back -- okay.

9 Can you raise your hand for us?

10 Okay. If you want an official comment on the
11 record, please go and see our court reporter or fill out

12 one of these forms and you can give them to any one of the
13 SANDAG staff. But this is the way to register an official
14 public comment for tonight's meeting.

15 Thank you.

16 MS. DUDLEY: Leslie, L-e-s-l-i-e. Dudley,
17 D-u-d-l-e-y. I live in Lincoln Park. I'm a Lincoln
18 Park representative for Encanto Planning. I have three
19 issues I'd like to bring to your attention. One for
20 health and safety reasons, we need a bridge for trolley
21 and trains on Euclid Avenue at Market.

22 Two, we need trolleys that go to the beaches, the
23 zoo and the park for the community.

24 Um, three, we need honesty about the railroad
25 tracks. These are not just trolley tracks. There are

SANDAG WORKSHOP - SAN DIEGO FORWARD

39

♀

1 freight trains that use these tracks. The setbacks are not
2 appropriate for housing and apartments. There's a pretense
3 that they're only trolleys on this track and, therefore,
4 the setbacks for public housing is not sufficient for
5 freight trains and there's going to be a disaster sooner or
6 later because of that problem.

7 ***

8 MS. CASTILLO: Amelia Castillo from southeast
9 San Diego. And I represent Platitando Con Mi Gente and
10 Latino Group, who is working to develop Latino
11 leadership in the community.

12 What we've noticed is no cultural *competency or
13 support, particularly for Latinos, in regards to the

14 Spanish language and the staff.

15 ***

16 FEMALE SPEAKER: I'm referencing to South Park
17 past Gregory Street.

18 Um, what we'd really like to see is the
19 postponement of any freeway expansion project and
20 prioritize really priorities transit structure.
21 (Inaudible) the second thing -- I mean, we also have a list
22 of particular projects we'd like to see included or
23 expedited in the plan that are really important to
24 environmental justice communities. One is, is the double
25 tracking of the blue line and orange line. They're

SANDAG WORKSHOP - SAN DIEGO FORWARD

40

♀

1 currently not in the regional transportation plan. And
2 this would make traveling, um, on those trolley lines much
3 quicker, because it would create an express line for the
4 orange and blue line. So that's been a priority we heard a
5 lot with the communities about the orange and blue line.

6 The other thing is -- well, this is included in
7 the plan currently, but we'd like to see it expedited in
8 the next five years, is the bus rapid transit down 54th
9 Street down into Euclid. It's the same route -- this bus
10 rapid transit is supposedly the same route as the 935 bus.
11 What this would do is make it much quicker for folks all
12 the way in City Heights to get down into National City very
13 quickly.

14 The next thing we'd like to see expedited is
15 currently in the plan, projected to be implemented, built

16 in 2035. And we'd like to seat the purple lines expedited
17 to 2025. On the purple line, it will serve communities all
18 the way from San Ysidro, all the way up and down Kearny
19 Mesa. So touching upon the communities, it's Chula Vista,
20 National City, southeast San Diego, City Heights and all
21 the way to Kearny Mesa.

22 And we see that this region, really lacks really
23 good north/south transit connectors. So it's really hard
24 for people to move north/south region quickly on public
25 transit. So that would be helpful. We want to see that

SANDAG WORKSHOP - SAN DIEGO FORWARD

41

♀

1 expedited also.

2 Another thing that was mentioned tonight, and we
3 hear it all the time from the community, is technical term
4 is grade separation. So grade separation for the orange
5 line. And so what that means is there's a trolley crossing
6 across the street, that trolleys can either go above ground
7 or underground so that cars can flow freely and so people
8 can walk freely at the street level and so that prevents
9 traffic and it also allows for the trolley line to go much
10 faster.

11 And so here in southeast San Diego on Euclid
12 Street, in particularly each side (inaudible) it doesn't
13 meet that as well. The orange line grade separation,
14 that's currently not in the regional transportation plan.
15 That should be a priority to be done quickly.

16 Um, lastly, the other thing that we're really
17 advocating for, is retrofits to existing transit for safe

18 rights to transit. Meaning, um, there's a lot of bus stops
19 and trolley stops where there isn't good sidewalks, or
20 there isn't good crosswalks or street lights. Basically
21 it's like walking into infrastructures. So you can get to
22 that bus stop or that trolley stop safely on the street.

23 And so -- and this is for existing stops. This
24 is currently not in the plan. It originally -- a plan had
25 500 million dollars set aside for this, but now it's taken

SANDAG WORKSHOP - SAN DIEGO FORWARD

42

♀

1 out and we're concerned about that, because we want to make
2 sure people can access both the trolley lines and the bus
3 stops safely and that there's the crosswalks so people get
4 to the sidewalk to help them get there.

5 In particular, I can give you an example. In
6 Logan Heights, I can see the trolley on Commercial,
7 Commercial Street is super dangerous. Um, were both people
8 on bikes, people on foot and even people in cars crossing
9 that intersection with the trolley is dangerous.

10 Um, and lastly, um, it's in regards to the 94
11 freeway project, which is the Martin Luther King freeway,
12 SANDAG, as part of this plan, is proposing on adding extra
13 lanes to the freeways. And, um, communities along that
14 corridor are really concerned because through the adding of
15 extra lanes, the research shows that it doesn't relieve
16 congestion. Actually, congestion reaches the same levels
17 within four to five period as it did prior to the expansion
18 of the transit. And so what that does is you allow more
19 cars on the road, that's gonna increase air pollution, it's

20 gonna increase gas emission, and it's gonna further impact
21 those communities.

22 Another thing as well is SANDAG's saying, Well,
23 it's a transit benefit. So they're throwing the bus on
24 that (inaudible). But there's not one single bus stop
25 being proposed to the impact of community. So see want to

SANDAG WORKSHOP - SAN DIEGO FORWARD

43

♀

1 see a bus stop there, particularly the Sherman Heights
2 area, so that those community members can (inaudible).

3 So we're asking SANDAG to look to making
4 improvements to the 94 freeway, that donate the widening,
5 that include other innovative communities supportive
6 solutions, but also include bus access for folks who live
7 in the neighborhood.

8 And that's it.

9 ***

10 MALE SPEAKER: My name is Robert (inaudible)
11 Ph.D. I'm a chemist by training and a property owner.
12 This meeting was somewhat of a farce, because of the
13 fact it was a advertising section. There was no honest
14 discussion. It was not getting real input from the
15 audience, especially on the engineering details of what
16 has been proposed.

17 There's a singular lack of intermodal connections
18 between the trolley and the bus rapid transit. Since the
19 people are like in the southeastern, are locked in the
20 ghetto, so they can't go north. And why should we support
21 it and, in fact, the planning in the area have not

22 supported this and SANDAG has to learn to listen.

23 Thank you.

24 ***

25 MR. CASTANON: My name is Daniel Castañon.

SANDAG WORKSHOP - SAN DIEGO FORWARD

44

♀

1 D-a-n-i-e-l. Last name, C-a-s-t-a-n-o-n, and I live in
2 the Fairmont Park Community. And my comments are
3 basically with access to transportation from Fairmont
4 Park into downtown.

5 Um, one of the issues we're facing is the SR94
6 project. The PRT that is being planned from the legal
7 (inaudible) 94 west into downtown. I don't have access to
8 that. Um, my concerns is we in the Fairmont Park area do
9 not have much access to get into downtown, especially for
10 when we're summoned for jury duty. Well, we would have to
11 take a bus up to University and down to the trolley station
12 to get to downtown, which will take about an hour. Where I
13 can jump in my car and go down the 94 into downtown in 30
14 minutes.

15 So just when you are planning or if you can take
16 into consideration a smaller neighborhood that is
17 surrounded by the 805 on the east side, the 15 on the west
18 side, along the 94 on the south side, don't forget about us
19 and give us appropriate transportation -- access to
20 transportation to downtown.

21 Thank you.

22 (Whereupon at 8:30 p.m. the deposition was
23 concluded.)

- Colleen Clementson - SANDAG Facilitator
- Phil Trom - Senior Regional Planner
- Dave Schumacher - Senior Transportation Planner
- Kathleen Ferrier - Circulate San Diego
- Nancy Bragado - City of San Diego
- Joe Terzi - San Diego Tourism Authority

1 SANDAG PUBLIC WORKSHOP, THURSDAY, MAY 28, 2015
2 UTC FORUM HALL
3 4545 LA JOLLA VILLAGE DRIVE, SUITE E-25, S. D. , CA 92122
4 6: 30 p. m. - 8: 30 p. m.

5 * * *

6
7 MS. CLEMENTSON: I'm going to ask the Panel to
8 come up and have a seat. And while I'm doing that, I
9 want to get a sense of where people are from. We've done
10 these workshops in seven different areas throughout the
11 region and tried to get people from different communities
12 so they don't all have to travel so far.

13 And I'm wondering, how many folks are from this
14 general area here?

15 (Audience hands raised.)

16 Many of you. Okay.

17 And then, what about any Del Mar or Solana
18 Beach?

19 PUBLIC SPEAKER: Further.

20 MS. CLEMENTSON: Further? Further north?
21 Encinitas? Oceanside?

22 PUBLIC SPEAKER: Vista.

23 MS. CLEMENTSON: Vista? Great.

24 Anybody from San Marcos or Escondido?

25 What about further south, anybody from further

1 south?

2 Holler out and you can let me know.

3 PUBLIC SPEAKER: Poway.

4 MS. CLEMENTSON: Poway.

5 PUBLIC SPEAKER: Rancho Bernardo.

6 MS. CLEMENTSON: Rancho Bernardo; great.

7 Rancho Bernardo too. Great, okay.

8 And then, I also understand that there may be
9 some UCSD students here with us tonight?

10 PUBLIC SPEAKER: Yes.

11 MS. CLEMENTSON: Part of a class assignment,
12 yeah, okay; that's great.

13 Your questions too on the -- so with that, I'm
14 going to introduce the Panel.

15 We have Joe Terzi, and Joe is with the "San
16 Diego Tourism Authority."

17 We have Nancy Bragado, and she is with the
18 "City of San Diego." She's a Planner with the City of
19 San Diego.

20 And Kathleen Ferrier, who is with "Circulate
21 San Diego."

22 And the way we selected Panelists, we tried to
23 identify folks that could cover those main goal areas of
24 the plan; you might remember, we have innovative mobility
25 and planning. We have healthy communities and healthy

♀

1 environment and vibrant economy. Obviously, all those
Page 4

2 areas touch one another.

3 But we're really kind of looking to Joe to sort
4 of represent that economic piece but also, we know you
5 care about healthy communities and innovative mobility.
6 We look to sort of the City of San Diego for healthy
7 communities, healthy environment, and Circulate San Diego
8 for innovative mobility but again, we know that these all
9 crossover one another.

10 So I'm just going to ask each of you to
11 introduce yourselves and tell all of us why you care
12 about the plan or why the organization you represent
13 cares about a long-range regional plan like this, and
14 maybe -- did you guys have -- Ms. Bragado, you wanted to
15 start or shall I just pick someone? I'm thinking we'll
16 start with Nancy because we are in the City of San Diego.

17 This is the local jurisdiction where we're
18 holding this meeting, and so maybe, Nancy, you can tell
19 us your perspective on the plan, the importance of a
20 local city perspective.

21 MS. BRAGADO: Well, thank you very much. Thank
22 you for having me here tonight.

23 I'm Nancy Bragado. I'm the "Deputy Planning
24 Director for the City of San Diego," and we care very
25 much about the regional comprehensive plan because we

1 play a big role in the region and we rely on SANDAG as
2 our partner, especially for transportation planning.

3 So the City of San Diego has 42 percent of the
4 region's population and in terms of the projections, more
5 than half of the regional growth in new housing will
6 occur in the City of San Diego. So obviously, what
7 happens in the regional plan is very important to us.

8 Also, our general plan, which we have as its
9 central theme it's called, the "City of Villages"
10 strategy "City OF Villages," and that's consistent with
11 the San Diego's -- SANDAG's Smart Growth approach, so our
12 strategy is for targeting new growth into mixed use,
13 walkable centers that are linked by the regional Transit
14 system so, of course, we need that regional Transit
15 system to make our plan work.

16 Another way we rely on SANDAG to help us meet
17 our Greenhouse Gas reduction rules, the City has a
18 draft, "Climate Action Plan" out for public review right
19 now. We have some very ambitious goals, including to
20 have Transit, bike and head mode split equal 50 percent
21 of the mode split for commuter trips by 2035. So that's
22 a really big goal.

23 And again, we need this rich Transit system
24 that's being envisioned in order to make that happen.

25 Thank you.

1 MS. CLEMENTSON: Thank you.

2 Kathleen, do you want to go next?

3 MS. FERRIER: Yes.
 Page 6

4 Hi, everybody; just for those of you who aren't
5 familiar with Circulate San Diego, we're a regional
6 nonprofit. We're relatively small. We're located
7 Downtown San Diego. We have about 11 staff people, and
8 our mission is to provide excellent mobility choices and
9 healthy, vibrant neighborhoods.

10 So just by saying that, that's a clear link to
11 why this regional transportation plan is so important
12 from our perspective. Our world is changing, as it said
13 in the video, and it's interesting when you look at
14 transportation that it used to be cars versus Transit.
15 It was more or less these two large buckets, but that's
16 not really the case anymore. We are innovating so
17 quickly, it's really hard to catch up.

18 And a plan like this really needs to tap into
19 those changes we think, and so we'll talk more about
20 that.

21 So really, really providing more mobility
22 choices, and more choices that maybe we haven't even
23 considered five years ago, is something that really needs
24 to be done and then, you know, we do a lot of studies, if
25 you will, around what's changing in the region, and so --

♀

1 and what's driving this need for transportation choices.

2 I think one of the slides that Phil showed
3 talks about how the housing mix is really changing
4 drastically. It's going to be changing so that by, you

5 know, by 2050 most of the growth that we're going to see
6 is multi-family housing, so that means apartments,
7 condos, things like that rather than what we would call
8 "detached housing," so that's a pretty significant change
9 from what we've seen traditionally in San Diego.

10 I think another change to really consider, is
11 that our demographics are changing. SANDAG's population
12 growth forecast talks about 50 percent of future
13 population change is going to be 65 and above. I think
14 that's right; 50 percent, that's significant and, you
15 know, so maybe those folks aren't going to be relying on
16 driving alone anymore.

17 And then, another demographic piece that I want
18 to mention is by 2050, 50 percent of our population is
19 also going to be living within a community of concern,
20 which SANDAG identifies.

21 So all of these different demographic changes
22 really speaks to the need for a comprehensive plan that
23 responds to that, while still providing for health and
24 economy, as we mentioned.

25 MS. CLEMENTSON: Great; thank you, Kathleen.

♀

1 So now we go to you, Joe.

2 MR. TERZI: Thank you.

3 Well, thanks for the opportunity.

4 Probably we have a number of different things
5 that we're concerned about. Some people might think, you
Page 8

6 know, if you're involving tourism, what does that have to
7 do with transportation? Well, we mentioned earlier that
8 we have about three million people living in the region.
9 We have 33 million people that visit the region every
10 year, 33 million; so you can understand when you have 33
11 million people coming into a community that has to rely
12 fairly heavily on transportation, we have a serious
13 concern about how do we accommodate those people that are
14 coming and how do we accommodate the growth we're trying
15 to develop for the community.

16 Our goal really is simple. We want to drive
17 visitation to the region to economically benefit San
18 Diego; very simple. We're out there every day talking to
19 people all over the world about coming to our wonderful
20 destination, for a lot of different reasons we're
21 challenged because, frankly, if you look at the 33
22 million, 16 million people come into San Diego every year
23 on a daily basis and leave. So there are day
24 visitations. A lot from Mexico. A lot from L.A.
25 They're in-and-out, but there are 16 million people every

♀

1 year that come into San Diego to stay, and stay overnight
2 in the region, so it's a significant issue for us.

3 If you think about what is good for local
4 residents in terms of transiting and in terms of using
5 our city, the same thing happens when people come and
6 stay here, they have to rely on the ability to transit.

7 They have to rely on the ability to get to where they
8 want to get to. I think it was mentioned the rail issue
9 is critically important. The rail service between L.A.
10 area and San Diego is the second highest-used traffic
11 route in the country. The first is D.C. to New York.

12 So we have some serious concerns about
13 transportation so we can continue to do our job and
14 attract more people to our community.

15 We also have 173 million -- 173,000 employees
16 that have to rely primarily on public transportation, so
17 it's not just a visitation issue. It's accommodating all
18 the employees in the industry that really rely on
19 transportation, and mostly public transportation for
20 their employment and so, it's a serious issue for us and
21 we're happy to have an opportunity to speak to you about
22 that.

23 MS. CLEMENTSON: Great.

24 And I don't know if all of you know this, but
25 with each of the seven meetings we've had different

♀

1 Panels, so we have different perspectives and I know some
2 of you attended several meetings. So actually, that's
3 what makes these all different and it's great, that way I
4 think we'll go in a similar order, the two questions.

5 The first I'm going to ask, is what do you like
6 in the plan or what did you see in the presentation that
7 you like about the plan, and what do you think could be

8 improved or could be better?

9 So we'll start with the positive, we'll start
10 with the likes.

11 If you have some thoughts on that, Nancy?

12 MS. BRAGADO: Sure.

13 Well, I think there's a lot to like in the
14 plan. Definitely the strong role of Transit in the
15 increase in the Transit line. I know looking for the
16 City -- from the City of San Diego's perspective, a new
17 Trolley line from San Ysidro to Kearny Mesa, I think is
18 very significant and I know we'd like to start updating
19 our Kearny Mesa community plan to see how we can better
20 strategize to work with that new proposed investment.

21 I know the streetcar lines are supported by
22 many of our communities as well. We're doing
23 community-plan updates in Uptown and North Park, and I
24 know those communities are very interested in streetcars,
25 and I think it's great to see that reflected in the

‡

1 regional plan.

2 I think the overall emphasis on active
3 transportation also fits in well with our strategies.
4 Our general plan supports the active living concept where
5 people can incorporate activities with their everyday
6 lives. So by making walking-and-bicycling better, that
7 helps with that aspect. It also helps with work transit
8 so people can get to Transit.

9 I think that the mobility hub concept is very
10 interesting, and I think it could have a lot of
11 applicability in some of our communities, especially
12 where it might be hard to focus, on like kind of a pure
13 Transit-oriented development, maybe some communities can
14 have a subset of transportation infrastructure along with
15 some of development planning. So I think that's
16 interesting.

17 I think it's good that the plan addresses
18 social equity so we can try to make sure that the cost
19 and benefits of these investments are spread throughout
20 the region.

21 And also, as I mentioned earlier, the fact that
22 it does show reduction in Greenhouse Gas Emissions
23 consistent with the state law as well as it looks like
24 the Executive Order as well. I think that helps us also
25 meet our point of action plan goals.

♀

1 MS. CLEMENTSON: Okay.

2 Kathleen, do you want to share some thoughts on
3 what you like about the plan?

4 MS. FERRIER: Yeah.

5 I was also going to mention the mobility hub,
6 just getting back to some of the options that are really
7 developing out there, and it's still not real clear what
8 that's going to be, but it seems to be on the right track
9 and SANDAG has a robust iCommute program, which is

10 basically helping, you know, encouraging folks not to
11 drive alone but to take other modes, and mobility hub
12 falls really nicely next to that.

13 I think another really positive component is
14 just active transportation, that's something that we're
15 really heavily involved in at Circulate San Diego and,
16 you know, we -- what's ironic about this process, as many
17 of you will know probably, is that SANDAG updates this
18 regional plan every four years.

19 And so, I personally went through the last
20 plan, and at that time there was a lot of talk for
21 increased funding for active transportation. So again,
22 walking, biking. Hopefully those are things that you
23 like to do in your neighborhood.

24 But there wasn't really any kind of a strategy
25 for what that was going to be, how those funds are going

♀

1 to be spent, and here we are four years later and it's a
2 totally different scene.

3 SANDAG has developed a bike plan. They have
4 developed what they call, an "Early Action Program" for
5 the bike plan, so that means making sure that certain
6 number of projects are built sooner than later. This is
7 great in our perspective.

8 And then, also developing new kinds of
9 strategies such as safe routes to school. So looking at
10 how we can make our streets safer for kids and families

11 who might want to walk to school and encourage more
12 people to walk, which helps, maybe, you know, hopefully
13 reduce some of the congestion on our streets but also
14 helps people be healthy.

15 And then also safe routes to Transit, which is
16 the same kind of idea, getting people safely to Transit
17 stations, especially those Transit stations which have a
18 higher number of ridership.

19 And so, again, those are new components that
20 were not there before, and we really strongly support
21 that.

22 MS. CLEMENTSON: What about your thoughts, Joe?

23 MR. TERZI: Mine are a little different because
24 we're dealing with people that don't live here but we're
25 trying to attract here, and then once they get here, they

♀

1 will be able to get here easily and once they get here,
2 be able to enjoy our community the same way that you want
3 to enjoy our community.

4 You know, frankly, I think, you know, this
5 planning process is critical to the future of our
6 industry, San Diego. We are a tourist community. There
7 are three major components of our community economically.
8 There's what we are now calling, "The Innovation Economy,
9 Research and Development," all innovative work that's
10 going on in San Diego. The military, which has always
11 been very strong with tourists.

12 So from our standpoint, tourism has a role to
13 play and tourism needs to figure into the planning
14 process in terms of what the tourists need in order to be
15 comfortable in San Diego, and it's not a lot different
16 than what our residents need but there are some
17 differences.

18 So for us, it's making sure that we can improve
19 the direct routes, populations that come here by car, and
20 that's transport on train, principally, and over roads,
21 and there's some great things in there to help that
22 happen.

23 There's some great things in there with the
24 transportation centers that I think are really cool and a
25 lot of people would really enjoy it. If you traveled

♀

1 around the world, most cities have -- you can arrive at
2 the airport in a public transportation, go anywhere you
3 want, underground or above ground. It's a lot easier in
4 most parts of the world and some large cities in our
5 country.

6 We're not necessarily well-equipped for that.
7 I think what we can do to give people the opportunity to
8 use our community more effectively and easier, will help
9 us when we compete with that visitor that we want to
10 attract here from anywhere around the world. I was just
11 in London and Tokyo, and I didn't have to take anything
12 but public transportation to get anywhere I wanted.

13 And so, we love the fact that the planning is
14 happening and it's well-thought out and there's some
15 unique things about it. We'd just like to see it happen
16 soon.

17 MS. CLEMENTSON: Okay.

18 So that's sort of your -- what could be better,
19 and that might be universal among all the Panelists, and
20 maybe even everybody here, how can we make it all happen
21 sooner?

22 Do you have some thoughts now on some of the
23 areas that you think there could be some improvements?

24 MS. BRAGADO: Sure.

25 So "sooner" definitely would be better. I

♀

1 think we can agree with that.

2 I think one point that I'd like to make in
3 terms of what I think could be better, is I think that
4 there needs to be more prioritization in the Smart Growth
5 opportunity areas and where incentives go and how the
6 transportation infrastructure is prioritized to serve
7 those Smart Growth areas.

8 As it is now, you know, the cities all
9 determine what their Smart Growth areas are,
10 as long as they meet the criteria, then SANDAG puts them
11 on the map and then, there's a little bit of regulations
12 if they're existing or if all of the planning is already
13 done; other than that, there really isn't.

14 And I think that if you start looking at the
15 role of the different Smart Growth areas in terms of what
16 role do they play in their city and in the region as a
17 whole, we can start to prioritize some as, you know, as
18 leading to occur sooner and I'm thinking, you know,
19 perhaps there's some related to economic development
20 where you're really linking jobs and housing, or maybe
21 there's some related to tourism where you really need to
22 connect people to major destinations.

23 So I think that's something I'd like to see
24 in the future, and I know that there is work on the
25 regional Transit line and development strategy underway,

‡

1 so maybe just getting some of those concepts in, if not
2 now then, you know, the next one but I do think that's an
3 important point.

4 I think the other thing, I think partially
5 related to funding and what you said about, you know, we
6 need things sooner, but I think we are going to have to
7 all look out for those funding sources. I know that a
8 lot of the Transit lines rely on another TransNet measure
9 or some additional measure funding source. I know it's
10 an important thing to keep in mind, that as a region
11 we're going to be challenged to find the money to
12 build-out the plan and to operate it.

13 MS. CLEMENTSON: Kathleen?

14 MS. FERRIER: I would piggyback on what Nancy

15 said about the Transit-oriented development on the idea
16 that I said earlier. If 82 percent of the housing that
17 we're going to be building in the future is going to be
18 multi-family, and how do we link that better with
19 transit? And certainly we want all of Transit now.
20 There's no doubt about it and that is challenging.

21 But what's interesting is that the Federal, and
22 at the State level, the funding sources that are
23 available, they've changed over time and so they're
24 really rewarding those regions who are planning for more
25 sustainable transportation choices and so, there's more

♀

1 funding out there for Transit projects than in the past.

2 And in the lines of even what kind of
3 funding -- how funding can be spent have become a lot
4 more blurred, whereas before it used to be very
5 compartmentalized, and the cities -- regions could spend
6 money, certain kinds of money on highway projects and
7 other kinds of money on transit projects, that's just not
8 the case anymore.

9 So again, the funding sources really want to
10 reward regions who are planning for more Transit, so-
11 whereas, yes, it's definitely challenging to build more
12 Transit and advance those projects. The funding out
13 there is really looking for that.

14 And so, we really want to see a heavier
15 emphasis on Transit projects and, what Nancy said, to

16 connect our neighborhoods and really to connect important
17 job centers. So I think, you know, Sorrento Valley is a
18 great example, how that's just kind of a tough spot right
19 now going up 805.

20 And some of the -- another concern we have, is
21 the kinds of Transit projects that aren't moving forward
22 rely on highway widening in order to get to the Transit,
23 so these managed lanes that Phil talked about.

24 And, you know, theoretically that works really
25 well, but we think that Transit lines can be advanced

♀

1 that are just pure Transit and really connect the places
2 that we need to connect in advance of widening our
3 freeways and it could be more cost-effective too.

4 And so -- and again, you know, the funding
5 sources are there.

6 And then, you know, I mentioned active
7 transportation before, and it's just -- it really is
8 great to see the advancement that had happened but, you
9 know, we've looked at a lot of -- looked at safety on our
10 streets for people walking and biking, and it's not safe
11 right now to walk and bike on a lot of our streets, and
12 we've got the data that shows that.

13 And so, by investing in these safe routes to
14 Transit and safe routes to school projects now, really
15 advancing those projects, that's something else we want
16 to see and what's currently in the plan is really to

17 delay those investments.

18 MS. CLEMENTSON: And, Joe, your thoughts on
19 what you've seen in the plan so far that you think maybe
20 could be improved?

21 MR. TERZI: You know, I think one area that
22 we're concerned about is the continued -- well, the work
23 at the airport, the expansion of the airport and
24 connecting the airport to the transportation systems. I
25 know that's part of the plan, maybe at a later stage, but

SANDAG WORKSHOP - SAN DIEGO FORWARD 20

†

1 we'd love to see a better connection between the new,
2 and the new construction at the airport where people can,
3 you know, arrive at the airport and efficiently transit
4 to public transportation and get to some of the
5 population or the centers of Downtown or Mission Valley
6 or Mission Bay, wherever they want to be.

7 Another thing is what we're interested in, and
8 maybe it doesn't fit in the short-term plan for the --
9 what you're doing, is it's not necessarily transportation
10 within the communities, it's more to the major
11 attractions and so, you know, how can I get to San Diego?
12 We get asked all the time, "how can I get to the beach?
13 How easy is it to get to the beach from my hotel or to
14 downtown or from some other place"?

15 And it's really not that easy. There are ways,
16 but it's really not that easy.

17 I'd also like to see, eventually, a little bit
Page 20

18 more attention paid to accommodating. We do have some
19 issues with accommodating signage (inaudible) be friendly
20 to people that are not necessarily from our country, and
21 the expansion into California is huge, and it's all going
22 to come to accommodation.

23 So we need to -- if we're going to be a player
24 in that, we need to recognize there are different
25 requirements that the people that are visiting us have,

♀

1 and I think that's something we need to talk about.

2 MS. CLEMENTSON: Okay.

3 Well, these have all been really good
4 observations and comments.

5 And so, now I'm happy to ask if anybody in the
6 audience has any questions for our Panelists? They've
7 put out a number of ideas and -- yes, so if you just
8 raise your hand I will head over and I'll hold the
9 microphone and you can speak.

10 PUBLIC SPEAKER: Okay.

11 My name is Dan Allen, and I was a member of the
12 Advisory Group from the Stakeholders Group for 2050 RTP,
13 apparently, I thought, finished four years ago.

14 I bring up the question of looking at the
15 Transit Network. I see four or five -- three or four
16 major changes to the Transit Network. I thought when I
17 was reading the (inaudible) but somewhere along the line
18 it's been changed fairly radically.

19 And I was wondering when did that happen or
20 did I miss the chance, or is tonight the chance to
21 comment about transit corridors?

22 MS. CLEMENTSON: So we can talk about the
23 opportunity here, but we update this plan every four
24 years. I don't know if that came through, and we make
25 adjustments with the plan. I think the last two plans,

♀

1 this plan and one before it, there are many similarities.
2 I think we made a big leap from the plan before that,
3 which may have been the Stakeholder working group that
4 you were on, where there was a pretty significant shift
5 toward public Transit.

6 But any thoughts from the Panel on kind of
7 changes in our vision in the plan from where we were
8 perhaps in the plan eight years ago or ten years ago, or
9 twelve years ago?

10 THE PUBLIC: No.

11 MS. CLEMENTSON: There's a question here.
12 (indicating)

13 PUBLIC SPEAKER: My question is primarily for
14 Nancy, but for the others too.

15 But there are some bottlenecks in the City that
16 seem to be low-hanging fruit, and we saw City council
17 fail to act on connecting Tierrasanta Boulevard across to
18 Mission Gorge Road, and we see that it's very difficult
19 to expand Regents Road area.

20 And I'm wondering if -- so for you it's really,
21 what is the City of San Diego doing and how does that
22 align with our goals to reduce emissions?

23 Then also for SANDAG, is there an effort to, I
24 mean, identify the problems where we have traffic that
25 just sits there and idles to not only relieve emissions

♀

1 but maybe relieve the stress on the people?

2 MS. CLEMENTSON: So I think that's a good
3 point, that even with our -- to support the Transit
4 Network, we need roads that work. I think that's a
5 common thing that we hear all the time.

6 I don't know, Nancy, if you want to comment on
7 that?

8 MS. BRAGADO: Well, we do have a -- in terms of
9 specific projects or specific roads or specific plans, we
10 do have mobility planners and traffic engineers in the
11 City that review these plans and actually, the City's
12 formal review of the San Diego Forward plan is including
13 our Engineers that are looking at specific projects. We
14 haven't completed that very technical review yet.

15 Overall, we do -- we have a series of community
16 plan updates underway, and as a part of each of those
17 plan updates, we do a multi-level mobility study. So we
18 look at roads. We look at Transit service. We look at,
19 you know, bicycles, pedestrians, Transit and we do make
20 recommendations to SANDAG for inclusion in their plan for

21 consideration so we're not entirely reactionary to the
22 plans that are going on right now.

23 Our City Council recently passed a resolution
24 directing us to do an amendment to the University plan to
25 take out a bridge, so we are studying that now. We are

♀

1 doing an Environmental Impact Report that will look at
2 all of the ramifications of that, but that is the current
3 policy direction from our City Council.

4 MS. CLEMENTSON: Do you have a question?

5 PUBLIC SPEAKER: Yeah; this is sort of a
6 general question.

7 All three of you mentioned and sort of stressed
8 this issue about the need to link current trends with
9 Transit, not with more vehicles necessarily.

10 For instance, when you visit a foreign city, I
11 do the same thing, I use public Transit everywhere. I
12 can go wherever I want on public Transit, you can't do it
13 in San Diego and if you want to link it with housing, you
14 could do a better job with housing linking to Transit.
15 The population is going to get older and multi-family;
16 you're not going to be able to put more cars necessarily
17 on the road, because you're going to have to put more
18 Transit.

19 Same thing with active Transit, with active
20 Transit you have to have, of course, the public Transit
21 system to service the active Transit. I can't go

22 anywhere on my bike, even if I try to.

23 So is there a coalition building of all these
24 groups to say we need to reprioritize and front-load more
25 of the Transit over vehicles?

♀

1 MS. CLEMENTSON: So just -- I think -- first
2 of all, I think this plan definitely gives much, much
3 higher priority to Transit than anything we've ever seen
4 before.

5 But just to kind of think about this question:

6 Do the three of you, based on the work that you
7 do and your interactions with community folks and
8 businesses, are you seeing a coalition or a trend toward
9 that?

10 Maybe, Joe, tell us what your thoughts are.

11 MR. TERZI: Comparing those is because the
12 tourism marketing district in San Diego, which is the
13 funding mechanism for promoting tourism, has contracted
14 with enhancing to do a 20-year master plan. One big
15 component of that is transportation, and it's not just
16 cars. It's how do we provide for transportation to be
17 competitive in a very competitive world and tourism?

18 And a lot of it has to do with the same thing
19 you just talked about: How do you make it easy for
20 somebody to use the community and be here and enjoy it
21 and not have to use anything but public transportation?

22 So I don't think the answer -- I'm sorry to say
Page 25

23 this -- is more lanes. I think that's necessary. I
24 think the answer is much more -- much better, much more
25 efficient. It should be light rail. It's very

†

1 expensive, but, you know, I don't know why we don't have
2 a light rail going right out the 15 and right out the 5,
3 all of that kind of stuff, that's a longer-term vision.

4 But, you know, putting more roadways in helps,
5 but that's not a long-term solution, I don't think. I
6 mean, that's my opinion.

7 MS. CLEMENTSON: Did I see a hand up back here?
8 (indicating)

9 Oh, and then I'll come to you, Jim.

10 PUBLIC SPEAKER: Yes.

11 I hear all these plans, which sound absolutely
12 wonderful, but Kathleen makes a notion that there's money
13 out there for Transit, but I don't hear any of you saying
14 we have a whole new problem. Where is the money coming
15 from? I think me being a very senior citizen, taxes are
16 going to go up.

17 Now, you can't be doing all these fancy things
18 without money. So who -- one, two, three -- who is into
19 the money? Who's looking for it? I think Kathleen has
20 said, "money's out there, yes, it's done."

21 But who's looking for it?

22 MS. CLEMENTSON: Who's looking for it?

23 MS. FERRIER: We're all looking for it.

24 MS. CLEMENTSON: Who is looking for it? Come
25 on, one of you must know.

SANDAG WORKSHOP - SAN DIEGO FORWARD

27

♀

1 MS. FERRIER: So that --

2 MS. CLEMENTSON: Do you want --

3 MS. FERRIER: No -- well, just that with
4 funding, like everything in our lives, as we advance, as,
5 you know, as years go by things change, priorities
6 change, demographics change, our relation changes and so,
7 funding responds to that.

8 And so again, you know, funding may not have
9 been available years ago for things like car-sharing or
10 bike-sharing where you can basically rent out the bikes,
11 but that's available now, so it's important to recognize
12 that.

13 MS. CLEMENTSON: So just that -- we do have a
14 financing plan for this plan, and --

15 PUBLIC SPEAKER: We do?

16 MS. CLEMENTSON: We do.

17 And so, SANDAG does that and actually, we have
18 a number of charts that kind of show how that funding is
19 allocated, generally what it comes from. We have a
20 better idea of what funding is available in the
21 near-term, in the next five years, the next ten years.

22 As we look out further-and-further, we kind of
23 look to the past of what sort of funding was available to
24 project. So that's one of the reasons we do this plan

25 every four years. We look again at what the financial

♀

1 projections are.

2 Maybe, Kathleen, your comment was that you're
3 seeing that various programs that are offered maybe at
4 the State-and-Federal level where a city could apply for
5 a grant or a community organization could apply for a
6 grant, now they've sort of increased the types of things
7 you could apply that grant to do.

8 So now you could get funding for a bike-share
9 where maybe ten years ago nobody had heard.

10 MS. FERRIER: And to focus on sustainability.

11 MS. CLEMENTSON: So I think that's --

12 PUBLIC SPEAKER: It's so much more important
13 that, and likely, much more likely to be funded if you
14 say accessible to everyone, "Look, we have all the money
15 in place. We know where it's coming from. Now we know
16 what we're going to do with it. We're going to do this,
17 this and this and we have all the money set up," instead
18 of which say, "Oh, we're going to do this. I'm going to
19 build a second story on my home, but I've got two
20 gardeners come every week and they're being paid.

21 Sure; when I get the money. I'm going to look
22 for it. It's out there."

23 MS. CLEMENTSON: Well, you know, it's a really
24 good point and you actually sound very much like a
25 planner.

♀

1 So the first thing we do in the process, is we
2 put our wish list together, then we figure out how much
3 money we have, and then we apply that money to the
4 highest priority project. So that -- you're -- we sign
5 you up for SANDAG.

6 PUBLIC SPEAKER: Uh-huh; if you can afford me.

7 PUBLIC SPEAKER: There's been a lot of
8 speculation tonight about the importance of Smart Growth
9 incentives, and my question is directed to you, Nancy.

10 Do you think that SANDAG should and can
11 incentivize cities to really focus on an advanced
12 development in these Smart Growth opportunities in our
13 City and if so, how should SANDAG do that?

14 MS. BRAGADO: Well, SANDAG does have the Smart
15 Growth incentive program, and the City of San Diego has
16 made as full use as we can of that program. We had a
17 number of projects funded every cycle that that's come
18 out. So I think that is an important tool and, of
19 course, we welcome, you know, expansion of that program.

20 And then I would add to it. I think what I
21 mentioned earlier, that I think that it's not just
22 providing incentives for the planning of Smart Growth,
23 but actually prioritizing the infrastructure's money to
24 support those Smart Growth areas that are considered the
25 highest priority.

♀

1 MS. CLEMENTSON: There's a question here.

2 (indicating)

3 PUBLIC SPEAKER: Yes.

4 I really like what Kathleen was talking about,
5 about active transportation and also the regional plan
6 talking about serving the open space, but in my
7 experience as somebody actively working in my community,
8 the prioritization for open space is in the East County
9 not in our communities where our children can just go out
10 and play.

11 And a lot of the active transportation projects
12 want to take away our natural spaces for paved bike
13 paths, which are a good goal but not in our open space.

14 So I'm wondering how, in these coastal areas
15 where land is at a premium and open space is a premium,
16 do we create an active transportation network that does
17 not encroach upon our open space?

18 MS. CLEMENTSON: So that's a good question
19 maybe for any of the Panelists.

20 How do we kind of balance that, the active
21 transportation open space areas? I know our canyons are
22 something that make this region so unique compared to
23 others.

24 It looks like, Nancy, you are ready to say
25 something.

♀

1 MS. BRAGADO: Well, with our community planning
2 and for -- we address issues with parks and open space
3 and active transportation with every project. So what we
4 try to do first and foremost is the open space area, you
5 know, that they're preserved. A lot of them are
6 preserved for habitat areas, so there's very strict rules
7 about what is or isn't compatible with those areas.

8 And we have a larger like, say, "exact park
9 planning program" within the Planning Department where we
10 try to make sure there's enough, you know, active-use
11 parks for people playing ball fields, all those kind of
12 amenities.

13 But then, we also try to make sure that there's
14 at least a small park or pocket park within walking
15 distance of people's homes.

16 So we try to blend those three things to create
17 an overall system. And one example would be in a plan
18 that we're getting ready to bring to council for adoption
19 in the Grantville area where it's going to be a higher
20 intensity Transit-oriented development right at an
21 existing Transit station. So that's a good return on
22 that public investment but we're also planning for
23 expanding -- or creating a San Diego river park master
24 plan with a linear trail along the park, along the river
25 that people can walk to.

♀

1 And then, we've looked through our broader
2 community area in that area to make sure there's enough
3 sports fields and active youth parks for the population
4 as well.

5 MS. CLEMENTSON: So it is -- I think that's a
6 really -- it's, you know, we talk about this big picture
7 vision, and how does that come to reality at a community
8 level? I think that's important.

9 Kathleen, did you want to add something to
10 that, or Joe?

11 MS. FERRIER: Well, just with, you know,
12 getting to your question about active transportation.

13 My experience with those projects and what I
14 know from the bike master's plan in SANDAG's plan, it's
15 really taking advantage of the routes where there's
16 existing right-of-way and building the bike network
17 within the existing right-of-way.

18 And what that means, is on an existing road or
19 path so not -- so as not to encroach further.

20 So, you know, we're certainly -- we're trying
21 to really maximize those opportunities.

22 MS. CLEMENTSON: Joe, you had something to add
23 to that? It looked like you wanted to say something.

24 MR. TERZI: Well, I'm just -- it would be
25 interesting to think about the -- where you project the

♀

1 growth and population of the residents. It's more
2 density kind of in the same area. So I don't know if
3 that's a simple way to look at it.

4 But I think the plan the City has to, or talk
5 about doing is making sure the open space is great, but
6 it's all in East County and the canyons so it's really
7 not useable. The open space used for active use it's, I
8 think, critically important and I think the City is
9 addressing it.

10 I would hope that communities will continue to
11 raise their hand and say, you know, we need to have
12 something available in our community as the density
13 planning goes forth, because as you're putting more
14 density in the same area, you're either going to go
15 higher or wider or you're going to use land.

16 MS. CLEMENTSON: There's a question here.

17 PUBLIC SPEAKER: I guess my question really
18 pertains to the financing of these plans. It's, I guess,
19 how has SANDAG, the City of San Diego and County of San
20 Diego looked at cutting red tape to get these projects
21 out quicker and, you know, save the taxpayers some money?

22 Have you looked at that at all?

23 MS. CLEMENTSON: We are constantly looking at
24 that; yeah. One thing that would help is the lack of
25 lawsuits.

1 PUBLIC SPEAKER: I just want to add to the
2 gentleman who was talking about the low-hanging fruit.

3 There are many streets and roads in the whole
4 County that should have been built 20 years ago; that
5 because somebody in that neighborhood said, we don't want
6 the road. I mean, 15-and-5 would not be anywhere as bad
7 as it is if they hadn't (inaudible), they are.

8 Right now I know there's a big study about
9 Mission Valley, how do you do that there? There's three
10 little projects that could be put in immediately that
11 should have been done a long time ago.

12 One bridge over the Colorado River. A
13 connection between the I-15 between the two shopping
14 centers. The newest -- the new -- hold on --
15 development, and that's Encinitas should be connected up
16 to 805 and above. There's none of that, just
17 infrastructure from the 805, you can't get to it. But
18 there's too many -- if something is good for the whole
19 region or San Diego, it should be the whole -- it should
20 be more important to get something built than just for
21 one little neighborhood, and somebody at the City needs
22 to stick up and fight for that. I'm not sure who that
23 is. The planner? The engineers? I mean, the engineers
24 would likely build a road that (inaudible), but it's not.
25 That's on the map out there.

1 But it's like, put the roads in but take care
2 of the neighborhood so they don't get impacted because
3 that can be done. It's just, they don't think -- they
4 think they're going to -- whatever they think. I don't
5 know.

6 MS. CLEMENTSON: So I think these are good
7 points, you know, as we get into the details it's always
8 a challenge.

9 Okay, you're right here and then I'm coming
10 there and then I'm going there, and somebody's helping me
11 figure out who I'm missing now.

12 PUBLIC SPEAKER: I'd like to know how there's
13 anything forward thinking about all these billions of
14 dollars spent on fancy, fast buses, Trolleys and bicycle
15 routes versus exactly what you were alluding to, which is
16 like where I'm going right down 15 and 5.

17 Has anybody done any serious thinking on what
18 that would cost? Because this is extremely expensive and
19 it's not modeled.

20 MS. CLEMENTSON: Okay; that's good.

21 Do you have --

22 MS. FERRIER: I can actually comment on that.

23 Just, you know, from my perspective that we
24 share at Circulate San Diego, is we're real strong
25 supporters of Bus Rapid Transit. Those buses that you're

1 talking about soon.

2 SANDAG has recently launched a Bus Rapid
3 Transit service between the City of San Diego and
4 Escondido, and then another one on El Cajon Boulevard and
5 really the central core of San Diego, and they had
6 experienced much higher ridership than even what they
7 anticipated.

8 And so it's cost-effective, in that, it's not
9 as expensive to run those -- I shouldn't say "run," but
10 to build those projects as it is the rail, but it can
11 also serve the population that wants to ride Transit in a
12 cost-effective way.

13 PUBLIC SPEAKER: Has anybody looked at rail,
14 light rail between 805 and 5 that is moderate?

15 MS. CLEMENTSON: So I think your question is a
16 really good one, and I think there probably are planners
17 here who could talk in great detail about all of these
18 projects.

19 I don't know -- Dave Schumacher, you're our
20 Transit Planner.

21 Is that anything that we've looked at or not,
22 or is there something we could look at some point in the
23 future?

24 MR. SCHUMACHER: So you're talking -- just to
25 make sure I understand -- a light rail-line along

♀

1 "Interstate 15"?

2 PUBLIC SPEAKER: Right along the 5, over by the

5-28-15 Court Reporter Discussion UTC
3 15; uh-huh.

4 MR. SCHUMACHER: Along "Interstate 5"?

5 PUBLIC SPEAKER: Just as he mentioned, right
6 down the 5 and the 15.

7 MR. SCHUMACHER: Yeah; well, the I-5 Corridor
8 we're looking to expand the Coaster service.

9 PUBLIC SPEAKER: Would that be right down over
10 Highway 5 and over 15 where the land is already owned, a
11 light rail right over that freeway?

12 MR. SCHUMACHER: Studies were looked at a long
13 time ago along Interstate 15. It was concluded that
14 light rail would not be a cost-effective investment as
15 far as Bus Rapid Transit, and I'd have to answer in more
16 detail than the question-and-answer period, but we have
17 put those in the past.

18 MS. CLEMENTSON: Okay.

19 I'm going to go up to the front, because you've
20 been waiting patiently. You've also come to three
21 meetings -- or is this your fourth?

22 PUBLIC SPEAKER: Third.

23 MS. CLEMENTSON: Third? Okay.

24 PUBLIC SPEAKER: So I just wanted to ask,
25 whether you think we have the right balance of off-peak

1 and recreational Transit, in terms of tourists generally
2 prefer rail? They have sort of rail lives.

3 And do we have the right balance there then to

5-28-15 Court Reporter Discussion UTC
4 get them between destinations, in your opinion?

5 MS. CLEMENTSON: I don't know if any of you
6 probably had a chance to look in great detail at all of
7 that.

8 But what you're asking -- let me understand
9 this, that you're asking about kind of a balance between
10 rail and bus Transit?

11 PUBLIC SPEAKER: Uh-huh; in terms of what
12 tourists prefer.

13 MS. CLEMENTSON: In terms of what tourists
14 prefer.

15 Are there any thoughts, from your perspective,
16 on what you hear that tourists prefer?

17 MR. TERZI: I -- we are not an easy city, first
18 of all, where tourists can use public transportation.
19 We're just not.

20 PUBLIC SPEAKER: (Inaudible.)

21 MR. TERZI: Well -- and do we have it? Yeah.
22 Is it easy to understand? No. There are a lot of
23 connections. It's not one. It's not a subway that you
24 can take a subway anywhere, you get off and you go to
25 where you're going. So there are connection between, you

1 know, whether it'd be the Coaster or the Trolley and then
2 the bus and then, you know, another bus.

3 So it's a very difficult thing for somebody
4 that doesn't know the community and is trying to get

5-28-15 Court Reporter Discussion UTC
5 somewhere, it's not easy. So I just think that we have a
6 lot of opportunity to be more friendly, and maybe part of
7 it is communication and maybe part of it is detailing for
8 people, "here's how you interact with our community from
9 a public transportation standpoint."

10 We have a lot of work to do.

11 MS. CLEMENTSON: I think we'll take a couple
12 more questions for the Panel, and then we will break so
13 you can ask your more detailed questions with Staff.

14 So we'll take this question and if there's
15 another one, we're happy to take that and then we'll
16 see --

17 PUBLIC SPEAKER: What's going to be done to
18 better coordinate the land use and Transit transportation
19 decision? Because I've seen a couple of instances lately
20 on issues where you can clearly see land use and
21 transportation that are not being coordinated, like you
22 see the Trolleys have been going through industrial areas
23 and single-family houses.

24 And actually the City's like saying, "we want
25 to leave this industrial because of --" "that's what the

♀

1 industrial landowners want."

2 And then you have, on the other hand, we have
3 one Paseo where there's not even a single bus route going
4 anywhere near there and -- yeah, I just wonder that -- I
5 think there needs to be more planning so that Transit

6 serves the density and the density is served by Transit,
7 rather than Transit running through industrial areas and
8 big density where there's no transit.

9 MS. CLEMENTSON: Good point.

10 I think, you know, the timing, too, when things
11 happen is really, really critical. So ...

12 MS. BRAGADO: It's certainly our objective to
13 do good coordinated land use and transportation planning
14 and Transit planning. Some of the examples you cited
15 with Transit lines going through industrial areas,
16 sometimes that's because that's where right-of-way
17 existed and so, you know, there's some portions that
18 don't have a high-density potential but some do, so it's
19 kind of trying to balance those things.

20 We do value our industrial lands because
21 they're big job generators. So again, it's kind of
22 looking at the system as a whole and where you can get
23 the most effectiveness in terms of meeting these goals
24 for economic prosperity for housing as well as for
25 mobility.

‡

1 MS. CLEMENTSON: Is there another question?

2 Okay, we'll take these two questions, and to
3 wrap it up, if each of you want to say a few remarks I'll
4 provide you that opportunity.

5 PUBLIC SPEAKER: Hi, my name is Allison Barton,
6 and I'm a member of the University City Planning Group

5-28-15 Court Reporter Discussion UTC
7 here that meets here monthly.

8 I heard some comments in the room this evening
9 regarding the "Regents Road Bridge," and I know that it's
10 contentious. I think it's worth mentioning that.

11 So I represent the area of La Jolla Colony in
12 UTC. The feedback I receive, is that everybody is very
13 happy that that Regents Road Bridge has been removed in
14 the plan. Regents Road does sit on --

15 PUBLIC SPEAKER: No. No.

16 MS. CLEMENTSON: Okay, I think this is not the
17 right time for our meeting, everything was going well.

18 PUBLIC SPEAKER: All right; yes, I will see.

19 So I think it's worth noting, that a lot of
20 people in my group are happy with it and that Regents
21 Road does sit on a very large elementary school, Doyle,
22 which has over 800 students.

23 So while you had mentioned that you were
24 looking at areas to help it so more people can walk to
25 school, I feel personally this is not a UCPG, that by

1 keeping the open space open in Rose Canyon and not
2 building more bridges around the school, that will
3 incentivize more people to walk to the local schools.

4 MS. CLEMENTSON: Coming over for the last
5 comment.

6 PUBLIC SPEAKER: So that's still crazy.

7 But you guys had mentioned a little bit about

8 safe routes to school and safe routes to Transit. I
9 assume that's like maybe widening bike paths on the side
10 of the roads, things like that, but you've also mentioned
11 first mile and last mile and I was wondering if that's --
12 that's something that really more concerns me if I'm
13 working up in like Carlsbad and taking the first mile to
14 even get to a Transit -- or at least it's pretty much
15 nonexistent.

16 And I know like in cities like Boston you have,
17 you know, parking structures where there's mass Transit.
18 We have little strips of asphalt where, you know, some
19 cars can park.

20 Is there more plan to, you know, build-up when
21 there is a mass-transit area? Like even UTC, is the
22 parking going to be sufficient here to accommodate that
23 future growth?

24 MS. CLEMENTSON: So I think you're asking a
25 couple of really good questions, and maybe part of what's

♀

1 in the plan we can address with you.

2 But just safe routes to Transit in general, I
3 think that's something that definitely has been generally
4 incorporated into the plan, but certainly is something
5 that I know is important to all of you.

6 Any comments?

7 I think you did ask the question:

8 What does that mean? What does "safe routes

5-28-15 Court Reporter Discussion UTC
9 Transit" mean?

10 MS. FERRIER: I can speak to that.

11 Safe routes to schools is -- I will highlight
12 two things, although it's actually a really robust
13 program, but part of it is just making the existing roads
14 safer for walking or for biking.

15 And so, you know, that can be different kinds
16 of crosswalks. It can be different kinds of things, that
17 you might slow vehicles in certain areas just to make it
18 safer so that if a kid, you know, recognizing that there
19 are more kids in certain areas around the school to make
20 it safer for them and their family.

21 But then there's also another component, and
22 this is partly what SANDAG has funds to encourage, and
23 that's education. So education to families and to
24 students about how to be safe on their bikes, how to be
25 safe walking and then encouraging them to walk, bike

SANDAG WORKSHOP - SAN DIEGO FORWARD

44

♀

1 home for academic performance reasons, those kinds of
2 things.

3 MS. CLEMENTSON: Okay.

4 If each of you want to make some closing
5 remarks, that's fine. You don't have to.

6 MR. TERZI: Sure.

7 I don't see tourism driving this. I think
8 tourism is a component of what happens, but I think it's
9 great to see planning processes.

10 When I looked at that, I saw that first chart
11 last time it was presented in 1999, and you look at what
12 was anticipated to happen and what is now planned on
13 happening, it's dramatically different.

14 And so, I guess if you talk about "Well, why
15 did this happen? Why did that happen"? You're planning
16 these things years-and-years in advance, and things have
17 changed dramatically.

18 So I think planning process is important, but a
19 planning process of 20 years is great, but ten years from
20 now it might be totally different than it is now. So I
21 think flexibility and the ability to, you know, continue
22 to dialog on what makes sense based on the current
23 condition of the new projected future is really
24 critically important. I applaud, you know, these guys
25 for having the opportunity to talk about it and for, you

♀

1 know, listening. Not everyone is going to get what they
2 want. I love a lot of things that would help my job
3 easier but it wouldn't help a lot of people in the
4 community.

5 So we just want to be part of making sure that
6 the industry that we support, is considered when
7 decisions are made and the other part of that is really
8 critically important, is 173,000 employees in the
9 industry primarily rely on public transportation to get
10 to the centers where they work.

11 MS. BRAGADO: So I think I'll close with sort
12 of a recognition that I think is obvious, just by the
13 questions you've all asked.

14 But, you know, it's easy to come up with really
15 good policies and ideas, but it's difficult to implement
16 them because real life gets complicated.

17 So, you know, on paper it sounds great to, you
18 know, to have reduced congestion or to help people get
19 around, but then it's like trying to prioritize that with
20 Transit or the idea of crossing canyons with bridges to
21 help interconnectivity.

22 But then, you have the issue with the open
23 space. So there's always these give-and-takes of all of
24 our policy initiatives. So I think a lot of it is going
25 to be about balancing multiple goals and trying to get

♀

1 the best result that you can.

2 And I think we also need to be flexible with
3 implementation that sometimes, you know, you have to take
4 things incrementally; you have to build good examples and
5 do something right and then do something somewhere else
6 that maybe pushes the boundaries a little bit more to get
7 people used to ideas, to show that things can work and to
8 really respect people's opinions because we're not
9 looking at, you know, cookie-cutter solutions. Not every
10 Transit stop has to look the same. Not every Transit
11 stop is high density. Not every Transit stop is an

12 5-28-15 Court Reporter Discussion UTC
employment center.

13 There's a role for different places and
14 different types of development and different facilities
15 throughout the region.

16 MS. FERRIER: Great; that's great. Two great
17 comments.

18 And I would just agree with that because it is
19 a very difficult balancing act, lots of trade-offs at the
20 community level, at the regional level.

21 One thing that I was thinking about that's just
22 an overarching concern, and this really gets to, I think,
23 what Nancy said about just keeping on trying different
24 alternatives, but SANDAG, as part of its planning
25 process produces performance measures which means they

♀

1 Look at how, you know, based on all this stuff, all the
2 money we're spending, all the routes that we need
3 projected -- or that we're planning, you know, how --
4 what kind of difference is that going to make? And on
5 the Transit side, if -- and after billions of dollars, by
6 2050, if on -- the investments are only going to yield
7 two percent to three percent more transit ridership in
8 this region.

9 We just heard Nancy say that, you know, they
10 actually have a local plan that projects they want 50
11 percent -- well, actually, it's only 25 percent of
12 commute trips to be by Transit. So there's a big gap

5-28-15 Court Reporter Discussion UTC
13 there. And certainly our region is very diverse.

14 And I know that the modeling capacity, just
15 looking at no trips from Poway versus urban San Diego,
16 are very different, and I know SANDAG is working on some
17 corridor analysis.

18 But, you know, I think -- or we think at, I
19 guess it's Circulate, that this very small change in
20 Transit ridership is really the result of the need to
21 better coordinate land use and Transit, but also to
22 really focus more on Transit and not widening the roads.

23 And so, widening roads can be a strategy that's
24 part of our vote, you know, what voters approved, but
25 we'd really like to see those Transit projects moved up

♀

1 so that we can get more bang for the buck, so to speak.

2 And especially for people who depend on our
3 Transit because right now, we, you know -- and one way to
4 do that is to make Transit more timely.

5 So I don't know what that magic bullet is. I
6 think it's very difficult but right now transit trips are
7 twice the time than driving alone. So as long as that's
8 the case, then we're going to keep driving. I do the
9 same thing.

10 And so, you know, trying to figure out a
11 balance to make Transit work better is really, I think,
12 an important goal to consider.

13 MS. BRAGADO: I'll just clarify one point with

5-28-15 Court Reporter Discussion UTC
14 our Climate Action Plans, the high notes we're looking
15 for is in Transit priority areas. So we're not looking
16 at city-wide, which makes it a little more feasible but
17 still a very high target to reach.

18 MS. CLEMENTSON: Okay.

19 So with that, let's thank our Panelists.

20 Thank you so much. Thank you for answering the
21 questions for us.

22 So again, I just want to remind you if you
23 wanted to make an official public comment, we have these
24 comment cards you can fill out; you can give them to any
25 one of the SANDAG staff.

♀

1 We have Gloria in the corner to type down
2 whatever it is that you want us to know, and you're also
3 invited to come to either or both of the public hearings.
4 Please do sign in with your email address if you'd like
5 to get future updates, times and meetings and where those
6 will be and when.

7 So thank you, everybody, for being here too.

8 * * *

9

10 PUBLIC SPEAKER: Pedestrian bicycle bridges:

11 They are really good and can be very useful
12 when used; however, more effort and thought must go into
13 planning how they connect to something. These zig-zag
14 ramps back-and-forth to the sidewalk don't work, people

5-28-15 Court Reporter Discussion UTC
15 won't use them. They need to go into where they're
16 connected to. They need to get the easements, the
17 right-of-way to people and put the path and connect
18 something, not just zig-zag at the sidewalk; okay.

19 Trolley speeds: Right now, it is no matter how fast
20 they are going, is perceived to be very much slower than
21 it keeps going. They slow down a lot, and I understand
22 there's construction going on right now; however, even
23 when there's no construction they slow down a lot. Some
24 effort needs to be made into fixing these issues what
25 makes it slow down so much, fix it; whatever is slowing

♀

1 the Transit, whether it's the tracks, safety issue,
2 something else, fix it. Get rid of it so that Transit
3 can be on their way and take people where they need to
4 go. The people will ride them. Okay. Okay.

5 The trains, the tracks to Del Mar: Instead of
6 building a big giant tunnel through Del Mar to avoid the
7 bus, I'd put in one tunnel for just northbound tracks,
8 should be cheaper and easier to construct and leave the
9 southbound tracks on the bluffs. After the tunnel is
10 built and the tracks are near, you could keep the tracks
11 in there and then fix the bluffs so there's no issues
12 there, beef up the tracks, whatever you need to do along
13 the bluffs but leave the southbound train on the bluffs.

14 Part of the reason that people take the train,
15 is to see the ocean; okay.

16 The Transit tax should be increased. All these
17 people, the bike people, the pedestrians, the Transit
18 people, environmentalists who want to see more Transit are
19 complaining it's not happening fast enough, well then
20 let's increase the Transit tax half a percent and then
21 we'll build those things they want.

22 Then there are many missing roadway connections
23 in town. They need to be fixed so that people, they can
24 walk, drive, Transit, whatever, can use it to get that
25 way, instead of going around in circles to get where they

♀

1 want to be.

2 Stop worrying about what one little community's
3 concern is, what's better for the region, for the whole
4 City, as long as we don't -- I don't want to damage the
5 community and I think it can be mitigated, but put the
6 roads through; thank you.

7 (Whereupon SANDAG Workshop concluded.)

10:00 a.m. - 12:00 p.m.

MR. DALE: For the record, this the time and place for the public hearing concerning the draft San Diego Forward, the Regional Plan, its Sustainable Communities Strategy, the draft air quality conformity determination, the draft Environmental Impact Report. If you wish to speak, as you know, put in a speaker slip. We invite you to tell us your name and address. A court reporter Erin, to my right here, is with us tonight -- or today.

Ladies and gentlemen, I'm sorry. I know you've been waiting a long time. I've got close to 20 speakers. I need to hold you to two minutes, I beg your pardon. And I will call two or three names in a row so we can keep as much time as listening to you, so not waiting for people to come to the podium. Our first speaker is Roya Golchoobian to be followed by Theresa Andrews.

MS. GOLCHOOBIAN: Good morning. My name is Roya Golchoobian. I am the president and life of the San Diego chapter of the American Public Works Association. I'm

3

1 here today to express American Public Works support for
2 the San Diego Forward Regional Plan. We find the main
3 objectives of your plan in line with our organizations
4 mission and philosophy in such areas as identifying short-
5 and long-term transportation alternatives that cover all
6 options, including highway, transit, and pedestrian
7 facilities, identifying the strategies for sustainability

6-12-15 Court Reporter Public Hearing_SANDAG
8 of growth without jeopardizing future plans, and for
9 keeping our eye on the big picture, while accommodating
10 growth in ways that protect our quality of life. We are
11 very encouraged by your plans for creating mobility
12 choices that protect the environment while stimulating
13 economic growth for protecting -- for projection of an
14 annual increase of 53,000 new jobs in the region, for 14.4
15 billion dollars increasing our GDP, and 5.9 billion
16 dollars increase in local income, and for accommodating
17 population in housing growth while presenting 55 percent
18 of the region's open space. Thank you.

19 MR. DALE: Thank you. Theresa Andrews to be followed
20 by Melanie Nally.

21 MS. ANDREWS: Good morning. My name is Theresa
22 Andrews, and I'm the interim president and CEO of the
23 San Diego County Tax Payers Association. Few issues are
24 as inherently relevant to taxpayers as transportation and
25 infrastructure. Our board has not yet taken formal

4

1 position on the San Diego Forward Plan, but we have a long
2 history of support for SANDAG transportation investment.
3 We supported the TransNet half-cent sales tax because we
4 recognize the need for investment in San Diego's
5 transportation infrastructure. The benefits of that
6 investment are now becoming evident, as we see the
7 expansion of trolley, light rail, and freeways from those
8 dollars. With our population continuing to -- continuing
9 to grow and the expected addition of about one million new
10 San Diegans over the next 35 years, it is wise to plan

11 now, to accommodate the new jobs, homes, commutes, and
12 movement -- and movement of goods and services. SANDAG
13 has put together a balanced plan of transit, road, and
14 freeway improvements, and upgrades for active
15 transportation that addresses the GHD -- GHG reduction
16 goals realistically and honestly. We will continue our
17 analysis of the plan as it moves forward in the process.
18 But at this stage, we believe it shows great promise for
19 handling San Diego's population and economic growth over
20 the next several decades. Thank you.

21 MR. DALE: Thank you. Melanie Nally to be followed by
22 Clive Richards.

23 MS. GOLCHOOBIAN: Good morning. I'm Melanie Nally
24 with BLOCOM, and we're here in support of the plan as
25 well. BLOCOM leads the advocacy efforts for the Southern

5

1 California life science community with more than 650
2 members, including biotechnology and medical device
3 companies, universities, basic research institutions, and
4 support service firms. San Diego's life science cluster
5 employs 60,000 people, and supports another 158,000 jobs,
6 for a total county-wide impact of over 218,000 jobs. This
7 represents 37 -- 37 billion dollars in economic activity.
8 As an advocacy organization, we are engaged in ensuring
9 that the life science industry has every tool for success,
10 including the necessary infrastructure for the
11 transportation of employees and products. SANDAG has
12 worked closely with the public, including BLOCOM, to

13 create a balanced plan that includes both public transit
14 and highway improvements. This balance is a necessary and
15 realistic approach to transportation in our region.
16 Effective, efficient transportation systems are vital to
17 our companies, both as employers and manufacturers, and
18 will be critical to San Diego's economic future. Thank
19 you.

20 MR. DALE: Thank you. Clive to be followed by Harry
21 Jensen.

22 MR. RICHARDS: Thank you. Mr. Chairman and members of
23 the Board of Directors, my name is Clive Richards, and I'm
24 on the 79th Counsel District of the City of San Diego and
25 the 2nd supervisory district of the County of San Diego.

6

1 I'm not going to take very much time on this. I'm going
2 to let you hear other people I'm sure you haven't heard
3 before, and, I'll be interested in hearing how they
4 approach this. Thank you.

5 MR. DALE: Thank you. Harry Jensen followed by Rob
6 Hixson.

7 MR. JENSEN: Hi, I'm Harry Jensen. I have a business
8 down on Morena Boulevard, native San Diegan. First 18
9 years of my life, I grew up in Linda Vista, graduated
10 Kearny, graduated San Diego State. All of that being
11 said, I'm here to ask for the cessation of all northern
12 trolley extension plans. In other words, don't build a
13 northern trolley center from Old Town to USD -- or UCSD.
14 We recommend -- the people that support me recommend that
15 you reallocate your resources to a trolley from Santa Fe

16 Station out to the airport via Harbor -- via Broadway to
17 Harbor. And I've been told that this is impossible, but
18 it's just an engineering problem. You've got elevated
19 tracks all over San Diego County. You have three rail
20 systems right now -- that between Santee, line two, and
21 South Bay, one; and you're losing -- that -- the
22 June 30th, 2014, 10-day San Diego Metropolitan Transit
23 System states that you lost -- that trolley system lost 27
24 million dollars. If you build a northern trolley
25 extension, that's probably going to add another 8 million

7

1 dollars to that deficit. So -- so you're asking, okay,
2 subsidized ridership. You can build the trolley rails out
3 to the airport, and you probably -- the cost could be
4 about \$12.50. \$6.00 would be operational costs, 6 and a
5 half dollars would be to repay the bonds necessary to
6 build that. You are facing right now legal problems from
7 the Cleveland National Foundation, friends of Rosecrans,
8 Sierra, and people of the sort -- me. You also have a
9 financial problem in building, so don't build the northern
10 trolley extension.

11 MR. DALE: Thank you. Rob Hixson to be followed by
12 Brad Barnum.

13 MR. HIXSON: Good morning. My name's Rob Hixson. I'm
14 the chairperson of the Otay Mesa Planning Group and also a
15 commercial real estate broker for the last 28 years, chair
16 of the planning group for the last eight years. Nobody
17 else wants the job. We are grateful for SANDAG and the
18 Caltrans for giving us our great freeways that we now have

19 down in Otay Mesa. We are looking for future
20 transportation to -- and as you can see on page 18,
21 there's a highlight there that the future jobs will all be
22 down in Otay Mesa, and I want to bring that to your
23 attention from my commercial real estate background.
24 Right now, there is no more industrial land in the central
25 part of the city of San Diego or all city -- central part

8

1 of San Diego. The remaining land is up in North County
2 and also down at the border and also some at Chula Vista.
3 So I'm very concerned about that and also the amount of
4 cost it is to improve these properties. Now, with all the
5 mitigation for this Burrowing Owl that we still think is a
6 species of interest, it's not endangered. And also this
7 new stormwater regulations that we have is quite
8 extensive. So I'm very concerned about it. Right now,
9 the commercial crossing in Otay Mesa is served by a city
10 street, so we've got trucks from all over the United
11 States and California using the city street to access the
12 border crossing. We're hopeful in the future that we're
13 going to get Otay too and have a new crossing that'll make
14 it so that these streets are easier to drive on and
15 access. We're grateful for all the stuff we've got, all
16 the transportation we got so far, and we'd like additional
17 transportation for those trucks. Thank you.

18 MR. DALE: Thank you. Brad Barnum to be followed by
19 Sean Karafin.

20 MR. BARNUM: Thank you, Mr. Board member. Brad

21 Barnum -- Brad Barnum, board member of the Associated
22 General Contractors, that are building your
23 infrastructure. We support the Regional Plan, and we ask
24 you to stay the course. I'm not sure how many of you know
25 of a Grateful Dead song called, "Truckin," and the quote

9

1 is, "What a long strange trip it's been." And I'll tell
2 you, if you were all there in 2004 when, two or three
3 weeks after the November election, Transnet won. The
4 coalition that surrounded that was incredible. And thank
5 you for helping that make that happen. Since that time,
6 you've had SD's 468, the keyhole bill. Agency attended
7 the hearing in Solana Beach in 2011 in January and
8 February. I can tell you the opposition from that bill
9 and the opponents of that up the 5 corridor was
10 incredible. You never thought that would come around, and
11 that passed. And that was a big coalition, and that was
12 needed to get you where you are at now. The culture
13 commission approval of The North Coast Corridor Project --
14 can you believe you got that through? That's a great
15 success story for everybody that was involved. Labor was
16 behind you, the business community, and the transportation
17 construction community was behind you. Now you have the
18 EIR. It sounds like you're going to be there in a few
19 weeks, and we wish you the best on that. We will be
20 behind you as you go forward. In 2004 voters wanted you
21 to have a balanced approach, and you're doing that, so we
22 ask you to continue to stay the course. Thank you.

23 MR. DALE: Thanks Brad. Sean Karafin to be followed

24 by Ted Shaw.

25 MR. KARAFIN: Thanks so much. Sean Karafin, the

10

1 Executive Director of Public Policy and Economic Research
2 at the Regional Chamber of Commerce. Thanks so much.
3 It's so important that we approach this growth that we've
4 been talking about in a thoughtful way. We need to
5 protect our environment. We obviously need to protect our
6 quality of life, and we also need to protect and allow for
7 our economy to grow with the population. The concepts
8 included in this plan, looking at accommodating more
9 compact development, multi-mobile transportation system
10 connecting housing to job centers -- these are all very
11 important things. And I don't have to tell people in this
12 room how diverse our region is and how each of our
13 communities have such unique needs. We need more fast and
14 reliable transit. We do need a broad and safe active
15 transportation network. And we need to target our
16 investments and our roads and our highways so that those
17 investments support transit service, carpools, and the
18 efficient movement of goods. And the people in this room,
19 again, know that that's code for jobs. That's how we
20 create jobs in this region. This plan directs investments
21 to keep our economy moving, creating jobs, and helping us
22 meet those greenhouse gas reduction targets that we're
23 trying so hard to do. Thank you.

24 MR. DALE: Thank you. Ted Shaw to be followed by Dana
25 Qui ttner.

1 MR. SHAW: Good morning everyone. Thank you for
2 having us. Ted Shaw with the Atlantis Group. I'm here
3 today on behalf of NAIOP San Diego. We are a commercial,
4 industrial, and office trade association. We have over
5 500 members representing tens of thousands of individual
6 employees. We support the balanced approach in the
7 San Diego Forward Plan. We believe that we need to
8 address both the current and future needs, excluding one
9 or the other is not the appropriate response. The
10 movement of goods, services, employees across this county
11 is critical to our economic health. We urge you to move
12 forward with the plan.

13 MR. DALE: Thank you. Dana to be followed by JoMarie.

14 MS. DIAMOND: Well, Dana is on a conference call, so
15 he doesn't know you were going to be so fast, sir. So --

16 MR. DALE: Jomarie, join us.

17 MS. DIAMOND: -- I'll do it then. Hello, my name is
18 Joemarie Diamond. I'm CEO of the East County Economic
19 Development Council. I've participated in the development
20 of the San Diego Forward in many ways, specifically in
21 technical working groups, public focus groups, and
22 recently was on the panel at the May 13 East County
23 meeting. In my review of the plan and also at my comments
24 on the panel, I wanted to underscore here again today how
25 critical it is to create jobs where people already live

1 and to develop the integrated transportation
2 infrastructure underneath it that allows those jobs to be
3 created. That's what we're doing in East County. We've
4 recently -- the cities of Santee and El Cajon and the
5 county of San Diego -- joined together to put the
6 first-ever-tried jurisdiction, special youth center on the
7 smart growth concept map. The intent of that center is to
8 ensure that the integrated multi-mobile transportation
9 will be what's required to produce the really good jobs
10 where people already live. That includes transit, which
11 is balanced within the plan, but it also includes the
12 ability to move goods and services. You're not going to
13 move goods produced, like Taylor Guitars on transit
14 systems. So we applaud you for having a balanced
15 approach, and thank you very much.

16 MR. DALE: Thank you. Alejandra.

17 MS. TERAN: Good morning. My name is Alejandra Mier y
18 Teran, and I'm the executive director of the Otay Mesa
19 Chamber of Commerce, and I appreciate the opportunity to
20 be here. I would like to express the chamber's full
21 support of, basically, highways, reconfiguring highways,
22 and potentially expanding them to support freight
23 management. We have a very important cross-border
24 manufacturing community in San Diego County from DJO
25 Orthopedics in Vista to Scanti Bodies in Santee, to Hunter

13

1 in San Marcos, as well as the many cross-border

6-12-15 Court Reporter Public Hearing_SANDAG
2 manufacturers in the city of San Diego, including
3 Honeywell, Kyocera. We need to support these companies
4 that are fueling our economy. We need to support highways
5 that are so important to truck, traffic, and our freight
6 management system. Thank you.

7 MR. DALE: Thank you. Our final speaker is Robert
8 Leif. Board members, Robert got a lot of time from some
9 other people, and we negotiated down to four minutes.
10 Robert?

11 MR. LEIF: I'm Robert Leif. I'm speaking about
12 southeast of San Diego needing an intermodal transit stop.
13 Because with all of these wonderful things, we got
14 nothing. We don't have any access going north. And we
15 have poor people who need jobs north -- you can see all
16 about jobs. Please read the full document I gave you
17 because I'm going to go fast. Next slide, please.

18 This will improve connectivity and access to jobs,
19 housing and services, and increased ridership. And what
20 we want to do is take the Orange Line Trolley and connect
21 it with the I-15 Bus Rapid Transit at the crossing of I-15
22 and Imperial Avenue by constructing an intermodal trolley
23 station. Next slide, please.

24 If you look on the left of the loop, right down at
25 the bottom, there's a little white arrow that you will see

14

1 is where the present station is. If you go around onto
2 Imperial, right underneath I-15, which is where it should
3 have been, if you put it together with the Bus Rapid
4 Transit, you have an intermodal connection. Next slide.

5 In order to build this, you're going to have to
6 widen the freeway because of the fact is the -- the buses
7 are in on the left-hand side, which means they're in the
8 center. You have to put a station in there, but you have
9 to be able to take the cars around so they don't hit the
10 buses. And you then put an elevator, which is the cheapest
11 form of Rapid Transit I know -- now going up and down --
12 and you -- of course, you have the stairs. Now you have
13 them connected, and the connections are phenomenal because
14 you also hit the Imperial Avenue bus, the newly planned
15 bus on 32nd Street, and you can get your passengers on the
16 Bus Rapid Transit down to downtown without even touching
17 State Road 84. Now, it doesn't say you shouldn't do it in
18 the long run, but this would get it done fast because it's
19 a one-shot, very small addition to your plan. And that
20 would allow them to get there as quickly as possible, so
21 you would maintain the ridership because they want to go
22 downtown. So they have to take an elevator. That's not
23 too much. So in other words, we're going to connect the
24 Orange Trolley Line with the I-15 BRT Imperial Bus and
25 propose the 32nd Street Rapid Bus. That is intermodal.

15

1 And you can use it at least for the time being as a
2 connection to get your people downtown who want to come
3 down from north. So we have three trolley lines that the
4 bus route and transit can connect to at America's Plaza on
5 12th and Imperial, a ride -- BRT riders can then go south
6 as far as San Ysidro, and the trolley riders to the

6-12-15 Court Reporter Public Hearing_SANDAG
7 northern part of the area, such as Escondido, Rancho
8 Bernardo, Sabre Springs, UTC, and UCSD. There are many
9 well-paying jobs. We have people with lousy jobs. They
10 can also go to school at UCSD and get into the middle
11 class and break out of poverty. So I think this will help
12 our community and everyone else. I am on the planning
13 group for Southeastern. I'm also on for City Heights and
14 a member of the CPC, but I'm speaking for myself. And
15 lastly, keep the northern trolley. I want to use it.

16 MR. DALE: Okay. Thank you very much. Members that
17 brings the end of all of our public speakers. We will now
18 declare the public hearing closed.

19

20 (Whereupon at 11:30 a.m. the hearing was concluded.)

Charles Muggs Stoll - Director of Land Use & Transportation Planning

Phil Trom - Senior Regional Planner

1 SANDAG PUBLIC HEARING, THURSDAY, JUNE 18, 2015
2 NORTH COUNTY TRANSIT DISTRICT BOARD ROOM
3 810 MISSION AVENUE, OCEANSIDE, CALIFORNIA 92054
4 11:30 p.m. - 12:01 p.m.

5 * * *

6
7 MR. STOLL: It's 11:32, so I am going to go
8 ahead and call the meeting to order, if that's okay.

9 And so, we're here for a public hearing on the
10 "San Diego Forward and Regional Plans." I'm Charles
11 Muggs Stoll. I'm the Planning Director at SANDAG and
12 I'll probably be the Hearing Officer today.

13 And so, if we start with our agenda, Item No. 1
14 on the agenda is any public comments that are not on the
15 agenda and I have one speaker for that and that's Michael
16 Bullock; you have three minutes up there.

17 Come forward.

18 (Mr. Bullock complies.)

19 MR. BULLOCK: Yes; thank you very much.

20 Good morning. My name is Mike Bullock. I live
21 here in Oceanside, just by way of identification, I am a
22 member of the, elected member of the "California
23 Democratic Party Central Committee," and also I have
24 submitted four papers that have been accepted for
25 presentation by the "Air and Waste Management

1 Association."

2 But what I want to talk about today, is
3 something that I just recently learned about and I think
4 it is important to SANDAG, and this is a resolution that
5 was adopted by the "California PTA." I didn't know the
6 PTA was organized as a statewide organization, but it is
7 and this was adopted by convention delegates on -- in May
8 15. In May of 2015, so this is very recent.

9 And the resolution says: "Climate change is a
10 children's issue ..."

11 So I think it's important that SANDAG
12 understand that this is becoming an issue in all walks of
13 life and so, the PTA -- and it was very interesting to
14 hear how this came about. It actually took two years
15 when they brought this resolution. The first year it was
16 not successful and had to go back and get more local
17 support.

18 However, when they finally got it on the floor
19 of the convention it was nearly unanimous. There were a
20 few no votes in Orange County, so they didn't think that
21 climate change is a children's issue.

22 There's four whereas's, and I just want to
23 state the fourth one, which I think is the most
24 important. It says, "The Greenhouse Gases emitted into
25 the atmosphere will accumulate over the coming decades

♀

1 and will profoundly impact today's children as adults and
Page 4

2 future generations ..."

3 And then, they resolve and what I really like
4 about this is there's one, two, three, four, five, six
5 resolves and they're all very good and they start with
6 the education and the education even needs to be of
7 parents and I think that's important.

8 But I'll just end with the fourth one down,
9 which I like and this first phrase is used over and over
10 again.

11 It is that, "The California state PTA, it's
12 unit councils and District; districts urge school
13 districts to serve as role models for practices that
14 promote energy conservation, alternative energy
15 sources --" this is what I like -- "reducing dependency
16 on automobile travel and encouraging sustainable
17 practices.

18 So I just thought you might be interested in
19 that. I think it does impact on SANDAG's work; thank you
20 very much.

21 MR. STOLL: Thank you.

22 I have another request to speak under public
23 nonagenda comment.

24 Joseph Nevins; is that correct?

25 MR. NEVINS: Correct.

♀

1 MR. STOLL: Thank you.

2 MR. NEVINS: Okay; good morning.
Page 5

3 MR. STOLL: Good morning.
4 MR. NEVINS: I'm assuming this is about the I-5
5 and 78 expansion?
6 MR. STOLL: Well I'll tell you what, that is
7 part of our, this is a public hearing on our overall
8 Regional Plan of which I-5 is part of --
9 MR. NEVINS: Okay.
10 So I'm going to address that now more
11 specifically, then the rest of the regional plan right
12 now.
13 MR. STOLL: Okay.
14 MR. NEVINS: But anyway, my concerns are, the
15 Regional Plan incorporates --
16 MR. STOLL: Okay; hold on one second.
17 If you want to talk about the Regional Plan and
18 I-5, what I would suggest is that you put that under
19 "Item 2," which is the actual public hearing where we
20 take the comments and put it on the record --
21 MR. NEVINS: Okay.
22 MR. STOLL: -- so, just I understand --
23 MR. NEVINS: Okay; no problem.
24 MR. STOLL: -- the confusion, so we'll do that.
25 I'll call you up first on that.

♀

1 Those were all the nonagenda comments that we
2 received for the meeting, so we'll move on to Item No. 2.
3 This is the time and place set for a public
Page 6

6-18-15 Court Reporter Public Hearing_NCTD

4 hearing concerning the Draft San Diego Forward, the
5 Regional Plan. It's Sustainable Community Strategy. The
6 Draft Air Quality Conformity Determination and the Draft
7 Environmental Impact Report.

8 Just a reminder, if you wish to speak, please
9 complete a speaker slip and place it, or you can bring it
10 right up to our Clerk, Tessa here and then as we go
11 through, I'll call your name.

12 And when called, we appreciate if you state
13 your name and address for the record and limit your
14 comment to three minutes; court reporter is here and will
15 be recording all of your comments today with Gloria.

16 The Staff will compile and respond to your
17 comments and the comments and responses will be provided
18 to the Board of Directors before the Regional Plan, NCIR
19 are finalized.

20 So before we start calling the speakers, Phil
21 Trom, our Project Manager is going to give just a brief
22 overview before we get things started and then we'll
23 start calling folks up; okay.

24 (Brief pause for presentation.)

25 (Off the record.)

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 7

♀

1 (Back on the record.)

2 I will now start the public hearing.

3 And the first speaker I have is Joseph Nevins.

4 This way it'll get on the record and have it all taken
Page 7

5 care of.

6 MR. NEVINS: Okay; thank you.

7 Josph Nevins 1724 Broadway, Oceanside,
8 California; all right.

9 Now, basically I'm going to address primarily
10 the 78 flyover issue and the I-5 expansion, you know, I'm
11 well aware of the stated goals that Caltrans is
12 undertaken to achieve concerning vehicle miles reduction,
13 air quality, et cetera, et cetera and also that SANDAG is
14 undertaken similar goals and yet, we see this project is
15 in direct conflict and contradictory goals.

16 Now, not only is the project contradictory to
17 the stated goals and objectives of both SANDAG and
18 Caltrans, but having lost in court twice, the agencies
19 are continuing to press on and continue in a manner where
20 they assume the public is going to finally accept it,
21 where they assume, it seems by their presentations that
22 they've already committed to this project, even though
23 they've lost twice in court and it's contrary and in
24 direct conflict of the stated goals in both department
25 and organization.

♀

1 So what I'd like SANDAG and the member cities
2 to do, is request from Attorney General Harris, an
3 investigation into whether or not there may be some
4 conflict of interest among staff and potential
5 contractors or Members of the Board or Directors and in
Page 8

6 particular, District 11, seems to be an outlier and not
7 in compliance with Caltrans's overall goals and the other
8 projects that are going out throughout the State.

9 And so, I urge the Members of SANDAG to request
10 an investigation by the State Attorney General into
11 whether or not there may be corruption; corrupt practices
12 or illegal conflicts of interest.

13 MR. STOLL: Thank you.

14 So the next speaker is Bob Spencer.

15 MR. SPENCER: Hi, Bob Spencer, 1202 North
16 Pacific Street, Oceanside, California. Thank you very
17 much for hosting the comments.

18 I'm a little chagrined. I don't think you did
19 quite the job in publicizing the meeting. I got it last
20 minute from a City Council Member in Oceanside and it
21 just zipped over, so anyway in any event, I appreciate
22 the meeting. I don't know that the general public heard
23 about it in quite the manner that I thought it might be,
24 just that aside. I want to talk a little less about
25 specifics and more about globalizing the project.

1 I understand the -- I'm going to do a
2 rudimentary cost benefit analysis of it -- I understand
3 the major benefit is to alleviate traffic down the I-5
4 corridor, make things a little faster. I don't know if
5 all of the cost have been calculated in this global, you
6 know, laudable goal.

7 All of the data that I've seen, it's going to
8 take a long time for this project to be completed. It's
9 a major project; you're going to be doing it in small
10 segments.

11 So the data -- I might be misinformed, but I
12 think it was like, 25 or 30 years it was going to take to
13 accomplish this. During those 25 or 30 years, you're
14 actually going to slow up traffic when you build
15 traffic -- I mean, anybody can see when they did I-15,
16 when they did the 210, when they built freeways, you have
17 to work on it; when you work on it, you have to lessen
18 the traffic, so that has to be into the cost benefit
19 equation.

20 All of the traffic delays for the next 30
21 years, if you make them through the court system and
22 break ground and start, then once you get this project
23 made, assuming it does, I don't think it's going to
24 happen but it may, I will agree it's -- there's a good
25 chance that you could alleviate traffic for maybe a

♀

1 long-term, for sure a short-term.

2 However, if -- we just need to look at history.
3 If you look at our neighbors to the north, Los Angeles
4 has tried to build their way out of freeway problems.
5 They haven't added lanes. They've added all freeway
6 systems and it's made the congestion worse. People that
7 were, that were sharing rides, finding other ways to

8 travel have gotten back on the freeways. I think that
9 it's very shortsighted and if we take into the account --
10 I know I'm just slightly over time -- I'll sum up.

11 If we take into account, that the new drivers
12 coming on and also, in 30 years who's to say what
13 transportation is going to be jetpacks, more busing, more
14 things.

15 Do we even know the internal combustion engine
16 is going to be moving people at that rate?

17 I appreciate the little extra time I got and I
18 appreciate the hearing.

19 MR. STOLL: Okay; thank you.

20 Okay. Our next speaker is Jack Shu.

21 Good morning, Jack.

22 MR. SHU: Good morning.

23 Thank you, Muggs, and SANDAG Staff for coming
24 up here. I guess I have up here as well.

25 I have a few points to make. One is kind of

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 11

‡

1 curious how these two hearings, both last Friday and
2 today came about. It'd be interesting to know, perhaps
3 there's some other information you can give me later as
4 what brought about these two hearings, because they seem
5 like it was their last minute item.

6 But I wanted to comment, the bid on the
7 general -- the Regional Transportation Plan -- it is very
8 interesting that when one looks at the actual projects

9 laid out in the plan, that we have actually the same
10 number of road and highway projects as in the previous
11 RTP.

12 In fact, the total cost of them presumed due to
13 inflation or other reasons, we're going to be spending
14 more money on freeways and roads than the last Regional
15 Transportation Plan had called for, even though the
16 public meetings I've attended for the past three years
17 all call for additional Transit development, rather than
18 road development.

19 The other point that is very curious and I hope
20 SANDAG Staff can clarify, is how it's going to achieve
21 it's Greenhouse Gas Emission goals to meet the, I guess,
22 voters that have been put out as well as legislation.

23 So I was curious how those can be achieved when
24 the previous one three years ago was not achieving those
25 goals into 2050 and all of a sudden, there's a thought

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 12

♀

1 that they can.

2 And if it is through lower emission vehicles
3 and nonemission vehicles, how they model that. How did
4 you come about this idea that 75 percent of our vehicles
5 by 2050 would be not emitting any clues at all?

6 So that to me is kind of a curious calculation.
7 If I can get some clarification or information on how
8 SANDAG modeled that, that would be very good.

9 I think it's something that is necessary in a
Page 12

10 EIR; thank you.
11 MR. STOLL: Thank you.
12 Our next speaker is Cindy Rocco.
13 MS. ROCCO: Yeah; one second.
14 This is all last minute, so I didn't even get
15 to prepare, but hang on a second.
16 (Brief pause.)
17 MR. STOLL: Would you prefer if we ask the next
18 person and then you can --
19 MS. ROCCO: Yeah, you know what --
20 MR. STOLL: Okay.
21 That's fine. We just want to make sure we hear
22 from you. So ...
23 MS. ROCCO: Thank you.
24 MR. STOLL: So the next speaker I have is Mike
25 Bullock.

♀

1 Mike looks prepared.
2 MR. BULLOCK: Not really.
3 MR. STOLL: Okay.
4 MR. BULLOCK: Thank you very much, Director
5 Stoll, and I appreciate the way you're running this
6 meeting up here and thank you for having the meeting up
7 here.
8 As I said earlier, I am a citizen of Oceanside
9 and I live at 1800 Mayberry Drive here in Oceanside and
10 as I said, I am an elected member of the "California

11 Democratic Party Central Committee."

12 And I have written four papers that were
13 accepted for presentation by the "Air and Waste
14 Management Association," so that's a lot of what I've
15 been doing since I retired.

16 Regarding your Regional Transportation Plan, I
17 believe that under CEQA, you need to consider negative
18 impacts, and one very important negative impact, of
19 course, is climate destabilization and what that would
20 mean and how that would come about and how that can get
21 avoided and so forth and so forth, and that's what you
22 have to do to consider it under CEQA.

23 Therefore, your Regional Transportation Plan
24 should have a clearly stated science-based climate
25 stabilizing target, and how you would achieve that

♀

1 target.

2 The Regional Transportation Plan should achieve
3 that target, or at least show how that target could be
4 achieved. Now by latest, Air and Waste Management
5 Association paper has both. It has a clearly stated
6 climate stabilizing target and it has a plan for cars and
7 light duty trucks to achieve that target. Its title is
8 "The Development of California Light Duty Vehicle
9 Requirements to Support Climate Stabilization," and
10 there's a colon because there's two categories of these
11 requirements.

12 The first is "fleet emissions rate." We really
13 need to adopt a lot of zero emission vehicles and so, in
14 the paper it shows exactly the rate at which we'll do
15 that, the percentage of new car sales that will need to
16 meet these steps and per capita driving, that's the other
17 category, and it's just one single number and it happens
18 to be 32 percent reduction in per capita driving with
19 respect to year 2005.

20 And my target is 2030, that's the target share
21 and it is 80 percent below 1990 levels; certainly that
22 should ring a bell if anyone is at all interested in
23 climate, because that is the point if the worlds vision
24 average that, that we will cap the atmospheric CO2, so
25 that's the first step.

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 15

♀

1 And many riders have been talking about the
2 decarbonization by 2030. It will have to do and minus
3 more lenient than that, it still allows 20 percent, but
4 the paper also shows clearly how you would achieve this.

5 And, first of all, you stop expanding
6 roads and you reallocate Transnet money that's been
7 allocated to highways to Transit why we would so call,
8 break a promise to the voters because we have a crises.
9 A life and death situation.

10 And that's why we should certainly have a super
11 majority to do that and stop expanding highways and spend
12 all of that money on Transit, mainly because we need to

13 reduce driving so much, we don't need the additional
14 capacity.

15 The other thing we need to do, is we need to
16 improve the way we pay for car parking and roads.

17 And I'll submit detail on that and you've seen
18 details on that over the years.

19 So thank you very much.

20 MR. STOLL: Thank you. Okay.

21 Cindy, you're the last speaker slip I have
22 left.

23 MS. ROCCO: Okay.

24 MR. STOLL: Okay.

25 MS. ROCCO: Sorry about that. It was actually

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 16

♀

1 in there.

2 I'm Cindy Rocco. I live on Alvarado Street in
3 South Cal and I did present this to City Council, but
4 this primarily has to do with the interchange and the
5 widening, and I think my main concern is the environment.

6 One of the things is with the lagoons. I have
7 several documents. I'm not sure where the reference
8 point is, but the other lagoons along six or five others,
9 they are actually getting a lot of mitigation from bike
10 paths, pedestrians. They're getting restoration efforts.
11 They're getting a lot of wetland for the production, et
12 cetera.

13 But from what I saw for our point of vista
Page 16

14 alone, was I think it was kind of handed off to -- I'm
15 not sure if it's somebody took over and it's a
16 restoration and they're trying to decide fresh water or
17 whatever, but there's no -- it doesn't seem to be any
18 other accountability or umbrella there.

19 And then, I also read -- oh, by the way,
20 Caltrans said that they didn't have any plans for
21 mitigations or anything, as if they didn't know what I
22 was talking about two weeks ago.

23 And then, for us the money funds go to the
24 other lagoons, so we don't get the money towards
25 allocation towards ours. I'm not sure whose budget that

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 17

♀

1 is and, you know, we already -- it's going to be a wet --
2 filled up or wetland in 50 years; okay. We already gave
3 half away from the mall. I think it has more diversity
4 in birds and animals, et cetera, et cetera, and tying in
5 to -- so I would want to have more consideration for our
6 water bodies because even Loma Alta Creek got
7 contaminated or whatever with the railroad, et cetera.

8 The other thing is, when they build now -- a
9 fellow said, "You can't look at 100 years," but we can
10 project things how things are going, and when they build
11 now, they should build the bridges for the train three-
12 wide.

13 In anticipation he said, "Well --" the Mayor
14 said, "Well we're having enough trouble getting two, but

15 anticipate."

16 And then also with the 5, no matter how wide
17 you make it, make it higher because the sea level
18 projections, I think with floodplains, et cetera, wave
19 height, it's going to come up five feet.

20 And I was reading where they said, "Oh, Well,
21 we'll do jacks. It can be remedied through jacks and
22 shins," but why would we do that if we know now what's
23 going to happen?

24 And -- what was I going say? Hang on. Oh,
25 wait. I have to sum up; okay.

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 18

♀

1 Oh, so what you ended up doing is, disturbing
2 the lagoon again and again and again and it was like the
3 first ecological reserve. It was supposed to be a State
4 Park, but there's a lot of history to that lagoon.

5 And my thought was, because of financial issues like
6 the corridor up in Orange County ended up like, doubling
7 their budget once they started getting -- started -- so
8 if you look at present dollars, future value of the
9 present dollars, it's going to actually be a better
10 return in payoff in the long run if you prepare now.

11 And, um -- okay, you know, just based on bonds
12 and et cetera. I mean, you're going to end up paying a
13 lot more now and we're going to take on and it's sort of
14 like being the stewards for the future.

15 I have a lot more stuff, but that was just my

16 basic feedback.

17 MR. STOLL: Okay; thank you.

18 MS. ROCCO: Oh, and maybe a diamond --

19 divergent diamond; just the other idea.

20 MR. STOLL: Okay. All right.

21 Well thank you for the comments, the public
22 hearing. I don't have any other speaker slips.

23 If anybody else wants to fill one out, if not,
24 I'm going to go ahead and close the public hearing.

25 I just remind all of you and Cindy in

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 19

♀

1 particular at the end, you know, we're taking written
2 comments through July 15, so there's still plenty of
3 opportunity for you to get any other comments that you
4 have on the record for that.

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 21

A-DA Summary Report 2013
SANDAG 2050 Regional Plan
Survey Responses

Background

Between February 2013 and September 2013 Able-Disabled Advocacy conducted outreach and collected surveys from persons living with disabilities seeking input for the Regional Plan. Two survey instruments were distributed and a total of 43 surveys were collected. This report provides a summary of comments and brief analysis of the results.

Survey 1 – 20 responses

1. Do you feel that your community is supported by sufficient transportation options?

Responses: Over 50% (11) of the responses indicated No; 4 yes; and, 4 maybe with one answer irrelevant.

Comments: Comments range from it depends on the area to deficient hours of service and transportation is “not disabled friendly” based on accessibility.

2. Please identify any needs or gaps relating to transportation within your community. Are there areas in your community that are lacking connectivity? Is there a certain population that is in need of specialized transportation?

Responses: Door to door service needs improvement; timeliness and reliability; lower fares for low-income; specialized transportation for seniors, disabled, students and Veterans; gaps in service in Scripps Ranch, La Jolla, and Miramar Road; connecting downtown to other areas; need to fix roads.

3. What types of resources (shuttles, grant writing assistance, etc.) does your community need that will help to address any transportation needs and gaps?

Responses: Shuttles; more federal financing; green investment such as solar vehicles and bike rentals; more door to door service with easier to use call centers for the disabled; change agents are communities of concern with support to help healing the transportation issues; all of the above, grant writing, training, money, better planning of routes, wheelchair seating on trolleys and buses.

Comments: Although many did not answer this question there were six responses stating shuttles.

4. Are there any opportunities to coordinate and pool together existing organizations/agencies/community group’s resources to help address your communities transportation needs.

Responses: express terminals on El Cajon bridge, stop budget cuts; yes, no, City planning meetings.

Comments: The majority of responses did not answer this question and the majority that did respond were non-descriptive or non-responsive.

Analysis:

Over 50% of the responses showed that the sample of persons living with disabilities felt that their community was not supported by sufficient transportation options. Some of the consistent and resounding concerns were the need to address accessibility (not just the service itself but peripheral services such as call centers, etc.) in addition to cost and hours of service. A majority of respondents that answered question 3 supported an expansion of shuttle services.

Survey 2 – 23 responses

This survey was implemented through an on-line service. A-DA is collecting this data on-going. The attached report summarizes this survey.

Responses: A majority of the respondents felt the quality of life in San Diego was good; it was very important to, improve transportation systems, protect the environment, improve the regional economy, maintain what is in-place, and locate housing and business to reduce congestion. A majority also agreed that it was a medium priority to expand and improve bus service, avoid making cuts to transit services, support light rail, connectivity of transportation modes, maintaining equipment, reducing wait times at the border, locate multi-family housing near transit, concentrating new business near transit to reduce congestion, and improving systems for shipping. Pedestrian safety and making it easier for people to walk to places of interest, schools, and businesses and expanding maintaining and improving highways was a high priority. Telecommuting and expanding opportunities for carpooling, preserving parks and open spaces, water quality, reducing pollution, protecting wetlands, housing availability in a variety of price ranges, renewable energy, attracting business and employment was also a high priority. The majority of respondents saw improving bike lanes as a low and medium priority (this item was close to an even split but some respondents also marked it as a high priority). Other comments seem evenly split between the environment, transportation and housing as the most important issue.

Analysis:

Highway transportation issues have the highest priority rankings as well as the environment in general while other modes of transportation have a medium ranking. Pedestrian traffic was also a high concern. The lowest priority ranking was regarding bike paths. Although many persons living with disabilities use public transportation it is interesting to note the high priority of highway transportation. This may indicate a cultural paradigm of relying on cars and the overall impact of congestion in San Diego. This is an outstanding observation considering the survey target audience was persons living with disabilities. This has implications for a social equity analysis if there is an assumption that alternative transportation modes create social equity.

Linda Vista Collaborative Focus Group Responses

Location:

University of San Diego, Student Life Pavillion
5998 Alcalá Park, San Diego CA 92110

Time: 3:00-4:00pm

Date: June 19, 2013

Participants:

10 participants in all including University of San Diego Staff, University of San Diego Students, SAY San Diego Staff, Linda Vista residents.

Economic Prosperity in Linda Vista

What is your vision of a prosperous Linda Vista?

Responses:

- A good mix of businesses that serve the Linda Vista community adequately. For example, healthy food stores, less liquor stores and less fast food.
- Creating a “Merchant Association” between local Linda Vista businesses so that businesses have an outlet to communicate. Currently, the business community seems separated and individualized.
- Stronger commitment from USD to provide opportunities for Linda Vista youth to attend USD. Possibly provide scholarships for students in Linda Vista.

What do you feel are Linda Vista’s greatest challenges in terms of the economy?

Responses:

- Access to job centers and job opportunities.
- Unifying our business community.
- Access to education such as USD, SDSU and UCSD.

Healthy Communities

What can we do to encourage Linda Vista residents to use multiple transportation modes?

Responses:

- Giving bikes and helmets to children.
- Providing discounted prices on transit lines to low-income families and students.
- Education and awareness about sharing the road with pedestrians and bikers.
- More volunteers for Safe Passage to schools and parks. Increase hours into the evening.
- Creating more frequent and reliable bus lines through Linda Vista.

How do you believe our physical environment affects the health of the Linda Vista residents?

Responses:

- Graffiti in the community makes it feel unsafe for people to walk.
- Quickly moving traffic on Linda Vista Road makes it unsafe for pedestrians and bikers.
- Sidewalks are broken and blocked in certain places by poles.
- Lighting needs to improve at night for people to feel safe walking in the evening.

Mobility

What kind of transportation would you like to see in Linda Vista and the San Diego region?

Responses:

- We would like to see better and safer access for bikes.
- Transit routes going to more job centers, more frequently.

What do you feel are the biggest challenges in traveling around Linda Vista and the San Diego region?

Responses:

- Sidewalks are very narrow, unsafe and broken.
- Busses only pass once every hour going from Linda Vista to the new SAY San Diego location in Serra Mesa.
- Positive: Small busses traveling through residential areas.

Linda Vista Collaborative Focus Group Responses

10 participants from: University of San Diego Staff, University of San Diego Students, SAY San Diego, Linda Vista residents.

Economic Prosperity in Linda Vista

What is your vision of a prosperous Linda Vista?

Linda Vista Vietnamese Seniors Focus Group Responses

Location:

Bayside Community Center 2202 Comstock St, San Diego, CA 92111

Time:

3:30-5pm

Date:

July 1, 2013

Participants:

9 seniors in Linda Vista. Age ranges from 64-75.

Economic Prosperity in Linda Vista

What is your vision of a prosperous Linda Vista?

Responses:

- The ability to walk in the early mornings and evenings without fear
- Cars will follow traffic rules and the roads will be safer for pedestrians
- Easier access to hospitals and social services

What do you feel are Linda Vista's greatest challenges in terms of the economy?

Responses:

- Participants say they do not know or keep up with the economy of Linda Vista.

Healthy Communities

What can we do to encourage Linda Vista residents to use multiple transportation modes?

Responses:

- Continue offering senior discount bus passes
- Ensuring a safe and clean bus/trolley
- Positive: 7/9 seniors in the group have bus passes and use them on a regular basis. Of the two who do not have passes: one drives independently, and the other has regular access to a personal vehicle

How do you believe our physical environment affects the health of the Linda Vista residents?

Responses:

- Unstable sidewalks are hazardous for seniors, especially those using assistive devices
- Lighting in certain residential areas are lacking, making it unsafe to walk at night

- Parks should be more inviting and free of people loitering
- A clean water fountain to keep people hydrated in the park

Mobility

What kind of transportation would you like to see in Linda Vista and the San Diego region?

Responses:

- Transit routes going to more hospitals, healthcare centers, UPAC, and social services centers
- More frequent buses on the weekends for certain routes

What do you feel are the biggest challenges in traveling around Linda Vista and the San Diego region?

Responses:

- Sidewalks are not senior friendly and are fall hazards
- The time one needs to wait for a bus to come, especially on the weekends, discourages traveling far
- The distance one has to travel in order to get to places of interest, such as the Social Security Administrative building, UPAC, or hospitals
- Language barriers to bus schedule and routes in Vietnamese on MTS information hotline (seniors have to rely on word of mouth to know which bus to take).

PRESENTACION DE SANDAG - ENCUESTA

1. Cuál es su principal método de transporte?
2. Cuál es el costo de este medio
3. Cuál es la principal razón por la que necesita el transporte (citas médicas, sociales, mandado, paseo, compras, etc)
4. Cuál es su principal preocupación en cuanto al transporte
5. El transporte público es accesible a usted/sus necesidades?
6. Cree usted que puede hacer todas sus actividades diarias con el método de transporte que tiene?

Algún otro comentario

SANDAG PRESENTATION – Questionnaire

1. What is your primary transportation method?
2. What is the cost of this method of transportation?
3. What is the primary reason why you need transportation (medical appts/ work/ social/ shopping, etc)
4. What is your primary concern with transportation?
5. Is public transportation accessible to you?
6. Are you able to conduct all your desired daily activities with your current transportation methods?

Any other comment?

“San Diego Forward: The Regional Plan”

City Heights Community Workshop

June 18, 2013, 6pm to 8pm

City Heights Wellness Center

4440 Wightman St., Suite 200

Outreach and facilitation by CBO Partners City Heights CDC and Mid City CAN

Notes from break-out table discussion (Facilitation questions are in *italics*):

Table Topic: LAND USE, GROWTH, HOUSING

San Diego as a region is expecting large growth. Where are we going to put all these people?

- Build out on open space in order to de-centralize the city
 - High rises create an “industrial city,” destroying any sense of beauty in the community and polluting the air and contribute to a trend of people “living on top of each other.”
 - Use vacant lots in the city for park land
- Instead of building roads out to new development, adapt public methods of transportation
 - Creates a necessity for jobs close to home
 - Improves air quality
- Build in vacant lots
 - Condos with underground parking
- Include low and moderate cost housing on new sites
 - The fee for excluding affordable housing is too low and needs to be increased
 - The percentage of affordable housing required in a new building is low
- Demolish old, dilapidated, and dangerous apartment buildings and rebuild new, affordable housing
 - Currently, most apartments east of 50th/Euclid are run down and detrimental to occupants’ health
- Build “granny flats” in back yards in order to house older people on existing space
 - Family is only required to live in one of two buildings on a given property
- Look at South Korea’s solutions to high population density
- Give NO land use authority to SANDAG

Table Topic: PUBLIC HEALTH AND HEALTHY COMMUNITIES

How can we create a healthier community?

- Increase amount of sickness prevention by increasing health screenings for preventable/treatable diseases
- Increase multi-lingual and multi-cultural education on health

- Hold companies accountable for amount of sugar, fat, and salt in food
- Have recourse about housing health codes
 - Enforce codes involving interiors of buildings to improve subpar housing
- Improve housing standards

What types of transportation projects do/don't you think promote public health?

Do

- Bike lanes
- Cleaner, safer walkability/sidewalks
- Expand boundaries of Car 2 Go
- Free and low cost transit

Don't

- Pollution caused by too many cars on the street
- HOV lanes promote private transportation and single owner vehicles
- ❖ Note: Portland has experienced growth but has not added vehicle lanes

Should public health be a standalone policy area in the regional plan, be integrated in to every policy area, or both?

- Yes, it is important and therefore should have its own category
- It is already related to all the areas in the plan, and making it its own category could limit its integration into the other categories
- It should definitely be addressed, but it is unknown whether it will be given more attention as a separate category or as a criterion

Should public health be used as one of the major criteria in prioritizing transportation projects?

- Yes, it could help prioritize healthy transportation and decrease the importance of freeways
- Public health is a very relevant part of transportation when issues like noise and pollution are taken into consideration
- The majority of people like this idea

Table Topic: TRANSPORTATION

How does transportation affect your daily life?

- Use it every day. It has improved but needs more improvement
- Get to and from appointments and grocery stores, meetings downtown
- Major transport.-walking
- The hierarchy of need- 1)walkers 2)bikers
- Freeway is developed but walking infrastructure is not

What type of transport would you like to see?

- Light rail

- Bus shelters
- Neighborhoods more connected to region, lack of connection prevents participation in civic life
- More access for wheelchair and electric wheelchair
- Better access to downtown, more regional connectivity

What are the biggest challenges in transportation?

- Learning bus routes
- San Diego is so car dependant, has huge sprawl, and destinations far from each other
- Shuttles to key destinations
- Change taxi fare system to be based on zones rather than mileage
- Free bus districts

How should we determine what/when to fund?

- Money should be distributed according to population density
- Social equity and Economic justice should get priority
- Is there a way to find out how money have been spent in the past
- We need to see how equitable the fund distribution has been
- “Communities of concern” like City Heights should get priority
- Equity assessment should be done by language, density, population
- Job density and people density, no job centers in City Heights
- Information on job density and availability needs to be factually based—not based on perception

What types of projects should be in the plan/not in plan?

- The SR 94 express lanes and HOV expansion project should NOT be in the plan
- ❖ Should be in the plan:
 - Centerline
 - Connectivity of I-15 to SR-94 by car
 - local bicycle and walking routes should be prioritized
 - more bike lanes to schools
 - projects that increase neighborhood connectivity and coordination between trucks and neighborhoods (grocery stores)

Table Topic: ECONOMIC PROSPERITY

What is a healthy economy?

- Growth does not equal prosperity
- Better neighborhoods
- Comprehensive developments
- City Heights is recovering, we have a police department but no local supermarket
- A balanced community (a little bit of everything in order to “live locally”) that serves community needs
- Fairmont east to 805, businesses still prospering because they have supportive infrastructure (wide sidewalks, etc.)

- Deciding how to use Development Impact Fees
- More pocket parks
- Rescue Mission-toxic site

What is working? What is good in City Heights?

- Lots of small businesses
- Lots of immigrant businesses
- Local strength but also connection to regional job centers

Any changes you would like to see that would improve the economy?

- Too many liquor/smoke stores
- Embrace bilingual and multicultural signage, City Heights pride, place making
- Small businesses need to employ locally
- Local hiring policies
- Need an economic base in order to hire locally
- Need to have living wage to make connection a priority
- Offer opportunities to small businesses to grow
- Need to support local businesses

Should SANDAG play a role in ensuring regional economic prosperity?

- Do government entities (school district, etc.) hire City Heights residents?
- Need more resources/information on jobs
- Need more workforce development
- Zoning for economic opportunity
- Stop investing on making it easier for people to drive in and out
- Stop subsidizing driving infrastructure
- SANDAG can support reverse ride share
- Improve tracking of infrastructure investments from neighborhood to neighborhood
- How do you measure prosperity? What's flowing in and out?
- Build affordable housing

Table Topic: SOCIAL EQUITY AND ENVIRONMENTAL JUSTICE

What do social equity and environmental justice mean to you?

- The way we want the world to be... access to jobs, opportunities to participate
- How are we measuring the success of these concepts? Parks, health services, etc.
- Equitable infrastructure conditions
- We shouldn't have to leave our community to get better jobs and education
- Connectivity for seniors and population with mobility challenges
 - Senior building was built but no supportive services or infrastructure was added to support it
 - Analyze the way development impact fees are associated with a project

- Identify a method for the community to have input on what that DIF should be used for
- Areas underserved need to have a strategy to connect to resources
- Community college or community college classes need to be offered in City Heights
- Communities of concern points need to be cumulative to give City Heights higher points because we hit on all categories that define communities of concern
- Even though City Heights may be a region of low income, social standards should be the same
 - City Heights should be prioritized (receive attention and funding) in order to bring living conditions up to par (housing and transportation)
- It means having intercultural and inter-religious involvement. The community comes together to understand each other

Should social equity and environmental justice be stand alone policy areas or be integrated into every policy area or both?

- Do both, already law. Stands to reason that social equity is required to be integrated without a standalone classification
- Coordination with community walk audits, non accessible sidewalks
- Equity assessment-we should assess how long people are living in areas, rates of asthma, etc and measure success in terms of condition improvement
- Play catch up in City Heights to accelerate progress
- The trolley system skirts City Heights. It should run through City Heights at some point because as it is, it keeps people out of good jobs in Chula Vista, Rancho Bernardo, etc.
- Look at how EIRs address the issue of social equity for guidance on how the regional plan should address this question

Should social equity/environmental justice be one of the major criteria in prioritizing projects?

- Social equity should be explicitly considered in every decision
- Can be made a criterion in the same way as the environmental impact component
- Canyons/sewers
- Mitigations for companies that create a lot of Greenhouse gas emissions or toxic runoff areas should turn into investments in infrastructure in communities like City Heights
- As the built environment improves, a mechanism needs to be put in place to prevent the displacement of people already living in City Heights

How we can ensure that SANDAG fulfills the elements of the regional plan?

- Create timeline
- Create oversight committee to keep an eye on everything being done that involves City Heights (watch dog group)
- Can't be just a committee but need to have influence/power
- Report back at a community forum
- Involve community in further decision-making

- Reorganize SANDAG with community input to make it more community friendly
- High attendance at SANDAG meetings-lots of people with a simple message
 - This holds SANDAG accountable as they vote
 - Such a high volume of people cannot be ignored
- Community must actively hold them accountable, not wait to be approached for input

International Rescue Committee Coordinated Plan Transportation Questionnaire

Participants Comments
March 2013-June 2013

The following comments were from clients who completed the questionnaire between March 2013-June 2013. An IRC staff translated assisted with the English translation. Comments in quotation marks were made specifically by the client.

Question #3a: Do you find that this cost is reasonable given your transportation needs? Why or why not?

Negative comments

- It is not reasonable because she is only able to complete the most basic errand with the amount that she is paying
- Does not have enough money for gas to do more activities with family
- “Because gas is expensive, I can’t go everywhere. I only take my kids to school, go shopping and go to other places nearby. I am unable to take my kids on trips or out on day excursions because I cannot afford this.”
- There is not enough bus stops near their house to get to where they need to go, such as the DMV
- Gas is too expensive so they cannot travel very far and to destinations outside of El Cajon
- To run all his errands, such as going shopping, taking his children to school, going to do doctors, the cost is not reasonable
- The places are too far and it takes a long time
- Gas and personal vehicle expense are too expensive
- Respondent uses car around El Cajon and uses public transportation when traveling outside of El Cajon. The client prefers to not drive on freeways.

Positive comments

- “ It cost \$150 and the cost is reasonable” *Note: the respondent did not elaborate if it was \$150 a month or a week.*
- The public transportation is fast enough and the cost is decent
- Transit fares are reasonable for the destination this specific respondent travels to
- “For the time and distance, the cost is okay.”

Question #7b: Do you think the community, in this case El Cajon, is supported by sufficient transportation options?

Comments for “No”

- For the area of El Cajon, there is not enough transportation [option] in El Cajon. It's difficult to get around.
- No, need more transportation options for community to utilize
- No. Transportation is easier in Europe than in the USA
- No. There is a weak rideshare system in El Cajon
- “ I found that the transportation option in El Cajon is not sufficient, which always makes me late.”
- No, it takes too long to get to my destination. *Note: respondent did not specify if the destination was within El Cajon or outside of the area. However, based on the question, IRC is going to assume that it is within El Cajon.*
- No, the commute is long, the wait time is long and the bus does not come often enough. Also, bus stops are not located where they are needed. *Note: respondent did not specify where a bus stop is needed.*
- “Since I do not use public transportation, I cannot speak to the overall issues related to the transit system in El Cajon. However, I think that the taxis are too expensive and based on comments from friends, I think the buses take too long.”
- “The buses and taxis are expensive. Also buses are too slow”
- “No, because I have a medical condition and using public transit is very difficult for me.”

Comments for “Yes”

- Public transportation is okay
- Yes, there are trains [trolleys], bus and taxi
- “Yes, there are.”

Question #8b: Do you think that you were able to carry out your daily activities/needs given your current primary mode of travel that you selected in Question 1A.

Comments for “No”

- No, the bus/trolley is not fast enough
- “It's hard to carry out activities on the bus and trolley. If I knew how to drive, I would be able to run my errands more frequently.”
- There needs to be more transportation options for El Cajon community to utilize
- “No, because I do not have a car.”
- “I have too many appointments but I cannot go everywhere easily.”

- For the area of El Cajon, there is not enough transportation [option] in El Cajon. It's difficult to get around.
- No, need more transportation options for community to utilize
- "Because of my medical condition and where I need to go, I am unable to carry out my daily activities. Public transportation takes too long and I also do not have enough time to travel so long on the bus."

Comments for "Yes"

- "Yes, but I depend on family and friends for rides. I have never used the bus."
- Yes, but using her car is easier than traveling by bus.
- I am only able to carry out my tasks because I have a car.
- "I am able to run my errands simply because I have a car. It would be more challenge if I did not."
- Public transportation is pretty fast in El Cajon.

August 21, 2013 Public Policy Workshop

Summary Comments

Between May and August 2013, SANDAG held a series of public workshops to engage the community and stakeholders on potential ideas and policy objectives that could be considered in the development of the regional plan. The workshop summarized below was held on August 21, 2013, at the Jacobs Center for Neighborhood Innovation in southeastern San Diego. The workshop focused on topics addressing issues of economic prosperity, borders, healthy communities, environment, climate change, energy, and mobility. The workshop contained 5 tables at which discussions were hosted by two SANDAG staff members (one serving as the facilitator and one serving as the note-taker), including one table facilitated in Spanish. The discussions at each table revolved around three focused themes listed below. Participants rotated tables three times, providing their ideas and opinions at each table they attended.

1. *Economic Prosperity/Borders (One Table)*
2. *Mobility (One Table)*
3. *Healthy Communities (One Table)*
4. *Environment/Climate Change/Energy (One Table)*
5. *All Topics in Spanish (One Table)*

The following is a list of the comments, questions, and suggestions made by community members and stakeholders who participated in the workshop, as recorded by the note-takers. Feedback is organized by the table (i.e., Healthy Communities, Table 2) and the round (1st, 2nd, and 3rd) at which it was shared.

Public comments that were submitted in writing are also included. The feedback collected at the workshop will help guide the development of the San Diego Forward: The Regional Plan.

Economic Prosperity/Borders: Table 1

Round 1 Participant Comments

1. When we think of “border” the focus is on the County border w/ Mexico.
2. We do not cross border as much as we used to because it’s too much hassle; too much traffic.
3. The border was a safer, more fun place before; we used to go to racetrack, nightclubs, shopping.
4. Violence deters people from crossing border.
5. Tijuana used to be a tourist attraction; we would take family, friends from out of town to visit.
6. Years ago, everyone wanted to go to Tijuana.
7. Tijuana/Mexico is now off limits to military.
8. Younger people cross more often than older; they don’t know fears of safety.
9. We should create check points leading up to the border crossing with special dedicated lanes, pre-checking of documentation in order to speed up crossing.
10. We need more public transportation to and from border.
11. We need more SENTRI (Secure Electronic Network for Travelers Rapid Inspection) card access and easier travel.
12. The wait time at border is an economic barrier.
13. Security and passport requirements can also be barriers.
14. A prosperous economy is when you’re not struggling.
15. There aren’t enough community residents (Blacks/African Americans in particular) working on transportation/construction projects in the community/region.
16. Our educational system is flawed and doesn’t support enough trade jobs.
17. Kids graduate high school not knowing enough about jobs, how to get by in life.
18. Schools need a new focus on simple personal budgeting techniques, innovation on basic skills.
19. Schools need more focus on apprenticeships.
20. The current welfare system needs to be improved.
21. Schools should teach self-sufficiency, earning money, skill-building.
22. The region needs to build more “social capital” or work on building more relationships with each other.
23. US/Mexico governments need more relationships with each other – more collaboration which will help economy.
24. The government/community needs to advocate more public transportation projects, workforce housing, business development.
25. The region needs more mixed-income housing.

Economic Prosperity/Borders: Table 1

Round 2 Participant Comments

26. We need to improve the Mexican crossing.
27. The process to crossing the border hasn't improved, and the wait time are too long.
28. The Artist communities on both sides of the border want to visit but it's very difficult to cross or take students.
29. Safety and Border wait times are major barriers.
30. Cultural barriers exist such as language barriers.
31. There are also borders within our region – the biggest one is the I-8, North & South.
32. There are safety issues south of I-8.
33. Southeast San Diego is still not safe.
34. There is a difference in development between North & South.
35. Communities north of the I-8 have more aesthetic amenities, better health.
36. Economic Prosperity is very slow in southeast San Diego.
37. Southeast San Diego doesn't have enough good jobs because of a lack or limited access to Golden Triangle, Sorrento Valley, and other communities with good-paying jobs.
38. Local businesses don't hire from community.
39. There are mostly minimum-wage jobs in our community.
40. It is very hard for families to survive on minimum wage jobs; families would need to work 3 minimum wage jobs just to reach the median income level.
41. There is a lack of infrastructure in Southeast San Diego.
42. We need to invest in transportation, our creeks, and roads.
43. There are often too many hurdles to development in this area; too many environmental hurdles, bureaucracy, infrastructure issues.
44. We should re-evaluate environmental, health, land-use requirements, and other hurdles in order to encourage more private investment in our neglected communities; but not completely throw all of them out.
45. Community residents (specifically Blacks/African Americans) are not being hired for local jobs
46. More high school internships are needed.
47. More technical college classes in high school are needed in order to prepare young people for jobs.
48. We need to invest more in education.
49. We need more trade schools, job training in high schools.
50. We need more summer jobs for youth.
51. We need more government, business, and community investment in our youth.
52. SANDAG should provide more money for youth jobs.

Economic Prosperity/Borders: Table 1

Round 3 Participant Comments

53. We need Rapid Transit for the US-Mexico border.
54. We need faster crossings.
55. Public Safety is a big barrier to crossing.
56. Human Trafficking a major problem.
57. We need an improved relationship with people on other side of border, and people who cross.
58. We need to allow people to cross more often.
59. We need to address Mexico's problems.
60. We need more collaboration between governments, communities.
61. The movement of people is a good thing.
62. When public officials on both sides of the border go to border region meetings, they need to report the findings/results of meeting to community in an open fashion.
63. We need to have more arts and culture exchange.
64. The Bi-national Olympics might help foster more arts and cultural exchange between San Diego & Tijuana.
65. We need more economic tourism to border region.
66. There are Baja traveling alerts due to safety.
67. Businesses need to connect between borders.
68. We need to address negative stigmas and stereotypes, such as the thought that Mexicans who cross illegally don't contribute to economy and take from it.
69. The region is segregated by community, and there are borders within.
70. We need to explore other areas of county; many residents have never been to beach, natural parks, etc.
71. SANDAG should encourage community visiting/ interchanging.
72. Businesses need to employ more local community members; local jobs for local people.
73. We need more meaningful jobs for youth, more internships/stipends.
74. PETCO Park should hire more youth.
75. Chambers of Commerce should work to get more local youth hired.
76. There is a lack of community awareness/knowledge.
77. College students are dependent on public transit and that needs to be improved.
78. There is a lack of jobs in Southeast San Diego.
79. Community residents need to start more businesses, hire more local residents; we need more entrepreneurship; more involvement with Chambers of Commerce.

Mobility: Table 2

Round 1 Participant Comments

80. When we think of mobility, we think of access around the community, pedestrians.
81. Public transit is time-consuming.
82. Public Transit runs often.
83. Traffic is high.
84. Where you live impacts your mobility decisions.
85. It is hard to get anywhere during peak periods.
86. You have to take several buses to get to one place.
87. I tried riding a bike but realized it was dangerous – bike lanes are not visible; there are not a lot of safe options going towards 32nd Street Naval Station.
88. 70% of patients from the Family Health Center take public transportation.
89. This area (Southeast) is not safe to walk in.
90. The lack of lighting keeps me from using a bike.
91. There is a lack of bicycle signage and no big notifications for bicycle riders.
92. The cost is a big mobility challenge.
93. Toll roads, bus, trolley and, buses run slow on Sundays.
94. Convenience and safety are challenges to effective mobility.
95. There can be bad experiences while taking the bus; bus drivers do not do anything to handle fighting that goes on, especially toward the back of the bus.
96. Cost is a huge challenge for those not working or on SSI (Social Security Income); the economy is a huge factor.
97. We would like to see more efficient metro system...rail is fast.
98. We would like to see SANDAG address issues of rail.
99. Buses are more flexible and easier to add routes – they are dynamic and adaptable.
100. We have a lot of hills and trucks have to be very careful around cars.
101. We need to have an express bus for kids to school, inner city kids.
102. We need more student bus passes.
103. We need better bike lanes on our major streets; it is scary and dangerous to ride bikes.
104. Bumps on Market & Euclid have popped tires on bikes.
105. To determine which projects get funding we have to support projects that support existing communities.
106. To address safety issues, engage stakeholders from start to finish.
107. In communities where projects will be built, the residents should be involved so they feel their input is valuable and they have to be involved from beginning to end.
108. We spend too much on cosmetic fixes as opposed to changing the land use.
109. As a community, stop putting jobs where people are not; put jobs where people are.
110. We need to support job centers, not housing projects in North County.

- 111. We need to support projects that directly support the people in the community.
- 112. We need to have more voices and more grass-roots outreach, promote door-to-door, and go to trolley locations or schools where people are.

Mobility: Table 2

Round 2 Participant Comments

- 113. When we hear Mobility, we think of buses, moving around, bikes, cars, electric cars, and walking.
- 114. I'm retired, so I can avoid traffic.
- 115. It's important to manage your time when traveling in the San Diego region.
- 116. Prices keep going up on bus/trolley.
- 117. To find transportation information, we use 511, Google transit, City sign closures, and non-profit groups send info.
- 118. We need more highway development.
- 119. We need more flexible bus routes.
- 120. Monthly passes for trolley and bus are expensive; youth passes are also expensive.
- 121. There is not enough trees, too many shrubs.
- 122. Poor transportation affects family life – less time w/ family.
- 123. It is hard to use transportation in Southeast San Diego, especially if you do not live on the bus route.
- 124. It's nearly impossible to shop when you can't walk with all your groceries.
- 125. Current transportation system does not meet our needs.
- 126. If we want to make it more walkable, make more destinations to walk.
- 127. Streets are dark, and there are not enough sidewalks in the community.
- 128. Olivera and Euclid is a pretty area in the community, but still dark and hard to walk.
- 129. Bikes are hard to see.
- 130. Many of us have almost hit people on bikes in our cars.
- 131. There should be a program that pays for reflective jackets for bike riders.
- 132. We should get more reports from SANDAG to keep issues in people's minds.
- 133. If more people knew about transportation was available, they would be more likely to take it.

Mobility: Table 2

Round 3 Participant Comments

- 134. For this workshop, I'm interested in having a healthy community, people having access to jobs, safe routes to school, access to health care, and improved pedestrian access.
- 135. When we hear the word mobility, we think of safety, economic mobility, transportation, people's economic status improving, motorized wheelchairs.

136. SANDAG should focus on sustainability and be an advocate on change.
137. We need to create an enterprise zone.
138. We should look at quality of life indicator, not always the cost when making transportation decisions.
139. There is not enough info (about routes, transit options) at bus stops.
140. More information exchange would be helpful (texts).
141. We need more awareness, more campaigns promoting public transportation.
142. We need to increase the use of google maps, facebook, posting info at grocery stores, and traffic reports.
143. UCSD provides vans & takes employees to work (carpool).
144. It is amazing how a bridge can be taken down in 18 hours to put in ramps; costs less money to do it quicker.
145. If people know which freeways are packed in the morning and evening, they can determine how to prioritize which route to take.
146. We need greater coordination between business community and government agencies.
147. All we talk about is spending billions to create freeways instead of mobility culture.
148. We need to spend more money on bus drivers.
149. Everyone's kids now get a car at 16.
150. If the experience of riding the trolley is improved more people might want to use it (example: trolley to downtown).
151. Sidewalks in Southeast SD are dangerous.
152. We need more senior transportation.
153. More door-to-door transportation options, sharing plans.
154. The only time we have those discussion is when a freeway closes (temporarily) that forces people to think about their travel plans and the transportation options available to them.
155. We just move (drive) wherever we like instead of thinking of the impacts of driving "mobility" (public transportation).
156. We are never going to get to a point where we have a solution for the masses because we love our vehicles.
157. After 3:30pm, Freeway congestion is horrible in this community.
158. The 94 Freeway is often backed up.
159. Interchanges are a challenge.
160. Other freeways have major challenges.
161. Every day there is a war with cars, especially if you are a pedestrian; we need to coexist peacefully.
162. Bikes act like they are cars; they are not respectful of each other's space.
163. SANDAG needs to commit to creating a mass transportation culture.
164. Our culture is about freeways, and not investing in mass transit like buses.
165. Buses should run frequently, so you can catch a bus and go to a job up north and make it on time.
166. All jobs are in Sorrento Valley – tech jobs, hotel jobs, etc.

Healthy Communities: Table 3

Round 1 Participant Comments

167. SANDAG should create more mixed use, walkable communities, and destinations for people to walk to.
168. To encourage walking, SANDAG can add sidewalks, plant trees, and incentivize healthy grocery stores to create businesses in low-income communities.
169. SANDAG should form more collaborative efforts with other organizations to improve air quality within the Region
170. Organizations that promote better health and safety.
171. SANDAG should support community activism by using its influence to help build and repair infrastructure.
172. SANDAG should fund community development/training to educate residents on getting involved with the public process.
173. By employing community residents, money is being circulated back into the Region.
174. Southeast San Diego lacks access and mobility to critical locations like grocery stores and medical facilities.
175. There are not enough healthy food options within the community.
176. We need a Trader Joe's and other types of health food stores in the 4th district.
177. There should be equity in grocery store options throughout the region.
178. A current health challenge in Southeast San Diego is a diminishing school focus on healthy eating and gardening.
179. Safety within schools must be addressed.
180. Project Safeway is a former program which ensured the safety of children commuting to and from school, but was cut due to budget cuts.
181. We need more programs that promote well-being and they should be self-sustaining.
182. There is a lack of community involvement.
183. Residents don't know their own neighbors
184. More publicity is needed to get communities together to jointly improve health.
185. We should incentivize communities to garden and rewarding members/businesses who practice sustainability.
186. We should promote active transportation, walking and biking to get to places.
187. In healthy communities, people have the ability and opportunity to access healthy grocery stores, medical care, and hiking trails.
188. Healthy communities are close-knit, and provide a safe environment.
189. We need to promote community engagement to bond families and neighbors together.
190. We need marketing strategies to bring awareness about convenient mobility options and encourage sustainability.
191. Farmers markets have a positive economic impact in the community and we should promote them more.

Healthy Communities: Table 3

Round 2 Participant Comments

192. Healthy Communities have the accessibility to healthy produce.
193. Healthy communities are safe, as neighbors know each other and are involved in community activities.
194. To establish and create healthy communities, there must be a focus on kids, health education programs regarding sanitation and healthy eating.
195. There is lack of pedestrian-friendly areas in South East San Diego.
196. We need to invest more in infrastructure projects, such as wider sidewalks.
197. There is a lack of engagement of the citizens and they are important to get input to guide their communities.
198. We need to create more community gathering spaces.
199. We need more plots of land designated for community gardens and playgrounds.
200. Funds should be allocated for maintenance of trails for running and walking.
201. We should promote activities to get the community out and to exercise.
202. The younger generations should be trained to get more involved and invested in their communities.
203. SANDAG should serve as an information broker and provide information to share with the public.
204. SANDAG should keep the concerns of its citizens at the forefront, and make the website user-friendly.
205. SANDAG should address the homeless population by using federal money to provide the homeless with housing units.
206. SANDAG should address traffic and congestion within San Diego County.

Healthy Communities: Table 3

Round 3 Participant Comments

207. Healthy communities are designed to promote Active Transportation, especially walk-friendly areas, with ample solar lighting.
208. There is an inequitable distribution of healthy food stores within San Diego County.
209. Big retailers are exploiting the community members by keeping inferior, cheaper products for sale.
210. More fresh produce should be brought in, and the quality of produce available in stores in Southeast San Diego should be equitable in quality to produce in other stores.
211. We need more gentrification occur at new BRT/trolley stations.
212. We need walkability and accessibility, especially around the 47th Street Trolley/BRT station to make it more appealing.
213. SANDAG should promote the idea of community.
214. Highways have separated communities, and it is important to reverse the trend by encouraging people to get to know one another including elected officials, business owners, and residents.
215. SANDAG needs to be the glue that brings people together, to build trust.

- 216. SANDAG should run a farmers garden and community garden.
- 217. SANDAG should assist in finding empty spaces to provide San Diego residents healthier food options, so the people can strive to make San Diego a Healthy Community.

Environment/Climate Change/Energy: Table 2

Round 1 Participant Comments

- 218. Use reclaimed water for landscaping.
- 219. Promote the use of solar energy to help create local "green collar" jobs.
- 220. Producing renewable energy will provide economic benefits for low-income and minority communities that have had to deal with environmental justice issues.
- 221. Invest money in electric car charging infrastructure.
- 222. Use solar panels.
- 223. There needs to be better education for our youth about climate change.
- 224. Youth need to know the processes that contaminate the environment and cause climate change.
- 225. Community members need to be educated about their own impacts on climate change and how to change their individual behaviors.
- 226. Too much traffic and the resulting exhaust are issues for our community.
- 227. We need more transportation choices to get around beyond cars and transit.
- 228. Make communities more walkable and bikeable.
- 229. We need a system that protects land from contamination that disproportionately impacts low-income and minority areas.
- 230. There needs to be better maintenance and cleaning for the streets for our community.
- 231. Right now, there's too much trash and we need more waste and recycling receptacles placed throughout the area.
- 232. Better maintenance and cleaning would help with neighborhood beautification and promote community pride.
- 233. We need a composting program.
- 234. Composting waste would be more environmentally friendly and divert trash from landfills.
- 235. Compost can be used to grow local produce and support the local food system.

Environment/Climate Change/Energy: Table 2

Round 2 Participant Comments

236. Partner with the development community to incentivize brownfield redevelopment.
237. The burden of paying for mitigation measures and removing contaminants falls on the developer and makes these sites less attractive for investment.
238. Make sure community members are aware of whom they can contact regarding their environmental concerns.
239. SANDAG needs to partner with community advocacy groups to help educate and spread awareness.
240. We need to balance transportation funding decisions with environmental impacts.
241. We need to reduce public transportation wait times.
242. We need to make the transit system more viable for day-to-day trips and provide a comfortable riding experience.
243. We need a change in culture to encourage communities to embrace mass transit.
244. Spread Car2Go.
245. Provide good connections so that people can change modes quickly and conveniently (i.e. walk/bike to a transit stop; take transit and then use Car2Go, etc.).
246. Let's create more walkable communities with better neighborhood design, well-lit streets, and better access to daily goods and services.
247. Grocery stores, social services, green space, etc. should be walking distance for everyone.
248. Whenever there is a chance to redevelop a community, we need to make sure that it is designed to be walkable.
249. There should be better lighting so that people can feel safe in their communities and walk around at night.
250. There needs to be more park and green space.
251. We need to create more fresh-food producing areas, especially in low-income and minority communities, and protect these lands from contamination, pollution, exhaust, etc. and the effects of climate change.
252. Our community needs better access to high-quality produce.
253. Produce at the Food 4 Less is low quality, but it's the only grocery store in this community for 150,000 people.
254. People have to go out of the neighborhood for high-quality groceries such as the Sprouts in Lemon Grove.
255. It would be nice to walk to the grocery store and have more choices where to buy.
256. Right now, there are more liquor stores than grocery stores.
257. We would like to have more Farmers Markets serve our community with affordably priced produce.

Spanish (Healthy Community): Table 5

Round 1 Participant Comments

258. A Una comunidad saludable significa tener una comunidad segura donde haya acceso a comida saludable al igual que parques recreativos seguros.
259. Una comunidad saludable significa sentirse seguro, tener buenos parques para mantenernos seguros, buena higiene, cambiar nuestra forma de pensar y nuestra comida para ser más saludable, y acceso a comida saludable.
260. Necesitamos programas de actividad física para los niños.
261. Necesitamos escuelas más seguras para que los niños puedan caminar sin temor.
262. Necesitamos más seguridad en los parques porque hay cosas que suceden en el parque como gente teniendo relaciones sexuales, haciendo drogas, y gente sin techo.
263. En los parques hay gente que hacen cosas que no deben ver nuestros niños; también gente que no recoge las necesidades de sus perros.
264. Necesitamos involucrarse para que la comunidad mejore y prospere.
265. Es importante para mantener seguro para las familias.
266. Decirles los que rentan que si le rentan a maleantes que los van a multar.

Spanish (Mobility): Table 5

Round 2 Participant Comments

267. Sale más barato irme en el carro que irme en el bus... es cuestión de dinero y tiempo; no rinde y no vale la pena.
268. Se tiene que tomar más de un trolley y un bus porque dura mucho tiempo el viaje.
269. En los fines de semana los camiones pasan cada media hora y es demasiado tiempo para esperar.
270. Antes se podía tomar el trolley y bus con \$2.50, pero ahora cobran el doble.
271. El Compass Card viene saliendo casi lo mismo por los días que no se llegan a usar.
272. En familia sale más caro y menos cómodo viajar por camión o el trolley.
273. La ventaja de ser persona de la tercera edad es mejor.
274. El precio del Compass Card es bueno para gente de la tercera edad.
275. Quizás poner en regla otro criterio a base de nivel socioeconómico para las tarifas.
276. Para los estudiantes universitarios también deberían de ser más baratos los pases.
277. Se siente injusto porque no hay descuento para las familias.
278. No hay incentivo para los padres usar tránsito público.
279. Quizás valdría la pena esperar tanto tiempo como dos horas si fuera por un descuento, pero sin descuento no vale la pena.

- 280. En las carreteras por la calle Euclid, hay una parte que siempre está llena de plantas...Antes limpiaban las baquetas, pero ya no.
- 281. Los niños tienen que bajarse a la calle porque ya no se puede caminar por la banqueta y corren peligro al hacerlo.
- 282. Para ir a museos etc. es como un lujo o una aventura.
- 283. El transporte subió mucho de precio y más para la gente que tiene familia.
- 284. "Walking school buses" sería una buena sugerencia para experimentarla.
- 285. Es muy importante interactuar y de conocer a los vecinos.
- 286. Necesitamos crear más rutas de bicicletas.
- 287. Necesitamos que bajen el costo de las bicicletas.
- 288. Necesitamos caminos seguros- entre elegir el trolley el carro y la bicicleta.
- 289. Sería mejor la bicicleta para bajar también costos médicos.
- 290. Si hubieran más rutas para las bicicletas y ciclistas podría irme al trabajo en bicicleta.
- 291. Se hace menos tiempo en bicicleta que en el trolley y a veces más rápido que el coche.
- 292. Tenemos que cambiar la cultura de manejando, y que den multas a la gente en auto que se meta en a rutas de ciclistas.
- 293. Calle Raven y Market son peligrosos - los carros vienen de bajadita los carros a veces no se alcanzan a detener y han matado a dos personas.

Spanish (Economic Prosperity/Borders): Table 5

Round 3 Participant Comments

- 294. Es frustrante como son las cosas diferentes... Aquí te piden todo nada más para que te paguen \$8.50 la hora.
- 295. Los trabajos son muy mal pagados para el costo de vida.
- 296. Hay gente que no tiene realmente el interés o la vocación para ejercer ciertas carreras y se meten a una carrera porque saben que paga bien
- 297. Hay fábricas u otros fuentes de trabajo que pueden lograr ponerlos en áreas más pobladas o en la comunidad, como en estas áreas.
- 298. Hay gente que gasta en cualquier cosa que realmente no se necesita.
- 299. El problema del crimen también es porque casi no hay trabajos.
- 300. Aquí alrededor (Euclid y Market) no hay fuentes de trabajo, así que tenemos que viajar lejos en coche para llegar a trabajo.
- 301. Según existe el sistema para verificar estatus legal y a veces no lo usan.
- 302. Debemos saber buscar y ver las oportunidades.
- 303. Los precios de la gasolina suben pero los sueldos no... también el costo de vida.
- 304. La calidad de trabajos es muy bajo entonces un solícita a cualquier trabajo y te dicen que eres sobre-calificado.
- 305. La región debe buscar industrias limpias que podrían insertarse en nuestra comunidad.
- 306. Quizás traer fábricas de software y celulares, pero que no se dañen la comunidad.

307. Hace falta empleos limpios donde se busca o se les brinda oportunidades de entrenamiento para poder acceder y hacer esos trabajos
308. Las industrias sucias atraen a mucha delincuencia. Hay que sacar a esas afuera y meter a industrias limpias.
309. Necesitamos una industria que pueda educar a los empleados- por ejemplo Motorola les enseñaron a los hombres como trabajar con las mujeres.
310. Tenemos que crear ciertos incentivos para que movilice y empuje la economía en otra dirección.
311. La limpieza de la comunidad, que exista más gente constante que aplique las leyes más patrullaje.
312. Uno mismo también tiene que cooperar con lo que tenemos.
313. Uno tiene que crear la cultura de cultivar nosotros mismos nuestro medio ambiente.
314. El transporte público y autos híbridos deberían ser más accesibles a gente de recursos limitados.
315. La SENTRI es muy buena y facilita la cruzada.
316. Debemos crear un lugar más grande para que sepan para donde ir cuando van a desbordar.
317. Que las carreteras estén más anchas.
318. Hay rayos tantos en México como en San Diego, los desvían y los revisan para que no traigamos armas.

August 21 Jacobs Center - Written Comments

319. **Comment 1**
Fue muy interesante la plática que tuvimos: los de la mesa, todos los temas, y espero que se logre todo.
320. **Comment 2**
Todo está muy interesante.
321. **Comment 3**
 - Very good Process.
 - Good ideas.
 - Bring industry real jobs.
 - Crime Prevention.
 - Bus pass is too high.
322. **Comment 4**
Muy completo. Me gusto la plática.

323. **Comment 5**

- Todo estuvo muy bien, gracias por todo 😊

The San Diego Association of Governments (SANDAG) is the San Diego region's primary public planning, transportation, transit construction, and research agency. In order to best serve San Diego residents, SANDAG is asking for information on your experiences with public transit.

Please fill out this survey so that SANDAG can work on understanding the specific needs of seniors in your area.

Name _____

Address _____

(Please include zip code)

{1} Have you had any problems or difficulties using public transportation? (Check all that apply)

- Overcrowding
- Bussing Hours
- Busses Not Being On Time
- PA System Volume
- Language Barriers
- Bus Doors Open/Shut Too Quickly
- Areas Not Covered
- Other (Please Specify): _____

{2} Are there ever times that you need to use public transportation and it's not available?

Yes No

Please Specify When: _____

{3} Do you ever avoid riding public transportation during certain times of the day?

Yes No

Please Specify When: _____

Please Explain Why: _____

{4} Are there any places you need to travel to and can't?

Yes No

Please Explain Why _____

{5} Do you have any suggestions for improvements to the public transit system?

Section 1: Introduction to Survey

Vista Community Clinic and the North Coastal Prevention Coalition are working in collaboration with SANDAG (San Diego Association of Governments) in gathering input about important issues in San Diego County and we would like to get your opinions.

The following survey questions are based on a telephone survey conducted by True North Research in March 2013.

Section 2: Area of Residence

SC1 What is the zip code at your residence?

[____ - ____ - ____ - ____ - ____]

Section 3: Quality of Life

The first questions are about life in the San Diego region.

Q1 How long have you lived in the San Diego region? (please check one)

- | | | |
|---|--------------------|--------------------------|
| 1 | Less than 1 year | <input type="checkbox"/> |
| 2 | 1 to 2 years | <input type="checkbox"/> |
| 3 | 3 to 4 years | <input type="checkbox"/> |
| 4 | 5 to 9 years | <input type="checkbox"/> |
| 5 | 10 to 14 years | <input type="checkbox"/> |
| 6 | 15 years or longer | <input type="checkbox"/> |
| | Don't Know | <input type="checkbox"/> |

Q2 How would you rate the overall quality of life in the San Diego region? Would you say it is excellent, good, fair, poor or very poor? (please check one)

- | | | |
|---|------------|--------------------------|
| 1 | Excellent | <input type="checkbox"/> |
| 2 | Good | <input type="checkbox"/> |
| 3 | Fair | <input type="checkbox"/> |
| 4 | Poor | <input type="checkbox"/> |
| 5 | Very Poor | <input type="checkbox"/> |
| | Don't Know | <input type="checkbox"/> |

Q3 If local and regional governments could change one thing to make the San Diego region a better place to live now and in the future, what change would you most like to see?

Describe:

Section 4: Broad Priority Areas													
The San Diego Association of Governments – also known as SANDAG – is in the process of developing a Regional Plan that will identify key projects and improvements for the region. Because there is not enough money to fund every project, however, we must set priorities.													
Q4	Below is a list of five general project areas.												
	Please rate each item on a scale from 0 to 10 to rate priority for future funding: <ul style="list-style-type: none"> • 0 means the item should be a very low priority • 5 means the item should be a medium priority • 10 means the item should be a very high priority You can use any number between 0 and 10. Please keep in mind that not all of the items can be high priorities.												
		Very Low Priority					Medium Priority					Very High Priority	Don't Know/NA
A	Improving the Transportation system to improve the flow of people and goods in the San Diego region.	0	1	2	3	4	5	6	7	8	9	10	<input type="checkbox"/>
B	Protecting the Environment , reducing pollution, and making better use of renewable energy sources.	0	1	2	3	4	5	6	7	8	9	10	<input type="checkbox"/>
C	Improving the regional Economy , business climate, and local job opportunities.	0	1	2	3	4	5	6	7	8	9	10	<input type="checkbox"/>
D	Maintaining what we've built , including streets, highways and public facilities.	0	1	2	3	4	5	6	7	8	9	10	<input type="checkbox"/>
E	Locating future housing and new businesses near major employment centers and transit services to reduce commute times and traffic congestion	0	1	2	3	4	5	6	7	8	9	10	<input type="checkbox"/>

Section 5: Specific Strategy Priorities							
Q5	The following is a list of specific projects. For each project listed, please indicate whether you think funding the project should be a high priority, a medium priority, or a low priority. If you don't think any funds should be spent on the project, please mark 'Should not spend resources.'						
	Please keep in mind that not all projects can be high priorities.						
		High Priority	Medium Priority	Low Priority	Should not spend resources	Not sure	Refused
Transportation/Mobility							
A	Expand and improve bus services	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
B	Expand and improve commuter train services including the Trolley, Coaster and Sprinter	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
C	Expand and improve highways	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
D	Make it easier and safer for people to walk to schools, stores, jobs, and other places of interest	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
E	Expand and improve bike lanes and bike paths	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
F	Improve how bus, train, bike and pedestrian routes connect to each other	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
G	Expand opportunities for carpooling, vanpooling, telecommuting and flexible work schedules	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Environment							
H	Preserve parks and natural open spaces	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
I	Protect water quality	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
J	Reduce air pollution and greenhouse gas emissions	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
K	Protect coastal wetlands and beaches	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
L	Promote greater use of renewable energy sources like solar and wind power	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

[continued]

		High Priority	Medium Priority	Low Priority	Should not spend resources	Not sure	Refused
Economy							
M	Attract new businesses to the region and retain existing businesses	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
N	Increase employment and job opportunities	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
O	Improve our transportation system to make it easier for businesses to ship commercial goods and cargo	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
P	Make sure we have the water, energy and other resources needed for businesses to grow in the future	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Q	Enhance regional economic activity by reducing the wait-times at the border for people and commercial goods	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Maintaining Infrastructure							
R	Repair and maintain transit vehicles and equipment	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
S	Repair and maintain local roads	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
T	Repair and maintain highways	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
U	Avoid making cuts to existing transit services	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Land Use							
V	Improve the availability of housing in a variety of price ranges	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
W	Concentrate new multi-family housing near transit services to reduce commute times and traffic congestion	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
X	Concentrate new businesses near transit services to reduce commute times and traffic congestion	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Q6	Of all of the projects listed above, which would you say should be the HIGHEST priority for funding if you had to choose just one?						
	Describe						

Section 6: Willingness to Fund		
Q7	Many of the projects listed do not have adequate funding, which means they can't be built or put in place until funding is found.	
	With that in mind, would you support a tax increase of \$50 per year if all of the money stayed local to fund the projects you just identified as high priorities?	
	1	Definitely Yes <input type="checkbox"/>
	2	Probably Yes <input type="checkbox"/>
	3	Probably No <input type="checkbox"/>
	4	Definitely No <input type="checkbox"/>
		Don't Know <input type="checkbox"/>

Section 7: Alternative Priorities & Willingness to Fund		
Q8	Besides the projects listed, are there any <u>others</u> that you think should be high priorities for funding? <i>If yes, please briefly describe the highest priority project.</i>	
	Describe	
		No/None come to mind <input type="checkbox"/>
		Don't Know <input type="checkbox"/>
Q9	Would you support a tax increase of \$50 per year to fund the high priority project you just described if all of the money stayed local?	
	1	Definitely Yes <input type="checkbox"/>
	2	Probably Yes <input type="checkbox"/>
	3	Probably No <input type="checkbox"/>
	4	Definitely No <input type="checkbox"/>
		Don't Know <input type="checkbox"/>
		N/A <input type="checkbox"/>

Section 8: Background/Demographics		
Thank you so much for your participation. I have just a few background questions for statistical purposes.		
D1	In what year were you born? [___ ___ ___ ___]	
D2	Do you own or rent your current residence?	
	1	Own <input type="checkbox"/>
	2	Rent <input type="checkbox"/>
	3	Live with family / friends and don't pay rent <input type="checkbox"/>
		Other (describe) <input type="checkbox"/>

D3	Which of the following best describes your employment status? Would you say you are employed full-time, part-time, a student, a homemaker, retired, or are you in-between jobs right now?	
	1	Employed full-time <input type="checkbox"/>
	2	Employed part-time <input type="checkbox"/>
	3	Student <input type="checkbox"/>
	4	Both: works & goes to school <input type="checkbox"/>
	5	Homemaker <input type="checkbox"/>
	6	Retired <input type="checkbox"/>
	7	In-between jobs <input type="checkbox"/>
		Other (describe) <input type="checkbox"/>
D4	Which do you spend more time at during a typical week – work or school?	
	1	Work <input type="checkbox"/>
	2	School <input type="checkbox"/>
		Other (describe) <input type="checkbox"/>
D5	On a typical day, how long does it take you to commute from your home to <<work/school>> if you travel there directly without stops?	
	1	Less than 15 minutes <input type="checkbox"/>
	2	15 to 24 minutes <input type="checkbox"/>
	3	25 to 39 minutes <input type="checkbox"/>
	4	40 to 59 minutes <input type="checkbox"/>
	5	60 minutes or longer <input type="checkbox"/>
	6	Don't commute/works from home <input type="checkbox"/>
		Other (describe) <input type="checkbox"/>
D6	How would you describe your access to a personal vehicle? Would you say you always have access, sometimes have access, rarely have access, or never have access to a personal vehicle?	
	1	Always <input type="checkbox"/>
	2	Sometimes <input type="checkbox"/>
	3	Rarely <input type="checkbox"/>
	4	Never <input type="checkbox"/>
		Other (describe) <input type="checkbox"/>

D7	Are you registered to vote? If yes, did you cast a ballot in the November election last year?		
	1	No, not registered to vote	<input type="checkbox"/>
	2	Yes Registered, but did NOT cast ballot	<input type="checkbox"/>
	3	Yes Registered, and DID cast ballot	<input type="checkbox"/>
		Not Sure	<input type="checkbox"/>

D8	What ethnic group do you consider yourself a part of or feel closest to?		
	1	Caucasian/White	<input type="checkbox"/>
	2	Latino/Hispanic	<input type="checkbox"/>
	3	African-American/Black	<input type="checkbox"/>
	4	American Indian or Alaskan Native	<input type="checkbox"/>
	5	Asian -- Korean, Japanese, Chinese, Vietnamese, Filipino or other Asian	<input type="checkbox"/>
	6	Pacific Islander	<input type="checkbox"/>
	7	Mixed Heritage	<input type="checkbox"/>
		Other	

D9	What income category best describes your total household income?		
	1	Less than \$25,000	<input type="checkbox"/>
	2	\$25,000 to less than \$50,000	<input type="checkbox"/>
	3	\$50,000 to less than \$75,000	<input type="checkbox"/>
	4	\$75,000 to less than \$100,000	<input type="checkbox"/>
	5	\$100,000 to less than \$150,000	<input type="checkbox"/>
	6	\$150,000 to less than \$200,000	<input type="checkbox"/>
	7	\$200,000 or more	<input type="checkbox"/>
		Not sure	<input type="checkbox"/>

Those are all of the questions on the survey - Thank you very much for participating!

Sección 1: Introducción de la encuesta

La Clínica de la Comunidad de Vista y North Coastal Prevention Coalition están colaborando con SANDAG (San Diego Association of Governments) para recopilar información acerca de asuntos importantes para el Condado de San Diego y nos gustaría escuchar su opinión

Las siguientes preguntas están basadas en una encuesta llevada a cabo por teléfono por la agencia True North Research en Marzo de 2013.

Sección 2: Área de residencia

SC1 ¿Cuál es su código postal?

[____ - ____ - ____ - ____]

Sección 3: Calidad de Vida

Las primeras preguntas son acerca de la vida en la región de San Diego.

Q1 ¿Cuánto tiempo tiene viviendo en la región de San Diego?

1	Menos de 1 año	<input type="checkbox"/>
2	1 a 2 años	<input type="checkbox"/>
3	3 a 4 años	<input type="checkbox"/>
4	5 a 9 años	<input type="checkbox"/>
5	10 a 14 años	<input type="checkbox"/>
6	15 años o más	<input type="checkbox"/>
	No se	<input type="checkbox"/>

Q2 ¿Cómo calificaría usted en general la calidad de vida en la región de San Diego? ¿Diría que es excelente, buena, regular, mala o muy mala?

1	Excelente	<input type="checkbox"/>
2	Buena	<input type="checkbox"/>
3	Regular	<input type="checkbox"/>
4	Mala	<input type="checkbox"/>
5	Muy mala	<input type="checkbox"/>
	No se	<input type="checkbox"/>

Q3 Si los gobiernos locales y regionales pudieran cambiar una cosa para hacer que la región de San Diego fuera un mejor lugar para vivir ahora y en el futuro, ¿qué cambio quisiera ver más?

Describe:

Sección 4: Áreas de Amplia prioridad													
La Asociación de Gobiernos de San Diego – también conocida como SANDAG – está en proceso de desarrollar un Plan Regional para identificar proyectos importantes para mejorar la región. Sin embargo, puesto que no hay suficiente dinero para proporcionar los fondos para todos los proyectos, debemos establecer prioridades.													
Q4	Lista de cinco áreas generales de proyectos.												
	<p>Sírvase clasificar cada área/proyecto en una escala de 0 a 10, en donde</p> <ul style="list-style-type: none"> • 0 significa que se le debe dar al proyecto una muy baja prioridad • 5 significa que se le debe dar al proyecto una mediana prioridad y • 10 significa que se le debe dar una muy alta prioridad para recibir fondos futuros. <p>Puede usar cualquier número entre 0 y 10. Sírvase tomar en cuenta que no todos los las aéreas/proyectos pueden ser de alta prioridad.</p>												
		Muy baja prioridad					Mediana Prioridad					Muy Alta Prioridad	No Se
A	Mejorar el sistema de transporte para mejorar el flujo de personas y bienes en la región de San Diego.	0	1	2	3	4	5	6	7	8	9	10	<input type="checkbox"/>
B	Proteger el medio ambiente , reducir la contaminación, y sacar mejor provecho de las fuentes de energía renovable.	0	1	2	3	4	5	6	7	8	9	10	<input type="checkbox"/>
C	Mejorar la Economía regional, clima de negocios, y oportunidades laborales locales.	0	1	2	3	4	5	6	7	8	9	10	<input type="checkbox"/>
D	Mantener lo que hemos construido , incluyendo calles, carreteras e instalaciones públicas.	0	1	2	3	4	5	6	7	8	9	10	<input type="checkbox"/>
E	Establecer vivienda futura y nuevos negocios cerca de centros principales de empleo y de servicios de transporte público para reducir los tiempos de viaje y el congestionamiento del tránsito	0	1	2	3	4	5	6	7	8	9	10	<input type="checkbox"/>

Sección 5: Prioridades de estrategias específicas							
Q5	Lo siguiente es una lista de proyectos específicos . Por cada uno de los proyectos por favor indique si piensa que debe ser de alta prioridad, mediana prioridad, o baja prioridad proporcionar fondos a dicho proyecto. Si piensa que no se deben gastar fondos en el proyecto, por favor marque no se deben gastar recursos. Sírvase tomar en cuenta que no a todos los proyectos se les pueden dar altas prioridades.						
	¿Debe este proyecto ser de alta,						
		Alta prioridad	Mediana prioridad	Baja prioridad	No se deben gastar recursos	No está seguro	Rehúso a contestar
Transportación /Movilidad							
A	Ampliar y mejorar los servicios de autobús	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
B	Ampliar y mejorar los servicios de trenes suburbanos incluyendo el "Trolley", Coaster y Sprinter	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
C	Ampliar y mejorar las carreteras	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
D	Hacer que sea más fácil y seguro que la gente camine a la escuela, a la tienda, al trabajo y a otros lugares de interés	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
E	Ampliar y mejorar los carriles para bicicletas y senderos para bicicletas	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
F	Mejorar cómo las rutas de autobús, tren, bicicleta y peatones se conectan unas con otras	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
G	Ampliar las oportunidades para el transporte compartido, transporte compartido en camioneta, trabajo a distancia y horarios flexibles de trabajo	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Medio Ambiente							
H	Conservar los parques y espacios naturales abiertos	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
I	Proteger la calidad del agua	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
J	Reducir la contaminación del aire y la emisiones de gases con efecto invernadero	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
K	Proteger los pantanos de la costa y playas	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
L	Promover mayor uso de las fuentes de energía renovable tales como energía solar y eólica (viento)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

[Continúa]

		Alta prioridad	Mediana prioridad	Baja prioridad	No se deben gastar recursos	No está seguro	Rehúso a contestar
Economía							
M	Atraer nuevos negocios a la región y retener los negocios existentes	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
N	Aumentar el empleo y oportunidades laborales	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
O	Mejorar nuestro sistema de transporte para que sea más fácil que los negocios envíen bienes comerciales y cargamentos	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
P	Asegurar que tengamos agua, energía y otros recursos necesarios para que florezcan los negocios en el futuro	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Q	Mejorar la actividad económica regional al reducir los tiempos de espera en la frontera para personas y mercancías	1	2	3	4	98	99
Mantener la Infraestructura							
R	Reparar y mantener los vehículos y equipo de transporte público	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
S	Reparar y mantener las calles locales	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
T	Reparar y mantener las carreteras	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
U	Evitar efectuar recortes a los servicios existentes de transporte público	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Uso del Suelo							
V	Mejorar la disponibilidad de viviendas en una variedad de rangos de precios	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
W	Concentrar nueva vivienda para familias múltiples cerca de servicios de transporte público para reducir los tiempos de viaje y el congestionamiento del tránsito	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
X	Concentrar nuevos negocios cerca de los servicios de transporte público para reducir los tiempos de viaje y el congestionamiento del tránsito	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Q6	De todos los proyectos que hemos mencionado, ¿si usted tuviera que escoger un solo proyecto, a cuál le la MÁS ALTA prioridad para recibir fondos?						
	Describe						

Sección 6: Voluntad para proporcionar los fondos		
Q7	Muchos de los proyectos de los hablamos no tienen suficientes fondos, lo que significa que no pueden ser construidos o establecidos hasta conseguir los fondos.	
	Con eso en mente, ¿apoyaría un aumento de impuestos de \$50 al año si todo el dinero recaudado se quedara aquí localmente para proporcionar los fondos para los proyectos que usted acaba de identificar como de alta prioridad?	
	1	Definitivamente si <input type="checkbox"/>
	2	Probablemente si <input type="checkbox"/>
	3	Probablemente no <input type="checkbox"/>
	4	Definitivamente no <input type="checkbox"/>
		No se <input type="checkbox"/>

Sección 7: Prioridades alternativas y voluntad para proporcionar los fondos		
Q8	Aparte de los proyectos que acabamos de mencionar, ¿hay cualquier otro proyecto que no he mencionado que usted piensa que se le debería dar una alta prioridad para recibir fondos? Si es si, por favor describa brevemente el proyecto de más alta prioridad.	
	Describa	
		No/No se me ocurre ningún proyecto <input type="checkbox"/>
		No se <input type="checkbox"/>
Q9	¿Apoyaría usted un aumento de impuestos de \$50 al año para proporcionar los fondos para el proyecto que usted ha mencionado si todo el dinero se quedara aquí localmente?	
	1	Definitivamente si <input type="checkbox"/>
	2	Probablemente si <input type="checkbox"/>
	3	Probablemente no <input type="checkbox"/>
	4	Definitivamente no <input type="checkbox"/>
	98	No se <input type="checkbox"/>
	99	N/A No aplica <input type="checkbox"/>

Sección 8: Antecedentes y datos demográficos		
Muchas gracias por su participación. Sólo tengo algunas preguntas generales para propósitos estadísticos.		
D1	¿En qué año nació? [___ ___ ___ ___]	
D2	¿Usted es propietario o está alquilando su casa actual?	
	1	Dueño <input type="checkbox"/>
	2	Renta o alquiler <input type="checkbox"/>

	3	Vivo con familia / amigos y no pago renta	<input type="checkbox"/>
		Otro (Describa)	
D3	¿Cuál de las siguientes frases mejor describe su situación laboral? ¿Diría que tiene trabajo de tiempo completo, de tiempo parcial, es estudiante, es ama de casa, jubilado, o está desempleado temporalmente en este momento?		
	1	Trabajo de tiempo completo	<input type="checkbox"/>
	2	Trabajo de tiempo parcial	<input type="checkbox"/>
	3	Estudiante	<input type="checkbox"/>
	4	Ambos: trabaja y va a la escuela	<input type="checkbox"/>
	5	Ama de casa	<input type="checkbox"/>
	6	Jubilado	<input type="checkbox"/>
	7	Desempleado temporalmente	<input type="checkbox"/>
		Otro (describa)	<input type="checkbox"/>
D4	¿En dónde pasa usted más tiempo en una semana típica - en el trabajo o en la escuela?		
	1	Trabajo	<input type="checkbox"/>
	2	Escuela	<input type="checkbox"/>
		Otro (describa)	
D5	En un día típico, ¿cuánto tiempo le toma viajar de su casa al <<trabajo/escuela>> si pudiera viajar allí directamente sin paradas?		
	1	Menos de 15 minutos	<input type="checkbox"/>
	2	15 a 24 minutos	<input type="checkbox"/>
	3	25 a 39 minutos	<input type="checkbox"/>
	4	40 a 59 minutos	<input type="checkbox"/>
	5	60 minutos o más	<input type="checkbox"/>
	6	No viaja/trabaja desde su casa	<input type="checkbox"/>
		Otro (describa)	
D6	¿Cómo describiría su acceso a un vehículo personal? ¿Diría usted que siempre tiene acceso, a veces tiene acceso, ocasionalmente tiene acceso, o nunca tiene acceso a un vehículo personal?		
	1	Siempre	<input type="checkbox"/>
	2	A veces	<input type="checkbox"/>
	3	Ocasionalmente	<input type="checkbox"/>
	4	Nunca	
		Otro (describa)	

D7	¿Está usted inscrito para votar? ¿Votó usted en las elecciones de noviembre el año pasado?		
	1	No, no estoy inscrito para votar	<input type="checkbox"/>
	2	Sí estoy inscrito, pero NO voté	<input type="checkbox"/>
	3	Sí estoy inscrito, y Sí voté	<input type="checkbox"/>
		No estoy seguro	<input type="checkbox"/>

D8	¿A qué grupo étnico se relaciona o con cuál se siente más cercano?		
	1	Caucásico/Blanco	<input type="checkbox"/>
	2	Hispano/Latino	<input type="checkbox"/>
	3	Afroamericano/Negro	<input type="checkbox"/>
	4	Indio americano o Nativo de Alaska	<input type="checkbox"/>
	5	Asiático -- Coreano, Japonés, Chino, Vietnamita, Filipino u otro Asiático	<input type="checkbox"/>
	6	De las Islas del Pacífico	<input type="checkbox"/>
	7	De herencia o antepasados mixtos	<input type="checkbox"/>
		Otro	<input type="checkbox"/>

D9	Únicamente tengo una pregunta más para razones estadísticas.		
	1	Menos de \$25,000	<input type="checkbox"/>
	2	\$25,000 a menos de \$50,000	<input type="checkbox"/>
	3	\$50,000 a menos de \$75,000	<input type="checkbox"/>
	4	\$75,000 a menos de \$100,000	<input type="checkbox"/>
	5	\$100,000 a menos de \$150,000	<input type="checkbox"/>
	6	\$150,000 a menos de \$200,000	<input type="checkbox"/>
	7	\$200,000 o más	<input type="checkbox"/>
	98	No estoy seguro	<input type="checkbox"/>

¡Esas son todas las preguntas! Machísimas gracias por su participación

SANDAG Regional Plan True North Survey Summary

Setting: Presentation on San Diego Forward at Poder Popular Resident Leadership meeting on June 4, 2013. Ten surveys collected.

1. Survey language

- | | |
|------------|-----|
| a. English | 30% |
| b. Spanish | 70% |

2. How long have you lived in the San Diego region?

- | | |
|------------------|-----|
| Less than 1 year | 0% |
| 1-2 yrs | 10% |
| 3-4 yrs | 0% |
| 5-9 yrs | 0% |
| 10-14 yrs | 20% |
| 15+ yrs. | 70% |

3. How would you rate the overall quality of life?

- | | |
|------------|-----|
| Excellent | 20% |
| Good | 40% |
| Fair | 20% |
| Poor | 20% |
| Very poor | 0% |
| Don't know | 0% |

4. If local and regional governments could change one thing to make San Diego region a better place to live now and in the future, what change would you most like to see?

- Housing, schools, streets, and more parks
- Reduce obesity rates and improve public transportation
- To be a safe place because security on different areas is really bad during night time
- Safer walk trails
- Improve evening public transportation
- More health information

5. Below is a list of five general project areas. Please rate each item on a scale from 0 to 10 to rate priority for future funding.

Top responses:

- Locating future housing and new businesses near major employment centers and transit services to reduce commute times and traffic congestion (66.7% rated this item a 10/10)
- Improving the regional economy, business climate, and local job opportunities (62.5% rated this item a 10/10)

6. Specific Strategy Priorities

a. Transportation/mobility

- Make it easier and safer for people to walk to schools, stores, jobs, and other places of interest (80% rated this item a high priority)
- Expand and improve commuter train services including the Trolley, Coaster, and Sprinter (80% rated this item as a high priority)
- Expand and improve bike lanes and bike paths (80% rated this item a high priority)

b. Environment

- Protect water quality (90% rated this item a high priority)
- Reduce air pollution and greenhouse gas emissions (70% rated this item a high priority)
- Preserve parks and natural open spaces (70% rated this item a high priority)
- Promote greater use of renewable energy sources like solar and wind power (70% rated this item a high priority)

c. Economy

- Increase employment and job opportunities (90% rated this item a high priority)
- Enhance regional economic activity by reducing the wait-times at the border for people and commercial goods (77.8% rated this item a high priority)

d. Maintaining infrastructure

- Repair and maintain transit vehicles and equipment (80% rated this item a high priority)
- Repair and maintain local roads (80% rated this item a high priority)

e. Land use

- Concentrate new businesses near transit services to reduce commute times and traffic congestion (80% rated this item a high priority)
- Improve the availability of housing in a variety of price ranges (70% rated this item a high priority)

7. Would you support a tax increase of \$50 per year to fund these projects?

Definitely yes	22.2%
Probably yes	44.4%
Probably no	0%
Definitely no	22.2%
Don't know	11.1%

8. Besides the projects listed, what others do you think should be high priorities for funding?

- Improve education
- Reduce gangs and drug use
- It is important to open to the public all the information for the projects in differ

Demographics

1. Do you own or rent your current residence?

- | | |
|------------------------------------|-----|
| a. Own | 20% |
| b. Rent | 80% |
| c. Live with family/don't pay rent | 0% |

2. Employment status

- | | |
|-----------------------|-------|
| a. Full-time | 11.1% |
| b. Part-time | 55.6% |
| c. Student | 11.1% |
| d. Both work & school | 0% |
| e. Homemaker | 11.1% |
| f. Retired | 0% |
| g. In-between jobs | 11.1% |

3. Where do you spend more time in a typical week?

- | | |
|-----------|------|
| a. Work | 100% |
| b. School | 0% |

4. Typical commute time

- | | |
|----------------------------------|-------|
| a. Less than 15 min | 22.2% |
| b. 15-24 min | 55.6% |
| c. 25-39 min | 0% |
| d. 40-59 min | 0% |
| e. 60+ min | 11.1% |
| f. Don't commute/works from home | 11.1% |

5. Access to a personal vehicle

- | | |
|--------------|-----|
| a. Always | 50% |
| b. Sometimes | 30% |
| c. Rarely | 20% |
| d. Never | 0% |

6. Registered to vote/casted a ballot in 2012

- | | |
|---------------------------------|-----|
| a. Not registered | 70% |
| b. Yes registered, did not vote | 0% |
| c. Yes registered, did vote | 20% |
| d. Not sure | 10% |

7. Ethnicity
- a. Caucasian/White 0%
 - b. Latino/Hispanic 100%
 - c. African-American/Black 0%
 - d. American Indian/Alaska Native 0%
 - e. Asian 0%
 - f. Pacific Islander 0%
 - g. Mixed heritage 0%
 - h. Other 0%
8. Household income
- a. Less than \$25,000 90%
 - b. \$25,000-\$50,000 0%
 - c. \$50,000-\$75,000 0%
 - d. \$75,000-\$100,000 0%
 - e. \$100,000-\$150,000 0%
 - f. \$150,000-\$200,000 0%
 - g. \$20,000 + 0%
 - h. Not sure 10%

SANDAG Regional Plan True North Survey Summary

Setting: Presentation on San Diego Forward at Vista Unified School District Adult Learning Center on June 4, 2013. Forty-four surveys collected.

1. Survey language

- | | |
|------------|-------|
| a. English | 4.5% |
| b. Spanish | 95.5% |

2. How long have you lived in the San Diego region?

- | | |
|------------------|-------|
| Less than 1 year | 2.3% |
| 1-2 yrs | 0% |
| 3-4 yrs | 4.5% |
| 5-9 yrs | 20.5% |
| 10-14 yrs | 22.7% |
| 15+ yrs. | 50% |

3. How would you rate the overall quality of life?

- | | |
|------------|-------|
| Excellent | 2.4% |
| Good | 45.2% |
| Fair | 50% |
| Poor | 0% |
| Very poor | 0% |
| Don't know | 2.4% |

4. If local and regional governments could change one thing to make San Diego region a better place to live now and in the future, what change would you most like to see?

- Improve transportation system to reduce car's use.
- Cost of housing and taxes
- Improve employment and economy
- Transportation, business, and jobs close to our neighborhoods
- Cost of housing, taxes and gas
- Mejor lugar en el futuro (Better place in the future)
- Que haya más trabajo y menos delincuentes (That there was more work and less criminals)

- Más seguridad en las calles. Mejorar las carreteras. (More safety in the streets, fix highways/roads)
 - Seguridad en las calles y más transportación más cerca de las casas y con más frecuencia (Safety in the streets and more transportation closer to residences and with more frequency)
 - Más librerías, más parques, más lugar para caminar (more libraries, more parks, more places to walk)
 - Menos tráfico, menos contaminación, no pandillerismo, si liderazgo positivo! (Less traffic, less pollution, no gangs, positive leadership!)
 - Que no hubiera barrera de fronteras. Para poder vivir libre de la migra y el racismo por ser Latina. (That there was no barrier of borders. To be able to live free of the (immigration enforcement) and the racism for being Latina).
 - Más "accessibility", less traffic, more transportation options - more affordable
 - Más seguridad (More safety)
 - Menos delincuentes y drogas (less crime and drugs)
 - Empleo, seguridad (jobs, safety)
 - Que ponga ley que las personas no tirar basura en la calle (To create a law so that people don't throw trash in the street).
 - Autobuses para los niños de la escuela (School bus for the children)
 - Más vigilancia policiaca (More police surveillance)
 - Hacer más centros recreativos para padres y jóvenes (More recreation centers for parents and children)
 - Más trabajo (More work)
 - parques, banquetas (Parks, sidewalks)
 - Banquetas para caminar más seguros (Sidewalks to walk more safely)
 - Yo quisiera que todas las comunidades tuvieran más parques, y banquetas las calles (I would like all communities to have more parks and sidewalks)
 - Detener la delincuencia (stop crime)
 - Más cuidado con la basura, reciclar lo necesario (More care with garbage, recycle what can be)
 - Más reciclaje (more recycling)
 - Cuidar el medio ambiente (protect the environment)
 - Viviendas más baratas (cheaper housing)
 - Viviendas más baratas, están muy caras las rentas (cheaper housing, rent is very expensive)
 - Mayor seguridad (Better security)
 - Más áreas verdes, lugares de estudios de reciclaje. More green areas, places to study recycling
5. Below is a list of five general project areas. Please rate each item on a scale from 0 to 10 to rate priority for future funding.

Top responses:

- Improving the regional economy, business climate, and local job opportunities (55.8% rated this item a 10/10)
- Protecting the environment, reducing pollution, and making better use of renewable energy sources (48.8% rated this item a 10/10)

6. Specific Strategy Priorities

a. Transportation/mobility

- i. Make it easier and safer for people to walk to schools, stores, jobs, and other places of interest (90.7% rated this item a high priority)
- ii. Expand and improve highways (79.1% rated this item as a high priority)

b. Environment

- i. Protect water quality (97.7% rated this item a high priority)
- ii. Reduce air pollution and greenhouse gas emissions (88.6% rated this item a high priority)
- iii. Protect coastal wetlands and beaches (88.4% rated this item a high priority)

c. Economy

- i. Increase employment and job opportunities (95.2% rated this item a high priority)
- ii. Make sure we have the water, energy and other resources needed for businesses to grow in the future (88.6% rated this item a high priority)

d. Maintaining infrastructure

- i. Repair and maintain highways (97.6% rated this item a high priority)
- ii. Repair and maintain local roads (88.4% rated this item a high priority)

e. Land use

- i. Concentrate new multi-family housing near transit services to reduce commute times and traffic congestion (88.4% rated this item a high priority)
- ii. Improve the availability of housing in a variety of price ranges (62.5% rated this item a high priority)

7. Would you support a tax increase of \$50 per year to fund these projects?

Definitely yes	34.1%
Probably yes	50%
Probably no	0%
Definitely no	0%
Don't know	15.9%

8. Besides the projects listed, what others do you think should be high priorities for funding?

- Build low cost housing
- Improve education
- Build low cost housing
- Proyecto de jóvenes adolescentes y padres (project for adolescents and parents)
- Money to the schools
- No quitar recursos autobuses de escuela (Do not take away resources for school buses)
- Más policías (More police)
- La educación (education)
- Menos policías racistas y más policías humanitarios (less racist police and more humanitarian police)

Demographics

1. Do you own or rent your current residence?
 - a. Own 14%
 - b. Rent 86%
 - c. Live with family/don't pay rent 0%

2. Employment status
 - a. Full-time 22.7%
 - b. Part-time 16.6%
 - c. Student 4.5%
 - d. Both work & school 4.5%
 - e. Homemaker 50%
 - f. Retired 2.3%
 - g. In-between jobs 2.3%

3. Where do you spend more time in a typical week?
 - a. Work 60%
 - b. School 40%

4. Typical commute time
 - a. Less than 15 min 20.5%
 - b. 15-24 min 25.6%
 - c. 25-39 min 17.9%
 - d. 40-59 min 12.8%
 - e. 60+ min 10.3%
 - f. Don't commute/works from home 12.8%

5. Access to a personal vehicle
 - a. Always 36.6%
 - b. Sometimes 56.1%
 - c. Rarely 4.9%
 - d. Never 2.4%

6. Registered to vote/casted a ballot in 2012
 - a. Not registered 62.2%
 - b. Yes registered, did not vote 2.7%

SANDAG Regional Plan True North Survey Summary

Setting: Presentation on San Diego Forward at Vista Community Clinic/Health Promotion Center All-Staff Meeting on June 14, 2013. Fifty-six surveys collected.

1. Survey language

- | | |
|------------|------|
| a. English | 100% |
| b. Spanish | 0% |

2. How long have you lived in the San Diego region?

- | | |
|------------------|-------|
| Less than 1 year | 1.8% |
| 1-2 yrs | 7.1% |
| 3-4 yrs | 1.8% |
| 5-9 yrs | 12.5% |
| 10-14 yrs | 8.9% |
| 15+ yrs. | 67.9% |

3. How would you rate the overall quality of life?

- | | |
|-----------|-------|
| Excellent | 25% |
| Good | 57.1% |
| Fair | 17.9% |
| Poor | 0% |
| Very poor | 0% |

4. If local and regional governments could change one thing to make San Diego region a better place to live now and in the future, what change would you most like to see?

- Affordable housing including home ownership opportunities
- Better public transportation system
- Expanding freeways to reduce traffic, housing, employment opportunities
- Transportation, better for peds
- Other transportation options besides auto!
- More open spaces/preservation of natural habitats
- More cultural arts, promotion of small businesses
- Build more freeway lanes

- Transportation congestion
- Lower cost of living
- Making sure that we take care of our wildlife as construction happens.
- Mass transit (train) along the 15 freeway
- Safer parks, lower housing rates and better educational services
- Sidewalks, safety parks, community places for activities for low income
- More park friendly places for families to take their kids & better quality of air.
- Clean, safe, well maintained neighborhoods. Moved to Temecula (Riverside county) due to lack of affordability.
- More efficient public transit
- More accessible public transportation. More recreation parks.
- More public transportation from San Diego to North County SD. More walkable communities. Neighborhood equity.
- Positive energy saving efforts & preserving nature
- Improve traffic congestion
- A less conservative approach and an embrace of change
- Public transit be more accessible, and not so spread out
- Increase transportation services between all regions of San Diego County
- Reduce congestion on roads
- Increase the flow of public transportation and make it more accessible
- Affordable or more pre-school and child care. More programs for low income families to be able to afford pre-school
- Assistance for the homeless. More cleanup along Oceanside and OB beaches
- Better transportation on the 15
- Increase public transit
- Cheaper public transportation
- Stop Marijuana
- Build a new airport
- More efficient public transportation
- Create a more green environment with less traffic
- Better public transportation, and more recycling programs
- Improve traffic. Improve safety in high crime areas.
- Make it easier to get places without a car by carpooling, walking, biking, public transit, etc.
- Better roads & freeways
- More sidewalks in low income communities. In my neighborhood there is very little areas to walk without having to look out for oncoming traffic.

5. Below is a list of five general project areas. Please rate each item on a scale from 0 to 10 to rate priority for future funding.

Top responses:

- Improving the regional economy, business climate, and local job opportunities (56.4% rated this item a 10/10)
- Protecting the environment, reducing pollution, and making better use of renewable energy sources (50.9% rated this item a 10/10)

6. Specific Strategy Priorities

a. Transportation/mobility

- i. Make it easier and safer for people to walk to schools, stores, jobs, and other places of interest (70.9% rated this item a high priority)
- ii. Expand and improve highways (55.6% rated this item as a high priority)

b. Environment

- i. Protect water quality (87.3% rated this item a high priority)
- ii. Reduce air pollution and greenhouse gas emissions (81.8% rated this item a high priority)
- iii. Preserve parks and natural open spaces (75.9% rated this item a high priority)

c. Economy

- i. Increase employment and job opportunities (85.7% rated this item a high priority)
- ii. Attract new businesses to the region and retain existing businesses (46.4% rated this item a high priority)

d. Maintaining infrastructure

- i. Repair and maintain highways (57.1% rated this item a high priority)
- ii. Repair and maintain local roads (48.2% rated this item a high priority)

e. Land use

- i. Improve the availability of housing in a variety of price ranges (62.5% rated this item a high priority)

7. Would you support a tax increase of \$50 per year to fund these projects?

Definitely yes	25%
Probably yes	55.4%
Probably no	7.1%
Definitely no	7.1%
Don't know	5.4%

8. Besides the projects listed, what others do you think should be high priorities for funding?

- Education/fixing schools - updating or making new ones available
- Speed rail to SF & LA
- Better education k-12
- Education
- Allow for open spaces for community garden use
- Make neighborhood parks safer - increase lighting
- Preschools affordable
- Protect water quality
- Community sports parks
- Make community colleges bigger and hiring more teachers
- Making all neighborhoods safe for walking

- Recycling
- Community clean-ups in urban neighborhoods
- Community clean-ups in areas such as Escondido

Demographics

1. Do you own or rent your current residence?
 - a. Own 30.4%
 - b. Rent 58.9%
 - c. Live with family/don't pay rent 10.7%

2. Employment status
 - a. Full-time 80%
 - b. Part-time 7.3%
 - c. Student 0%
 - d. Both work & school 10.9%
 - e. Homemaker 0%
 - f. Retired 1.8%
 - g. In-between jobs 0%

3. Where do you spend more time in a typical week?
 - a. Work 98.1%
 - b. School 1.9%

4. Typical commute time
 - a. Less than 15 min 29.1%
 - b. 15-24 min 41.8%
 - c. 25-39 min 12.7%
 - d. 40-59 min 12.7%
 - e. 60+ min 3.6%
 - f. Don't commute/works from home 0%

5. Access to a personal vehicle
 - a. Always 90.9%
 - b. Sometimes 9.1%
 - c. Rarely 0%
 - d. Never 0%

6. Registered to vote/casted a ballot in 2012
 - a. Not registered 25.5%
 - b. Yes registered, did not vote 18.2%
 - c. Yes registered, did vote 56.4%
 - d. Not sure 0%

7. Ethnicity
- a. Caucasian/White 20%
 - b. Latino/Hispanic 70.9%
 - c. African-American/Black 3.6%
 - d. American Indian/Alaska Native 1.8%
 - e. Asian 3.6%
 - f. Pacific Islander 0%
 - g. Mixed heritage 1.8%
 - h. Other 0%
8. Household income
- a. Less than \$25,000 18.5%
 - b. \$25,000-\$50,000 53.7%
 - c. \$50,000-\$75,000 9.3%
 - d. \$75,000-\$100,000 7.4%
 - e. \$100,000-\$150,000 9.3%
 - f. \$150,000-\$200,000 0%
 - g. \$20,000 + 0%
 - h. Not sure 1.9%

Alliance for Regional Solutions

Community-based Outreach Services

Task 7: Final Report June 28, 2013

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

We reached out to our ARS member organizations to get ideas from them about the best way to reach communities of concern in North County. We presented the San Diego project at our general meeting which was attended by over 40 organizations and city representatives. We also discussed San Diego Forward with our Executive Board to get their opinions and ideas on how to reach this community. We then had a steering committee meeting on June 26th and got some great ideas and comments on the future of North County and transportation.

In the beginning stage of this project, I think ARS has been successful in reaching out to our member organization and informing them of San Diego Forward and the goals we have of reaching the communities of concern in North County. We have a group of organizations that are willing to work with us to hold meetings and forums and to help us get surveys filled out to get a wide range of opinions on what is needed in North County.

Our plan is to hold meetings at some of the organizations with some of their clients that fall in the category of communities of concern.

We have started distributing the surveys to clients of North County Community Services and have collected a few. We will collect the remainder in the month of July.

The main concern/want coming from the community is the need for reliable, reachable and affordable public transportation in North County. I have attached a public comments report with the main ideas, comments and concerns that we found.

Our accomplishments:

- We have held three meetings with ARS member organizations. We were able to inform them about San Diego Forward and how ARS will be involved over the next two years.
- We promoted and attended the SANDAG community workshops that were held in North County (Escondido and Oceanside).
- We formed a steering committee with organizations that would like to be a part of San Diego Forward. These organizations will be helping us set up meetings with their clients.
- We have started a survey collection covering topics relevant to the San Diego Forward Regional Plan.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

We have representatives from certain member organizations that would like to join us in gathering information. They will be helping us get surveys filled out by their clients. They have also offered to help us hold forums and meetings. These organizations are North County Community Services, Mira Costa College, Housing and Urban Development (HUD), Interfaith Community Services, Brother Bennos, Mental Health Systems and Community Resource Center.

We have begun having surveys filled out by over 100 clients of North County Community Services. We have collected over 35 and are expecting another 60-70 in the next two weeks. We used a version of the phone interview survey that SANDAG conducted by True North Research. We have a list of survey participants who would like to continue with San Diego Forward and will be willing to participate in future meetings and/or surveys.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

I think we are off to a good start. By getting our member organizations informed and some of them involved, we are closer to getting to the communities that we want to engage. We are going to now start meeting directly with these communities as we start to plan meetings and forums.

We are hoping to plan a forum at MiraCosta College and meet with college students to get their opinions.

We also are planning meetings at Brother Bennos, Interfaith Community Services, North County Community Services and some of the largest section 8 housing complexes. We will collect information through open dialogue and surveys.

The surveys were successful in getting good information. We may need to tailor them to different organizations. It was noted that our survey may not be relatable to certain populations.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

We think that having forums and open discussions followed up with surveys is the best way to reach people. This will inform people about the San Diego Forward Regional Plan and what the goals are. The discussions will be good for people to see all sides of an issue and then be able to decide for themselves what they think would be the best option for what their needs are. The survey will then be a great way for participants to be able to freely express what they feel about each topic.

Title of Organization

Community-based Outreach Services

Task 7: Final Report

Date

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

Policy Workshops:

- Linda Vista Collaborative:
 - o 10 members from the Linda Vista Collaborative participated in a focus group regarding the Regional Plan. The participants were instructed to speak on their own behalf, and also voice opinions that they have heard from their clients. The policy areas that were addressed were as follows: Mobility, Healthy Communities and Economic Prosperity. The questions that were used during this focus group were being tested and were later altered and built upon.
- Vietnamese
 - o 9 Linda Vista resident seniors (ages 64-75 years old) participated in a focus group in order to discuss the various topics in the Regional Plan such as: Mobility, Healthy Communities and Economic Prosperity. This focus group was conducted in Vietnamese by the Bayside Community Advocate. This focus group was run at Bayside Community Center for 1.5 hours.
- Spanish
 - o 20 Spanish-speaking Linda Vista residents participated in a 3-hour workshop at Bayside Community Center. During this workshop the policy areas of the Regional Plan that were discussed were Quality of Life, Mobility, Economic Prosperity and Healthy Communities. This workshop ran 1 hour over the specified original 2-hour meeting time.

Summary of findings for all three focus groups:

Mobility:

- More frequent, affordable and reliable transit routes to hospitals, health care and job centers.
- Information in transit centers and buses is not represented in Vietnamese.
- Sidewalks are unsafe and unusable for all ages.
- Would like to see more and safe bike routes connecting Linda Vista to other communities and San Diego amenities.

Healthy Communities:

- Desire safer, cleaner and well-lit parks. Also, more green space.
- Ability to safely walk in early mornings and evenings.
- Continue offering senior discount bus passes
- Ensure safe and clean bus/trolley and stops.

Economic Prosperity:

- Creating a “Merchant Association” between local Linda Vista businesses so that businesses have an outlet to communicate. Currently, the business community seems separated and individualized.
- A good mix of businesses that serve the Linda Vista community adequately. For example, healthy food stores, less liquor stores and less fast food. Also having access to healthy food stores.
- Having more and affordable access to educational institutions.

Linda Vista walkability Survey

- 276 Linda Vista residents participated in a walkability survey of the Linda Vista and surrounding areas. The surveys were administered at the Linda Vista Multi-cultural Fair and at Bayside’s monthly commodity food distribution. A very high percentage of Linda Vista residents that receive services at the monthly food distribution travel primarily by foot and public transit on a daily basis. The survey was administered in English, Spanish and Vietnamese. 28% of surveys were filled out in a language other than English.

Summary of results:

- More and brighter lighting on Ulric Street, Comstock Street and Linda Vista Road near Twain High.
- Residents desire more police patrols.
- Safer, well-lit and cleaner parks are needed.
- Improving sidewalks
- Improving crosswalks
- Adding landscaping
- Speed bumps and traffic calming
- Adding murals

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

Bayside reached out to multiple communities within the Linda Vista Community. The first was the Linda Vista Collaborative (community members and people who work in Linda Vista). The second group was Vietnamese speaking seniors. These seniors were recruited from Bayside’s Senior Steps program and were enthusiastic about participating in this program. The third population that participated was Spanish-speaking parents. These were active community members and parents of children participating in our Academic Clubs. The last group that will include students living in the Linda Vista area between the ages of 14 and 18. These students have been recruited through a partnership with the Boys and Girls Club.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

The Public Involvement Plan and Outreach Plan appropriately reached out to the various groups in the Linda Vista community in order to yield useful and relevant input. The focus group protocol that was used worked very well with the community. Groups were small enough so that all participants were comfortable sharing their input. Also, the questions that were used were easily understood and relevant to the community's experience. This also helped participants feel comfortable in giving input.

In regards to outreach, the most successful method was to utilize regular meeting times and events that were already put in place. Examples of this were using the monthly Linda Vista Collaborative meeting, monthly Bayside Food Commodity Distribution and the yearly Linda Vista Multi-Cultural Fair as venues for receiving input. Also, expanding on connections that had already been made through the Boys and Girls Club, Bayside Academic Club, Bayside Volunteers and the Senior Steps program eased the recruitment process.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

It is important to note that in the Spanish-speaking focus group participants would address other issues as a way to compliment their answers to the questions being asked. For example, when discussing quality of life issues, many participants agreed that there was not a way to live a quality life in the United States as an undocumented person. This is because many opportunities are not offered to them due to their legal status, etc. This topic is an important and sensitive issue that this community needed to address before speaking about additional topic areas.

Casa Familiar, Inc.
Community-based Outreach Services

Task 7: Final Report
August 5, 2013

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

Casa Familiar accomplishments were visible in the close to 100 community members in attendance. While the community understands this is a long term planning document, many concerns revolve around the present day transportation and access issues. Some that keep re-occurring or brought up to Casa Familiar, particularly in small group discussions are: Cost of public transit, need for improved infrastructure at the San Ysidro Trolley Stations and length of time to get from San Ysidro to destinations north of Chula Vista.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

We outreached to the following organizations:

The San Ysidro Chamber of Commerce, The San Ysidro Business Association, The San Ysidro Smart Border Coalition, The San Ysidro Health Center, political office holders, and The San Ysidro Community Planning group, which is very engaged and has some of the most involved and committed volunteers that understand more details of urban planning. Casa Familiar requested their presence/attendance to the San Ysidro Workshop.

We also outreached to residents and clients of Casa Familiar services and programs. Engaged residents of Casa programs offered some direct perspective at the workshop on particular details for how they access public transit. We had several initial meetings to introduce them to the topic and plan elements, discuss how those elements could be interpreted in the San Ysidro/Border context, then invited them to the workshop to provide input.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

Yes, our public outreach plan engaged the San Ysidro community. Material that was missing was information on how much investment has been brought and lost in the community. There was no sense of quantifying the impacts of localized investment.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

Presenting information on how much investment has been introduced into the community and is planned future investment would help to begin to explain why/where social equity now plays an important role in the process. This should be included in the next phase.

COMMENTS/NOTES

City Heights CDC and Mid-City CAN

Community-based Outreach Services

Task 7: Final Report – 7/30/13

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

The City Heights Community Development Corporation (CHCDC) and Mid-City Community Advocacy Network (MCC) have been engaged in outreach in the City Heights neighborhood of San Diego to educate and engage residents on the issues and process surrounding San Diego Forward: The Regional Plan (RP). This outreach has engaged dozens of residents, speaking several different languages (Somali and Spanish the largest among them). There has been both substantive information sharing through data and explanations of roles and process, as well as qualitative information gathering about community priorities and expectations of the process. Outreach has been conducted through a workshop on June 18th, 2013 attended by 20 people and numerous small group and one-on-one meetings conducted by Randy VanVleck and Emily Serafy Cox.

The findings thus far can be summed up as a sentiment of needing additional investment in the City Heights community. There have been many challenges facing City Heights identified in the workshop, small group, and one-on-one meetings: lack of affordable transportation options or access to important destinations, poor housing quality and unaffordable housing overall, sluggish economic development and a lack of local jobs, lack of park and open space, and the negative health effects to which all of these conditions contribute. Here are a few quotes from residents:

What should be in the regional plan: "Centerline", "local bicycle routes", "walking", "network building and neighborhood connectivity", "free youth bus pass", "more pocket parks"

"Points for communities of concern need to be combined to give City Heights more, we are all 4 categories"

"We need to see how equitable the distribution of transportation funds has been"

"SR-94 expressway should not be in the regional plan"

"Connectivity for seniors and population with mobility challenges"

"Offer opportunities to small businesses to grow"

"There are too many liquor/smoke stores"

"Do government entities hire City Heights residents?"

"Stop investing on making it easier for people to drive in and out"

"We shouldn't have to leave our community to get better jobs and education"

"Senior building was built but no supportive services and infrastructure to support it"

"Play catch up in City Heights to accelerate progress"

"Freeway is developed but walking infrastructure is not"

"Enrichment classes not available, we have to leave community, need community college that offers that"

As you can see above, the current concerns of the community are tied to a history of lacking investment and complex community needs. Many of the concerns are not new, they are long-standing community challenges that have never been addressed. A concern that is picking-up steam in the community is related to the State Route 94 Expressway project. The concerns have risen to the level of asking that the project be removed from the plan all together. These concerns came out during our workshop as well as in one-on-one conversations with community leaders.

From the dialogue that we have facilitated, it seems clear that in the eyes of City Heights residents the most desirable outcome of the RP process and finalized plan will be: 1. a process that genuinely involves the community and incorporates their priorities into the final plan; 2. a transportation plan that shifts investment from roads and freeways towards active transportation and transit; and 3. a plan that lays the groundwork for jobs close to where people live, namely close to City Heights.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

Though we reached out to residents and organizations in the greater Mid-City and Southeast area, we concentrated our efforts on individual leaders and groups in City Heights. We worked with and involved the following groups:

- City Heights Town Council
- City Heights Area Planning Committee
- Improving Transportation in City Heights Momentum Team-Food Justice Momentum Team
- Built Environment Team
- City Heights Business Association
- Employee Rights Center
- Environmental Health Coalition
- International Rescue Committee
- City Heights Seniors
- City Heights on Patrol
- Bikes Del Pueblo
- Crawford High School Students
- Mid City Bike Corridor Community Advisory Group Members
- City Heights Urban Greening Community Working Group Members
- Cherokee Point Elementary School Parents group
- Asociacion de Liderazgo Comunitario (formerly Proyecto De Casas Saludables)
- SR-15 CenterLine BRT Working Group Members
- El Cajon Boulevard Business Improvement Association

The level of engagement of a some of the groups above has been simply through informal conversation on the issue. The rest of the groups above had a presentation on the regional plan at one of their meetings and/or had a representative attend the workshop on June 18th, 2013.

Formal input has thus far been solicited in the setting of the workshop through small group discussions on the major issues at hand in the RP. These small groups were facilitated by Emily Serafy Cox and Randy VanVleck, with both informational and probing questions. Responses were documented by note-takers and the final notes are attached to this document.

Informal input has been solicited through small group and one-on-one meetings with individual leaders and residents in the community. These meetings are tracked by the project staff in order to assess emerging areas of community concern and level of interest in the RP. It is our experience that often information can be gathered through these small group and one-on-one meetings that can never come out in a large group meetings. In these smaller, more informal meetings people are able to feel more comfortable and have better communication with the project staff, especially if a translator is involved. These meetings are also an opportunity for people to ask questions about the process that they may be reluctant to ask in a large group session.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

Our Public Involvement/Outreach Plan engaged our community as well as it could, considering the constraints on time and resources. The methods we used were very successful in engaging people from a range of perspectives and levels of knowledge about the RP.

We designed our workshop questions to gather useful information and input from people who knew very little about the planning process or scope of the RP. We used simple, yet engaging graphics to highlight the challenges faced by our region in the next 40 years (see attached materials from workshop). We allowed people to give input in the setting that best suited their comfort level and interest. We built off existing relationships to reach diverse perspectives. We used trained facilitators to lead small group discussion so that everyone could be heard.

The most successful method is the one-on-one meeting with a leader or resident. These meetings give a deeper understanding of the person's perspective and improves trust in the process. These meetings also build to the public workshops because they serve as a recruitment tool and a chance for individuals to enter the workshop better prepared to offer formal input.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

The Regional Plan process and associated processes regarding the development of components within the plan are extremely confusing to the general public. CBO partners also seemed confused,. It has been a challenge to explain, to the general public, the timeline and significance of a plan with such complexity and scale. Much of the materials for public consumption that have been produced by SANDAG are wordy or unclear and do not serve as a useful starting point for discussion. Additionally, community engagement would likely improve if the names of different SANDAG plans – such as “Coordinated Plan,” “Comprehensive Plan,” “Regional Transportation Improvement Plan” -- were less vague and abstract and instead spoke directly to the subject matter of the plan as “Regional Bicycle Plan” and “Regional Transportation Plan” do.

That being said, much of the graphical data available from SANDAG is incredibly useful. Graphical information is extremely useful for engaging residents in this dialogue who have little technical expertise in the traditional sense. This is especially true for residents with low English proficiency and/or low literacy. The contract would leave more time for fulfilling the deliverables if

the reporting process was simplified. Consider simplifying the descriptions of the Tasks in the contract documents. The Task descriptions in the Scope of Work, Required Deliverables, and the Task Titles in the invoice template document vary slightly from document to document.

Documentation of CBO-related work in the community (more documents included in CD delivered to Jane Clough):

What should San Diego look like in 40 years?

You should decide!

Tuesday, June 18th, 2013
6-8pm
City Heights Wellness Center
4440 Wightman St. Suite 200
(around the corner from Albertson's)

The San Diego Association of Governments (SANDAG) is making a new plan — called “San Diego Forward: The Regional Plan” — for what the San Diego region’s transportation and land use should look like over the next 40 years. Come learn about how you can have an effect on this process!

Chula Vista Community Collaborative

Community-based Outreach Services

Task 7: Final Report June 30, 2013

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

CVCC participated and attended all required meeting with SANDAG. CVCC has been engaged with SANDAG and continues to work to ensure residents of Chula Vista have a voice. In accordance with the contract, CVCC Developed a draft Involvement/Outreach Plan to best meet the needs of the Chula Vista Community.

CVCC has met all deliverables, including the submission of a Status report through 4-30-13. CVCC actively participated in meetings and discussion and provided feedback and contributed to the definition of communities of concern discussion/definition.

CVCC presented SANDAG information and message at various community events/meetings, including:

- CVCC Partners Meeting on April 9, 2013
- Promotoras Active for Community Meeting on May 3, 2013
- Teen Promotores Active for Community Meeting on May 9, 2013
- Community meeting on May 9, 2013
- Promised Neighborhood Promotoras (Academy) on June 4, 2013

In addition, CVCC actively recruited participants and conducted outreach for the Regional Meeting at Casa Familiar in San Ysidro on June 6, 2013

CVCC also utilized its extensive network of community partners and residents and sent out meeting and message announcements through these networks. CVCC also posted information on the CVCC website and provided the SANDAG flyers in English and Spanish (Regional meeting in San Ysidro)

Feedback gathered from Chula Vista residents/Meeting participants includes:

- Most people use their own car as their primary transportation method
- Few people use the Trolley or bus system
- Cost of transportation for people using their own vehicle ranges between \$300-\$400 per month
- Bus users noted that they pay \$2.25 - \$2.85 per day

Item #1 Continues

- Participants identified their primary concern with transportation as:
 - o Cost of gasoline
 - o Cost of transportation overall
 - o Traffic
 - o Being late to work/destination due to transportation issues
- Specific to public transportation comments included:
 - o Not sufficient routes
 - o Takes too long to get to destination
 - o Its time consuming

Overall comments included:

- There are insufficient bus routes
- Need more flexible schedules/buses to run more often
- Need more public transportation options
- Bus stops need shade as buses take too long and people have to wait
- Would use public transportation if it was not so expensive

The resounding comment from participants was that public transportation is too expensive and not accessible to them due to the cost. Participants feel that public transportation should be more financially accessible (cost) and more effective (more routes/more often).

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

CVCC conducted outreach in Chula Vista, targeting Chula Vista residents and families who are low income and Spanish speaking. Outreach was done through our network of Family Resource Centers and through our Promotoras at local events. In addition we used our list serve and partners network to get the word out about these efforts.

Participants seems to be well engaged with the presentations and the information. The SANDAG 101 presentation was well received and provided a good introduction to regional efforts. More handouts would have been helpful.

Participants were asked questions during the presentation and this made for a more interactive presentation and increased the engagement level. Participants were also asked to fill out a simple one-page questionnaire to note their transportation model and note their concerns.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

The PowerPoint on SANDAG 101 was useful; however it should be simplified to best fit the community. Some of the slides were difficult to explain and some of the technology does not work for those of us who do not have high tech equipment.

The handouts are useful but were received late into the contract; they will be very useful during the next cycle.

A PowerPoint is the correct tool to use for our community and simple handouts are a great way to support the presentation and make the objective clear.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

Need more clarity on the objective of the project and handouts that are simpler to use, at the beginning of the project. It is already becoming clearer and the second cycle will be more effective.

El Cajon Collaborative Status Report/ June 2013

Community-Based Outreach Services for 2050 Regional Plan

1. Explain your organization's progress with relevant tasks in the contract. Narrative can be in the form of bullet points. Describe progress made on each task that is in process. Level of effort described should coincide with invoicing.

Task 1: CBO Meetings

- Prepared for and participated in Network meetings with other Community-based Partners on the following dates:
 - June 6, 2013

Task 2: Develop Community Public Involvement Strategy: COMPLETED in May 2013

Task 3: Monthly Status/ Progress Reports

- Gathered communications, logs and documents needed for report
- Drafted report for June 2013
- Formatted, finalized and submitted report

Task 4: Contribute to Key Elements in Social Equity Analysis: COMPLETED in April 2013

Task 5: Initial Public Outreach (workshops/regular meetings)

MARKETING/PROMOTION

- Promoted the SANDAG Regional Workshops through flyer distribution at meetings, announcements at meetings, posting of flyer on community bulletin boards, and by sending promotional materials through email blasts to ECC stakeholders
- Made announcements about ECC's proposed outreach activities and the importance of collecting community input to inform SANDAG regional planning processes

PREPARATION FOR COMMUNITY OUTREACH

- Prepared for ECC's upcoming workshops through participation in SANDAG's Regional Workshop on June 27th at the La Mesa Community Center on Memorial Drive in La Mesa.
- Convened with outreach Partners to form working relationships and customize plans for outreach to the project's target demographics
- Prepared for outreach through study of the Regional Transportation Plan

INITIAL OUTREACH

- "What is SANDAG? Why Does it Matter?" presentation to El Cajon Collaborative Council, June 4th
TARGET DEMOGRAPHIC: Low-income, older adults, refugees/immigrants
- "What is SANDAG? Why Does it Matter?" presentation to Silvercrest Senior Living, June 21st
TARGET DEMOGRAPHIC: Older adults, low-income, low-mobility
- "What is SANDAG? Why Does it Matter?" presentation to St Madeleine Sophie's, June 26th
TARGET DEMOGRAPHIC: Disabled, low-income
- Recruited (17) El Cajon residents to attend the Regional Plan Workshop in La Mesa, June 27th

Task 6: Documentation of work efforts (photos/sign in sheets)

- Prepared a sign-in sheet templates for ECC's outreach
- Scanned and saved sign-sheets for use in reporting
- Took photos of outreach activities
- Uploaded photos and saved them for reporting

Task 7: Final Report for Feb-June, 2013

- Compiled information needed to complete report
- Wrote, edited, formatted and finalized report

2. Address any issues or problems that have come up during your meetings, workshops, canvassing efforts, surveys, and other methods of participation.

- Outreach activities have gone smoothly with few issues or problems arising.
- First use of translator felt awkward. Lesson learned was that the message needed to be framed in one sentence chunks. Two at the most.
- Using a translator caused each language group to have to wait every other sentence. It took a lot of patience for both groups (English speakers and Arabic speakers).
- At June 27th Regional Plan Workshop, a refugee from El Cajon with limited English had difficulty expressing his complex ideas. We plan to collect input from his group this year.
- One of the presentations to refugees was cancelled last minute. That caused challenges in properly spending down the remaining funding for June's outreach activities.
- After the initial outreach activities we concluded that the sign-in sheet needed to be modified. Residents were confused by the questions and some were uncomfortable giving contact info.

3. Discuss your organization's upcoming plans for next month.

- Outreach activities were in full swing, with (3) presentations given
- Level of engagement has been good overall
- Incentives (gift cards) are greatly appreciated by persons with low-incomes and are an effective engagement tool.
- People from the Middle-East are attentive to any mention of how SANDAG treats Native American Tribes. Some come from Tribal systems and this is a topic of interest to them.
- Overall, the majority of our audience members had never heard of SANDAG before.
- Any promise that we would come back again to talk only about "transportation" as a policy area in an upcoming meeting made audience members very happy.

4. Other reflections on the process (i.e., have your outreach efforts been successful? What is the level of engagement?)?

The El Cajon Collaborative's plans for the Community-based Partners grant in the next month are:

- Continue working with community Partners to determine customized approaches for outreaching to their stakeholder groups (communities of concern)
- Continue working with community Partners on any necessary outreach material preparation that is needed, including translation
- Purchase incentives needed for outreach
- Continue planning for support staff needed for material translation, facilitation, interpretation and meeting support
- Prepare presentations for community as needed
- Request speakers from SANDAG as needed
- Gather all documentation and information needed for the monthly Status Report
- Maintain communication with SANDAG staff and other community Partners as needed
- Get the word out about available presentations through conversations, announcements, and emails
- Schedule outreach presentations over the next year
- Conduct outreach utilizing community Partners as cultural brokers
- Compile input from outreach
- Compile documentation (including sign-ins and photos) from outreach

El Cajon Collaborative
Community-based Outreach Services

Task 7: Final Report
January-June 2013

1. Explain your organization's **accomplishments in terms of Community-based Outreach Services** for the Regional Plan. **Summarize the findings**, thus far, from your communities, articulating both **current and future concerns and desirable outcomes**.

Accomplishments

The first phase of this Community-based Partners project was scheduled for January through June 2013. Our initial months (January through May) were mostly spent establishing relationships with SANDAG staff (and other key stakeholders) and orienting to the project. Other accomplishments were related to planning and preparing for upcoming community outreach activities. Community outreach activities began in June 2013.

The El Cajon Collaborative's accomplishments for the Community-based Outreach Services for the Regional Plan for January-June 2013 included:

1. Establishing working relationships with SANDAG staff and the other Community-based organizations through monthly SANDAG Community-based Partner Network meetings
2. Establishing an understanding of the project's Goals, Objectives and expected Activities
3. Establishing working relationships with El Cajon Collaborative Partners for planning customized outreach strategies to target communities of concern
4. Raised awareness among El Cajon residents and stakeholders of upcoming SANDAG Regional Plan outreach activities planned for FY2014
5. Recruited (14) El Cajon residents to attend the SANDAG San Diego Forward Regional Plan Workshop at the La Mesa Community Center on June 27th
6. Gave (3) community presentations on the topic of "What is SANDAG and Why Does it Matter?" to El Cajon residents (see demographic breakdown in Item 2 below)
7. Secured follow-up presentation opportunities from all three community groups presented to in June (for focused presentations on policy areas of interest to each group)

Summary of Findings

Current and Future Concerns

Presentations given in June were an overview of SANDAG and an introduction to the proposed policy areas for San Diego Forward Regional Plan. Although there were opportunities at each presentation for community members to give input, specific input about policy areas was not solicited. Therefore, community input in this first month of outreach was quite general:

- The majority of the input offered by residents was related to transportation and/or transit. The main theme of the transportation/transit-related input was:
 1. Many El Cajon residents cannot afford their own car
 2. Public Transit is expensive and time-consuming
 3. Bus benches are unbearably hot in the summer due to lack of shelters and trees
 4. Buses are too far apart and a 45 minute wait between buses was reported
 5. The trolley is so far away from the center of town that it is practically useless to El Cajon residents for employment, shopping and medically-related trips.
- The second theme that emerged from resident input was related to housing:
 1. Housing is expensive
 2. Affordable housing is often infested with insects/rodents or is otherwise sub-standard
- General themes were a lack of awareness about SANDAG and a struggle for communities of concern to see the relevance of regional planning in their daily lives (which focus on survival).

Desirable Outcomes

The lack of understanding by residents of what SANDAG is and does make it hard to get a true read on what El Cajon residents think would be desirable outcomes from the SD Forward Regional Plan. Our goal is to help residents determine this over time as we educate them about specific policy areas.

2. What **groups and/or communities did your organization reach out to**? What was the **level of engagement**? How did you **solicit input**?

Groups/Organizations Outreached to

Presentations regarding the SANDAG SD Forward Regional Plan that were given in the initial phase of this Contract (January through June 2013) were:

1. El Cajon Collaborative Community Council
2. Silvercrest Senior Living
3. Saint Madeleine Sophie's Center

We educated and collected input from a total of (54) El Cajon residents who were members of SANDAG's identified communities of concern. Fifteen persons with disabilities, 15 older adults and 24 persons of limited means were included in these groups.

Level of Engagement

As noted in the narrative of item #1 above, it was obvious to us that El Cajon residents who struggled to cover basic needs such as food, shelter and clothing found it challenging to find the relevance of regional planning in their lives. Incentives were key to gaining entry to these groups.

All three presentations followed the same pattern; an initial low level of engagement evidenced by people looking bored and sleepy, followed by an increased interest as relevant topics were presented evidenced by more alert audience members, making comments and asking questions. By the end of each presentation residents were excited about having another SANDAG presentation to further discuss the policy areas they were interested in.

Ways of Soliciting Input

Initially, these residents were interested in the gift cards more than the presentations. However, we did our best in each presentation to mention the policy areas we felt that the residents would be most interested in, encouraging them not to wait until all of the decisions were impacting them, but to stand up and give input while the policies were being formed. Here is a summary of our most effective ways of soliciting input from residents in our first round of outreach activities in El Cajon:

PERSONS OF LIMITED MEANS

- Incentives to attract residents who are focused on daily survival. Believe it or not, a gift card makes a big difference in some of these residents' lives. They were SO GRATEFUL.

REFUGEES/IMMIGRANTS

- Mentioning that San Diego has a high number of Native American Tribes and they have representation on the SANDAG Board made a big difference to Middle-Eastern refugees and immigrants. They respect SANDAG for including Tribal perspectives. It means a lot to them.
- Talking about democracy in America, the fact that everyone has a voice. Explaining that SANDAG leaders are NOT a diverse group that demographically mirror the communities they serve and therefore SANDAG has made extra efforts to collect input from members of diverse communities to inform policy making. Making sure they understand their opinions matter and will be reflected in a report to SANDAG. Acknowledgement that they may sometimes feel like they have no voice, but this is a special opportunity to magnify their voices.
- Explaining that the only way to truly have a voice in America is to first study the way government works, what is in the government's purview, and what is important to the government systems being engaged, and by being smart, strategic and cool-headed, THAT is how Americans have a voice. Acknowledging that they may FEEL angry about transportation and housing but being smart, strategic and calm is the only way to be heard.
- Promising to come back to talk in detail about SANDAG policy areas of interest so they could give input was key. The first presentation about "What is SANDAG and Why Does it Matter?" stirred them to want to give more input. The first meeting helped peak their interest.

PERSONS WITH DISABILITIES

- Keeping concepts in their most basic form possible helped this group to engage
- Using concrete examples about transportation and housing issues common to their demographic helped to further peak their interest. General concepts were hard to grasp but more specific examples of those concepts furthered their understanding.
- This group was highly motivated by Subway gift cards

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

Success of Public Involvement/Outreach Plan

The strategies outlined in our Public Involvement/ Outreach Plan have been successful in outreaching to the community. Particular strategies that have worked well in El Cajon have been:

- Using the existing relationships we have with community organizations to gain access to/ establish trust with communities of concern.
- Working with key community contacts to develop a custom strategy to outreach to each community of concern
- Offering incentives to residents that participate in outreach activities
- Offering community organizations that broker outreach opportunities a stipend to offset their investment of time and resources
- Outreaching to groups that already meet, rather than scheduling a new meeting

Success of Materials, Methods, and Mechanisms

So far, the customized outreach activities have been simplified and low-tech. Advice from community Partners in outreaching to communities of concern have been to keep it simple, with as few written words as possible. Successful materials, methods and mechanisms in the initial round of outreach have included:

MATERIALS

- Not using written materials for initial "What is SANDAG and Why Does it Matter?" presentation due to the abstract nature of some of the concepts
- Using gift cards as incentives (ranged from \$10-\$20 each from WalMart and Subway)

METHODS

- Giving the presentation verbally without use of Power Point
- Creating presentations in a format that can be easily "chunked off" into 1-2 sentence pieces for interpretation into foreign languages
- Using an interpreter

MECHANISMS

- Using community Partners as "cultural brokers" to gain access to residents and create appropriate and relevant outreach strategies for effectively reaching them

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

Reflections on the Process

All in all the process has been good. Here is a summary of the reflections we have had on the process thus far:

1. The Community-based Partners' efforts were slow to launch, taking several meetings to orient the group to the project and several more to assist us in understanding the concepts involved.
2. The more often the Community-based Partners met, the more comfortable we felt with the project. The support from the "Network" meetings has been invaluable.
3. Although we had the idea of creating materials before we started the outreach, it has become clear to us that we needed to **experience** the outreach in order to gain understanding about the materials that would be most useful.

Lessons to Incorporate in to Next Phrase

1. The size and type of incentive will vary depending on the group.
2. Presentations must be written in 1-2 sentence chunks in order to effectively use an interpreter
3. Middle-Eastern refugees/immigrants are sensitive to the concept of inclusion of Tribes in planning
4. Regional planning seems irrelevant to communities of concern. Focusing on policy areas they care about helps connect them to planning. Relevant examples are also a good tool.

International Rescue Committee

Community-based Outreach Services

Task 7: Final Report June 30, 2013

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

The International Rescue Committee (IRC) completed the major tasks as anticipated during this period and began the process of outreaching to and collecting community input for the Regional Plan.

IRC developed all of the marketing materials needed to conduct outreach including developing a Coordinated Plan Questionnaire in multiple languages and translating SANDAG materials and workshop announcements into Arabic and Somali. On May 14th and May 25th, the IRC held group Workshops with refugee clients to introduce the Regional Plan and discuss the public transit system and its infrastructure in San Diego County. The Workshop was held in English and Arabic and included a Q & A session. The Coordinated Plan Questionnaire was also distributed to clients to complete. Attached to this Final Report is data from the questionnaire, which were completed by 44 refugees living in El Cajon. Clients were encouraged to write commentaries in their own language. The commentaries have been translated into English for SANDAG and also attached with the Final Report. Through the discussion groups and questionnaires, IRC staff has gained a better understanding of how to properly phrase the questions to receive the most meaningful answers from clients. As a result, the questionnaire has been revised to draw suggestions and ideas from community members on policies and infrastructure within the Regional Plan.

Some initial findings showed clients felt generally favorable toward transportation in San Diego. Approximately half of respondents felt public transportation is accessible for their travel needs and 70% of respondents stated that they are able to carry out their daily activities given their current mode of transportation. The main concern that has been brought up is the cost of travel and the inability for many low income individuals to afford transportation. Safety was also brought up as a concern. IRC will look into these initial comments further through the next several months to analyze the trends and get more specific feedback. As mentioned in section 4 IRC will begin to solicit feedback on the other policy areas as well as transportation starting with the next workshop on July 25th.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

The IRC outreached to low-income, minority (LIM) and limited English proficiency community members in City Heights and El Cajon. Initially, the IRC attempted to engage a wide range of refugees, from recently arrived (4-6 months) to those who have been in San Diego for more than a year. The IRC found that while newly arrived refugees utilize public transportation more and are aware of current challenges related to the transit system, their level of engagement was not as high as the IRC anticipated. This is largely due to the fact that many were still in the process of rebuilding their lives in San Diego. Refugees who have been in San Diego for more than a year, on the other hand, were much more engaged and provided better feedback on the Regional Plan, adding commentaries to the questionnaire and verbalizing their challenges.

To solicit input, the IRC distributed the translated Coordinated Plan questionnaires, held two workshops onsite on topics related to transportation in the Regional Plan and also encouraged community attendance at the SANDAG hosted workshops.

Along with outreaching to LIM community members directly, the IRC engaged other local community based organizations (CBOs) with access to similar clientele to engage in the Regional Plan process. IRC recognizes that many LIM individuals interact with other CBOs and IRC felt that it was important to collaborate with these organizations too. IRC hopes that the CBOs will act as advocates for their clients by attending the Regional Plan information session and by participating in the Regional Policy workshops. To increase engagement from other CBOs, the IRC held a Regional Plan information session during the San Diego Refugee Forum monthly meeting. Phil Trom of SANDAG spoke about the purpose of the Regional Plan and the importance of engagement, 54 individuals from various community based organizations all over San Diego were in attendance. IRC also advertised the SANDAG policy workshops to multiple listserv, including San Diego Immigrant Rights' Consortium, San Diego Naturalization Collaborative and Friends of City Heights. On May 25th, the IRC hosted a Regional Plan workshop at the San Diego Refugee Forum monthly meeting in City Heights.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

The Public Involvement/Outreach Plan that was developed has been an excellent tool to appropriately engage targeted communities in City Heights and El Cajon. The IRC utilized the existing network of over 7000 existing clients (all of whom fall under the LIM and/ or LEP community category).

Methods of engagement include holding workshops in existing classes and trainings to facilitate discussion about the Regional Plan. The Coordinated Plan Questionnaire is distributed prior to the discussion to allow clients to voice concerns that were not adequately collected in the questionnaire. The survey has been translated into Arabic and Somali and interpretation is provided at all workshops. Interpretation is done by an IRC staff that is also part of the clients' ethnic community, which ensures that the interpretation is culturally appropriate. The IRC noticed that in collecting input, the surveys were a bit more challenging than face-to-face workshops. This may be a result of cultural differences since answering survey questions is not a common method of gathering information in many of IRC's clients' home countries. However, the surveys solicit quantitative data that IRC and SANDAG can use to analyze travel patterns, transit utilization and basic transportation concerns from a specific population of the LIM community. IRC will continue to distribute the surveys and encourage clients to elaborate on the answers they selected.

The group discussions are naturally more interactive and by providing an interpreter it significantly improves the client's participation in the conversation. Clients are more comfortable expressing their concerns and providing anecdotes about their own experience in their native language.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

As a new contactor for SANDAG's Regional Plan outreach efforts, the IRC staff spent time understanding the Regional Plan and SANDAG's expectations for executing the contract. With multiple tasks involved in the contract, expectations for them were not always clear and deadlines kept shifting. A concise outline of requirements during each period will help significantly to ensure each CBO is on task with their outreach efforts.

During this contract period, IRC focused largely on transportation challenges for the targeted communities however after participating in multiple Regional Policy workshops, the IRC has gained a better understanding of the other policy areas in the Regional Plan. IRC has found that community members are also interested in land use and public health topics and for the next agreement term IRC anticipates engaging community members on these policy areas too.

IRC appreciates the opportunity to be involved in this process and is fully committed to soliciting compelling feedback from the community and strengthening the partnership with SANDAG.

FINDINGS: June 2013 SANDAG Regional Plan 2050

The MOUNTAIN EMPIRE REGION Mountain Health & Community Services

SANDAG TRANSPORTATION Findings: PROCESS

Our initial outreach efforts covered community-wide introductions to the concept of Regional Planning. We had booths at two, highly attended, community events that drew people from multiple of our Mountain Empire Region communities. They were the *Round Up* on May 18, and the *Wellness Fair* on June 1. Individuals shared their opinions on the comment cards that were used during the regional May 17 workshop. These comments have been transcribed into our findings.

These activities were followed by outreach to seniors in the individual communities via the senior lunch program; and an all-age, community-wide event held at the Campo Community Center. Attendees viewed a PowerPoint on Regional Planning and were then asked three questions related to transportation: *How does transportation impact your daily life? What do you feel are the biggest challenges in traveling around the community/San Diego region? What types of transportation improvements would you like to see in your community/the region/San Diego?* Followed by an open-ended question: *How do you envision our region in the year 2050?* All comments were transcribed and appear in the findings that follow.

FINDINGS: *How does transportation impact your daily life?*

- Limited income/limited access to vehicle means I often go without services for longer periods of time than I would like
- 80-mile trip to the Veterans Hospital is daunting even with a gas reimbursement
- No local dental providers/clinics are limited on hours doctors are available, hours do not coincide with bus times
- Cost of gas is very impactful
- Limited transportation options coupled with limited access to food is a challenge
- I am disabled and still am able to drive a small amount, I have no certainty in being able to get to doctors, food, friends
- Stress of losing one's license and having to rely on limited routes/access is very *real* to rural seniors

- Fortunately, friends and neighbors step up to provide transportation support
- Closet pharmacy for prescriptions is in Alpine 45+ miles away
- 90-year-old senior had concerns regarding ability to get to doctor appointments and the cost of a pass; we live in isolated, rural communities and depend largely on friends and neighbors. How do I use the mini, access bus?
- Reliance on public transportation impacts work attendance
- High cost of gas
- High cost of public transportation is a burden- its basically the same cost as gas would be- yet takes all day with too short a time in town
- Mobility/transportation provides access to stores & healthcare; allows us to socialize with family & friends and provides opportunities to participate in education/trade skills. It is a key attribute of “quality of life”- our ‘zero-car’ households are restricted in all these areas
- The cost is affecting my ability as a senior to utilize transportation; the same for our youth, high school and post-secondary aged cannot get to jobs or school
- Communities need education and transportation options
- We may gain options with the re-opening of rail in the region
- The high cost of gasoline makes managing/prioritizing trips a concern
- Trips for health needs are a concern- one woman stated: “I had to rely on friends and neighbors to get follow-up treatment after an eye surgery made it impossible for me to drive”
- Consensus was easily reached that the cost of gasoline has a limiting impact on their car-trips. Also that while cars may be in good enough shape for local trips, trips on the freeway and into town are limited due to age/condition of cars, as well as traffic conditions

FINDINGS: *What do you feel are the biggest challenges in traveling around the community/San Diego region?*

- High rates of diabetes affect many, getting to dialysis is very problematic, access to healthy foods is limited
- In the winter, El Centro/Tecate are better options than San Diego for goods/services; in summer its too hot
- High cost of gasoline, we barely have vehicles let alone hybrid vehicles
- Limited route access/reasonable timeframes
- Yes, yes, yes, re-open the *volunteer driver* reimbursement program!
- Many of us drive locally, but we do not drive freeways
- Many of us use Tecate for goods and services rather than going to San Diego
- Improve infrastructure/economies around the Tecate border region
- Local, back country community trips would be an asset- to get to Jacumba, or Campo. Have bus take loops on roads other than Highway 94
- Access to affordable food is limited- Alpine, being closer but still expensive, El Cajon is often the only realistic, affordable option
- These individuals indicated they have used the tribal buses (Viejas) as a transportation extender, but timeframes around trips are “unreliable”
- To attend cultural/recreational events in urban San Diego they drive to the nearest trolley hub (El Cajon) then use the trolley, but it is time consuming; need more express routes/links to city hubs and scenic attractions

- Unanimously, the cost of gas was a major concern; followed by the cost and lack of accessibility of bus options in this region.
- Followed by the need to address: Limited local route options, pricing, connectivity
- Few buses/ bus routes/review and refine scheduling
- Bus passes for seniors low-income, students- how do we get these
- Inadequate time in town to do errands, have to be back on the bus
- Not only gas, but vehicle maintenance and insurance are hardships
- More outreach/communication to allow understanding of services may be beneficial-remembering, however, that most do not have access to technology

FINDINGS: *What types of transportation improvements would you like to see in your community/the region/San Diego?*

- Need more local route options/use mini-buses is more effective in rural areas than full-size buses
- More buses and more bus routes-loop rather than staying solely on Hwy 94
- Bus passes for seniors, low-income, disabled, students
- We need to get to hubs in the city- and be able to have adequate time in town to do errands- two consecutive rural route days would allow people to stay in town with friends/family, and even enjoy an evening event in the San Diego region
- Express loop, with trolley and bus coordination in Santee- Santee Town Center has many shopping alternatives in a close range
- More bike racks and merchandise space on buses
- Encourage ride sharing programs
- Utilize bus stops at community focal points- libraries, cafes, markets, provide shade!
- More time in town (only a little over an hour and one needs to be back on the bus)
- More outreach/communication to allow understanding of services would be beneficial
- Local loops and border loops
- More linkages/express routes from the El Cajon trolley station/Santee Town Center
- Express lines to Los Coches, (Walmart), El Cajon transit station- along the I8 corridor
- Create a Mobility Newsletter so people know how to access transportation options
- The development of localized transportation options is highly encouraged
- More fuel efficient, non-polluting buses/auto options
- Review routes and connectivity, more trolley options in El Cajon- loop routes on major connector streets
- More information on para-transit programs, how do we know about routes/options when we have no access to internet
- Local mini-shuttles
- We are a “food desert” in the rural backcountry, the closest supermarket is in Alpine and the closet affordable markets are in El Cajon, Santee, (Food for Less, Smart & Final) or La Mesa/Santee (Costco)—we need local access to fresh fruits and vegetables, and affordable options. It is very difficult, costly and time extensive to get to shopping options

How do you envision our region in the year 2050?

Jacumba: We would like to be seen as the “Gate way to San Diego” not the “Backdoor”. It would be extremely beneficial for SANDAG or its partnering agencies/governments to assist in some **research and development** in the creation of a self-contained rural area with expanded economic/transportation/education opportunities. Our seniors and young adults (focal points of consensus) face severe challenges in terms of local employment and educational opportunities. How will the re-vitalization of rail impact our area? Will there be passenger rail? Bring a “99 cent” store to the region that has affordable groceries! Link us with express routes to Santee Town Center.

Campo: What are the opportunities presented by the re-opening of rail lines? What options do we have for clean, low-water impact, industry? Expand eco-tourism outreach. Utilize our unique vistas and dark night skies. Hiking, biking, horse activities. Glider airport, hot springs, cultural amenities, music festivals. Utilize the bi-national border aspect- create a mini-rural-hub? Jacumba-Hot Springs has a vision for a unique ‘Tourism-centric’ community. Access the regions Planning & Sponsor Group Plans to see goals and outcomes. Remember- we want to stay rural, avoid sprawl; many people only wish to see minimal change- but we need jobs!

Descanso: Gas pricing is their number one challenge. Create an Interstate Corridor-18 express bus from the park and ride to El Cajon or Santee. Reinstate the local bus, one day a week, at Perkins store; it is currently an appointment only option. How do seniors get passes?

Potrero: Many of us moved here for the solitude, the scenic beauty- we wish to avoid growth (sprawl)- see our Planning Group’s community plan for more priorities/goals for Potrero. Include the Tecate/Potrero/Campo region in SANDAG’s Border Planning Activities. As far as need, we have a huge need in terms of education and employment opportunities; and many residents are on fixed incomes and receive food support from the San Diego Food Bank, we are a “food desert”- what can we do to create greater access to grocery stores?

NOTE: It became apparent that access to food was an issue, as such we are adding these comments on food access in the Mountain Empire Region for consideration in further outreach efforts.

Emerging Issues: Access to Food

According to the FDA, nearly 1 million Californians live in “food deserts” where there is no nearby supermarket or large grocery store. Food Deserts are defined as “low-income communities whose closest grocery store or market is at least 1-5 miles from that community”. In general, census tracts were identified as low-income if they had a poverty rate of at least 20 percent. People in those areas were considered low-income if their annual household income was 200 percent or less of the federal poverty level – \$34,100 for a family of four in 2000. They had low access to a supermarket or large grocery store if they lived more than one mile away in an urban area or more than 10 miles away in a rural area. Yet in 70 census tracts in our state, the entire population – more than 300,000 people all together – do not live near a supermarket or large grocery store. Imagine the impact to rural communities, right here in San Diego county,

where households are impacted by 'zero-car' issues, high rates of poverty, and who must travel greater than 55 miles to reach affordable groceries.

Food choices influence the health and well-being of individuals and families. Current dietary concerns in our region include the over-consumption of calories, added sugars, and saturated fats; paired with the under-consumption of whole grains, fruits, and vegetables. These factors contribute to high levels of diabetes, coronary disease, and obesity; and most importantly do not provide nourishment developing youth need. Furthermore, California is ranked 13th, among the nations states with food access needs- 26.8% of our youth experience child hunger issues. Access to food has arisen as a serious issue in all of our community outreach workshops. Just as transportation and mobility affect all facets of life- education, economic, health, so does access to healthy and affordable food. Residents of the region highly urge our attention to this issue, including assisting in awareness and implementation efforts, investing in research and development, and partnering on:

- Grants and loan financing to help fresh food retailers overcome the higher initial barriers to entry into underserved, low-income communities.
- Support the renovation and expansion of existing stores so they can provide the healthy foods that communities want and need.

Food for Thought: A sample solution for a Columbus, Ohio neighborhood-

<http://www.theatlanticcities.com/commute/2013/04/one-small-solution-food-deserts-bus-mounted-grocery-bin/5338/>

Resources: We will be looking at remedies to this challenge, and exploring NMTC (New Market Tax Credit), California Freshworks Fund, and USDA resources that are available to support rural grocery stores. We have sufficient empty retail and the cost of site development is less than urban; we need start up capital options.

Subregional Plan Input

The Boulevard Planning Group statement on transportation, from the county's Subregional Plan states:

2.4 Local Transit

The lack of reliable and affordable public transportation is a reality that impacts Boulevard and all backcountry communities, especially for those who do not possess a driver's license and those who do not have access to a vehicle. Opportunities for increased efficiencies, grant monies to supplement transit operations, and construction of park and ride facilities should be explored through coordination, including working with the County, Metropolitan Transit System (MTS) and Tribal Governments.

(Refer to the Public Transit section of the Mobility Element for goals and policies)

The Potrero Planning Group statement on transportation, from the county's Subregional Plan states:

2.3 Local Transit

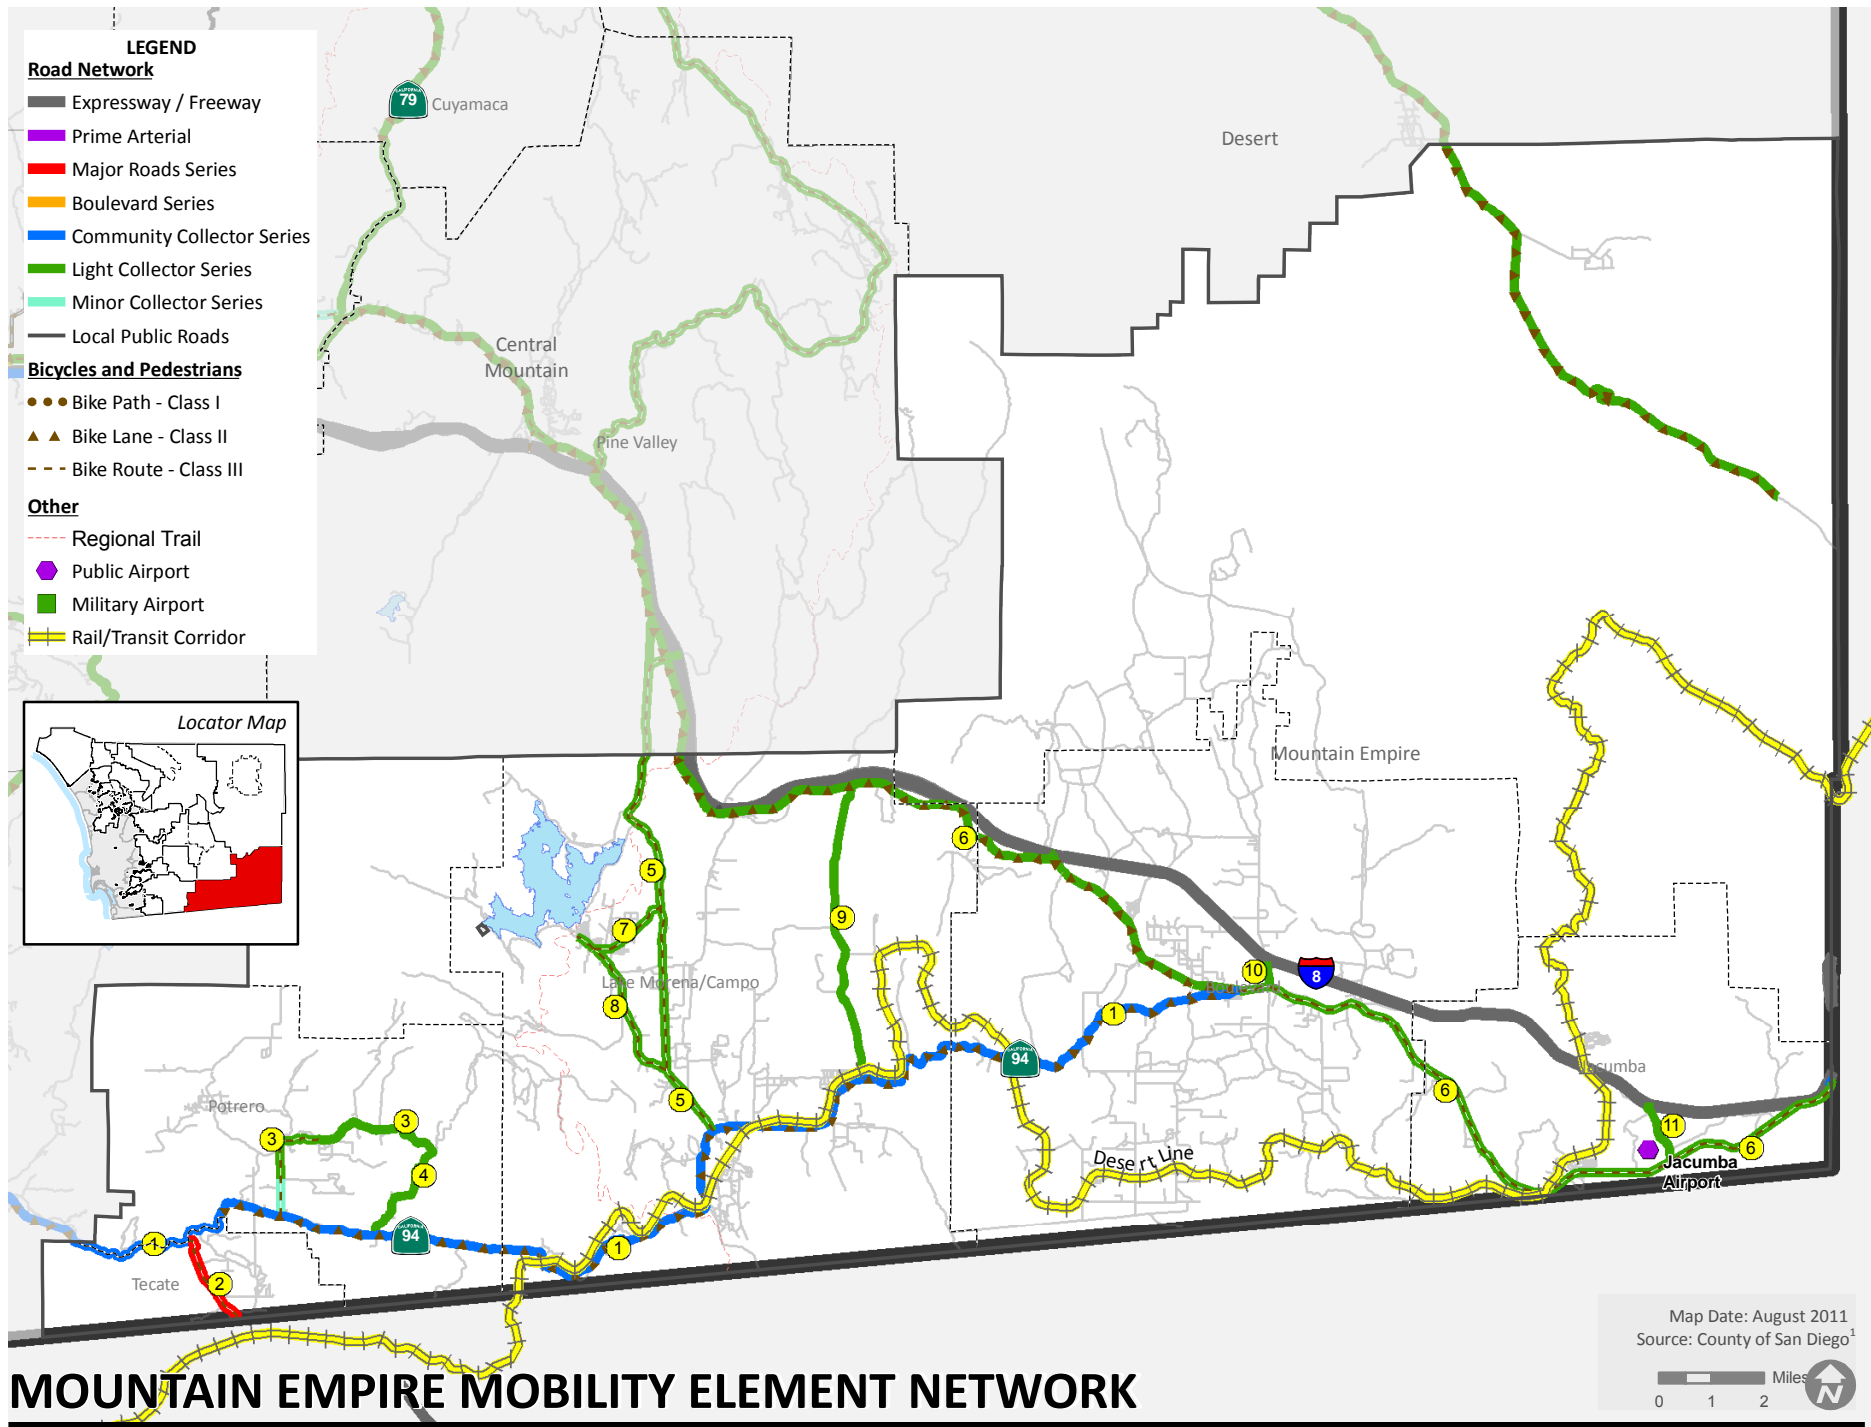

Issue CM-3.1 — The San Diego Metropolitan Transit system (MTS) provides a limited number of trips to Potrero. There are currently three scheduled trips Monday to Friday not conducive to work commuting. There are no scheduled trips on weekends or holidays.

Goal CM-3.1: Provide transportation options aimed at addressing congestion, safety, and accessibility, emphasizing alternatives to the private automobile and limited road improvements.

Policy CM-3.1.1- Identify opportunities for improved MTS service to and from Potrero including, but not limited to, increased trip frequency and weekend service.

Policy CM-3.1.2- Coordinate new and existing trip schedules to allow greater compatibility with commuter work schedules.

Policy CM-3.1.3- Work with MTS to create a monthly, rural transit pass with a further reduced fare or other incentive as a method to increase ridership, make fares more affordable, and decrease automobile dependence.

Senior Community Centers Community-based Outreach Services Task 7 Final Report

June 30, 2013

Senior Community Centers
525 14th Street, suite 200
San Diego, CA 92101

1. Explain your organization’s accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

Our initial concern was a lack of materials and ramp-up time required to gain a better understanding of SANDAG, and the possible topics to cover. As a new CBO, the ramp up time was significant. We needed to educate ourselves and develop outreach materials, documentation and time-tracking procedures.

Our findings illustrate the differences between older adults in our communities. Those residing in downtown San Diego heavily rely upon alternative modes of transportation, either through private/non-profit transportation services, caregiver (family or non-family) or public modes of transportation (buses, trolley); whereas older adults in other parts of the county typically have access to a vehicle (or caregiver).

Our desired outcome is to engage older adults to participate in the regional planning process. The levels of participation have steadily increased and we will continue to outreach to new communities and return to others to maintain engagement as we roll out our outreach plan.

2. What groups and/or communities did your organization reach out to? What was the level of engagement?

Senior Community Centers initial outreach focused on introducing SANDAG, the Coordinated Plan and the concept of the Regional Plan to older adults and stakeholders. We had many conversations internally and

externally on priorities contained in the Coordinated Plan. See Appendix 1. We began outreach efforts to smaller groups and individual conversations at senior nutrition lunch programs. We met with seniors at congregate nutrition sites in San Diego, Lemon Grove, La Mesa, San Marcos and Escondido. We directed outreach of the Regional Policy Workshops to stakeholders at the regional County Action Networks (Sandi-CAN and ECAN), as well as to partners at the Hunger Advocacy Network. We actively promoted our advocacy workshops and Regional Policy Workshops at two large events hosted at the Wellness Center, Senior Scam Stopper Seminar and the Senior Resource Fair. For the East regional workshop, we targeted public libraries, The Springs residential building and the La Mesa Older Adult Enrichment Center providing fliers we created specifically for the event.

Soliciting Input and Methods

We utilized a survey to introduce our senior clients to the work of SANDAG. We created a Transportation assessment questionnaire asking their transportation priorities, needs and demographic information. In addition to the survey, we used the questions to initiate conversations during workshops at Senior Centers in Mira Mesa, Carlsbad, and La Mesa we spoke to several groups of older adults. We have included our findings below.

Community Findings

We surveyed 219 older adults 60+ during meal service at the Gary and Mary West Senior Wellness Center located in downtown San Diego. We asked questions pertaining to their primary mode of transportation, reasons for travel and use of public transportation. Ten percent utilized the survey in

Spanish, while 26 percent utilized a Mandarin-translated survey. Nearly 60 percent of the participants live in the downtown area surrounding the senior wellness center.

Coordinated Survey Summary of Findings

1. 66 percent utilize public transportation as their primary mode of transportation.
2. 86 percent travel independently from an animal, device or attendant.
3. (Figure 1) As suspected, Safety and Security followed by Affordability/Cost topped the list of the most important characteristics related to transportation. The ranking didn't appear to shift among the different ethnicities among seniors.
4. 94 percent consider public transportation costs to be reasonable.
5. Medical and Groceries/Food ranked one and two for the reasons for travel.
6. Most seniors are under 85 years of age and more than 58 percent consider themselves low-income. See demographic information below.

Figure 1 - Safety and Security ranked highest of importance

1. Safety/Security
2. Affordable/Cost
3. Availability of seating
4. Frequency of Service
5. Destination length
6. Understand announcements
7. Accessibility
8. Reliability
9. Clarity of route info

Demographic information (*may have selected multiple identifiers)	
60+ years	201
85+ years	18
Disabled	43
Low-income	129
Veteran	27

Workshop Findings

Some of their concerns reflect those indicated through the surveys. However, most of these seniors primary mode of transportation is their car.

- Mira Mesa:
 - Little or no public transportation in Rancho Penasquitos or Scripps Ranch.
 - No Sunday Service.
 - Serious safety concerns for pedestrian traffic on Black Mountain Road and Mira

Mesa Blvd.

- Balboa Park Sunday public transportation impacted.
- No parking access in Balboa Park (for seniors).
- No seats or shades at bus stops.
- No trash receptacles at bus stops.
- High parking rates to access locales and destinations (Sea Port).
- Infrequency of stops along certain roads, like Black Mountain is burdensome for older adults.
- Not enough handicap parking access.
- Little or no public transit serving neighborhoods on streets off Black Mountain or Mira Mesa.
- The infrequency of bus trips prevents seniors from using.
- Buses don't run late enough.
- La Mesa:
 - Cuts to Sunday services impact those most needy.
 - Ability to go to church impacted by no Sunday service in some areas (Lemon Grove)
 - Trolley cost, access and parking are negatives to using it (La Mesa).
 - Sunday service to participate in Balboa Park concerts.
 - Increase senior and disabled seating on public transit.
 - On bus safety concerns – driver not waiting for seniors to sit before continuing on route.
- Carlsbad: During the workshop we discussed the regional plan and policy areas to be addressed during the North County Policy Workshop.
 - No parking access in Balboa Park (for seniors).
 - There is a lack of quality alternative pathways in Carlsbad i.e. Sidewalks (many are comprised on gravel or dirt paths).
 - Many of the residential developments, housing empty-nesters are not within walking distance to a grocery store that contains “household items”.
 - Closest grocery store is several miles away.
 - Aging in place issues if seniors are lower income and unable to drive (North Coastal County Oceanside, Encinitas, Oceanside).
 - Lack of smart growth developments in Carlsbad. Not enough senior housing and high-rises or smaller homes.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

The content is challenging to cover. The key is to break it down as much as possible as regional planning is not an easily digestible topic. Our outreach plan incorporates this strategy, whereby we divide the topics into components that suit our population. As other targeted demographics, the needs widely vary between seniors based on socio-economic levels and the needs associated with different parts of the county. It would be great to have had opportunity to discuss with other CBO's the methods and materials employed – as well as to do a lessons learned. The regional policy workshops compacted many topics into a small timeframe. Additionally, the regional policy workshops were not inclusive to older adults living outside San Diego, as they occurred in the evening hours. The SANDAG 101 PowerPoint is a very good tool, and we've borrowed several slides for discussions and presentations. The notes and policy workshop summaries posted on the website are another good tool that we're using to give updates and encourage for conversation. We've found a conversational workshop, focusing on two or three prompting questions to be the most effective to fully engage older adults.

results.xlsx

1. What are specific needs that seniors have in regards to transportation and why? (What impact would having those needs met vs. not have?) Ex. medical-related trips important for preventing complications, grocery shopping, visits to the center for food/socialization, attendance to religious events fulfills spiritual need etc

- Doctor's appointments, access to resources (ex. congregate nutrition sites for meals), job applications, visits to family (important for socialization).
- seeing their attorney, going to visit girlfriend/loved ones,
- Seasonal holiday shopping, weddings and funerals, social reasons, volunteering to get to their destinations or volunteering to visit others,
- Transportation to job during odd hours or long commutes
- Seniors who want to work are hindered by the lack of available commuting options ex. North County to South county ex. One senior couldn't get a job in north county because he'd have to stand all day on the coaster and wouldn't be able to get up to north county in time for work
- grocery shopping and they need affordable food because income restricted and men to healthy seniors or frail can't carry all the bags, canes/walkers-
- dental and vision appointments, transportation to congregate nutrition site so they can eat and socialize
- discounted services (many are on a fixed income)
- assistance riding a bus or learning how because they are afraid to go alone at first
- Seniors need improved access to busses (physical impairments which make it difficult to get on the bus in first place), loud PA announcements, longer times to get on/off buss
- Homeless seniors trying to find a place to live often have to travel down to the SRO on a moment's notice which can be hard if they are on a fixed income and can't find a ride

Impact of having those needs met: Increased quality of life, seniors would live longer and healthier because they are attending doctor's appointments and staying active, they would be able to maintain their social networks

Impact of not having those needs met: isolation which can lead to depression, not being able to grocery shop or go to a congregate nutrition site can cause hunger & malnutrition, not being able to go to pharmacy for medication could further complicate health issues, missing medical/dental/vision appointments can cause negative health outcomes, not hearing or understanding the bus schedule could result in a lot of wasted time because the senior failed to get off at the right stop or took the wrong bus etc

2. Identify any gaps (geographic or service type-related) in transportation (ex. areas not covered, are the hours limited? does the trolley/bus/etc. stop for long enough to allow those with physical disabilities to get on safely etc)

- **Geographic gaps in transportation:** east of El Cajon and Alpine (rural bus stops come out less), Claremont, North county has limited transportation in their rural areas & going from N to S county is difficult.
- **Service Related:**
 - Overcrowded stops and not enough busses during peak hours or sports games at Petco Park; seniors often have to wait for multiple busses to pass by before they can get on one

that has room. EX. the downtown 5th ave stop of trolley, H street trolley station and Iris set before Chula Vista)

- Busses are often late which impacts older adults because they miss appointments that are important or are hard to reschedule.
- PA system is not loud enough, and if there isn't one then drivers don't always remember to announce stops. (Difficult for seniors hard of hearing or blind to know when to get off)
- Announcements are often only in English/Spanish which leaves out Chinese seniors
- Hours need to be extended; ex. Trying to go between north and south county is difficult; ex. some seniors would have to get up so early to catch a ride in order to make their appointments on time that they often miss it, or if they are working they can't afford to waste a whole day because of an infrequent bus schedule.
- there needs to be better protection from weather/environment- ex.diabetes patients have swollen legs and they are in pain and it's really hot in summer so they don't want to go or cold weather
- Seniors fall on bus stop stairs, they get squished by the doors that are quickly closed, the streets by the pavement are uneven so walkers catch and they fall, urgency to catch bus causes fall hazards, drivers have little patience because they are pressured to make all the stops on time,
- Limited hours and limited busses – during rush hours and working hours the seniors won't ride the bus because it's too crowded. public transportation might not coincide with their volunteer hours,
- Senior disabled section is not large enough and everyone sits in it and they don't get up for older adults. **balance issues, the bus moved before they sat down so they fell, chaotic environment
- announcements only made Spanish and English, Chinese seniors left out

3. Are there risk factors that put seniors at a transportation-disadvantage? (reframed the "Help in identifying transportation disadvantaged populations" question) Ex. low income, disabled, living in a rural area, language barrier, homeless, mental health/cognitive/physical impairments, lack of awareness that transportation opportunities exist?

In addition to the examples listed responses included:

- Low education level (can't read schedules), lack of telephone for scheduling door to door services, those that use assistive devices, proximity to bus stops – 1 mile is a long time for someone with a walker, environment: uneven ground at the stops can pose a hazard
- Seniors who don't have telephones will not be able to "call in" a request for transportation, and if they have to call in a few days ahead of time and an appointment time gets changed at the last second they are out of luck.
- Older adults who need to see out of town specialists (cancer, therapy, etc) may have to take multiple types of transportation to get there, which can be expensive for those on a fixed income
- wheelchairs, walkers, canes, intolerant drivers on a schedule don't wait which can be dangerous for seniors who try to hurry, they need medications from pharmacy before it closes (antibiotics)
- Education level (can't read, uncomfortable trying to ride), low income and physical limitations, mental illnesses and cognitive disabilities, ex. There's a senior over at Potiker who won't ride the busses because they can't read (lack of education)
- Physical/cognitive impairments, financial (low income seniors can't always afford a monthly bus pass),

- Bus drivers are pressured to hurry up on their routes and rush through it and so it becomes a safety issue for seniors that have to move slowly to get off the bus and some have been squished by the doors, or fallen trying to get off at their stop in time
- Lack of awareness-People do not usually know about Senior Ride or any options besides public transportation

6. Identify constraints and opportunities within your community relating to specialized transit/transportation

Barriers:

- Requests for a day pass or door to door service can take 2-3 days, so seniors who call the day before needing a ride are out of luck.
- Tedious paperwork makes requesting transportation services difficult for seniors, who don't always come to the center with all the information they'd need to fill it out.
- Not enough low income transportation resources, or awareness of them
- Proximity; north county, east of El Cajon, Alpine, Chula Vista could use more coverage
- Level of education, language barriers, cognitive impairments/mental health issues, or visual impairments can make it difficult for some seniors to get around because they are unable to read the bus schedule and stops. This is especially hard when the bus stops are not announced out loud ex. Chula vista or coastal the drivers just make the announcements and sometimes they forget or if the bus is crowded it's too loud to hear the driver from the back
- Overcrowded stops; Bus drivers are pressured to hurry up on their routes and rush through it and so many people are on it that you can't even always make the stop... for example the downtown 5th Avenue stop of trolley) , H street trolley station and Iris street before Chula Vista)
- Medical appointments (need to update master resource list to include transportation resources for medical appointments specifically), physical impairments

Opportunities:

Travelers Aid has been trying to get transportation for seniors and doing needs assessments/meeting needs to address specific issue. They use a form that a caseworker can fill out easily however are very limited. **Jewish Family Services** has “senior on the go” but their forms are difficult to fill out which causes usage to be lower

4. Do you have any ideas on developing types of coordination that can occur between different agencies? Ex. non-profit to non-profit; public-private; etc. Types of Coordination may include an exchange of services (grant writing, providing trips), resources (personnel, radios, trip scheduling software, etc), and vehicle maintenance and storage.

- Good transportation set up with insurance companies so medical appointments are covered (CareFirst), door to door service Tim; government involved with volunteers by paying for their car and gas of drivers; donors have money that would donate a car or van depending on agency as a side volunteer program but gas and maintenance still need to be covered
- Seniors only bus
- Transit store phone menu to be recorded speaking slower, or providing RFP's that require collaborations between agencies that have a bus and those that don't but serve the same target population in order to secure funding (For ex. a mutually beneficial IG mentorship afterschool

program that uses a school bus to take HS seniors over to the senior center where they are mentored & teach the older adults computer skills)

- Or requiring two orgs that serve the same population and don't have any source of transportation to work together and create a shared resources transportation plan (ex.2 nearby HUD buildings share a bus that goes between both buildings and different drop-off locations throughout the week. M/W are hospital/pharmacy days, T/TH grocery days etc)
- Ride with a buddy program that teaches seniors how to ride (North county has one)

5. Which transportation strategies best assist your communities? Which strategies should we consider adding (Keep in mind, for our grant programs (MAP-21 aside), projects must be identified under the “Very High” or “High” priority list in order to be deemed “eligible”. Strategies are addressed in Chapter 7 of the Coordinated Plan.

Add this: Consider lowering the age for identifying communities of need to 60 (when they become eligible for OAA programs... ex. seniors that live in HUD would benefit from being able to get to a congregate nutrition site)

Strategies that would assist seniors but already ranked very high/high & eligible for grant programs:

Very High

- Develop or expand transit and non-agency client transportation services in areas with little or no other transportation options (or replace services that have been cut in those areas, such as transit or school bus transportation) based on identified gaps in transportation services included in the Coordinated Plan.
- Develop or expand transportation solutions in areas with sufficient densities to support transit (regional, inter-jurisdictional, and intra-jurisdictional transportation solutions) or coordinated services based on identified gaps in transportation services included in the Coordinated Plan.

High

- Provide door-to-door service (and door-through-door when necessary) for trips such as nonemergency medical transportation and grocery shopping in circumstances where Para transit is insufficient, inappropriate, or unavailable **HUD housing, this would meet many seniors needs
- Develop centralized ride scheduling, voucher programs, dispatching, and mobility management/brokerage.
- Increase coordination efforts by combining resources such as vehicles, riders, funds for rides, vehicle maintenance, drivers, driver training, insurance coverage, general ride subsidies, dispatching equipment, software, and gas cards for volunteers.
- **Increase work-based weekday and weekend service/extend hours of operation** based on identified gaps in service included in the Coordinated Plan. **Linda/Laura; seniors need to be able to look for jobs, going from north to south county they have to turn down jobs,*
- **Increase work-based weeknight service** based on identified gaps in service included in the Coordinated Plan.
- **Provide travel training to encourage more individuals to ride regular transit.** *many seniors are afraid or uneasy riding the bus, this would give them confidence to ride it alone
- **Support collaborations between non-profit and private organizations to assist with transit pass subsidies.**

- **Develop or expand transportation solutions for developmentally disabled individuals and veterans with service-related disabilities** based on identified gaps in service included in the Coordinated Plan
- Para transit users to encourage more individuals to ride regular fixed-route transit; **improved accessible travel paths to transit stops and stations**; and retrofitting of existing bus stops to ensure accessibility and Americans with Disabilities (ADA) compliance. ***Linda pointed out that for seniors with walkers having uneven pavement at the bus stop is a fall hazard, etc**
- Expand Para transit eligibility beyond the ¾-mile boundary.
- Develop or enhance volunteer driver programs, including the support of volunteer driver coalitions.
- Develop centralized ride scheduling, voucher programs, dispatching, and mobility management/brokerage to maximize service coverage areas.

Strategies that need to be upgraded in priority b/c they are currently ranked too low for grant programs (currently mid/low):

Mid

- **Reduce transit travel time and transfers for low-income communities.**
- **Develop transportation travel training services for non-English speaking populations.**
*Steve; # of Chinese seniors rapidly increasing; Carlos/Linda; Spanish speaking seniors who can't read English rely on people at the bus stop to help them who might not always know how to read the schedule themselves
- *** Expand public information regarding alternative transportation programs.** **important for low income seniors seeking employment, rides to medical appointments, or who want to go grocery shopping but are unable to carry all the bags on a bus*
- **Provide door-to-door service for trips** such as nonemergency medical transportation in circumstances where transit is insufficient, inappropriate, or unavailable.
- **Provide demand responsive transportation for areas not served by fixed-route transit.**
Alpine, north county, San Ysidro, Chula Vista – HUD housing
- **Shorten ADA trip request windows for pickup times.** *many miss out because they do not call far enough ahead of time – especially impacts seniors using assistive devices that need to make it to their rehab appointments
- **Develop or improve veteran medical and non-medical transportation.** * What good is free health care if you can't access it as a retired veteran?
- **Upgrade bus stops to include weather protection, shelters, benches, and lighting where appropriate.** *Safety & fall hazards;
- **Improve accessible travel information** and services for visitors and residents, including increased language requirements and automated auditory destination cues at transit stops.
- **Enhance sensitivity training for drivers particularly for those assisting passengers with developmental disabilities.** *Tim pointed out that many drivers are in a hurry and not sensitive to the fact that seniors with assistive devices take longer to get on the bus which poses a safety issue for seniors who try to rush. *Linda gave examples: seniors who move slowly have been squished by bus doors; if their wheelchair isn't strapped in properly the older adult could fall out or roll over and hurt someone else

LOW

- **Increase transportation service frequency.** *stops are overcrowded & so busy during certain times (rush hour/after a Petco park game etc.) that passengers have to wait for more than one

bus/trolley to pass by before it's possible to get on. Ex. the downtown 5th ave stop of trolley, H street trolley station and Iris st before Chula Vista. Rush hour, or after a Petco park game

- **Increase operating hours of accessible health and human service transportation vehicles.**
- **Provide transportation system guides.**
- **Create additional bus stop locations.**
- **Provide trips during off-peak hours and ensure midday coverage.**
- **Increase COASTER service, including regular weekend service.** **Some seniors would choose to work on the weekends yet can't because there isn't transit available, visit family, or go to religious events which is important for improving their quality of life
- **Improve bus public address systems.** **needs to be louder so that seniors with visual or hearing impairments don't miss stop; only in English/Spanish leaves out Chinese speaking population
- **Community outreach and marketing of services.** *Seniors need to know they are eligible for a discounted rate; raising awareness of available transportation options is important*

Vista Community Clinic

Community-based Outreach Services

Task 7: Final Report July 15, 2013

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

With only four months in this initial contract term, our organization's primary accomplishment is becoming knowledgeable about regional planning and San Diego Forward 2050. After attending many meetings and workshops at SANDAG, and reading numerous reports, we are at the point where we feel confident to present the information in our community, encourage involvement, and facilitate presentations and workshops to various sectors. We attended several community events to promote the SANDAG workshop held in Oceanside on June 20, and conducted presentations to a variety of community groups. A brief description of those efforts is below:

- Began attending monthly Intergenerational Community Council meetings held in San Marcos, presented an overview of San Diego Forward: 2050 Regional Plan on June 12, encouraged attendance at SANDAG workshop on June 20, and plan to coordinate workshop at Senior Center in the near future.
- Conducted a presentation of the San Diego Forward: 2050 Regional Plan during the North Coastal Prevention Coalition monthly meeting on May 9 and will provide regular updates to the group.
- Attended community events and posted flyers to promote SANDAG workshop on June 20, including Libby Lake community resource fair in Oceanside on May 11, Crown Heights Community Resource Fair on June 1, Boomers in Vista, and Oceanside Library.
- Reached out to several local churches in Vista and Oceanside and will be scheduling workshops with their congregations in the near future.
- Conducted a presentation in Spanish at Vista Unified School District Learning Center in Vista on June 4, distributed SANDAG workshop fliers, and collected 44 surveys.
- Conducted a presentation in English at Vista Community Clinic's Health Promotion Center All-Staff meeting, distributed SANDAG workshop fliers, and collected 44 surveys.
- Conducted a presentation in Spanish at Poder Popular meeting on June 18, distributed SANDAG workshop fliers and collected 10 surveys.

Improving the local economy was identified most often as the primary issue of concern across groups. We did not have the survey available for the NCPC meeting on 5/9/13 and had limited feedback. Some recommendations included offering a free daily pass for public transportation to encourage people to give it a try, and to increase bike paths that are not on busy streets.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

Through contacts and presentations we have reached out to local churches, North Coastal Prevention Youth Coalition members, the Intergenerational Community Council, other Vista Community Clinic Health Promotion Center programs, and the Vista Unified Adult Learning Center. During three presentations we solicited input utilizing the True North survey and collected a total of 110 (summaries included in appendices). We will be following up with all of these groups to schedule workshops in the near future to solicit input in a more interactive way using a format similar to SANDAG workshops. Several of these will be conducted in Spanish.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

We spent time this initial contract period conducting general presentations on San Diego Forward and encouraging groups to participate in the SANDAG Oceanside workshop on June 20. Despite distributing hundreds of flyers, we estimate approximately 20 of the attendees came from our outreach efforts. Attendance was much more likely from group leaders and people we had a relationship with in the community, rather than people who just got a flyer. Revising the True North telephone survey to use during presentations was an effective and efficient way to obtain input and feedback in a short time-period. (A copy of the survey and summary of results are included in the appendices.)

We attended three SANDAG workshops (CalTrans on May 17, Escondido on June 13, and Oceanside on June 20) to both participate and learn the process for conducting community workshops. We believe we now have the information and tools to conduct similar workshops with various sectors in our region. We feel that going to defined groups, such as churches, senior centers, youth groups, and neighborhood associations, will be an effective way to engage the community.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

We experienced a rather steep learning curve, being new to SANDAG and the regional planning process. We anticipated having a 'menu' of SANDAG outreach strategies (surveys, door-knocking, promotional items, presentations, etc.) to select from and use in various settings. With only four months in this initial contract term, we were halfway through before we understood that we were to work more with defined groups within our target region and not necessarily do general outreach and solicit input from the general public.

We attended the Summit on Transportation Equity at CSUSM and got the sense we may be competing with other groups trying to get the public engaged in these issues. We attended a follow-up meeting with Justice Overcoming Boundaries and learned of their efforts with local churches throughout the North County region. It remains somewhat unclear if we can collaborate with these efforts or if we are in competition of sorts.

Alliance for Regional Solution
Community Based Outreach Services
Final Report
June 30, 2014

Alliance for Regional Solutions

Community-based Outreach Services

Task 7: Final Report June 30, 2014

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

We have given SANDAG updates at our quarterly general meetings to our membership. These were held in August 2013, November 2013, February 2014 and May 2014. Our alliance consists of 40+ member organizations as well as city representatives. Most of these organizations are located in North County or serve the community of North County. We gave short reports of what San Diego Forward is accomplishing and what the needs are for the future.

We were able to distribute questionnaires during the summer of 2013 to three of our member organizations. We collected over 100 surveys filled out by clients of North County Community Services, The Fellowship Center, Community Resource Center and North County Lifeline. We used a version of the phone interview survey that SANDAG conducted by True North Research. The surveys and the results are attached. The biggest obstacle with the surveys was trying to get the clients to pinpoint what their priorities were. They marked most things as very important so it was hard to get a clear picture of what our sample group felt strongest about.

We conducted three workshops in February and March of 2014. The groups were:

The first was with a parent group at one of the North County Community Services preschools. We had 10 parents attend. The presentation was done in English and there was a Spanish translator. There were over 5 parents that did not speak English. We went over what SANDAG and San Diego Forward are. We discussed transportation options in North County and had a discussion on this. I passed out questionnaires that are in English and Spanish. We had 5 of the parents complete.

The second was with a group of case managers, therapists, supervisors from North County Lifeline that work with the Youth Development Programs. Many from this group work with SANDAG on different projects and have an understanding of what SANDAG does. The San Diego Forward plan was new to them. After a short presentation, we had an open discussion about what some of the obstacles their clients had with the transportation in North County. They are going to have their youth groups fill out our questionnaires.

The third workshop was with another Lifeline group- Bridges to Employment. These Lifeline clients were attending a one week workshop to build skills to help them find employment. There were about 9 people in the class. One of the obstacles these people have with finding and keeping a job is transportation. They had strong opinions on public transportation in North County.

The main finding we came away with is that the majority of North County communities of concern do not feel good about the public transportation system that is offered in North County. It is not convenient, affordable, or attainable for going long distances in a reasonable amount of time. They would very much like be able to rely on public transportation but most feel like an automobile is the most sensible way to travel.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

We made presentations to groups from the following organizations and collected information through surveys.

Fellowship Center

The Fellowship Center is a private, not-for-profit 501(c) 3 corporation occupying several homes and buildings on one city block in North San Diego County governed by a voluntary board of directors. It is licensed and certified by the California State Department of Alcohol and Drug Programs and employs a team of state credentialed addiction professionals along with a seasoned food services staff and experienced administrative leadership. Its beginnings grew from the desire of one alcoholic helping another.

Community Resource Center

Community Resource Center's Social Service Department provides homeless and at-risk homeless households with the tools and resources necessary to avoid and escape homelessness and hunger.

North County Community Services

North County Community Services (NCCS) is a nonprofit organization in Northern San Diego County. NCCS is passionately committed to improving our neighbors health and well being by providing programs that educate young children, support working families, provide food for those feeding the hungry and ultimately create opportunities to improve the quality of life for residents of North County.

North County Lifeline

North County Lifeline's mission is to build self-reliance among youth, individuals and families through problem solving, skill building and accessible community based services.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

We found that the surveys were a good way to get information and also get open ended responses from people.

We think that having forums and open discussions followed up with surveys is the best way to reach people. This will inform people about the San Diego Forward Regional Plan and what the goals are. The discussions will be good for people to see all sides of an issue and then be able to decide for themselves what they think would be the best option for what the needs of the community are. The survey will then be a great way for participants to be able to freely express what they feel about each topic

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

I think we have built a good base of knowledge about the San Diego Forward plan with our member organizations and also with a group of communities of concern who will be an asset to us as we continue to need information and we will be able to go to these groups for input. We think the most important step going forward is to make all of the people reaching out understand why their participation is so important. Some of the participants in the past workshops stated the information wasn't relevant to them. Going forward we need to include the impact they will be making on the future of San Diego. We also need to make sure the materials are understandable for the group we will be talking too. Each group is unique and our materials and presentation need to be tailored to each group.

BAME CDC

Community-Based Outreach Services for 2050 Regional Plan

Status Report

June 1-30, 2014

In addition to the status reports, high-resolution photos, sign-in sheets, samples of materials should be submitted to SANDAG staff immediately after each activity or meeting.

1. Explain your organization's progress with relevant tasks in the contract. Narrative can be in the form of bullet points. Describe progress made on each task that is in process. Level of effort described should coincide with invoicing.

TASK 1 -COORDINATE WITH SANDAG: _____

Coordinate with SANDAG on public outreach efforts to ensure timely and meaningful input into the development of San Diego Forward: The Regional Plan (Regional Plan) and related agency-wide work efforts.

Monthly Progress:

- 06/05 Staff attended CBO Network Project Meeting
- 06/18 Staff participated in Webinar: Calming Arterial Streets for Safer Walking/Cycling
- 06/19 Staff attended CBO Outreach Training- Alternative Network Scenarios

TASK 2 - CONTRIBUTE TO SOCIAL EQUITY ANALYSIS:

Serve as members of a Peer Group on issues of Social Equity related to the development of the Regional Plan. This could be the Project Manager, as well as other interested stakeholders from the CBO's staff or constituents who will participate in an ongoing discussion related to the analytical aspects of the Regional Plan development.

Monthly Progress: Nothing to report in FY14.

TASK 3: CONDUCT COMMUNITY-BASED OUTREACH –

Coordinate with SANDAG on public outreach activities for the Regional Plan and related work efforts throughout the process of developing the Regional Plan. This may involve outreach activities such as surveys, canvassing, and other methods of participation. CBOs will have flexibility on selecting which outreach methods to use in order to best reach their constituents.

Monthly Progress:

- 06/12 Staff met with Monique Lopez from Environmental Health Coalition to work collaboratively on community outreach in Greater Logan Heights/Barrio Logan
- 06/21 Staff conducted community outreach at Juneteenth and Sherman Heights Music Festival. An estimated 150 people participated in an interactive game to spark conversation about priorities for transportation funding.
- Booked venue and did outreach for a July public workshop on regional transportation planning- sent invites via BAME list serve and distributed flyers at several other public events in the neighborhood

TASK 4 (For Future Use, FY15): COORDINATE PUBLIC INPUT ON DRAFT PLAN

While the public input process is ongoing, federal regulations require a formal public comment period during the Regional Plan development. CBO partners will be expected to leverage their resources to facilitate the submission of community members' comments to SANDAG within the public comment period for the draft Regional Plan in Spring 2015.

Monthly Progress: Nothing to report in FY14.

TASK 5 – FINAL REPORT:

For each contract period, CBOs will provide a report for use in the Regional Plan and related work efforts based on collected public comments. The report must show public comments in a summary form that is consistent with the public comment format that will be used in the Regional Plan.

Monthly Progress: Nothing to report until June 2014.

2. Address any issues or problems that have come up during your meetings, workshops, canvassing efforts, surveys, and other methods of participation.

The date for the workshop on the Alternative Network Scenarios has now changed three times so we keep booking a venue and inviting people to attend and then end up having to push the date out further. This has made our planning and outreach efforts more challenging.

3. Discuss your organization's upcoming plans for next month.

- Staff will continue to reach out to community groups throughout the month of July
- Staff has an educational/outreach workshop planned for July 23, 2014 at the Logan Heights Library
- Staff will schedule and prepare for another workshop in for the Alternative Network Scenarios (for August)

4. Other reflections on the process (i.e., Have your outreach efforts been successful? What is the level of engagement?)?

- The outreach at the community festivals was extremely successful because we engaged people (of all ages and backgrounds) with a simple game. We showed people pictures of different types of transportation projects (freeway expansion, better public transit, and bike/ped improvements) and put jars in front of each picture. We then asked them to put beans in the jar that corresponded with their priorities for where funding should go in the next 10 years. This sparked great conversations and helped us understand community needs. It was also an opportunity to answer people's questions about planned transportation projects that affect their neighborhood and region at large.

Linda Vista Collaborative

Community-based Outreach Services

Task 7: Final Report 7/1/2014

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

Outreach/Workshops:

- Boys and Girls Club teenagers:
 - o 11 teens at the Linda Vista Boys and Girls club participated in a focus group workshop at the Boys and Girls club. The focus group was about the importance of getting involved in long-term transportation planning. Students were asked open-ended questions; they answered the questions, and came to their own conclusions. Support staff facilitated this process and gave additional information about past transportation planning in San Diego, San Diego's growth forecast and "green" transportation planning.
- Linda Vista Collaborative
 - o Members from the Linda Vista Collaborative participated in an interactive presentation made by support staff about our role in pursuing physical activity in Linda Vista and advocating for a walkable community. Pictures of Linda Vista and neighboring communities in San Diego were examined in order to identify the positive aspects of our community and the aspects that could be used to improve walkability. Collaborative members shared their experiences and difficulties with walkability in the community and there was collective Collaborative support to continue advocating for these changes.
- Linda Vista Spanish-speaking resident leaders
 - o Linda Vista resident leaders participated in a 2 hour interactive presentation on long-term transportation planning and the regional plan conducted by Support staff and SANDAG. The resident leaders engaged in a brainstorming exercise in which they built their own small city, just as planners do. Resident leaders also got the opportunity to ask questions about the importance of long-term transportation planning. The presentation also included examples of past transportation planning as well as what is in the plan for the future and what is included in the 2050 RTP.
 - o Outreach with the resident leaders was very successful that they also started engaging in public workshops held by SANDAG. Two of the resident leaders represented the transportation concerns of the Linda Vista community during the SANDAG Coordinated Workshop, where both residents contributed and gave their input during the workshop.
 - o A Letter of Support was written, signed and submitted on behalf of the Resident Leadership Academy to the Morena Boulevard Planning Engineers. The letter served to show community support for specific planning projects being proposed to the community during the Public Trolley Forum. Their suggestions included safe bike lanes and safer pedestrian crossings.

- Vietnamese
 - o 11 Vietnamese senior residents attended and participated in a workshop in order to be educated about Long-term transportation planning in San Diego.
 - o 31 Vietnamese residents (in general)attended and participated in the workshop on June 30/2014 in order to be educated about the Regional Work including the population grow, the transportation, transit construction, habitat planning, energy, public safety and economic prosperity. Informed residents about the developing program for the projects included in the Regional Bicycle Plan, public transportation and clean environment. Implementing an action to develop a regional transit-oriented development policy in the 2050 Sustainable Communities Strategy to promote and incentivize sustainable development. Contiuing to make enhancements to the travel demand models.

Summary of findings for focus groups:

Mobility:

- Would like to see more and safe bike routes connecting Linda Vista to other communities and San Diego amenities. More frequent and reliable transit routes to recreational places (beaches, Balboa Park), hospitals, health care and job centers.
- Information in transit centers and buses in languages other than Spanish and English, and more and frequent stops in Linda Vista.
- Sidewalks are unsafe and unusable for all ages.
- Infrastructure improvements

Healthy Communities:

- Access to high performing schools
- Safer schools and community in general
- Safer, cleaner and well-lit parks.
- Offer services to help the homeless population in Linda Vista
- Offering discounted rates for students, elderly and pregnant women
- Organizing to have a neighborhood watch in Linda Vista
- Ensure safe and clean bus/trolley and stops.

Economic Prosperity:

- A region which gives its residents access to jobs with good wages
- More opportunities and options for green technology (electric cars, solar energy)
- More opportunities for youth to attend and exceed in college
- More affordable housing
- More greenery or positive points for San Diegans to enjoy

Linda Vista Walkability and Access to Goods and Services Survey

- 99 Linda Vista residents participated in a walkability and access to goods and services survey of Linda Vista and surrounding areas. The surveys were administered at the Linda Vista Multi-cultural Fair. A very high percentage of Linda Vista residents travel primarily by foot and public transit on a daily basis. The survey was administered in English, Spanish and Vietnamese. 85% of survveys were filled out in a lanuaage other than English. with an

Summary of survey results:

- 52% of respondents walked more than 10 times per week around the Linda Vista community
- Majority of issues raised in relation to walkability were focused on crime and infrastructural problems such as lighting and sidewalks.
- Top 4 streets that improvements should be made on are: Ulric St., Kelly St., Fulton St. and Comstock Street.
- In neighboring parks, the restroom and near canyon areas are the areas where lighting is needed.
- Although 70% of respondents believed they had good access to fresh fruits and vegetables in Linda Vista, the #2 place where Linda Vista residents shop for their fruits and vegetables were markets outside of Linda Vista.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

We reached out to multiple communities within Linda Vista. The first was the Boys and Girls Club teenagers ages 14-18 years old. These students have been recruited through a partnership with the Boys and Girls Club. The second was the Linda Vista Collaborative (community members and people who work in Linda Vista). The third group was the Spanish speaking resident leaders. This group in particular has been a very successful and committed group of resident leaders, as they truly represent the Spanish speaking community in Linda Vista. This group has also been actively involved in helping reach out to the rest of the community as well as participating in workshops and trainings provided by SANDAG. The fourth group is Vietnamese-speaking residents. Among these most were recruited from Bayside's Senior Steps program and were enthusiastic about participating in this program.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

The Public Involvement Plan and Outreach Plan appropriately reached out to the various groups in the Linda Vista community in order for their input to be relevant and useful. The focus group protocol that was provided was easy to understand and navigate through. The questions were relevant and straight to the point, which also allowed for a comfortable environment to form for participants to understand and give valuable feedback based on their experience.

Regarding outreach, for the Linda Vista Collaborative, the most successful method was to utilize regular meeting times and events that were already put in place. Examples of this were using the monthly Linda Vista Collaborative meeting, resident leaders and the yearly Linda Vista Multi-Cultural Fair as venues for receiving input. Also, expanding on connections that had already been made through the Boys and Girls Club, Linda Vista Resident Leadership Academy, Bayside Volunteers and the Senior Steps program eased the recruitment process.

It is important to note that outreach with the Spanish speaking resident leaders has been very successful upon the completion of the Linda Vista Resident Leadership Academy and our involvement and outreach with them will continue to be as effective as it is now, or better. There is a second cohort that has graduated and continued outreach will take place with them as well.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

There was not a need for flyers or other outreach materials to be used, as our outreach was done with existing groups in Linda Vista. We want to emphasize how crucial it is to keep and continue to establish great connections and partnerships with other relevant organizations so that we can successfully continue to provide the input of true caring community members.

Casa Familiar, Inc.
Community-Based Outreach Services for 2050 Regional Plan

Status Report
April 01, 2014 to June 30, 2013

In addition to the status reports, high-resolution photos, sign-in sheets, samples of materials should be submitted to SANDAG staff immediately after each activity or meeting.

1. Explain your organization's progress with relevant tasks in the contract. Narrative can be in the form of bullet points. Describe progress made on each task that is in process. Level of effort described should coincide with invoicing.

- Casa Familiar began the year with a week long retreat from January 6th to the 10th where we presented the SD Forward work to staff and touched on the need to continue to do outreach for hosting Sin Limites workshops.
- Casa Familiar presented a San Ysidro Sin Limites community workshop on SD Forward with the year in review 2013 and other videos from the SD Forward website to the community on February 27, 2013. Casa Staff assisted to provide child care, preparation of the space prior to the meeting including setup of tables, chairs, sound system, refreshments and signage/easels, and assistance during the meeting and clean up after the event. We also provided translation. The workshop had a total of 34 community members, representing 110 residents in the community as well as 25 Casa Familiar staff that participated. Total workshop participation was 59. The workshop was used as an educational event to raise awareness of the work that SD Forward is trying to do with the next regional plan. The presentation included 1) Updates of the GSA – SY POE Reconstruction Project, including the Virginia Avenue Concept for the development of a transit center; 2) Update of the completion of the last parcel as Outlet shops adjacent to the Las Americas Premium Outlets and the new access for pedestrians; 3) Status Update of the San Ysidro Community Park Tot Lot Project; 4) SD Forward and a review of the Regional Growth Forecast and the shift towards transit support in urbanized centers 5) Visual examples of smart growth through the use of the videos such as:
 - HOW WE WILL GROW –
 - SD FORWARD – Welcome Video
 - SAN YSIDRO WORKSHOP
 - E STREET SMART GROWTH SIMULATION
 - 2013 Year in Review
 - 0:00 to 0:60 – Transnet
 - 1:34 to 4:35 – So Bay BRT – I-805
 - 11:49 to 15:15 – Blue Line Trolley Renewal
 - 20:39 to 23:00 – Bike Early Action Plan (EAP)
 - 23:01 to 25:28 – Coastal Rail Trail – example for SY
- This was very useful in showing how projects in different areas could be imagined in SY and to get an update of what work will actually affect San Ysidro. (see attached power point presentation)
- We also used our copy machine to provide 2,100 copies of various SANDAG efforts in both our outreach as well as had them present during the workshop. Materials copied were: The SD Trolley Renewal Project, SD Forward June 6, 2013 SY Workshop Summary, and the SD Forward Regional Plan handouts in English and Spanish.
- Flyers were distributed at our 5 community centers, all our programs, as well as distributed online through our email lists and social media access.
- May was a big month as Casa Familiar organized the Dia de San Ysidro Community Fair at the SY Community Park. We reserved a booth and shared information on the SD Forward Regional Plan there also.

Address any issues or problems that have come up during your meetings, workshops, canvassing efforts, surveys, and other methods of participation.

Both workshops on February 27th – SD Forward and the March 27th – Border Health Equity Transportation Study had issues with attendance as they were both rain days. We are ready to share the network scenarios of SD Forward Regional Plan but the continued delay has pushed the community workshop & presentation from June to August.

2. Discuss your organization's upcoming plans for next QUARTER.

August is not a good month for Casa Familiar as it always focuses on its annual gala dinner/fundraiser. We look forward to executing a new agreement for FY 15.

3. Other reflections on the process (i.e., Have your outreach efforts been successful? What is the level of engagement?)?

Of concern is the weight or value that the SANDAG Board will give to the communities of concern and social justice integration into the Regional Plan. Besides the plan being a difficult and complicated document for non profits to explain to their respective communities, a dis-interest by the Board can result in a negative participation at the conclusion of the project when projects are selected to be included in the network scenario that is selected and can backfire by resulting in both the non-profit and community not wanting to continue engagement. June had us sharing a great deal through the SANDAG Transportation Committee, the SANDAG Binational Seminar, San Ysidro Intermodal Transportation Center, and the tangent Border Health Equity Transportation Study.

CASA FAMILIAR
A COMMUNITY DEVELOPMENT AGENCY

June 6, 2014

Todd Gloria, Chair
SANDAG Transportation Committee
Council President
City of San Diego
401 B Street, Suite 800
San Diego, CA 92101

Delivered via: e-mail

Re: San Diego Forward: The Regional Plan, Draft Grade Separation Project Rankings.

Honorable Chair Gloria,

As part of our community development work for the San Diego South Bay and specifically for San Ysidro, Casa Familiar is one of the organizations assisting to reach Communities of Concern for San Diego Forward. As part of this work, we have been learning like all of the other Community Based Organizations, how this huge process for future planning works and how we can engage our communities – a very difficult task with communities that represent different communities with varied languages, disabilities, and low-income levels. As such, I was listening to the online feed of the discussion regarding San Diego Forward, last month on Friday, May 16, 2014 and am writing with concerns regarding the Draft Rail Grade Separations Project Rankings.

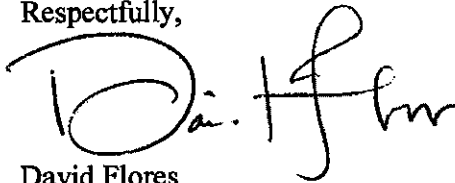

I believe that all of our region, through SANDAG, and with the Board of Directors and its committees is learning what it means to integrate input, recommendations and prioritizations from Communities of Concern. I am providing the following communication as we take issue with the exclusion of Grade Rail Separation at the San Ysidro Intermodal Transportation Center. The questioning of the rankings brought up by Supervisor Roberts and requesting that it be re-analyzed has brought up this huge exclusion in the project rankings. To use Supervisor Robert's own words: "Something is really wrong." When the rail grade separation list includes no San Ysidro projects. Mr. Roberts states that "Any of us that have to live with this daily have to suffer this" and to "Show me another intersection worse than Ash." We would opine that the trolley at the *San Ysidro Intermodal Station* is easily more conflicted with higher impacts. The *San Ysidro Intermodal Center Station* (and future SY ITC) and huge conflicts with every mode of transportation, public and private, passenger pick up and drop off, and the huge pedestrian conflict the Trolley and rail creates is like placing LAX on the San Ysidro border with the San Ysidro Land Port of Entry are places we invite all of the committee members to visit personally.

Casa Familiar, would request that if Ash Rail Grade Separation will be re-analyzed and ranked higher, that the grade rail separation project at the San Ysidro ITC also be included for analysis of impact and that the rail separation for the San Ysidro ITC be the preferred option in moving that project forward.

The second point, also brought up by Supervisor Roberts, which is funding considerations and areas that would provide funding to receive higher points; we would like to remind all of the committee that San Ysidro and the San Ysidro Station generates a significant part funding for the ENTIRE trolley system. We would request that usage be considered if this category will also be adjusted for Social Equity.

We would also like to recommend that SANDAG consider a Node-to-Node project where both the San Ysidro Intermodal Transportation Center and Chula Vista Bayfront be developed as Smart Mobility Hubs connecting as many transportation options as possible, including public, private service providers and active transportation alternatives.

Respectfully,

A handwritten signature in black ink, appearing to read "D. Flores". The signature is fluid and cursive, with a large initial "D" and a long, sweeping tail.

David Flores
Community Development Officer

San Ysidro Intermodal Transportation Center Study – Casa Familiar Comments
06/09/2014

Comments for SY SBC – Presentation to the SY Smart Border Coalition

- The community of San Ysidro, Casa Familiar and attendees to the San Ysidro Sin Limites Community Workshops appreciate the opportunities for input and the outreach done for developing the SY ITC Study.
- The study presents a preliminary roadmap for the concept of the development of a multi-level ITC that is supported by the community, issues and concerns still remain however as to the design and how it facilitates and integrates commercial and pedestrian access & activities around the site.
- The Study should state in the project introduction that this project would also achieve a community goal of developing it as it has been identified as a necessary project in the 1990 San Ysidro Community Plan.
- The document clearly identifies construction costs and details it in Phasing, however no income generation is shared or documented. The community of San Ysidro deserves to see this information in the document so it can understand fees generated and make a case for social equity and transportation investment in the community of San Ysidro. Social equity and environmental justice are now being mandated by the State for regional plans. Information on income generation and an analysis through Social Equity investments will identify that this area has not received fair funding treatment.

Casa Familiar comments on the need to clearly identify social equity issues and where we find that a value is not being placed in San Ysidro and ITC investment.

Research conducted by an investigative reporter and Casa Familiar indicates that San Ysidro might actually be generating massive revenue, which is then being distributed unequitably to North County. (Referenced newspaper articles & research.)

Findings:

1) MTS annually collects 54 percent of its operating costs through fares, more than double the nationwide average of 24 percent. MTS officials credit the San Ysidro Trolley Station for the bulk of that revenue.

An average (CONSERVATIVELY) of 11,461 trolley riders board at the San Ysidro Station every weekday, or one out of every ten boarding's for the entire system. (Michael Freedman and Miguel Aguirre actually think it's more like 20,000-30,000 riders per day.)

When the trolley first opened in the early 1980s, it ran from the border to downtown and fares covered *all* the trolley's costs. Once the system expanded into three different lines going as far north as Santee, taxpayers had to start subsidizing the operating expenses.

(Matt Clark, "Trolley is tops in U.S. at recouping costs" *San Diego Union-Tribune* 15 June 2012.)

We are concerned that many politicians, do NOT want a world class ITC and from committee meeting recordings, it seems to be because they have poured money into the MidCoast Trolley line as well as into the UTC Mall. Supervisor Ron Roberts has essentially said at the Transportation Committee meetings that he doesn't believe that retail stores at ITC will generate any revenue. He has essentially said that it's not a tourist destination, but only a transportation hub where people come and go only. He has stated that people will have a single seat ride going up to the employment centers of UCSD and to a huge shopping mall at UTC. (This is direct from the Transportation Committee tapes on SANDAG's webpage audio links.)

There is an unfair push and initiative that is of concern: SANDAG secured the funding for the MidCoast Trolley from the TransNet half cent sales tax as well as from the Federal Transportation Commission. The total cost, at first, reached \$1.2 billion, but then an extra \$500 million was deemed necessary, pushing the cost to **\$1.7 billion**. The project received little to no opposition. (Robert J Hawkins, "Mid-Coast Trolley gets key federal approval," *San Diego Union-Tribune* 16 September 2011.)

The five trolley lines total are projected to have a ridership of only 20,000 *for all stops*. (Meaning, over time, taxpayers will probably have to subsidize these stops.) Meanwhile, putting the tracks above grade at the San Ysidro trolley station would be a mere \$75 million, and yet there has been LARGE opposition to paying that amount. Also at the Transportation Committee meetings, people seem to think that \$200 million for the ITC is ***too much money***.

2) According to a South County Economic Development Council study of pedestrian crossings, 31 percent of people who cross the border want to shop. (Lana Graves and Cindy Gompper-Graves, San Ysidro Pedestrian Crossing Report (August 25, 2011) South County Economic Development Council <http://southcountyedc.com/images/SYPOE.SurveyReportFinal.pdf>)

Market research done by the Simon Property Group, owner of the Las Americas Outlet, confirms that 21 million shoppers enter the U.S. each year through San Ysidro. *They* put sales tax dollars into San Diego County. (<http://www.utsandiego.com/news/2012/Mar/19/why-san-ysidro-such-shopping-mecca/>)

Meanwhile, in 2012 the Westfield UTC Mall kicked off a **\$1 billion renovation** project that eventually intends to include high rise buildings, 150 shops, 5,000 square feet of office space and 3,000 new parking spaces. That mall attracts *only* 8 million shoppers per year. (Tanya Mannes, "Westfield UTC kicks off \$1b renovation project" *San Diego Union-Tribune* 7 September 2011.)

City Heights Community Development Corp. (Lead) &
Mid City CAN (Sub)
SANDAG Community-based Outreach Services
Task 7: Final Report
July 29, 2014

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. *Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.*

The City Heights Community Development Corporation (CHCDC) and Mid-City Community Advocacy Network (MCC) have been engaged in outreach in the City Heights neighborhood of San Diego to educate and engage residents on the issues and process surrounding San Diego Forward: The Regional Plan (RP). This outreach has engaged dozens of residents, speaking several different languages (Somali and Spanish the largest among them). There has been both substantive information sharing through data and explanations of roles and process, as well as qualitative information gathering about community priorities and expectations of the process. Outreach has been conducted through fun community events that engage residents in unique ways and in numerous small group and one-on-one meetings conducted by Randy Van Vleck and Emily Serafy Cox.

The findings thus far continues to be a sentiment of needing additional investment in the City Heights community.

There have been many challenges facing City Heights which have been identified in our engagement. Common themes include lack of affordable transportation options or access to important destinations; poor housing quality and unaffordable housing overall, sluggish economic development and a lack of local jobs; lack of safe streets including safe routes to transit, schools, job centers, and commercial centers; lack of park and open space, and the negative health effects to which all of these conditions contribute.

One of the major accomplishments of our work is that our resident teams have had an increased understanding of the importance and role of SANDAG, who the SANDAG Board and staff are, and what the Regional Plan and related plans are.

The greatest accomplishment of the past year has been the community wins that residents have championed and achieved which relate to SANDAG and local infrastructure and transportation decision making processes. These include \$34 million approved for Complete Streets in Mid City, the remaining \$23 million for the CenterLine BRT (aka Rapid Route 235), nearly \$2 million for skate parks, funding for the Youth Opportunity Bus Pass Pilot, and other high visible wins such as the implementation of crosswalks and buffered and green bike lanes on University Ave. These aren't just advocacy wins, these are engagement wins too. These wins help residents understand the importance of public involvement and they show that resident involvement and input combined with organizing and advocacy can result in transformative projects.

In Decemeber of 2013, CHCDC and MCC organized a Community Celebration for transportation wins. The event was well attended. The momentum has carried over into 2014 and will likely continue and magnify.

2. *What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?*

Though we reached out to residents and organizations in the greater Mid-City and Southeast area, we concentrated our efforts on individual leaders and groups in City Heights. We worked with and involved the following groups:

- City Heights Town Council
- City Heights Area Planning Committee
- Improving Transportation in City Heights Momentum Team
- Built Environment Team
- City Heights Business Association
- Employee Rights Center
- Environmental Health Coalition
- International Rescue Committee
- City Heights Seniors
- Bikes Del Pueblo
- Crawford High School Students
- Hoover High School Students
- Mid City Bike Corridor Community Advisory Group Members
- City Heights Urban Greening Community Working Group Members
- Lincoln Cluster
- Hoover Parent Meetings
- Urban Collaborative
- United Taxi Workers
- Justice Overcoming Boundaries
- Center for Social Advocacy
- Cherokee Point Elementary School Parents group
- Asociación de Liderazgo Comunitario
- Safe Passage

- SD Bike Train
- SR-15 CenterLine BRT Working Group Members
- El Cajon Boulevard Business Improvement Association

The level of engagement of the groups above has ranged from informal conversation on the issue, one on one conversations with leadership to presentations on the regional plan at one of their meetings. Outreach about SANDAG-hosted workshops was also done with these groups.

The main resident groups we work with on regional transportation issues include the Built Environment Team and the Improving Transportation in City Heights groups. These groups meet monthly in CH. RVV and ESC staff the meetings and help facilitate meetings and work with the residents to chart next steps, actions, and advocacy strategy.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

Our Public Involvement/Outreach Plan engaged our community as well as it could, considering the constraints on time and resources. The methods we used were very successful in engaging people from a range of perspectives and levels of knowledge about the RP.

The most successful method is the one-on-one meeting with a leader or resident. These meetings give a deeper understanding of the person's perspective and improves trust in the process. These meetings also build to the public workshops because they serve as a recruitment tool and a chance for individuals to enter the workshop better prepared to offer formal input.

We also engaged new residents through fun, unique, active transportation-promoting demonstrations such as CicloSDias, Bike To Work Day, PARK(ing) Day, etc.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

The Regional Plan process and associated processes regarding the development of components within the plan remain extremely confusing to the general public. CBO partners also seemed confused. It has been a challenge to explain, to the general public, the timeline and significance of a plan with such complexity and scale. Much of the materials for public consumption that have been produced by SANDAG are wordy or unclear and do not serve as a useful starting point for discussion. Additionally, community engagement would likely improve if the names of different SANDAG plans – such as “Coordinated Plan,” “Comprehensive Plan,” “Regional Transportation Improvement Plan” -- were less vague and abstract and instead spoke directly to the subject matter of the plan as “Regional Bicycle Plan” and “Regional Transportation Plan” do.

That being said, much of the graphical data available from SANDAG, such as graphics in the State of the Commute report, remain incredibly useful. Graphical information is extremely useful for engaging residents in this dialogue who have little technical expertise in the traditional sense. This is especially true for residents with low English proficiency and/or low literacy.

We look forward to further methods of streamlining the reporting process.

Chula Vista Community Collaborative
Community-based Outreach Services

Task 7: Final Report
July 2, 2014

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

CVCC conducted outreach through various venues. We utilized existing groups where we have established relationships and also reached out to new groups. We ceased opportunities to share about the work of SANDAG and how it impacts community and therefore the importance of community input and involvement.

CVCC hosted booth with SANDAG information at local events, fairs, health events. CVCC also hosted events specific to SANDAG and to provide information to the community about SANDAG.

In the initial outreach efforts, the audience seemed disengaged and disinterested. In response to the need to better engage the residents, CVCC developed a "loteria" game (bingo) game. This game reflects a game that is very common and typical of the Hispanic community. Participants seemed to be entertained and engaged at a much better level. The fact that they would be playing a game that they enjoyed and get prizes was a great incentive to participate in the presentation and ask questions. The gift cards where a great incentive for participation.

CVCC continues to elevate the fact that our community needs outreach that is simple and engaging. Material that summarizes in easy to understand terms and provides an actual action item for residents.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

CVCC presented to:

Area Health Education Center Committee

San Diego Prevention Center – Community Engagement Committee

National City Collaborative

Teen Promotores

Promotores

CVCC Partners Meeting

CVCC Staff

Southwest Civic Association

South Bay Homeless Coalition

ESL Classes

Familias Sanas & Activas Program Promotoras

Sunrise Rotary

We shared information about San Diego Forward and the importance of community involvement and sharing the true community prospective in future efforts.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

We conducted outreach in our community and did as much as we could. However, the project did not have a clear description of what we were to accomplish for several months into the contract. Therefore, outreach was mostly about informing people about SANDAG, its role, San Diego Forward, and the plans. This seemed abstract to the community and to the CBOs. There was a level of frustration with the lack of material and clear action items as to what we were expected to accomplish.

Once we developed our game, it was easier to engage the community. The latest presentation video seems much more brief, simple, and easy to follow.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

We need to have more clarity on the action items and outcomes. CBOs need more clear direction and material to use in reaching out to our community.

REACHOUT TO FAMILIES COLLABORATIVE VALUES

We Believe In:

EMPOWERMENT

We believe that services provided through collaboration and networking will improve the quality of life for children and families in our community by building their capacity to be self-reliant.

HONESTY

Only through honesty in both words and actions will we continue to build the mutual trust that is the foundation of our relationships with ourselves, our clients, and our Collaborative partners.

RESPECT

We seek, encourage, and respect each individual's contribution to this collaborative and value the services provided by each individual, and each partner agency.

DIVERSITY

The beauty of our Collaborative is in the diversity of its members.

El Cajon Collaborative Community-based Outreach Services

Task 7: Final Report
October 23, 2014

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

The El Cajon Collaborative conducted a total of 10 community educational presentations on SD Forward, the regional comprehensive plan, to a variety of community groups throughout the cities of El Cajon, Santee and unincorporated Spring Valley. Staff also contributed to the social equity analysis of the following topics at the regular CBO Partners meetings, including: evaluation criteria; the public health framework and indicators; the unconstrained network; proposed policy areas; project evaluation criteria; performance measures; the gaps and condition analysis; and the health indicators. We also distributed and reviewed the Climate Change, Economic Prosperity and the Emerging Technologies White Paper, both internally and externally.

Our low income, limited English – speaking, minority, and limited mobility communities of concern identified concerns about the following topics:
the affordability of transportation alternatives, both transit and automobile travel, given their limited resources; access to transit service resulting from reductions in the frequency of bus service and elimination of routes during the great recession; and challenges associated with the " last mile" from their residence to public transportation. In East County, " the last mile" is often 1-3 miles or more, dramatically reducing access to the Transit Center in both Santee and El Cajon.

Our new immigrant populations are surprised by the lack of vanpools or jitney service that allow those without their own automobile to move freely about urban areas, seen in the communities from which they have come in "less developed" nations. This limited English speaking population's access to transit is also limited by trolley signage in English only.

Affordability is an issue across all communities of concern who identify fares as "too expensive" and transit as "too slow", even if available for their destination. In Santee, we heard many complaints about the elimination of both routes and "transfers" on the bus system. Additional concerns expressed about transit services include lack of shelters in some locations, service frequency and concerns about safety resulting from the homeless population's use of these same facilities.

Many of those with whom we spoke were initially dismissive, saying that their input. "Would have no impact so, why bother?" Concerns about the relative lack of access to transit resources, i.e. the "last 1-3 miles", in Santee and the unincorporated communities of Spring Valley and Lakeside, were brought forward by those who live or have family there.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

Community groups representing limited English-speaking, low income and minority communities of concern included new immigrant communities from the Middle East (a sizable population in El Cajon) residents of a large affordable housing project in the city of Santee, members of the El Cajon Resident Leaders in Action (graduates of the County's Resident Leadership Academy in El Cajon), and El Cajon Collaborative Council members and leadership groups. Some members of these groups provide health and human services far beyond the city limits of the city of El Cajon, with many serving the larger East County communities of concern as clients.

Community educational presentations and regular updates were provided to the 50+ El Cajon Collaborative Council attendees composed of health and human service agency staff, providing services to residents of the city of El Cajon. Many of these same individuals also serve surrounding communities. The Live Well San Diego's East Region Leadership Team, composed of health and human service agency leaders who serve the four incorporated cities and the unincorporated communities in the East HHS region, have also been briefed and contributed to the Public Health White paper.

Community leadership groups received regular updates from staff on the development of San Diego Forward throughout the year, including the El Cajon Collaborative Executive Committee and the El Cajon Collaborative Core Committee, both of which contributed support to the outreach effort.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

Our public involvement/outreach plan appropriately engaged many of the most at-risk communities of concern in the city of El Cajon. Perhaps surprisingly, our outreach efforts were most successful in reaching members of the Middle Eastern new immigrant community that are limited English speaking, low income, and low mobility communities of concern. This may be due to the concentration of both this population and health and human service providers working with this population in the city of El Cajon.

Community members are willing to engage on these issues if given an educational process that includes a series of workshops about both the decision-making process and content – specific topics. However, one – shot presentations cannot produce the type of community engagement or quality of participation required to adequately represent them.

The availability of incentives as meeting supplies including food, translation services, and cultural brokers were essential to the inclusion of both existing residents and the rapidly growing new immigrant population in these efforts. Incentives are particularly important to support participation by members of the low income communities of concern.

The SANDAG-produced video and printed materials, providing an overview of the process and products generated, were very helpful in orienting participants. The project lists were not a useful resource for all but the most committed of residents. Large-format maps by mode helped familiarize residents with the plan.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

Concerned that our input was the only voice from East County participating in this effort, we successfully included participants from the city of Santee and the unincorporated community of Spring Valley. Affordable housing communities are one source of participants that we were able to tap in the city of Santee and we view them as a potential resource in other communities as well.

Spring Valley and Lakeside are some of the largest unincorporated communities in the County of San Diego, yet neither was formally included in this effort. Future efforts ensure representation from those unincorporated communities as their sales tax dollars support these efforts as well

On review, Spanish-speaking translation services were not required during the year reflecting very limited participation. Neither the Cajon Valley Union, Lakeside Union, La Mesa – Spring Valley, nor the Grossmont Union High School District’s English or District – language Advisory Committees were included in our outreach plan. This may reflect a gap in our efforts that should be addressed in the future.

Outreach efforts are most successful as part of an ongoing relationship and conversation with members of a particular community group that meets on a regular basis. Members of groups who meet regularly (at least monthly) were able to engage and contribute better informed input as they learned more about the project over time.

El Cajon has been described as the "poorest city in San Diego County" and as one of the most diverse as a result of immigration. On reflection, it appears that non-immigrant communities of concern in the city of El Cajon were not as well represented in our outreach efforts. These include both our black and brown communities of color, many of whom are low income and whose access to transportation resources is limited. As noted above, strategies to reach these communities will be reviewed in the next phase of the project’s community outreach efforts.

Changes in project timelines were often in conflict with the monthly meeting cycles of our participating community groups. This reduced the effectiveness and success of our outreach efforts by not allowing time for group participation at their monthly meeting. Future efforts will be more effective when a minimum of one month is allowed to support community input.

In past years, maps reportedly failed to extend beyond SR 15. This iteration of SD Forward maps extend East and include the western edge of the unincorporated community of Alpine.

We commend this much more comprehensive and inclusive nature of the CBO Partners outreach effort of which we've been a part. On behalf of the El Cajon Collaborative’s leadership teams and the larger community of East Region, we very much appreciate the opportunity to participate as one of the CBO Partners in this project and look forward to the next phase of this work.

International Rescue Committee

Community-based Outreach Services

Task 5: Final Report June 30, 2014

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

The International Rescue Committee (IRC) has made tremendous efforts in outreaching to LIM communities about the San Diego Forward 2050 Regional Transportation Plan. The IRC incorporated the Food Security and Community Health department to expand the existing outreach network for increased engagement from community members. During the first six months, IRC staff was active in connecting clients to various workshops, led both by the IRC and SANDAG to collect input. A summary of some of the major workshops is outlined below:

- July 19th: IRC staff worked closely with SANDAG staff to organize an Arabic language table at Regional Policy workshop. IRC also provided interpretation for workshop participants.
- July 25th: IRC facilitated a workshop on civic engagement and the regional policies for the IRC's Citizenship class.
- July 30th: IRC led a workshop on advocacy and civic engagement with a discussion on San Diego Forward Regional Transportation Plan for members of the City Heights Resident Leadership Academy and the El Cajon Community Garden.
- August 5th: IRC brought clients to Transportation Project Criteria Evaluation Workshop and provided Arabic interpretation for those in attendance.
- August 22nd: IRC staff hosted a workshop about the Regional Plan and its policies for all El Cajon community gardeners. Arabic interpretation was available for Arabic-speaking clients.
- August 23rd: IRC staff hosted a workshop for the Burmese refugees, in collaboration with the Karen Organization of San Diego. Participants at the workshop reside in both City Heights and El Cajon. Discussion topics included the Regional Plan and the Mid-City bicycle corridor project.
- September 21st: IRC staff hosted a workshop for Somali refugees in City Heights regarding the Regional Plan and Mid-City bicycle corridor project. This workshop raised questions about responsibilities that were within SANDAG jurisdiction and how to engage LIM communities in the effort to address concerns that were outside of SANDAG's authority.
- October 23rd: IRC collaborated with the El Cajon Collaborative, San Diego Hunger Coalition and Leah's Pantry to screen "A Place at the Table" and present information about SANDAG's work on the public health. Interpretation and translated handouts were provided for attendees.
- November 15th: IRC staff hosted a workshop in El Cajon as a follow up discussion to SANDAG's public health efforts. Library patrons and participants were asked about their concerns and suggestions for improving public health in East County.

During the second half of the contract period, IRC staff provided input on multiple RTP-related efforts, such as the performance measures, the San Diego Forward website and the draft White Papers for three SANDAG policies, Emerging Technology, Climate Change Mitigation and Adaptation, and Economic Prosperity. Due to the technical depth of some of the topics, the IRC had difficulty outreaching to the community; however, IRC staff was able to provide input representative of the anecdotes and concerns raised by LIM community members from previous interactions and outreach meetings. All input provided by IRC were from a social equity perspective and how it could improve access and option for LIM communities.

In all, during the past 12 months (from July 2013-June 2014):

- 161 participants attended an IRC and/or SANDAG led workshop
- IRC led 8 workshops for LIM community members
- IRC connected and help facilitated transportation for community members to 6 SANDAG-led workshops
- LIM community members attended a total of 14 different workshops

Based on the outcomes shown, the IRC is proud of the contributions we have made in outreaching to the community about the Regional Plan and engaging them in planning process. With staff changes, the IRC is looking at other avenues to engage clients as we move forward with the continued efforts to solicit client comments. The IRC will begin incorporating outreach efforts into the IRC's Citizenship class, as part of the Rights and Responsibility portion of the curriculum as well as the El Cajon Resident Leadership Academy.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

During this contract year, the IRC has outreached to low-income, minority (LIM) and limited English proficiency community members in City Heights and El Cajon. Additionally, IRC collaborated with other community base organizations, who also work with LIM individuals, about the Regional Plan process.

Learning from our efforts during the previous contract period, the IRC connected with refugees who have been in San Diego for more than a year. We found that the level of engagement was high and clients provided better feedback and comments. Clients who have been here for more than a year offered insightful solutions to addressing some of the transportation challenges, specifically related to public transit. Clients' perceptive commentaries may be a combined result of bringing a relatively fresh perspective to San Diego, but having enough familiarity with the region to provide meaningful input.

To solicit input, the IRC hosted multiple workshops throughout the contract year and with various LIM communities. Interpretation was provided for each workshop as IRC staff led discussion on topics related to the 2050 Regional Transportation Plan. To increase engagement, the IRC provided participants the opportunity to complete a comment card during individual workshop. The cards were then translated by an IRC staff and submitted to SANDAG for review. The IRC solicited comments from Iraqi, Somali and Burmese refugees.

Along with outreaching to LIM communities, the IRC engaged community based organizations in the Regional Plan process. IRC is aware that many LIM individuals are shy about voicing their concerns, for various reasons. As a result, IRC felt that it was important to connect with other community based organizations that work closely with LIM communities and are cognizant of their clients' challenges. The IRC worked with the Karen Organization of San Diego and the local mosque in City Heights to facilitate a workshop for their members.

Examples of translated handouts are attached to this report and they include:

- One pagers translated into Arabic for the July 19th Regional Policy workshop
 - Public Facilities
 - Economic Prosperity
 - Borders
- Client comment for Coordinated Plan on 10/17/2013 by El Cajon community gardener Nazar, in both Arabic and English
- Focal Points Handout- Regional Planning & Public Health both Arabic and English

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

The IRC feels that our Public Involvement/Outreach Plan does appropriately engage LIM communities in City Heights and El Cajon.

The IRC utilized our network of clients (all of whom fall under the LIM and vulnerable community category) in existing classes and trainings to facilitate discussion about the Regional Plan. Methods of engagement included holding an informational workshop, facilitating group discussions and utilized SANDAG outreach kit. The IRC no longer use surveys or questionnaires to solicit input as they were more challenging. As mentioned in previous reports, this may be a result of cultural differences since answering survey questions is not a common method of gathering information in many of IRC's clients' home countries.

The group discussions are naturally more interactive and providing an interpreter significantly improves the client's participation in the conversation. Clients are more comfortable expressing their concerns and providing anecdotes about their own experiences in their native languages. As new residents in San Diego, the clients are able to provide feedback about their quality of life in San Diego. IRC always encourage clients to voice their concerns, needs or suggestion in the comment card. .

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

This is still a learning process for the IRC, especially as staff continues to determine the best method with collecting input from vulnerable LIM community members, including continually revising materials and identify better methods and mechanisms to increase and encourage engagement from the LIM communities the IRC works with.

The most challenging during this contract period was identifying opportunities to engage clients in the conversations around the policies White Papers. Past attempt to introduce high level policy documents, specifically the Public Health White Paper, to clients was not successful. If SANDAG can provide explicit expectations and directions with how to present the material, it would significantly help with gathering client input. The presentation template for the network scenario workshops prepared by SANDAG has been extremely helpful in introducing clients to the topic and with understanding the specific feedback SANDAG is interested in.

Jacobs Center for Neighborhood Innovation

Community-based Outreach Services

Task 7: Final Report

8/11/12

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

Our biggest finding during the process of implementing this grant is that staff continuity matters! Transportation planning is difficult and it is especially difficult to understand for someone who has no experience or understanding about how transportation works on a larger system basis. We found that having staff comes in and out of the process really made it difficult to explain concepts clearly to community about this SD Forward Regional plan. It was process of learning & relearning the SD Forward vision and plan and then having to take the information to the community. Staff needs to be up to speed on the SD Forward plan if they are to share the right information with the constituents we want to participate.

Our strategy of engaging already existing groups in the planning process proved successful. We took the information to them and had them engage in the process in a way they were already used to participating. We incorporated the SD Forward plan presentations into their already occurring organizational/group meetings.

We have to make special efforts to engage all the diverse portions of our community in this process. I believe we must expand out engagement work to include as many representatives of the diversity of our community's population.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

Our outreach strategy focused mainly on engaging already established groups into the SD Forward discussion. We outreached to groups we already had relationships with and invited them to participate in the activities we had scheduled. We also brought the information to them to facilitate their participation.

People were genuinely interested in the information but had a difficult time grasping the "planning" concept. They wanted immediate changes and are not accustomed to thinking about transportation so in the future.

We collected input orally and if necessary we asked people to write comments on comment cards or on paper so we could then codify them and turn in when necessary. We also took down notes and questions from participants to make sure and get them the information they requested.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

Our outreach went well this year. We got already organized groups to connect to new information and have a voice in the larger discussion about transportation.

The materials, although very nice, did not give a clear picture or understanding to people who have never been a part of conversations at such a high level. The materials work fine for most people but when working with groups of people with low-levels of literacy or with little experience in the public policy/transportation world grasping such huge concepts can be difficult. We often had to "translate" larger concepts into more understandable/accessible tidbits of information for the community to understand and digest.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

Transportation planning is such a huge concept and bringing this important information to a level where everyday people understand can be difficult. Having people understand the speed at which implementation happens would be a great way for them to understand the process of how changes are made to the system.

**SAN DIEGO FORWARD: A Regional Plan
Community-Based Outreach Services**

FINAL REPORT

July 17, 2014

Jennifer Inman, Project Manager

Mountain Health & Community Services, Inc.

Community-based Outreach Services

Task 7: Final Report

Date: July 11, 2014

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes

- Beginning in January, 2014, we outreached to students and teachers at Mountain Empire alternative education school in Campo. We discussed the importance of built environment and community planning. We engaged in the "Cities at Play" community planning activity. Students broke off into groups and created their own model healthy communities out of various items from a box. This activity supplemented the Smart Growth discussions we had. **(SEE PHOTOS)** Jennifer attended the school once a week for a month. At the conclusion of our meetings, the students (and teachers) had an understanding of what built environment was, how it affects individual and community health and what role SANDAG plays in built environment planning. They also had an understanding of the reasons for the 2050 RTP, such as dedicating more land to open space and pedestrian and bike friendly communities. The students all agreed that their neighborhoods were not pedestrian and bike friendly, not walkable nor health promoting. Several of the students were interested in participating in Mountain Empire's Resident Leadership Academy (RLA), but transportation after school hours was an issue.
- Mountain Empire Collaborative was established as the regular working group in which we outreached to and educated on SANDAG and the 2050 RTP. As a result of our relationships with collaborative partners, we were able to organize a Resident Leadership Academy (RLA). With participation from members of Jacumba, Boulevard, Campo and Lake Morena, we were able to educate them on the importance of built environment planning on individual and community health. The group completed neighborhood assessments, evaluating their efficiency, safety, walkability and overall health of their neighborhoods. The group also surveyed other residents in their communities on their neighborhood/built environment concerns.

Outreaching SANDAG plans to Mountain Empire was difficult because the plans did not include any future growth in Mountain Empire over the next 37 years. Delivering this news was discouraging to the residents and made them question the reason for informing them on projects that will virtually have no effect on their everyday lives. The formation of the RLA was an outlet to not only conduct SANDAG outreach education, but

to provide residents of Mountain Empire with the tools necessary to initiate healthy changes in their neighborhoods. The group graduated in May 2014 and continues to meet. They've created a name for their group, Taking Essential Action for Mountain Empire (TEAME). The groups' goals are aligned with those of LIVE WELL SAN DIEGO, which are to create and support healthy, safe and thriving communities in Mountain Empire. Their priority Community Improvement Project includes creating a joint use agreement with the Mtn. Empire school district for use of their facilities to provide community programs during summer months and after school hours. They are currently working toward starting a foundation in order to write and receive grants for the community as well as the school district.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

- We reached out to the Mountain Empire Unified School District, working with alternative education school students weekly for a month. We also continue to work with the Superintendent of the district to create a joint use agreement for use of school facilities, as well as planning a school foundation to receive funds for capital improvements as well as programs.
- We worked with the Mountain Empire Collaborative from the beginning of the grant period. The Mtn. Empire Collaborative were our regular working group meetings we attended monthly to relay recent SANDAG news and have them disseminate across their organizations and communities as well as gather input.
- I attended the Campo/Lake Morena planning group meeting to update them on SANDAG plans as well as inform them on Smart Growth incentive mini grant opportunities.
- We attended two community health fairs in Mountain Empire, one in Jacumba and one in Campo. We organized a resource board for iCommute programs that could possibly be of benefit if implemented by Mtn. Empire residents. We encouraged locals to list their top concerns related to their built environment, safety, etc.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

The outreach methods we employed were appropriate for the groups we reached. In all settings with the exception of health fairs, community members were fully engaged and offered helpful insight.

The outreach to the alternative education school students was extremely successful. The students were engaged and understood the concepts being taught. They showed concern for the environment as well as their future in regard to smart growth.

The outreach to the Mountain Empire Collaborative was successful in that we were able to convey SANDAG messages and have them disseminated across a broad range of organizations and communities. Because some of the members of the Collaborative aren't consistent in their monthly attendance, there was difficulty getting everyone on the same page in regard to SANDAG updates. SANDAG language, being difficult for the average person to understand, was a challenge in educating the group.

The formation of the Mountain Empire Resident Leadership Academy (RLA) was successful in outreaching SANDAG as a player in community planning. The group was focused on topics related to SANDAG planning, which made the information easy to understand.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

Outreaching to residents of the rural, unincorporated area of San Diego was challenging because residents did not see the point of informing them on programs or plans that had no effect on their area. I would suggest, when organizing outreach for areas similar to Mountain Empire, preparing alternatives to the plans that don't include them such as iCommute or Smart Growth incentive opportunities, to keep their attention and give them hope that their neighborhoods can still see improvements in transit, transportation and built environment. Also, emphasizing the environmental benefits of densifying growth to areas with existing infrastructure is a point that everyone responds positively to.

Operation Samahan

Community-based Outreach Services

Task 7: Final Report

July 2, 2014

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

Operation Samahan gave a presentation on May 22 on SANDAG and the Regional Plan, in addition to the Emerging Technologies, Climate Change, and Economic Prosperity White Papers. A set of questions were prepared by staff beforehand to guide the discussion after each presentation. Below lists the input that was gathered.

SANDAG & Regional Plan Presentation

What kind of transportation issues do you see in National City or the community you reside in?

- Buses do not pass by H Street
- A lot of congestion where schools are
- Difficult to see the flashing lights on the street during the day time that indicates when pedestrians should cross. A good example of this is the cross walk that links Sweetwater High School to the adjacent street.
- The bus is not efficient in Navy housing areas; getting to Plaza Blvd. takes an hour.
- The bus stop is right in front of an attendee's house (on Ava Street) and as a result, trash accumulates there and sometimes she cleans it up even though she knows that it is not her responsibility to do so. In addition, a lot of homeless people are there. Inquired if there is a way to have the bus stop somewhere else.
- Needs to be an inland train system.
- Biking in National City is unsafe.
- Don't ride bikes or walk at night in National City because there are very limited lights; becomes a safety issue (especially on Euclid and Sweetwater).
- Many low income residents do not have cars and bus passes are around \$5 and aren't affordable.
- Another issue in National City is hit and runs. Many cases of this in this area.
- The crosswalks are too far apart and therefore, jay walking is prominent.
- Attendee mentioned that San Diego is ranked #29 in the deadliest cities for pedestrians.
- There are many islands around the area and there is an issue when it comes to emergency vehicles who can't get through because the streets are too congested.
- Sorrento Valley is congested all the time.

What suggestions can you give so that our community is not left behind in SANDAG's planning efforts?

- Attend board meetings and tell them our problems.
- Look into SANDAG's resources

Emerging Technologies White Paper

- Driverless cars are helpful for people with disabilities but not a good idea for the general public.
- What happens if the car malfunctions?
- Some people enjoy driving.

- This will show that we are so dependent on machines (example is the movie, Wall-E).
- A lot of institutions will lose jobs like the DMV or the police force because they do not have to administer a driving test for anyone and police won't have to issue tickets.
- Jobs that have been around for a long time will not be around anymore like taxi and truck drivers.
- Cars as we know will not be in existence in the future.
- Since the population is growing, there has to be an efficient transportation system. Japan, Germany and London's transportation systems are good examples.
- Using the AMTRAK was stress free and an attendee expressed that she will always use the train when traveling to Los Angeles. Want to see the San Diego train system like AMTRAK.
- Technology causes stress for people who are not accustomed to it. Using a computer is already too much for some.
- Technology will make life much simpler but for now, it is too complicated.
- The US makes very large cars as opposed to other countries.
- Gas is very expensive overseas so this forces people to take public transportation.

Climate Change

- This is a global issue and it requires the effort of not only us, but pretty much the whole world.
- Difficult when countries such as China are not concerned about climate change as much as other countries are. When attendee went to China, by the end of the day, her white shirt was black from pollution. China is undergoing an industrial revolution right now, much like how the US went through it in the early 1900s.
- There are billboards that convert polluted air into clean air.
- Something that we can do is to use less cars to commute.
- Changing the air filters in your home is important.
- Communities need to be prepared in regards to disaster planning education.
- Many were impressed with the way the firemen handled the San Diego fires two weeks ago. SDG&E gave out automated messages letting the community know what to do.
- Other things that we can do is to use less electricity in the home by setting a timer on devices to a certain time so it can turn off automatically and unplugging electronics that are not being used. Although electronics are turned off, simply being plugged into outlet generates electricity.
- The community is so accustomed to how they are living now that even if we gave education, it is up to them to act.
- Difficult to get the community to care about climate change when there are much more pressing issues that are in the forefront. Best to see where climate change can be incorporated into various programs that are seen as more important.

Economic Prosperity

- Education is an important component in the topic of economic prosperity.
- It's about being able to manage your income in a fair share.
- Housing is very expensive in San Diego.
- 38-40% cannot meet basic needs of housing and food.
- Everything is so much more expensive now.
- Increasing minimum wage will hurt the population because the prices of everything will go up and companies will not hire a lot of workers as a result. Someone will have to pay for the increase.
- The middle class is the ones that are hurting the most because if you are low income, you receive assistance from the government.

- Solution is to have the opportunities available like internships and apprenticeships so people can learn the skills for higher paying jobs.
- Education needs to be accessible for all.
- Small business owners are considered well of when in reality, they are not. All the income that is made goes to everything for the business.

To serve as an introduction to the Alternative Scenarios Workshop that will be held in August, we presented the Alternative Scenarios Outreach Video to our partners and briefly discussed what to expect during the large workshop in August.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

Operation Samahan reached out to several community based organizations including the Lao American Coalition who represents the Lao community and Kalusugan Community Services who represents the Filipino community. In addition, we reached out to our contacts from the County of San Diego, National University, and San Diego State University. We also reached out to Operation Samahan employees since many of our employees are residents of National City and the surrounding areas.

Since Operation Samahan is still fairly new to the project, getting the word out and getting the community to attend our meetings has been a bit difficult, but for those who do attend the meetings, level of engagement is very high. We solicit input by preparing an agenda that not only outlines what will be discussed during the meeting, but also has a list of questions that we hope to gain answers to.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

In order to increase attendance, a more effective marketing strategy must be implemented. For our presentations, we utilized PowerPoint slides to present the information. This method is successful solely because those we presented to those accustomed to PowerPoint presentations, but we are aware that when we present to community members, we will have to utilize a method that is more engaging and hands on. Examples include: (1) interactive games; (2) more illustrations; and (3) more videos.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

Overall, the community expressed the following interests and concerns:

1. The community needs an efficient and effective mass transit that will enable them to move from home, work, and school at minimum time and costs.
2. Climate change and its impact in the overall community is not a priority among community members. To get their buy-in, we will need to incorporate this topic onto other programs that will make them (the community members) realize that such is a part of their personal lives.
3. On technology, many are still apprehensive about its impact (particularly on technology glitches/malfunctions). There's a lot of confusion on SANDAG's technology jargon (e.g. mobility hub, connected vs. automated, etc.). It will be probably be helpful to develop an illustrated glossary of terms to help them visualize how these concepts look like.
4. Community members are interested in programs that will expand job opportunities. They feel that job creation/placement is highly correlated with education. Innovative ways to approach education and training should be explored. An example would be an apprenticeship program that will enable those seeking employment learn or enhance their skills from hands-on training rather than through textbook or classroom setting.

Vista Community Clinic Community-based Outreach Services

Task 7: Final Report July 15, 2014

Title of Organization

Community-based Outreach Services

Task 7: Final Report

Date: July 1, 2013 to June 30, 2014

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

Community outreach was conducted through schools, faith based organizations, community organizations, community groups, health fairs, community events and one-on-one conversations with stakeholders and representatives from various organizations. Hundreds of community members were reached through community presentations and workshops. Twelve presentations and two community input workshops were conducted during this fiscal year in the cities of Vista, Oceanside and Fallbrook. These were arranged through many one-on-one conversations with representatives from different organizations to engage them in the process.

Findings:

- Safety was identified as one of the biggest concerns for the community; deteriorated roads, poor lighting, narrow streets with no sidewalks, sidewalks in bad condition, and drug use in parks are some of the factors that refrain residents from doing physical activity in their neighborhoods. Although some residents live a couple blocks away from grocery stores, recreation facilities, and the Sprinter station, they prefer choose to drive instead of walk since street conditions are poor and unsafe.
- Another concern is social equity. Participants stated that funds are not distributed equally. Some neighborhoods have more than others. More open spaces are needed in the poorest neighborhoods; social equity should be promoted and funds should be distributed equally. In addition, affordable housing should be located in nicer neighborhoods. Usually, affordable housing is located in already deteriorated neighborhoods, so the environment hardly changes.
- Affordable and reliable transportation is another priority. Currently, transportation is unaffordable for many residents. Public transportation is not used due to high cost and low frequency. Some suggestions to increase the use of public transportation are to lower cost and implement programs that help single parents, low income families, seniors and students. In addition, improvements on the system such as bus speed and frequency; more space and services for disabled, and more space for strollers and bikes. Residents who use public transportation stated it takes them three hours to come to Vista from Escondido. The recommendation was to increase the frequency of buses to every 10 minutes during the peak hours, and every 20 minutes during normal hours. It was mentioned that the Sprinter is clean and fast; however, it is too crowded in the mornings during school hours. The Coaster is too expensive and hours are not convenient. Free fares on weekends will encourage the entire community to use public transportation and eventually will lead non-users to start using it. The usage might reduce the problems of private transportation; morning and afternoon traffic on the freeways and roads is a big problem.

- Better communication between transportation users and providers. The Sprinter and buses changed routes and that affected the community. Information on route changes should be disseminated through different media outlets including magazines and booklets. Information should be displayed in strategic places such as community clinics and bus stops.
- Lack of school busses is also a big concern; school busses are needed because it is unsafe for parents and children to walk to school due to the bad conditions of the roads. School buses or transportation services designated to transport children/students will replace hundreds of cars lining up every day at schools; therefore, gas emissions will decrease.
- A bus to transport people back and forth from the border would be ideal. This might reduce the long wait at the border; it takes two to three hours to cross. Opening up more fast service lanes will be also helpful.
- Economic prosperity: there is a need for policies that control rent fees. It seems that landlords increase the rent often and there are not regulations. There should be rent control in order to improve the economy. Job training is also a big need in the Hispanic community. The community agreed they want jobs close to housing so that there is no need to drive and spend money on gas. Some residents wanted to be trained on how to open a business and want to see more support for small businesses instead of being invaded by big chains such as Starbucks. Low interest business loans, raising the minimum wage, more jobs for migrant communities, improving working conditions for household workers and landscapers, and fair working information were additionally identified by the community as determinates to improve the economy.
- Community members showed support to the smart growth concept; when community residents were asked to build their dream communities as part of an interactive activity in one of the workshops, they built compact communities that included amenities within walking distance, such as parks for children and families, dog parks, walking and biking trails, business, access to healthy food, community centers, community clinics, post offices, coffee shops, schools, banks, churches, bus and train stations. Trees along sidewalks and public lighting stand in their dream communities.
- Water preservation, energy and recycling were mentioned as issues that need special attention. Communities need more information on how to save energy, but solar panels should start replacing electrical energy. Planting more trees to clean the air and attract more rain was suggested, as well as programs and education on recycling to reduce contamination.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

Staff approached various groups and organizations that focus their services on many sectors of what has been defined as communities of concern. Those organizations include the FarmWorker Care Coalition, Poder Popular, Universidad Popular, North Coastal Prevention Coalition, North Coastal Prevention Youth Coalition, Resident Leadership Academy groups, Vista Unified School District Learning Center, North County Life Line, San Francis of Assisi Catholic Church and Iglesia Cristiana Discípulos de Cristo (Disciples of Christ Church).

Staff met several times with community leaders and organizations' representatives to engage them in the process. Organizations that had worked with us in the past were more likely to collaborate. The ongoing conversations in person, through emails, and telephone, helped to keep key leaders involved during the outreach process. Vista Unified School District Learning Center, North County Life Line, and Iglesia Cristiana Discípulos the Cristo were very instrumental in the planning of two workshops. Staff of these organizations volunteered to be trained to assist with note taking and workshop facilitation; in addition, they provided personnel to assist with child care for the workshop. Furthermore, the Learning Center used its robocall system to invite Vista Unified School District Spanish Speaking parents to participate in the workshop. We were successful on outreaching and engaging community leaders and organizations and community residents.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

Going to the organizations that we already had relationships with was the best strategy to outreach to the community. The level of trust between those organization and us facilitated the outreach process. Through community presentations and workshops, we reached hundreds of people. Powerpoint presentations, maps, and interactive activities helped the community get more familiar with community planning. These presentations empowered and motivated people; some participants stated they were going to go to City Council and advocate for their streets to be fixed. Some residents attended the presentations and workshops more than once.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

Attending workshops facilitated by SANDAG, and using their assistance in facilitating our first workshop, strengthened our knowledge and confidence. This led to us successfully facilitating our second workshop which was attended by over fifty people. We invited Vista City Planning Department staff to attend this workshop and conduct a presentation on their Bicycle Master Plan/Inland Trail and Paseo Pointe project (mixed-use, affordable housing project on South Santa Fe). It was very helpful to have someone from the city to come and talk about local projects. We learned while conducting presentations that the community is eager to learn what is happening in their own communities. It is easy to engage the community in regional planning when they also learned about current projects planned in their own communities.

In our second workshop we asked the residents to build their dream communities using a variety of items including legos and blocks, and we found that interactive activities during the workshop helped the residents better understand regional planning (for more details please see our workshop report from January 20, 2014).

Combined Input Worksheet

General Information

CBO: Able-Disabled Advocacy

Workshop Date: 8/13/14

Workshop Location: South County Career Center

Number of Participants: 20

Number of limited English proficiency participants: 0

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Notes Taken From Discussions

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. Transit if travel times were shorter (Express Trolley)
2. Trolley Express is more for commuters as opposed to tourists on the other lines
3. Mira Mesa Trolley Line serves Jobs Centers
4. SR 78 Completed Sooner
5. New Technology
6. Bike Corridors

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. Transit goes to more places in North County with Jobs (Rapid Bus)
2. Bus Rapid Transit El Cajon to Downtown will serve a lot of people
3. Managed Lanes Included
4. Trolley Connection to Coaster
5. New Technology
6. Bike Corridors

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario? No, the participants had appreciated the score card addressed issues but expressed what their own priorities were.

Identify your top 10 projects identified as priorities by your participants

1. SR54 Managed Lanes (69 & 70)
2. SR78 Managed Lanes (59)
3. Bus Rapid Transit Downtown to El Cajon Corridor (13)
4. 805 to Kearney Mesa Corridor Transit (562)
5. Bus Rapid Transit serving Otay Ranch (638)
6. Mira Mesa Trolley (10)
7. Airport Access (49)
8. Mobility Hubs , Including (49 & 50)
9. Bike Network
10. Overall Rapid Bus & Bus Rapid Transit Network

Is there anything else we should know that came up during your discussions?

Most of the participants liked many of the projects concerning transit but were concerned that many of them were so far in the future and didn't believe a lot of the transit projects like the Trolley Lines would be built. This is a big overall scenario and most of the participants were there for information. The participants were interested in the expanded Rapid Bus/Bus Rapid Transit system being introduced. Also it was brought up that Managed Lanes should have more photo enforcement. Many talked about the quality of service of the existing network (travel times, costs, etc.)

Please remember to turn in:

Combined Input Worksheet

General Information

CBO: Alliance for Regional Solutions

Workshop Date: August 14, 2014

Workshop Location: North County Lifeline, Vista CA

Number of Participants: 28

Number of limited English proficiency participants: 0

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. Addition of managed lanes is a good thing.
2. Managed lanes will happen faster in this scenario.
3. Some of the Rapid bus additions proposed in North County not part of this scenario.
4. The public transportation side of this plan happens too late- we need these changes now.
5. This scenario still mostly helping people with cars.
6. Sprinter improvements sooner are a good thing about this scenario.
7. Rapid lines missing in this scenario a problem.
8. Traffic on the 78 will be horrible during all this construction. Will cause more problems.
- 9.
- 10.
- 11.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. Rapid lines throughout North County great.
2. Most of the rapid lines won't happen till 2050- we need sooner.
3. This scenario seems to focus more on public transportation options- a good thing.
4. There is concern over fees for Rapid-will our clients be able to afford?
5. Construction will make traffic worse before it gets better.
6. Times and frequency of bus lines. Will it expand and help our clients?
7. Too much emphasis on Rapid- we need more comprehensive expansion.
8. The break in the managed lanes on the 78- could be a big problem.
- 9.
- 10.

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario?

Because there wasn't a difference in the outcomes between the scenarios- it didn't make a big difference but there were definitely certain performance measures that were important to everyone- cost to user and travel times were discussed at length. This will affect their clients the most.

Identify your top 10 projects identified as priorities by your participants

1. 59
2. 2
3. 3
4. 35A
5. 36
6. 37
7. 17
8. 66
9. 33
10. 70

Is there anything else we should know that came up during your discussions?

There was a lot of concern over traffic during construction causing more problems during the first phases.

Lots of concern over cost of transportation. New routes and transportation options are great but if clients can't afford to use them then it isn't a help at all.

Please remember to turn in:

Combined Input Worksheet

General Information

CBO: BAME CDC

Workshop Date: 8/20/2014

Workshop Location: The Logan Heights Library. 567 S. 28th Street

Number of Participants: 17

Number of limited English proficiency participants: 5

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. Express trolley saves time
2. More frequent trolleys
3. More accessible
4. Project #7- Trolley 552 Orange Line Express- El Cajon to San Diego Airport ITC (but needs to be phased sooner)
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.
- 11.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. More connections
2. More options

3. Project #17- BRT 650 Chula Vista to Palomar Airport Rd via 805/1-5 (but needs to be phased sooner)
4. Good for North County
5. Seems to connect neighborhoods better
6. Less congestion in urban core
- 7.
- 8.
- 9.
- 10.

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario?

No, but they did emphasize the importance of reduction in travel time, reduction in GHG, and safety in the form of cameras and lighting (both on transit itself and on the way to transit). There were questions about whether or not BRT will contribute to GHG emissions. Participants also said it's important to consider the impact that big construction/developments have on dense neighborhoods. They also talked about the importance of ensuring safety measures in the building process, and ensuring that the construction provides more jobs.

Identify your top 10 projects identified as priorities by your participants

1. Project #40 Rapid 637 North Park to 32nd Street Trolley via Golden Hill (what exactly is the route) and needs to be phased WAY sooner
2. Project #7 Orange Line Express- El Cajon to San Diego International Airport ITC (needs to be phased sooner and is currently only in scenario 1)
3. Safe Routes to transit and/or mobility hubs- better lighting, sidewalks, security cameras, crosswalks, signals, etc.)
4. Project #6 Orange Line Frequency Enhancements and rail grade separations
5. All transit projects in 2020 phase!
6. Mobility hubs on Market and Imperial
7. More funding allocated to bike and pedestrian infrastructure projects- to support people getting to transit more safely, and make transit riding more attractive (also more bike racks on transit)

8. Project #17 BRT 650 Chula Vista to Palomar Airport Road
9. Project #9 Trolley SDSU to Downtown via El Cajon Blvd.
10. Project # 11a- Trolley San Ysidro to Kearney Mesa
11. Project #5a- Blue Line Frequency Enhancements, Blue/Orange Track Connection 12th & Imperial

Is there anything else we should know that came up during your discussions?

Participants expressed strong interest in a third network scenario that phases all transit, bike/ped projects FIRST before any highway projects.
Greater transit service along the 805

Please remember to turn in:

COMBINED INPUT WORKSHEET

General information

CBO: BAYSIDE COMMUNITY CENTER

Workshop Date: August 12, 2014

Workshop Location: Bayside Community Center, Room 3 & 4

Number of Participants: 43

Number of limited English proficiency participants: 38 (Vietnamese)

PART 1: Network Scenarios:

The benefits of Scenario 1:

1. Significant travel time savings from San Diego to the other regions.
2. The neighborhoods are connected.
3. It creates more jobs for San Diego residents.
4. The economy will grow – economic prosperity
5. The completing of transit systems and the managed lanes reduce congestion along the region's major traffic arteries.
6. More carpool, cyclists will take down the greenhouse gas emission which protects our environment.
7. It cuts down expenses.
8. The transit system is secure by employing the technologies in transportation.
9. It can improve people's general health.
10. The environment is improved (more open spaces).

The benefits of Scenario 2:

1. Significant travel time savings from around the local communities and around San Diego vicinity.
2. The local social services and the businesses are linked.
3. It's more focused community centers.
4. It's giving the residents more choices in how to get around.
5. The education will grow.
6. More jobs will be created.
7. San Diego economy is prosperity.
8. It's more enjoyable life for residents.
9. The transportation system is secure by applying the technologies in transportation.
10. More biking and walking which improves people's health.

PART 2:

After looking at the Performance Measures Scorecard, the feelings of our participants had changed about the scenarios:

1. They confused about the scorecard predicting that “N/A” on the transportation investments help to improve the regional economy in the 2035.
2. They thought that the travel times, reduce should be 100% positively, however, the scorecard predicting was not as they thought.

The top 10 projects identified as priorities:

1. 11A: Trolley, Route 562
2. 11B: Trolley, Route 562
3. 12A: Trolley, Route 563
4. 12B: Trolley, Route 563
5. 18 : BRT, Route 653
6. 28 : Rapid Route 28
7. 30 : Rapid Route 41
8. 32 : Rapid Route 120
9. 4 : Trolley Route 510
10. 6 : Trolley Route 520

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. Faster transit and travel time
2. Better for the environment
3. Time efficient
4. Energy efficient
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. More space available to create the public transit lines
2. More room for growth for system to expand
- 3.
- 4.

- 5.
- 6.
- 7.
- 8.
- 9.
- 10.

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario?

** No noted change of expressions.

Identify your top 10 projects identified as priorities by your participants

1. They suggested strengthening *both* the trolley and bus systems, not just one
2. The trolley route from San Ysidro to Mission Valley is of great importance
3. Increase trolley lines to Linda Vista community
4. Work with the drivers of public transit systems to better respect bicyclists
5. Increase education (inteligente) on scenarios
6. Increase number of public transit services to the more rural communities (edges of the communities)
7. Busses are needed from Tierra Santa on the weekends
- 8.
- 9.
- 10.

Is there anything else we should know that came up during your discussions?

** Many participants expressed their gratitude for inviting them to the workshop, as they knew very little on the topic before and felt they learned a lot. They were excited to be a part of the planning and public opinion phase of the project's development.

Please remember to turn in:

- Sign-in sheets (originals or scans)

August 27, 2014

SD Forward - Casa Familiar

Community Outreach Workshop

Combined Input Worksheet

General Information

CBO: Casa Familiar

Workshop date: August 27, 2014

Workshop location: San Ysidro Recreation and Civic Center (212 West Park Ave., San Diego, CA 92173)

Number of participants: 16

Number of limited English proficiency participants: 16

Part 1

Benefits of scenario #1

- Ease the current overcrowding on trolleys through the addition of the express trolley line
- Quicker commuting times to/from San Ysidro with the express trolley
- Increased public transportation that reaches San Ysidro

Benefits of scenario #2

- Increased public transportation that reaches San Ysidro
- Faster commuting times with the Bus Rapid Transit coming to San Ysidro

Part 2

Projects identified as priorities by participants:

- **8** Trolley 540, Blue Line Express- Santa Fe Depot to San Ysidro
- **11A** Trolley 562, Phase 1- San Ysidro to Kearny Mesa
- **21** *TransNet* BRT 680 and 688/689, Otay Mesa/San Ysidro to Sorrento Mesa
- **38** Rapid 635, Eastlake/EUC to Palomar Trolley
- **51A** Intermodal, Phase 1- San Ysidro ITC

Other concerns brought up during discussion:

- **Price:** Community members are worried that ticket prices are going to increase with the transit renovations. They voice that the trolleys are already too expensive for the people in this community. They wonder why free bus transportation to Coronado is offered in the summer months for tourists, while prices remain the same for people living in lower socioeconomic areas of the city.
- **Service hours:** Community members express the need for increased service hours on the weekends. They would like services to run later into the night, especially on Sundays.

- **Service routes:** Community members express concern that bus service to Sharp hospital was cut. They are worried about how they would get to the hospital in an emergency situation. They would also like increased services from San Ysidro to Eastlake during the weekends.
- **Inequality of service:** Community members identify that there are few public transportation options that reach all the way down to San Ysidro. They are also unhappy over the discrepancy between the city offering free public transportation in a more prosperous areas, while the rest of the city continues to pay at the regular price.

Casa Familiar - SD Forward Community Workshop on Scenarios

4 | Casa Familiar - SD Forward Community Workshop on Scenarios

Combined Input Worksheet

General Information

CBO: City Heights CDC & Mid-City CAN

Workshop Date: August 12, 2014

Workshop Location: City Heights Wellness Center

[Other Workshop: At the Improving Transportation in City Heights monthly meeting Saturday, August 9 - we presented a few Icebreaker Interactive Posters to get residents thinking about transportation issues, planting the seed for future engagement.]

Number of Participants: 23

Number of limited English proficiency participants: 0

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. Not soon enough.
2. Too much freeway expansion.
- 3.
- 4.
- 5.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. Not soon enough.
2. Liked the added route options (widespread network).
3. Too much freeway expansion.
- 4.
- 5.

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario?

Respondents expressed unanimous agreement that the Scorecard, demonstrating equivalent scores, provided no useful insight into distinguishing between the two Scenarios.

Identify your top 10 projects identified as priorities by your participants

- 1. 54th Street BRT**
- 2. Rapid #10**
- 3. CenterLine BRT and subsequent LRT conversion (verbally mentioned)**
- 4.**
- 5.**

Is there anything else we should know that came up during your discussions?

The participants asked for a Transit First Scenario.

They want to know how their input is being used to influence the Final Scenario.

Participants believe their input has not influenced the Scenarios' development, as they and others have asked for Transit First at previous SANDAG workshops earlier in the planning phase. As a result, many chose not to submit comment cards.

Some participants, more familiar with planning, felt that the current scenarios have not changed significantly from the RTP 2050.

Many who have been involved in RTP public workshops are becoming jaded about whether their input matters.

Please remember to turn in:

- Sign-in sheets (originals or scans)
- Comment cards (originals or scans) and Excel table
 - Please transfer all comment card contents into the Excel table in English

CBO: Chula Vista Community Collaborative

Workshop Date: August 12, 2014

Workshop Location: Turning the Hearts Center 345 5th Ave, Chula Vista

Number of Participants: 18

Number of limited English proficiency participants: 0

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. Travel times will be faster
2. Services seem more direct
3. More express services
4. Commuting longer distances will be faster
5. Less stops will increase efficiency
- 6.
- 7.
- 8.
- 9.
- 10.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. More options
2. More linkage to North County
3. Ore widespread services
4. More transportation options

5. Easier access to more places
- 6.
- 7.
- 8.
- 9.
- 10.

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario? No

Identify your top 10 projects identified as priorities by your participants

1. More options for San Ysidro to San Diego travel
2. Transportation to airport
3. More bus service
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.

Is there anything else we should know that came up during your discussions?

Affordability and accessibility continue to be a concern

Please remember to turn in:

- Sign-in sheets (originals or scans)
- Comment cards (originals or scans) and Excel table
 - Please transfer all comment card contents into the Excel table in English
- Workshop photos

Combined Input Worksheet

General Information

CBO: Chula Vista Community Collaborative

Workshop Date: August 14, 2014

Workshop Location: Rayo de Esperanza Family Resource Center 1671 Albany, Chula Vista

Number of Participants: 20

Number of limited English proficiency participants: 18 - workshop in Spanish

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. Improves travel times
2. Faster service to long distances
3. Gives more access with less stops
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. Benefits more communities
2. Easier and faster access to North County
3. More widespread benefit
4. More options to get to more places

5. Easier access to more places
6. Gives more access to people to get to more places
- 7.
- 8.
- 9.
- 10.

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario? No

Identify your top 10 projects identified as priorities by your participants

1. Provides more bicycle options
2. Decrease travel times
3. Increase transportation lines to more places
4. Options that improve the environment
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.

Is there anything else we should know that came up during your discussions?

Affordability and accessibility in a main concern for the participants

Please remember to turn in:

- Sign-in sheets (originals or scans)
- Comment cards (originals or scans) and Excel table
 - Please transfer all comment card contents into the Excel table in English
- Workshop photos
- Photos of all flip chart notes and activity boards

Combined Input Worksheet

General Information

CBO: El Cajon Collaborative

Workshop Date: 08/11/14

Workshop Location: Mountain Empire Unified School District Board Room

Number of Participants: 4

Number of limited English proficiency participants: 0

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group. None

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. Improved commute times
2. Reduced congestion
3. Additional carpooling to use HOV lanes

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. Reduced GHG by getting cars off the road, reduced solo drivers
2. Increased usage of transit / ridership

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario?

Yes

Identify your top 10 projects identified as priorities by your participants

1. BRT El Cajon to downtown San Diego
2. Increased managed lanes

Is there anything else we should know that came up during your discussions?

Reductions in bus service in the Mountain Empire leave residents with only one round-trip bus per week for residents access to healthcare, education, and employment resources for low income, low mobility, and minority residents. None of the proposed projects will address this lack of access to these resources for residents.

People living East of Alpine have no way to connect to existing transportation network on a daily basis.

Please remember to turn in:

Number of limited English proficiency participants: 0

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. Offers more mobility on existing infrastructure.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. Offers more bus route support
- 2.
- 3.
- 4.

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario?

No

Identify your top 10 projects identified as priorities by your participants

1. BRT to downtown San Diego
2. BRT to La Jolla, North City
- 3.
- 4.
- 5.

Is there anything else we should know that came up during your discussions?

This 100+ unit affordable housing apartment complex is 2 miles North of Mission Gorge in Santee, approximately 3 miles from the trolley station, with no bus service after 4 pm on weekdays. All residents are low income with many low mobility seniors, locate 1 mile away from the nearest grocery store. The Great Recession resulted in a significant reduction in bus service, leaving residents even more isolated than before as these service reductions have not been restored.

Access to employment opportunities, shopping, and educational resources are all constrained by the current level of bus service. Youth seeking to attend Grossmont College reportedly require two hours to make the trip, only 15 minutes by car on the hills overlooking Santee.

Many residents have no automobile and are dependent upon family or friends for transportation.

Please remember to turn in:

CBO: El Cajon Resident Leaders in Action (RLA)

Workshop Date: Thursday, 8/14/14

Workshop Location: Little House, 131 Avocado Ave., El Cajon, Ca 92020

Number of Participants: 6

Number of limited English proficiency participants:

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Small group discussions devolved to discussions with individual about differences between the scenarios and time spent responding individually to the community input worksheet questions in writing.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. BRT to downtown from El Cajon transit center
2. increase speed on existing infrastructure

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. Increased neighborhood access to transportation network, via mobility hub
- 2.

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario?

No, little attention was paid to these issues.

Identify your top 10 projects identified as priorities by your participants

1. Mobility hub location suggestions include:
 - a. Fletcher and Johnson in El Cajon, close to the mall
 - b. Broadway and Fletcher Parkway in El Cajon
 - c. Pkwy., Plaza in El Cajon
 - d.
2. Express trolley
3. AirPort Express
- 4.

Is there anything else we should know that came up during your discussions?

Inadequate transportation network in East County and RCP fails to address existing lack of access to resources for residents and communities of concern.

The list of projects was not a useful resource during the time allowed for the workshop due to the time limitations. Even engaged residents have limited knowledge of the decision-makers representing them on both the MTS and SANDAG Boards of Directors.

Please remember to turn in:

Combined Input Worksheet

General Information

CBO: El Cajon Collaborative

Workshop Date: 8/17/14

Workshop Location: 3845 Spring Drive, Spring Valley, CA 91977

Number of Participants: 16

Number of limited English proficiency participants: 0

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Single group discussion, no flip chart used.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. Speeds up traffic.
2. Transit to airport
- 3.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. Serving more people that need to use the transit system.
2. May reduce some traffic.
3. Expands bus routes and convenience
4. More destinations accessible faster.
- 5.

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario?

No. Grasping the performance measure concepts and system changes too much of a leap for participants new to the RCP.

Identify your top 10 projects identified as priorities by your participants

1. BRT from El Cajon to downtown San Diego.
2. BRT from El Cajon to North city.
3. Increase bus routes in Spring Valley linkage to Spring St. trolley station
- 4.

Is there anything else we should know that came up during your discussions?

Consistent concern about lack of access to public transit, primarily bus routes, serving the Spring Valley community that links to the larger system in a timely manner. Travel times limit access to healthcare and employment opportunities for low mobility and minority communities. Operational hours for local MTS services constrain access to jobs for those whose working hours are not 9 to 5 limiting access to employment.

In Spring Valley, **suggested mobility hub locations** include:

Jamacha Boulevard and State Route 125

Parkway Plaza in El Cajon

El Cajon, the mall

state route 125 and Jamacha

Spring Street Trolley stop

Spring Street hub

Workshop Date: August 12th and August 13th

Workshop Location: 131 E. Main Street, El Cajon CA 92109

Number of Participants: 73

Number of limited English proficiency participants: 61

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. Everyone liked the Orange Line Express from El Cajon to San Diego International Airport because many frequently travel in and out of the country to connect with families still in the Middle East
2. Most parents like the idea of the Express bus from El Cajon to UCSD via Santee, SR 52 freeway, and I-805 freeway
3. The express bus project from SDSU to Spring Valley via East San Diego, Lemon Grove and Skyline was not a big priority for many of the clients as there is an existing trolley line from El Cajon to SDSU.
4. In general, many clients really like the idea of express trolley lines but would still like more connectivity within the region, which many complained was lacking.
5. Concern raises regarding projects around expressed trolley was that it was plan for 2050 and many would prefer an earlier construction date.
6. Since projects related to the El Cajon community are in both Scenario 1 and Scenario 2, the strongest distinct is once again, the pushed for expressed trolley.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. Scenario 1 was definitely more popular than Scenario 2, but many clients liked how regionally focus Scenario 2 is.
2. The El Cajon Transit Center to Downtown via SR-94 freeway is a popular project within Scenarios 2 but concerns were raised regarding the redundancy of the project since the Orange Line easily connects to the Downtown from El Cajon
3. Since projects related to the El Cajon community are in both Scenario 1 and Scenario 2, the strongest distinct is once again, the pushed for expressed trolley.

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario?

Originally, the IRC intended to use the scorecard in our workshop but unfortunately, due to time limitation, the IRC was not able to present the scorecard to workshop participants. IRC staff determined that it was much more pertinent to get the input on the projects within the scenarios.

Identify your top 10 projects identified as priorities by your participants

1. Orange Line Express from El Cajon to San Diego International Airport
2. El Cajon Transit Center to Downtown via SR-94 freeway
3. Express bus from El Cajon to UCSD via Santee, SR 52 freeway, and I-805 freeway

Is there anything else we should know that came up during your discussions?

Other concerns raised were the potential to increase fare prices, since many clients already feels that the cost of using public transit is currently too expensive. Furthermore, many still prefer to drive, rather than use the bus/trolley because they feel that they have to plan their days around public transit, which can be stressful. If buses/trolleys were always on time, if there were not long wait times and better frequencies, many would utilize the transit system since this is how they travel around their

Combined Input Worksheet

General Information

CBO: Jacobs Center for Neighborhood Innovation

Workshop Date: 8/12/14

Workshop Location: JCNI, Chollas View Room, 404 Euclid Ave., San Diego, CA 92114

Number of Participants: 18

Number of limited English proficiency participants: 0

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. The Express Trolley from El Cajon to Airport would be great for Southeast SD especially since one of the stops can be in this neighborhood - possibly Market St. This will bring more people to the neighborhood and we can get to downtown SD faster.
2. Expands Mass Transit by 2050.
3. It includes a variety of transportation options by 2050.
4. Expands Managed Lanes on 94.
5. The idea that more accessible transportation will create a culture of awareness on where we can go on public transit.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. Cost savings, fewer people driving, smog decreases.
2. Expands transit services in the area - diverse options for travels including rapid bus.
- 3.
- 4.
- 5.
- 6.

- 7.
- 8.
- 9.
- 10.

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario?

Yes - areas of focus:

- Economic prosperity
- Travel times
- Cost to user
- Destination access
- System safety
- Environment

Identify your top 10 projects identified as priorities by your participants

1. Express trolley from El Cajon to airport - should include a stop in southeast San Diego to create money, business and jobs.
2. Express buses to connect to SDSU, downtown SD
3. 2 ML on 95 fwy
4. Transportation hub in S.E. San Diego
5. Bike station/bikes share
6. Improved connections and strengthening current routes we will cut travel times

Is there anything else we should know that came up during your discussions?

- “These decisions are already made! SANDAG is just collecting this information for them to meet their requirements by law.”
- “This plan is designed for middle-class and wealthy people. People with good jobs like the ones in Sorrento Valley and La Jolla. We do not have those jobs!”
- “All of these projects do not affect us directly. It is for other people to get to where they are going not for me.”
- Develop bike sharing program in Southeast San Diego.
- We need incentives to want to use the public transportation system especially for those who already have a car to move around in.

- We need to accelerate these plans...2050 is too long to implement some of the solutions to the traffic problems we have now.
- The changes to the transportation system have to benefit Southeast San Diego somehow.

Please remember to turn in:

- Sign-in sheets (originals or scans)
- Comment cards (originals or scans) and Excel table

Combined Input Worksheet

General Information

CBO: Jacobs Center for Neighborhood Innovation

Workshop Date: 8/13/14

Workshop Location: Jacobs Center for Neighborhood Innovation

Number of Participants: 10

Number of limited English proficiency participants: 8

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. Relieves traffic congestion on the freeways
2. The Express trolley will pass through our neighborhood and can make it faster for us to get to downtown SD
3. More people would be interested in using the trolley in this scenario because it would be much faster
4. People traveling from El Cajon to the Airport could choose to stop here to buy food or snacks especially if there is a transportation hub on the express trolley line here.
5. Express trolleys will take more people off of the freeways and get them to take public transit.
- 6.
- 7.
- 8.
- 9.
- 10.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. This scenario will extend services much further. It creates more connections that can help us go different places faster.
2. There will be more options for transportation - I can use the trolley and the buses in combination especially if they are times right so I do not have to wait so long for either.
3. This scenario is more helpful to those of us who do not have cars.
4. This scenario will help get people out of their cars and using the trolley and buses especially if it is less time or easier to use it.
5. This scenario will bring more tourism and make it easy for the tourists to travel around the entire city. Maybe they can even come to Southeast San Diego.
6. More buses that connect me to the places that I need to go. I can get to the doctor faster, the mall, the schools, and offices to do business. Maybe now I can get a better job that I can get to faster.
7. Buses get you to more places than the trolleys.
8. The scenario makes it easier to get around so future generations will not need to buy cars only to get around.
- 9.
- 10.

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario?

The most important areas of focus were:

Travel times and easier connections to a variety of locations throughout the county.

Identify your top 10 projects identified as priorities by your participants

1. More rapid and express buses
2. Express trolley from El Cajon to Downtown and from San Ysidro to Downtown.
3. Express bus to Kearney Mesa
- 4.
- 5.

- 6.
- 7.
- 8.
- 9.
- 10.

Is there anything else we should know that came up during your discussions?

- Will a plan like this make travelling on public transit more accessible?
- People are disillusioned with the plan because it brings very few new things to Southeastern San Diego - most of the impact (benefit) will be to suburban communities and communities with higher income jobs. Quote: "This plan is for the wealthy people not for us. This plan build roads for people to get to the job centers where you need higher education. So many of our people do not have jobs there so what is the point of having transportation there."
- Lots of concern about short-distance travel from southeast to downtown because that is where local people work. The current routes take too long and trolley is expensive.
- People felt that there is no point to this discussion because SANDAG has already decided what it is going to build and it is not for the people in this community.
- Job growth will focus along the 15fwy but little is being done to accommodate that job growth.
- Market trolley can be a transit hub since there is so many things already there - library, stores, park, etc.
- Roads need to be more bike accessible and be safer to walk.

Please remember to turn in:

- Sign-in sheets (originals or scans)
- Comment cards (originals or scans) and Excel table

Combined Input Worksheet

General Information

CBO: OPERATION SAMAHAN, INC.

Workshop Date: AUGUST 13, 2014

Workshop Location: 1428 HIGHLAND AVENUE, NATIONAL CITY, CA 91950

Number of Participants: 16

Number of limited English proficiency participants:

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. A stronger trolley system will benefit many of the residents who use the trolley to commute to work particularly in the Northern region.
2. Less traffic.
3. Less accidents.
4. A cleaner system. Easier to do.
5. Less dependence on freeway improvements.
6. Less stops and less transfer.
7. Regional connectivity in less time: particularly, South to North regions.
- 8.
- 9.
- 10.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. More coverage in terms of geographic reach.

2. More accessible especially for those who do not have cars. With a trolley system, one needs a car to get to the trolley system unless there is a bus depot nearby that connects with the trolley.
3. Will have less stops.
4. Will have better schedules and options.
5. The BUS RAPD TRANSIT (BRT) will allow us to travel and reach our destination in less time.
- 6.
- 7.
- 8.
- 9.
- 10.

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario? NO

Identify your top 10 projects identified as priorities by your participants

1. Trolley system by Highland Avenue
2. Safer and more bike lanes in National City
3. UCSD trolley project
4. Mobility hub in National City
5. Improve existing bus system in National City especially, resuming Sunday bus schedule to enable the seniors to go to church.
6. Need sheds in several bus stops for safety during rain.
7. Need cleaner buses.
- 8.
- 9.

Is there anything else we should know that came up during your discussions?

1. The group would like to have a scenario that's community-focused. National City and the South Bay are often overlooked in planning. They would like an efficient local bus system in National City which would enable them to go places at minimum cost and time.
2. The community wants to re-direct funds away from freeway improvements and expansions. Instead, focus on the community particularly low-income communities who are heavily impacted by transportation and the lack of.
3. Improve the current bus system which includes providing sheds on all bus stops, dependable schedule, more bus routes, reinstate buses on Sundays, cleaner buses, providing drinking fountain at bus stops, bathrooms at trolley stations, more connectivity between trolleys and buses.
4. They also want a better way to present the scenarios. Use videos rather than power-point.

Combined Input Worksheet

General Information

CBO: Vista Community Clinic

Workshop Date: August 8, 2014

Workshop Location: 1000 Vale Terrace, Vista CA 92084

Number of Participants: 32

Number of limited English proficiency participants: 0

Demographics:

- Thirty-two people participated, but only twenty-four signed on the sign in sheet.
- Thirty-two Community Input Worksheets and thirty-two surveys were collected
- Demographic Survey Summary:
 - 25 female; 6 male; 1 no answer
 - 22 Hispanic; 5 White; 2 Asian/Pacific Islander; 1 African American; 2 no answer
 - 0 with disabilities
 - 23 under 40; 9 over 40
 - 4 income under \$22,050; 27 income over \$22,050; 1 no answer
 - 27 primary language at home English; 8 Spanish; 3 English/Spanish; 1 Tagalog

Inter-Active Board Activities:

How Do I commute?

- It was identified that all participants are single drivers except one who carools

How far is my work from home?

- It was identified that most participants live between a zero to 15 mile ratio; a few live between 16 to 35 and only two participants live between 46 and 60.

How long is my commute?

- It was identified that commute for most participants is between five to 15 minutes; for a few is 20 to 30 and for four participants is between 40 to 60 minutes.

What's my walk score?

- Scores range from 1 to 88

Where is a good place for mobility hub?

- Oceanside Transit Center
- Escondido near Dixon Lake
- Escondido Transit Center

- Near universities or large colleges
- Palomar Airport and Melrose Dr.
- Encinitas Coaster Station
- Near Tri-City Medical Center
- Near to Mira Costa College and other large hospitals
- Close to Vista Community Clinic

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Staff did not facilitate group discussions.

- Please note that this workshop followed the format of SANDAG's workshop hosted at CALTRANS on August 4, 2014.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

Please note that the following information is based on the Community Input Worksheets' information.

1. The idea of reducing traffic at the border and crossing time by enhancing and expanding the rail system; although participants stated they do not live near the border, they stated it will be beneficial for people who live close to the border.
2. Managed lanes on 78; however, they showed concerns. They stated they do not want the single rider lanes to be taken away to insert managed lanes.
3. Participants stated Scenario 1 do not address entire County.
4. Downtown San Diego has many public transportation options already.
5. It does not impact North County.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. Scenario addresses county as a whole
2. Rapid buses and frequency in addition to adding a route from Chula Vista to Carlsbad
3. Managed lanes on I-5 and 78
4. It focuses more on North County
5. Cost of bus passes: it should be affordable

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario? No, there are no differences on the performance measures.

Identify your top 10 projects identified as priorities by your participants

1. Rail system enhancements
2. Rapid bus and bus rapid system
3. Enhancements on the hwy 78, I-5, 805

Is there anything else we should know that came up during your discussions?

N/A

Please remember to turn in:

- Sign-in sheets (originals or scans)
- Comment cards (originals or scans) and Excel table
 - Please transfer all comment card contents into the Excel table in English
- Workshop photos

Combined Input Worksheet

General Information

CBO: Vista Community Clinic

Workshop Date: August 14, 2014

Workshop Location*: Carlsbad Safety Center, 2560 Orion Way, Carlsbad, CA 92010

*this was a presentation at the monthly meeting of the North Coastal Prevention Coalition. We did not have time for the full workshop process, but we shared the voiceover presentation on the San Diego Forward website and had a discussion about implications of proposed scenarios. Members were encouraged to follow up independently and provide input on the San Diego Forward website and/or to attend the workshop sponsored by ARS later that morning.

Number of Participants: 23

Number of limited English proficiency participants: 0

Demographics:

- **Twenty-three people participated**
- **Demographic Survey Summary:**
 - 16 female; 7 male
 - 19 White; 1 African American; 3 Hispanic
 - 0 with disabilities
 - 6 under 40; 17 over 40
 - 20 primary language at home English; 3 English/Spanish

Inter-Active Board Activities:

Interactive activities were not conducted due to time constraints.

Network Scenarios:

The mission of the North Coastal Prevention Coalition is to reduce the harm of alcohol, tobacco, marijuana and other drugs in the cities of Carlsbad, Oceanside and Vista through community action, education, support and collaboration.

Because of this, members did not discuss the network scenarios specifically, but ended up discussing how the proposed plans would impact NCPC's mission in the future.

Is there anything else we should know that came up during your discussions?

- Will there be any specific requirements/discussion to address billboard/signage, advertising, alcohol marketing, drinking and driving.
- Improved public transportation will enable more people without cars to get to treatment centers. Also students to get to continuation schools.
- Increased public transportation might reduce drinking and driving problems because there will be other public transportation options than driving a car.
- Big issue for the county's transportation system is smart growth. With increased and improved public transportation, there will be more people where we already have development along with new and expanding development. What about responsible alcohol consumption? With expanded development and more people, there will be more demand for services (i.e. bars, restaurants, breweries). We need to be sure that land use, policy, and zoning rules for these types of use are enforced. Some of these issues (residents complaining about customers getting out of the bars and causing problems), may need to be addressed at a local level, collaboration with local leaders.
- Need to work on public policies, i.e. reducing underage drinking on the Coaster. It was reported that there have been incidences of minors drinking on the Coaster; they are using the Coaster to attend College Nights at Padres games (some of these youth are siblings of college students and are meeting their siblings at the games). Fighting has also been witnessed on the train as these youth return from the games. There needs to be strong policies in place to prevent this from happening.

Please remember to turn in:

- Sign-in sheets (originals or scans) - we did not collect a separate SANDAG sign-in sheet at this meeting. NCPC sign-in sheet will be scanned fyi.
- Comment cards (originals or scans) and Excel table
 - We did not have time for comment cards. Encouraged members to complete input online or at ARS workshop.
- Workshop photos - we did not take photos since this was a presentation and not a full workshop.
- Photos of all flip chart notes and activity boards - we did not have time for interactive activities or small group discussion.

Combined Input Worksheet

General Information

CBO: Vista Community Clinic

Workshop Date: August 18, 2014 from 6:00 to 8:00 PM

Workshop Location: Iglesia Discipulos de Cristo, 305 W California St., Vista CA

Number of Participants: 19

Number of limited English proficiency participants: 19 - Workshop was conducted in Spanish

Demographics:

- Nineteen people participated,
- Fourteen Community Input Worksheets and seventeen surveys were collected
- Demographic Survey Summary:
 - 11 female; 5 male; 1 no answer
 - 16 Hispanic; 1 Oaxaqueño
 - 14 with no disabilities; 2 with disabilities; 1 no answer
 - 9 under 40; 8 over 40
 - 12 income under \$22,050; 3 income over \$22,050; 2 no answer
 - 14 primary language at home Spanish; 1 English; 2 English/Spanish

Inter-Active Board Activities:

How Do I commute?

- It was identified that participants use different modes to commute: they walk, carpool, drive, use the bus and Sprinter

How far is my work from home?

- It was identified that about half of the participants live between a zero to 5 miles; another half live between 6 to 35 miles.

How long is my commute?

- It was identified that commute time for half of the participants is between 10 to 30 minutes; and between 45 to 60 minutes for the other half.

What's my walk score?

- Scores ranged from 43 to 56

Where is a good place for mobility hub?

- Melrose in Vista
- Vista Transit Center
- Oceanside Transit Center/Close to the beach
- At Courthouse in Vista

- Vista Civic Center
- Palomar College in San Marcos
- Aldama Park in Carlsbad (*note: written by participant but unsure of existence*)

PART 1: Network Scenarios

Please review your flip chart notes from each discussion group.

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 1:

1. Rail system will reduce road, freeway congestion, and air pollution, but projects should be implemented sooner. Thirty-five years is too long. Projects should be reviewed and updated. These projects will benefit people without cars, so should be built sooner. Expansion of Sprinter from Escondido to North County Fair should be a priority.
2. Coaster and Sprinter double tracking might reduce congestion on the freeway. There might not be a need to expand the freeways in the future. There might be some savings.
3. Rail system will attract tourists. They won't have to worry about renting a car when they visit San Diego.
4. 2 managed lanes on SR 78 by 2035

Develop up to 10 bullet points that encapsulate the discussion of all groups on the benefits of Scenario 2:

1. Rapid bus is efficient. "I use the rapid bus from Escondido to San Diego and I like it, it is fast."
2. Bus will reach more people since it will go to more neighborhoods
3. Bus form Chula Vista to Carlsbad
4. Rapid bus from Escondido to Riverside

PART 2:

After looking at the Performance Measures Scorecard, did the feelings of your participants change about either scenario? NO

Identify your top 10 projects identified as priorities by your participants

1. Double tracking of Sprinter and Coaster and expansion of the Sprinter. These projects should be a priority
2. Frequency and affordability.
3. Managed lanes on the 78 to be accomplished by 2020

Is there anything else we should know that came up during your discussions?

Yes

- There is no balance on the Scenarios. Most projects are concentrated in the South. There is a need for a better transportation system in North County. Projects like double tracking of Sprinter and Coaster should be a priority and accomplished sooner; “for people like us who depend of public transportation thirty-five years is too long.”
- Four managed lanes should be part of Scenario 1 and accomplished by 2020 or sooner.
- There should be an implementation of an underground system. San Diego is a prosperous city, but maybe unable to be compared with other cities because of its insufficient public transportation system.
- The system should be efficient and affordable to encourage everyone to use it. “The Coaster is very expensive and not convenient on these days.” Future public transportation system should prove that it is better than driving, so that drivers may switch from driving to using public transportation
- The rail transportation System should be efficient. Frequency and affordability should be a priority.
- There should be special programs for students, seniors and low-income families

Able-Disabled Advocacy

Fiscal Year 2015

Community-Based Outreach Services

Final Report

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings from your communities, articulating both current and future concerns and desirable outcomes.

Able-Disabled Advocacy's (A-DA) Community-Based Outreach services for the Regional Plan reached a diverse section of people who are challenged by all types of disabilities. During this process, we continued to review SANDAG's "SDForward, The Regional Plan" and improve upon our outreach strategies and distribution materials. We promoted the outreach program as a unique opportunity for participants to personally contribute input into our region's planning process. Furthermore, their participation served to educate them on how the Regional Plan was developed. We realized from our previous experiences in conducting outreach activities for SANDAG that many of the issues that affect low-income individuals, seniors and minority populations are similar to the challenges faced by people with disabilities. They often rely on a variety of transportation modes i.e., private transportation services, a family member and/or caregiver and public transit. However, under the current system, people with disabilities still face many obstacles to travel including the high cost of private transportation services, which are more frequently used by them because they feel that there are not enough public transit options, due mostly to accessibility issues.

In general, the Regional Plan addressed many of our participants' concerns and most were supportive of the Final Scenario presented. However, they did suggest that further investments be made in improving transit along current corridors with high use, including the Rapid system and Trolley lines.

A major issue of concern expressed by participants was improving public restroom facilities at new and existing transit stations. There are people with disabilities, as well as seniors, who need to use restroom facilities more frequently than other individuals, often due to medical reasons. Currently, there is a lack of accessible restroom facilities at transit stops, which

prevents many from being able to use the public transit system for daily living purposes, education and employment. Providing more public restroom facilities near or at transit stations would allow many more people with a disability healthy access to transit system services.

Our workshop participants expressed that safety was another significant issue. Currently, those who use the Blue Line and adjacent bus services commented on what they perceived to be unsafe overcrowding conditions on board, which often deterred people with disabilities from using public transit. Also, many adult and youth participants stated that they had not recently travelled by bus because of the unsafe environment at stations and the potential for violence on board. Though law enforcement is not a part of the scope of the Regional Plan, SANDAG should be strongly encouraged to seek out technologies that can be incorporated into the system to better monitor for public safety disturbances by incorporating features that would create a safer environment and by designing new transit facilities with public safety in mind.

There was a mixed response to the plans for expanding the bicycle network. Though many supported its early implementation, there was concern as to the design specifics of these new trails related to safety issues. Though cycling is often not an option for those with mobility impairments, it is often an option for others i.e. youth with learning disabilities and those with non-mobility challenges as it is the least expensive mode of transportation. Ensuring safe routes that are appropriately separated from automobile traffic and providing more secured docking stations for bicycles will encourage more widespread use.

Over the course of this project, many of the initial issues that were brought forth by people with disabilities concerned negative personal interactions with transit staff and the lack of physical accommodations on the buses themselves. Some felt that there is a general lack of sensitivity to disability issues on the part of the drivers; and the buses are unable to accommodate more than a few people with mobility challenges who may need wheelchair access. Those who have a hearing or vision disability also struggle in navigating the current

system. While SANDAG and The Regional Plan may not deal with personnel issues nor disability sensitivity training specifically, other investments into the system can be made to minimize these problems. In the Regional Plan appendixes, technological improvements to the system are further detailed and may provide remedies. Participants would like to see a Regional Plan that incorporates technology that will provide the user with as much information as possible without them having to directly interact with bus drivers or other transit workers. In addition, with the wide-spread use of mobile devices, which can potentially encourage the use of public transit, participants felt that users should have the same access to amenities that are available to those who use cars, such as charging outlets for technology devices. Something as simple as including charging outlets for phones and other devices would greatly improve the user experience and allow travelers to take advantage of mobile technology offered within the system.

Overall, A-DA was encouraged by our participant's level of interest in how our region will grow in the future and by the work that is being done by SANDAG to ensure that all geographic areas of San Diego will benefit from our growth. However, there is a general feeling that more needs to be done to ensure equal access for individuals with disabilities during future planning activities.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

A-DA's outreach focused on introducing SANDAG, the Coordinated Plan and the concept of the Regional Plan to youth, adults and Veterans with disabilities, along with conducting outreach to the organizations who work with them. Our efforts solicited input from various low-income demographic groups that included all ages, ethnicities, genders, geographic residences and disability groups, i.e. the Blind, hearing impaired and those with mobility, mental health, PTSD, developmental, learning and other challenges. Workshop presentations included the following

venues: Able-Disabled Advocacy’s adult program participants, YouthBuild students and homeless and recently seperated Veterans participating in A-DA’s VetWORKS program; the National Federation of the Blind; ARC of San Diego; Xcite Steps; the Blind Community Center; and the San Diego Brain Injury Foundation. Between 10 to 30 individuals attended each of the eight (8) workshops. Using information from meetings conducted, we collected a wide range of comments, opinions and notes from each venue to present to SANDAG for consideration. A-DA also offered e-mail updates and notices for A-DA clients and other associated organizations on the ongoing process for public input. We developed and maintained an e-mail list of over 200 A-DA clients and associated organizations for regular updates and notices on the ongoing process for public input for SANDAG. With the e-mails, we tracked responses through the “Mail Chimp” program, with a 15% – 30% open rate for each message. As a follow up, we asked the organizations to include information on the Regional Plan in updates and/or newsletters to their clients as new phases of the process were implemented. Based on previous experiences, we found that some individuals had difficulty attending workshops or other presentations so we provided them with easy to navigate links that enabled them to give on-line input. SANDAG also created a much more user friendly interface on the www.sdforward.com website. This allowed us to reach an audience that may have had barriers to transportation to attend one of our presentations or workshops.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

A-DA was able to engage a large section of the San Diego disability community in our outreach efforts for SANDAG. With support and materials provided by SANDAG, we were able to provide extensive project information to participants on the Final Scenario of the Regional Plan. The PowerPoint presentations, videos, website and supporting materials provided by SANDAG were thorough in content and representative of the large geographic area that we covered. During the workshops, A-DA presented a regional overview of the planning process including information on the Final Scenario of the Regional Plan. For the Final Scenario of the Regional

Plan, we conducted two workshops with a total of 49 participants in attendance and 22 comment cards collected. SANDAG provided a great number of resources from which we could choose to engage participants. The “Map Puzzles” were especially helpful in encouraging our participants to engage in discussion during the workshops. We used the Regional Plan’s poster map of the transportation network to effectively give a visual overview of the network. We also used the “Hub” diagram poster from the last round of workshops to help give a visual overview of the new facilities being planned. We felt that we were successful in communicating information from SANDAG and in providing further on-line resources for participants to gain additional information. We increased the number and frequency of on-line updates regarding the process and utilized the on-line comment forms to collect data for the final report. A-DA’s use of an expanded e-mail database further enabled us to outreach to those with accessibility limitations and allowed for the inclusion of our materials in the newsletters and various communications of other organizations.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

In reflection, the follow-up CBO meetings served as sounding boards to identify “Best Practices” and “Lessons Learned” for the inclusion of the disabled community in planning efforts. While the Regional Plan does contain extensive detail on the transportation network’s geographic improvements, along with materials geared towards the interests of minority groups, there was limited information for those with disabilities. It would be helpful if future information developed contain more extensive information on disability improvements to the system. During the next regional planning process, SANDAG should specifically address disability issues and create relevant support materials that better identify how the Plan will affect individuals with various types of disabilities. A-DA would welcome the opportunity to work in concert with SANDAG to develop these materials.

According to the U.S. Census Bureau, roughly 17% of San Diegans have a disability; and the U.S. Department of Veterans Affairs reports that San Diego ranks first in the nation in the number of disabled Veterans, along with the highest count of returning Veterans – many of whom will exit military service in San Diego with service-connected disabilities. Disability covers a wide range of categories and may well include a much larger percentage of the population than is documented. Many more people will experience disability at some point in their lives.

The California Workforce Investment Board recently reported that only 18% of Californians with disabilities are employed, which translates into an 82% unemployment rate – the highest of any demographic group! From four decades of providing workforce development services for youth and adults with disabilities, A-DA has found that the lack of adequate transportation is often the greatest barrier to their employment. It is imperative that there is equal access to the transit system for all San Diego residents.

A-DA thanks SANDAG for affording us the opportunity to provide input on the Regional Plan on behalf of San Diego's citizens with disabilities.

Alliance for Regional Solutions

Fiscal Year 2015

Community-based Outreach Services

Task 5: Final Report

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings from your communities, articulating both current and future concerns and desirable outcomes.

Alternative Transportation Scenarios

We had a workshop for our Alliance membership on August 14, 2014. Our members work with many of the Communities of Concern in North County San Diego. It was right after our General Meeting so we were able to get most of our members to stay for the Alternative Transportation Scenario workshop. We had 25-30 members attend as well as a local reporter who wrote an article on the workshop. We were able to explain the differences between the two scenarios and most of the attendees agreed that the best scenario would be a cross between both. Most of the attendees were concerned about the lack of public transportation in North County and that a more widespread network was needed as in Scenario 2. Scenario 1 offered managed lanes being implemented along the 78 sooner and this is a very big concern for North County. The congestion and traffic along the 78 is a huge problem for those commuting along this freeway. The biggest frustration was that the majority of money and implementation will come between 2036-2050 which means many of these changes aren't coming for another 20+ years. One of the biggest barriers for the workshop attendees' clients are ways to get to work. This definitely limits their ability to get jobs.

Preferred Transportation Network

We met with two different groups to share the preferred transportation network in January 2015. The first group was our leadership board for the Alliance and the second was our North County Works committee. *(The purpose of North County Works is to identify and reduce barriers faced by the underemployed and unemployed living in North San Diego County by improving the connections between employment opportunities, job referral organizations and those seeking work.)*

Both groups liked that the plan had managed lanes for the SR 78 coming towards the beginning of the plan rather than the end. They also liked more peak service and rapid routes at some of the most used parts of North County.

Both groups still have concerns about accessibility to public transportation for North County residents and particularly the communities of concern. While the improvements are good, North County needs more routes, etc. to give this community the ability to move around San Diego County as needed.

Draft Plan for San Diego Forward

We held three workshops to present the Draft Plan. The first group consisted of Alliance members and the last two workshops were clients at Interfaith Community Services.

The group's top positive feedback about the plan:

- The regional bike plan
- The high speed rail will give San Diego residents more access to affordable housing without leaving their jobs.
- Improvements to the 78 (managed lanes)
- Better access to the airport
- The Mobility Hubs
- Increased jobs in the region

The group's top concerns were:

- The rural areas like Ramona and Valley Center are still lacking good public transportation.
- The pricing of transportation was not mentioned. This is a huge concern for the communities of concern.
- More bus lines/rapid transit are needed in North County.
- Better understanding of the environmental impact on the County.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

We reached out to our Alliance for Regional Solutions membership for much of our outreach. The members that came to the workshops were people that had concerns about the future of transportation and how it would impact North County and the populations that they serve. The level of engagement was good with this group. Most had concerns specifically about public transportation in North County because it is not as easily accessible as other parts of the County. They were hopeful that the plan would be heavy on public transportation improvements and less on highway improvements.

Most of the input that we received came from comment cards and open discussions.

We also reached out to clients of Interfaith Community Services. The level of engagement was more difficult because we weren't meeting with them regularly. Most groups I met with was a one-time meeting and San Diego Forward was a new concept for them. They were able to give input on the experiences that they have had with public transportation/highway in the past and they were able to tell us what they would like improved. Most of the comments were from comment cards and open discussion.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

I think that the Alliance for Regional Solutions were able to reach a good mix of people through our outreach plans. One disadvantage was that we didn't have a specific group that we were able to meet with over the course of the project. We met frequently with our Alliance membership but the participants were not always the same so we lost the consistency of a regular group.

For the most part, I think the materials were good. For groups that didn't have a concept of what the plan was all about, they got a little lost with the information and details. The videos and power point slides were the easiest and best ways to get the information out to the whole group. The interactive activities were really helpful getting people to engage with each other and to start conversations about transportation.

1. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

I think the toughest part of the project was the timelines we (CBOs) were given. Some of the biggest workshops we were assigned to give were in the summertime when our member meeting attendance is very low.

We were also not always given a lot of lead time for workshops so marketing was tough and attendance was not as large as we would have liked.

I think working with CBOs that have particular groups that meet on a regular basis is the best way to get input. The participants will be knowledgeable about the plan and then the workshops won't be spent explaining what SANDAG is and what they do.

BAME Community Development Corporation

**Fiscal Year 2015
Task 5: Final Report**

Community-based Outreach Services

Task5: Final Report- BAME Community Development Corporation

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings from your communities, articulating both current and future concerns and desirable outcomes.

BAME CDC staff has been involved in many community outreach discussions with residents of Greater Logan Heights regarding all phases of the Regional Plan, from the Alternative Transportation Scenario to SD Forward. BAME CDC staff talked to the Logan Heights Library Teen Council, residents of Mercado Apartments, Logan Heights Branch Library participants, community members who attended workshops, and the many community members who attended Juneteenth and the Sherman Heights Music Festival. The level of community engagement was also reached through phone calls, text messages and flier distribution in the community.

Alternative Transportation Scenarios

In April (2014) we began doing outreach for the Alternative Transportation scenarios. On May 7th, 2014 we met with the Logan Heights Library Teen Council and we had a total of 14 participants. The teen council touched on their methods of transportation, predominantly public transit, and expressed the waiting time to get from one place to the next is long. On May 21st, 2014 we reached out to residents of Mercado Apartments and parents from Barrio Logan Heights College Institute (BLCI). We had a small turnout but great feedback from community members that reside there. The participants were concerned that senior citizens' mobility is not taken into consideration in

transportation planning. Like the Teen Council, the participants believe that there should be shorter weekend wait times for trolleys and better all-around public transportation. BLCI parents focused on better transportation to North County as well as more frequent buses and trolleys.

On June 21, 2014, BAME CDC conducted community outreach to attendees of both the Juneteenth Celebration on Imperial Avenue and the Sherman Heights Music Festival. This was a great opportunity for outreach because these celebrations catered primarily to the African-American and Latino population, respectively, which are the primary populations in Greater Logan Heights. With the help of Monique Lopez of the Environmental Health Coalition (EHC), BAME CDC asked residents to express their priorities regarding future transportation projects that should receive funding within the next 10 years. We created a display board that showed pictures of three types of transportation investments: Highway Expansion, Improved Public Transit Network, & Pedestrian and Bicyclist Improvements. In front of each of these pictures, we placed glass jars. We gave participants 10 beans each and asked them to deposit their beans in the jars according to their preference for where funding should be allocated (in the near future). We estimate that 150 people participated in this activity throughout the course of the day (at both events). These are the approximate results:

- Highway Expansion: 100 beans
- Improved Public Transit Network: 500 beans
- Pedestrian and Bicyclist Improvement: 700 beans

On July 23, 2014 approximately 30 residents and stakeholders of the Greater Logan Heights neighborhoods participated in the community forum on transportation organized by BAME CDC and EHC. As people entered they were instructed to participate in an interactive mapping activity which plotted people's modes of transportation and commute times for a variety of different destinations, including work, school, errands, church, leisure activities, and visiting family/friends.

We also conducted an introduction regarding SANDAG and regional transportation planning, including explanations of the San Diego Forward plan, TransNet, and smart growth. We then divided the participants into three groups for a facilitated small group discussion in which they were asked to talk about their current experiences with transportation and ways they believe it could be improved. We made audio recordings of these conversations as well as took written notes. Each group chose a representative to present concerns and recommendations to the larger group (notes below). We then defined transportation equity and gave a brief overview of some of the freeway, transit, and bike infrastructure projects that are being proposed by SANDAG and the Community Planning Group which will impact the Greater Logan Heights neighborhoods. We explained what freeway expansion could look like, distinctions between rapid buses and light rails, and the difference between Class 1, 2, 3 and bike lanes.

We then revealed results of our community outreach using the beans activity to determine community priorities. We polled the room and saw that their priorities matched our findings: more interest in money going toward better transit and bike and pedestrian infrastructure (before freeway expansion). Here we summarize the similar finding the three different groups found:

- Need a bus route from Golden Hill to Barrio Logan
- Better lighting/ cleanliness on pedestrian bridges over/under freeways
- More efficient/faster transit → create apps to help navigate the system (technology)
- Market street (and neighboring streets) need to be CLEAN to make walking more enjoyable/safe
- Better bike lanes (safer routes)
- Bridging neighborhoods (north/south along 30th)
- Improvements on roads, streets, sidewalks
- Stray dogs problem → animal control
- Crosswalks on major streets
- Bus/trolley schedule extended (weekends)
- Bus doesn't run often at night
- Bus/trolley connection
- Trolley/buses transportation costs are too high

Preferred Transportation Network

BAME CDC staff met with community members on August 20th, 2014 at Logan Heights Branch Library to discuss the preferred transportation scenarios. We discussed each scenario and looked at both the positives and the negatives of each scenario. Participants emphasized the importance of reduction in travel time, reduction in greenhouse gas emissions (GHG) and safety in the form of cameras and lighting (both on transit itself and on the way to transit). There were questions about whether or not Bus Rapid Transit (BRT) will contribute to GHG emissions. Participants also said it's important to consider the impact that big

construction/developments have on dense neighborhoods. They also talked about the importance of ensuring safety measures in the building process, and ensuring that the construction provides more jobs to the local residents. Participants did not feel that either scenarios were representative of their needs in order to commute to and from places. They expressed strong interest in a third network scenario that phases all transit, bike/pedestrian projects FIRST before any highway projects. They called this Plan C.

Draft Plan for San Diego Forward

In Spring 2015 we met with parents at several Parent-Teacher Organizations (PTO). BAME CDC staff did presentations about the Regional Transportation Plan (RTP) and Safe Routes to School at **three local schools**: Logan Elementary, King Chavez Primary, and King Chavez Prep.

On April 16th, 2015 we conducted the Language Assistant Plan (LAP) Focus Group. We had a total of 6 participants from the community, all Spanish speakers except for one. In this focus group we discussed issues/problems and concerns that they had due to language barriers they face and their modes of transportation. The LAP Focus group would like to see one comprehensive booklet with most bus and trolley stops and frequencies available to them in various languages. They have been concerned that in buses they frequent there is not as much information as there is at trolleys stops. The group focused on having a better/faster trolley and bus lines. They mentioned there is no or very little information about routes and stops. They would like to see some sort of map available at bus stops, similar to those found at the trolleys. They mentioned this would be helpful because when they ask bus drivers about what other bus routes they should take the bus drivers do not know and have not been helpful to them. Participants noticed that the text messaging system for bus schedules is not reliable. It was hard to keep them focused on language assistance because they also wanted to focus on the discrimination they have received over the years from bus drivers and trolley officers. Cultural competency was a big concern for this focus group.

On May 21st, 2015 BAME CDC staff had a presentation on SD Forward with community members at the San Diego Police Department. Participants were happy to participate and learn about the new transportation plan. They like that the ecosystem is being well protected in the plan and they believe that once the whole plan is implemented transportation will be better. We heard similar comments to the ones we had previously heard about the discrimination they have faced with bus drivers, trolley police, and MTS staff overall.

Overall community residents also expressed feeling discouraged to participate in the process because some of the project requests, specifically those related to better and faster development of transit and bike/walk infrastructure are not being advanced in the network scenarios. Further concerns and outcomes voiced by the community were expressed throughout the development of the existing plan. More often than not participants were unhappy with bus drivers and MTS staff in general. For example, in our (LAP) Focus group it was shared with great concern that they had experienced racism and general disrespect at the hands of bus drivers and other MTS staff. These similar comments and concerns were found in a later SD Forward Plan update done by BAME CDC staff. One specific concern shared is the aggressive restraint and enforcement by Transit Enforcement Officers at trolley stops. Many community members agreed that overall staff in any public transportation should be retrained to be more culturally competent. Community members expressed interest in having increased bus and trolley stops on weekends as well as earlier pickups and later drop-offs during the week. Lastly, throughout BAME CDC interactions with community members we learned that the elderly feel

underrepresented in the implementation of SD Forward plans and discriminated against while boarding public transportation.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

BAME CDC staff initially reached out to the Logan Heights Library Teen Council, residents of Mercado Apartments, and Barrio Logan College Institute parents. The level of participation from these groups was instrumental. From these initial conversations with residents we had numerous stories detailing 2-hour bus commutes to Clairemont Mesa, frequent pedestrian and bicyclist collisions on Market Street, and fear of walking to the bus and trolley stops due to insufficient lighting and uneven pavement.

Our outreach showed us that community members who gave their input are most interested in seeing transportation funding go toward improved public transit network & pedestrian and bicyclist improvements. We attended the Mid-City CAN Regional Transportation Equity Summit to discuss better ways to conceptualize and advocate for equitable regional transportation planning. BAME CDC staff participated at SANDAG Transportation Committee Meeting (along with other organizations) to provide input on the proposed Alternative Network Scenarios. We also participated in a collaborative meeting with transportation justice advocates to develop a set of policy recommendations for SANDAG to incorporate into the RTP. In early October BAME CDC staff met with council member David Alvarez and Circulate San Diego to discuss Vision Zero Campaign. BAME CDC staff participated in a workshop/walk audit with Mark Fenton, an expert in working with community members to promote more safe and walkable neighborhoods and to effectively mobilize our community, city, and regional government to prioritize and promote walkability. We also attended a Vision Zero meeting with community partners to strategize ways to eliminate pedestrian and cyclist traffic fatalities and casualties. We will work with partners to identify dangerous corridors and advocate for City support on the Vision Zero campaign. This partnership expanded with Technical Assistance on a Safe Routes to School initiative. In order to expand on Safe Routes to School, BAME CDC staff did presentations on the RTP and Safe Routes to School at Parent Teacher Organization (PTO) Meetings at three local schools: Logan Elementary, King Chavez Primary, and King Chavez Preparatory. Parents were very interested in doing these walk audits and often expressed they wanted to see quick results in their neighborhoods. They had a hard time conceptualizing a long term regional plan.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

All forums and outreach events facilitated by BAME CDC staff were very successful in presenting the information provided by SANDAG on the development of the transportation plan. Community members' input has offered real helpful insight to what our community needs in regards to equitable transportation. All of the community members that have participated in our various community forums emphasized the need for better public transportation as a whole. They graciously gave us their time and commitment and valued commentary because they truly understand the need for regional transportation plan that connects their homes to their jobs and elsewhere. The frustration still felt today is that the plan SANDAG has selected does not reflect the values and needs of the residents of Logan Heights. As a very small organization we ran into some minor challenges in the beginning of transportation planning. In order to not overwhelm our residents with the information, one of the difficulties BAME CDC staff faced was explaining the nuances and details regarding each phase in a 10 minute pop-up conversation when it is usually 2 hour workshop. The fact sheets have been pretty helpful as well as other materials and ideas from other organizations in engaging community members.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

It would be beneficial to break down into simpler language for people not in environmental and transportation fields to make it easier to comprehend.

Linda Vista Collaborative

Fiscal Year 2014-15

Community-based Outreach Services

Task 5: Final Report

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings from your communities, articulating both current and future concerns and desirable outcomes.

The Linda Vista Collaborative (LVC), a forum for public deliberation among the stakeholders of Linda Vista, is a community-based organization (CBO) that proudly serves as the liaison between the Linda Vista community and SANDAG, specifically vis-à-vis the latter's San Diego Region Plan. The Collaborative promotes collaboration among its members with the goal of improving the quality of life of all its leaders, which is directly in line with SANDAG's efforts to improve transportation and mobility throughout the region, as well as the mission of the Collaborative's lead agency, Bayside Community Center, which empowers its diverse community through service, education, and advocacy. Below are the accomplishments and summaries of each phase: Alternative Transportation Scenarios, Preferred Transportation Network, and Draft Plan for San Diego Forward.

Alternative Transportation Scenarios

The following are Bayside's accomplishments in terms of Community-Based Outreach services for the Regional Plan's Alternative Transportation Scenarios:

- Linda Vista Collaborative support staff hosted Alternative Scenario Workshops on July 7 (Spanish), August 12 (Vietnamese), and August 19 (Spanish) at Bayside Community Center, reaching over 75 community members and gathering over 60 public comments on the scenarios.
- The main feedback gathered from the Vietnamese community included (1) that *all* travel times should be significantly reduced, (2) that both Scenarios 1 & 2 demonstrated significant travel time savings from the City of San Diego to other areas within San Diego County, created more jobs, and utilized technology to improve transportation, (3) that Scenario 1 connects neighborhoods more efficiently and better preserves the environment, and (4) that Scenario 2 gives residents more choices in transportation and provides more biking and walking alternatives.
- The main feedback gathered from the Spanish-speaking community included that (1) Scenario 1 offered faster transit and travel time, was more time and energy efficient, and was better for the environment, and (2) Scenario 2 allowed for more space availability for public transit lines to be created and for the transportation system to expand.

Preferred Transportation Network

The following are Bayside's accomplishments in terms of Community-Based Outreach services for the Regional Plan's Preferred Transportation Network:

- Linda Vista Collaborative support staff hosted or supported a number of events in March and April 2015 in preparation for the SD Forward Region Plan public comment period:
 - In March and April, 6 information sessions on the Plan were hosted to educate the public on the proposed changes laid out in the Draft. 3 sessions were hosted on March 31 and 3 more on April 24, each day with a 1-hour session in English, 1-hour in Spanish, and 1-hour in Vietnamese. 25 community members attended.
 - From April 6-April 23, 4 San Diego Forward: Regional Plan display boards made by LVC support staff were on display at the Linda Vista Public Library educating the public on changes under the Regional Plan, and how it'll affect housing, employment, the local economy, and beyond.

Draft Plan for San Diego Forward

The following are Bayside's accomplishments in terms of Community-Based Outreach services for the Regional Plan's Draft for San Diego Forward:

- Linda Vista Collaborative support staff hosted or supported a number of events in April, May, and June 2015 to gather public comment for the SD Forward Region Plan:
 - On April 25, Support Staff tabled information and did outreach at the Linda Vista Multicultural Fair re: information on the Regional Plan and Public Comment period. In addition to conversations with a number of Fair-goers on the Regional Plan, 87 surveys were collected asking, "What do you think about access to public transportation in Linda Vista?" 49% of respondents answered 'good;' 22% 'wonderful, excellent, great, awesome, or very good;' 7% 'okay;' 6% 'don't use or think about;' 3% 'more bus lines needed;' 3% 'more frequency needed;' 3% 'convenient or useful;' 2% 'fine;' 1% 'slow;' 1% 'not very good;' 1% 'dangerous;' and 1% 'Sunday service ends too early.' No other public comment collected.
 - On May 2, Support Staff hosted a Tecolote Canyon Clean Up Day at Bayside Community Center in conjunction with the University of San Diego's Alumni Association and Tecolote Canyon Nature Center. Event attendees totaled more than 30 participants, who engaged in discussion with Support Staff and Canyon Rangers about the importance of alternative uses of transportation (e.g. canyon biking, hiking, walking), preservation of green space (e.g. canyon, parks), and reductions in GHG emissions, all in line with SB 375 and the work the San Diego Forward: Regional Plan seeks to accomplish. No public comment collected.
 - On May 14, Support Staff recruited 4 Vietnamese community members to attend the Caltrans workshop at Caltrans District 11 building in Old Town, CA. Public comment focused on need to connect Point Loma and Kearny Mesa with Rapid Bus Route to expedite travel time for residents to get to and from doctors' appointments.

- On May 19, Linda Vista Collaborative supported the New Urban Film Festival hosted at the Linda Vista Public Library. Support Staff tabled information on Regional Plan and gathered public comment. More than 7 community members attended and 4 public comments gathered, all related to Chapter 2: A Strategy for Sustainability. Support for the Plan emerged around the use of interconnected hubs via Smart Growth, while cons of the Plan were suggestions that more bus routes and faster bus routes are needed, such as Rapid Bus Transit lines. Questions also emerged around sustainability of Plan and specifically the use of water to make Plan happen.
- On June 4 and June 11, Support Staff tabled at the Linda Vista Farmer’s Market, engaging with community members through use of the SANDAG-printed materials, display boards (both SANDAG and Support Staff-created boards), SANDAG puzzle, survey, and more. 23 public comments were collected, covering topics from Chapters 1-4 and General Comment. Just over half of all comments regarded Chapter 2: A Strategy for Sustainability (12 out of 23), just over one quarter regarded General Comment (6 of 23), a couple for Chapters 3 and 4 (2 of 23 each), and one comment for Chapter 1 (1 of 23). Many expressed their satisfaction with the Plan and the need for change, while others highlighted the need for even more buses and connections to all parts of San Diego County.
- On June 16 and June 23, Support Staff hosted their last Regional Plan events, with Game Night (Trivia and Bingo) on June 16 in Spanish/English, and on June 23 in Vietnamese. 25 community members attended in total, and 9 public comments were collected, although 4 of which (all from the Vietnamese event) were comments specific to the constituents’ satisfaction with the Game Night itself and the need for more fun events. The 5 comments from the Spanish/English event, however, all were General Comments expressing the need for more bike lanes, more buses, cheaper fares, and more responsible bus drivers, as well as general satisfaction with Regional Plan.
- From March to June, Support Staff presented updates on Preferred Transportation and San Diego Forward: Regional Plan to community on a regular basis at the following monthly meetings, by informing meeting attendees about Support Staff next steps with Plan Outreach, upcoming events, and timeline for SANDAG Board Draft approval and Public Comment: Linda Vista Resident Leaders in Action, Linda Vista Planning Group, Linda Vista Town Council, Linda Vista Collaborative, Linda Vista Rec. Council, and Live Well San Diego. Linda Vista Collaborative members, in particular, expressed their interest in learning more about Smart Growth and the potential to have a mobility hub and Smart Growth concept outside of the Linda Vista Public Library where Ulric St. and Coolidge St. intersect.

Linda Vista Collaborative support staff was able to take away a number of current and future concerns and desirable outcomes of the San Diego Forward: Regional Plan. Current concerns include lack of major projects coming to Linda Vista, and the need for more bus routes and bus frequency, among others. Future concerns include the lack of change in either of these current concerns, the potential rise in public transit fare to accommodate transit system growth, and ...

... the draining of water resources to build and maintain the Regional Plan. However, desirable outcomes were plenty, with many community members very pleased to hear of upgrade and improvements to current transportation in San Diego. Community members were largely pleased with the connections the Blue Line Trolley extension from Old Town to UTC/UCSD will provide Linda Vista residents following construction beginning in 2016, as well as the Purple Line Trolley extension from San Ysidro through Kearny Mesa, although not tentatively scheduled for construction for quite some time. Community members were also pleased to hear of the plan to *not* add more freeways to the already freeway heavy system.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

Through Bayside Community Center staff, the Linda Vista Collaborative reached out to and engaged with a multitude of organizations, communities, and entities in Linda Vista and beyond. The Collaborative itself is a network of stakeholders in Linda Vista with broad reach to a cross-sector of services, including health, government agencies, elected officials, education, social services, business, and more. Support staff reached out specifically to the English, Spanish, and Vietnamese communities in Linda Vista, often hosting Alternative Transportation Scenario-, Preferred Transportation Network-, and San Diego Forward-workshops and distributing informative publications in all three languages. Community members largely came from already-established groups, specifically the Resident Leaders in Action, Resident Leadership Academy, Academic Club parents, University of San Diego (general), and University of San Diego Alumni Association. Support staff also worked directly with Linda Vista-based community planning groups to do outreach and education, specifically presenting at the Linda Vista Town Council, Linda Vista Planning Group, Live Well San Diego, and Linda Vista Rec. Council.

Community engagement was successful, particularly with the Spanish and Vietnamese communities. Almost every SANDAG-related event planned by support staff in FY14-15 had great turnout, ranging from 2 to 60 community members, and an unquantified amount at the Linda Vista Multicultural Fair in April 2015. Community input on Alternative Scenarios and the San Diego Forward: The Regional Plan Draft was solicited through surveys, workshops, information sessions, attendance by community members at Caltrans event, and face-to-face interactions.

There were some identified challenges Support Staff experienced, however. For one, turnover in support staff from FY13-14 to FY14-15 meant dealing with challenges that come naturally when transitions happen, like a learning curve for new staff at SANDAG meetings and events, loss of institutional transfer, etc. This can be addressed moving forward by having more permanent, stable positions on the Linda Vista Collaborative/Bayside Community Center's end. Another challenge was the language barrier present during SANDAG-related outreach and events by support staff. With over 35 dialects spoken in Linda Vista, reaching the population that are not English-, Spanish-, or Vietnamese-speaking community members proved difficult. Even reaching the English population re: transportation issues, SD Forward, etc. was difficult at times given the nuanced and technical language included in such conversations.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

The Public Involvement/Outreach Plan appropriately engaged the Linda Vista community, particularly exemplified through the turnout and continued involvement from the Spanish- and Vietnamese-speaking communities throughout FY14-15. Hosting Alternative Scenario workshops and events in July and August, updates and outreach on the Preferred Transportation Network through Fall 2014 and Spring 2015, San Diego Forward: Regional Plan Draft educational sessions in March and April in preparation for the Public Comment Period beginning April 24 through July 15, and a host of engaging, interactive, educational, and fun events related to San Diego Forward in April, May, and June kept the community engaged throughout the entire fiscal year. Events also ranged in scope (e.g. tabling and outreach at New Urban Film Festival, Linda Vista Farmers Market, and Linda Vista Multicultural Fair, as well as SD Forward Game Nights and informational sessions) in an effort to reach the community through a variety of mediums to engage all interests and preferences. The most successful methods used to engage with community and solicit Public Comment were through face-to-face interactions at events (e.g. LVMC Fair, LV Collaborative meetings, Game Nights), and to do outreach for such events through word-of-mouth (e.g. Bayside to clientele promotion, handing out fliers *in person*, and public announcements at community group meetings).

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

Support staff recognized the value and importance of having SANDAG-prepared materials for use for public outreach during all phases of the fiscal year (Alternative Scenarios, Preferred Transportation Network, and San Diego Forward). Such materials appealed to the public, enticed individuals to interact with the information on display, and most importantly motivated them to engage in conversation with Support Staff and ultimately leave Public Comment on the Plan.

Support staff also noted a sense of SANDAG-burnout near the end of the fiscal year. Although Staff was able to continue engaging with the public and soliciting Public Comment, at times there seemed to be a bit of a pushback on continuing the conversation. That is why having a variety of outreach materials (PowerPoints, surveys, Game Nights, educational sessions, etc.) is crucial to maintaining public engagement to keep the information fresh and interesting for community members.

Casa Familiar, Inc.

FINAL REPORT

SANDAG SAN DIEGO FORWARD

Community-based Outreach Services

Task 5: Final Report

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings from your communities, articulating both current and future concerns and desirable outcomes.

Through the CBO Network, Casa Familiar and the other agencies involved in the group feels it provided necessary input through the development of San Diego Forward's: Alternative Transportation Scenarios, Preferred Transportation Network, and the Draft Plan for San Diego Forward. Casa also participated in the "Economic Competitiveness" meetings with AECOM and in the TOD discussion from a social equity perspective.

The inclusion and consideration in the Social Equity Appendix continues to provide a valuable opportunity to include the different community concerns around the County. Casa Familiar also became a member of the SANDAG Public Health Stakeholders Group 01/15/15 and through a subcontract was a consultant in the Border Health Equity Transportation Study. This was perhaps the most valuable outreach and input into why the community should become engaged and involved in long term planning. The BHETS made a direct connection to long term investments and needs for transportation infrastructure in the community of San Ysidro and the feedback from the community was very positive as far as understanding project priorities and outlining how investments improve their quality of life.

Casa Familiar participation in Bike to Work day for the first time included a great event hosting several pit stops in the border area with a discussion that concluded at Casa Familiar's The FRONT Art and Culture Gallery.

The Casa Familiar Language Assistance Plan Focus Group (all in Spanish) was held at Casa Familiar's The FRONT Art & Culture Gallery. Respondents seemed to be very aware of public transportation operations and use of both website and phone (511) service. They had very limited to no knowledge of highway/freeway services. Respondents seemed to be able to communicate issues, when they could find an MTS employee or even the security guards provided at trolley stops. They were aware of additional signage at buses/trolleys through poster announcements or with signage that was in Spanish. They biggest need that would have them using more public transportation is that they need more frequent service in order to take care of more of their errands. Respondents did not have additional suggestions for providing other language services but did comment that the best way to get information out about SANDAG services is by the Spanish/Mexico media and Television stations.

Casa Familiar was also proud to have hosted and participated in the first completely Spanish SANDAG Workshop on May 21st for the release of the Draft Regional Plan and Sustainable Communities Strategy.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

We outreached to the following organizations:

The San Ysidro Chamber of Commerce, The San Ysidro Business Association, The San Ysidro Smart Border Coalition, and The San Ysidro Community Planning group; which is very engaged and has some of the most involved and committed volunteers that understand more details of urban planning. The subcommittee reviewing the Mobility Element for the San Ysidro Community Plan Update was very interested in how to include and integrate local community projects into San Diego Forward.

We also outreached to residents and clients of Casa Familiar services and programs. Engaged residents of Casa programs offered some direct perspective at the workshops, of particular note were how engaged and interested residents were with the Border Health Equity Transportation Study. Attendees were interested in learning how investment in public transportation affects community health. For the Language Assistance Plan we had to outreach outside of the Casa Familiar client base.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

The two weeks given CBO's to reach out to our communities of concern was inadequate. We need at least 4 weeks notice so we may activate our outreach methodology. We also need material generated with enough lead-time to review and familiarize ourselves with the information. The whole purpose for generating this partnership with community organizations was to integrate processes for reaching out to the community and this was completely underutilized for input on the 2 draft scenarios. We were not given the time to reach our full level of engagement or fully activate our outreach efforts.

The short videos were useful and the engagement exercises were also helpful to present to the community. Getting the presentation material for the SDF Draft Plan in Spanish took some time. We were able to use the draft English presentation though.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

Casa Familiar would suggest that a beneficial process to share with the community would be how a project gets included into the Regional Plan. The answer given to the CBO's was that it depends on where the project is located if it is City or County responsibility, however, it is still unclear how to activate the community to introduce projects.

Conoce los proyectos a la agencia SANDAG?

Buscamos a 50 participantes....Participe en un grupo de enfoque. Se proveera lonche.

Agenda

(Apr.9) Re-scheduled April 15, 2015

- Welcome, & Introductions – 8:30 am
- Agency Roundtable – 8:35 am– Please share with us what your agency is working on...SHORT announcements please!!

Upcoming Events:

APRIL

1. *San Ysidro Community Plan Update Meeting* – April 8, (Wed.) 6:00 pm @ Willow Elementary School multi-purpose room, 226 Willow Rd. Presentation of Draft plan release and open public review process
2. *GSA Virginia Avenue Workshop* – April 23, (Thursday) 4:00 pm @ The FRONT, 147 W. San Ysidro Blvd. Presentation by GSA on Virginia Avenue improvements.
3. *San Ysidro Safety WALK#14* – April 24, (Fri.) 9:00 a.m @ the Corner of Beyer Blvd. and Otay Mesa Rd. Walk to raise awareness of the need for the Sidewalk to SY High.

MAY

4. *FRONTERAS FESTIVAL – Raramuri Exhibition Opening* – MAY 7, (Thursday) 5:00 pm to 8:00 pm. @ The FRONT, 147 W. San Ysidro Blvd. Art exhibition opening, of artist/photographer, Arturo Rodrigues Torija and his work with the Tarahumara of Chihuahua, Mexico. Contact: Luz Camacho.
5. *Dia de San Ysidro* – MAY 16, (Saturday) 9:00am to 4:00 pm. @ The San Ysidro Community Park & Civic Center- 212 W. Park Ave. Community building project and resource fair. Co-sponsored by The Children's Museum. Artist Wes Bruce with a hands on art making workshop. Concert by: Mariachi Familiar and Vintage Mist. Contact Irma Castro for booth information.
6. *Bike to Work Day* – MAY 15, (Friday) 6 to 9:00am. Pit Stop @ The SY Chamber Office 663 E. San Ysidro Blvd. Support Riding a bike all month or on Bike to work day.
7. *San Ysidro Sin Limites* – MAY 21, (Thursday) 6:00 pm. @ The San Ysidro Community Park & Civic Center- 212 W. Park Ave. Presentation by SANDAG on San Diego Forward, The Regional Plan open for public review process. Contact: David Flores.
8. *FRONTERAS FESTIVAL – "Agua Caliente" Book Reading* – MAY 28, (Thursday) 6:00 pm. @ The FRONT, 147 W. San Ysidro Blvd. Book reading with author, Marcos Aurelio Ochoa Barba from his book "Agua Caliente" with historical accounts from Tijuana. Contact: Luz Camacho.

Regular Occuring Events:

2nd Tuesday of the Month – Hearts & Hands Food Distribution

3rd Monday of the Month – San Ysidro Community Planning Group meets @ SYSD Ed. Ctr. Board Room, 4350 Otay Mesa Rd.

SANDAG Community-based Outreach Services

Task 5: Final Report

Fiscal Year 2015

August 28, 2015

City Heights CDC & Mid City CAN SANDAG Community-based Outreach Services

Task 5: Final Report

Fiscal Year 2015

1. *Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.*

The City Heights Community Development Corporation (CHCDC) and Mid-City Community Advocacy Network (MCC) have been engaged in outreach in the City Heights neighborhood of San Diego to educate and engage residents on the issues and process surrounding San Diego Forward: The Regional Plan (RP). This outreach has engaged dozens of residents, speaking several different languages (English, Spanish and Vietnamese the largest among them). There has been both substantive information sharing and explanations of roles and processes, as well as qualitative information gathering about community priorities and expectations of the process. Outreach has been conducted through fun community events that engage residents in unique ways and in numerous small group and one-on-one meetings.

In **August 2014**, CHCDC and MCC partnered to facilitate two **Public Workshops on the Network Scenarios**, both hosted in City Heights. At the MCCAN Networking Meeting on August 12, using the outreach materials and powerpoint slides provided by SANDAG, two dozen City Heights residents were educated on the regional plan process, the two proposed network scenarios, and the importance of providing input. Participants liked being able to look at the poster-sized Network Scenario maps, while discussing their travel modes and routes. Residents and agency leaders agreed that neither scenario was satisfactory due to the continued plans for freeway expansions, though they preferred the more widespread network of Scenario 2. As a community with many transit riders, the resounding request was to include analysis of a scenario that prioritized building out the transit network before freeway expansion—this third scenario came to be known among regional advocacy groups as the Transit First scenario. At the Improving Transportation in City Heights meeting, attended by many walkers and transit riders, many with limited exposure to regional planning, CHCDC and MCCAN opted to simply facilitate the Icebreaker Posters to get residents thinking about transportation issues, priming them for future engagement.

In **October 2014**, CHCDC promoted the **Rapid 215 Celebration** and participated in the event as an outreach opportunity, highlighting the importance of public input in order to bring desired transportation investments to the neighborhood. These kinds of celebrations are a crucial component of engagement among low-income communities because they are a visible demonstration of successful long-term engagement and hopefully inspire new and deeper levels of engagement among concerned residents.

During 2014 and 2015, through update presentations on the regional plan at the monthly Built Environment Team (BET) and Improving Transportation in City Heights (ITCH) resident group meetings, resident leaders were informed on regional planning progress, and several BET members chose to get further engaged on the regional plan by making public comment at Transportation Committee and

SANDAG Board meetings. The BET is a long-standing resident group committed to advocating for a safe and healthy built environment in City Heights – typically attended by 15-25 residents who primarily speak English or Spanish, though we have growing participation from the Vietnamese and Karen communities.

In **April 2015**, on behalf of the BET, CHCDC invited SANDAG's Active Transportation team to send a team member to present their progress on the design of the **North Park - Mid City Bikeways project**. A SANDAG consultant joined BET for the evening where he both educated residents and received feedback. In addition, CHCDC staff urged BET members to come out to the next City Heights Area Planning Committee (CHAPC) meeting to show their support of the NPMC Bikeways project. In response, BET members and neighbors came out to support the SANDAG Bikeways project at the **May CHAPC meeting**.

In **May 2015**, CHCDC encouraged BET members to attend the **San Diego Forward DRAFT Public Workshop hosted at the Jacobs Center**, and brought out a handful of people to attend the panel presentation. In addition, we used email and social media to promote the workshop.

In **June 2015**, CHCDC and MCCAN partnered to host a **San Diego Forward Draft Workshop** on June 11 at the Price Charities Building in City Heights, attended by nearly 40 residents and agency leaders, speaking English, Spanish and Somali. Participants turned in 31 comment cards at the workshop, and many more were directed to the San Diego Forward public input web form via our invitation emails that went out to over 500 people.

When asked which Mid City transportation projects were highest priority, residents chose the Purple Line (Route 562), 54th Street Rapid (Route 550), and North Park – Mid City Bikeways as their top projects. Residents urge SANDAG to accelerate these transit projects and implement the NP-MC Bikeways project.

In **July 2015**, CHCDC announced at the CHAPC meeting that the Draft plan comment period was coming to an end, but that there was a couple weeks left to do so on-line.

Throughout our San Diego Forward community-based outreach, community residents shared their desire for near-term infrastructural improvements to improve the quality of their daily active transportation trips. City Heights is plagued by poorly maintained sidewalks, inadequate lighting, insufficient bikeways, and unsafe pedestrian crossings. Residents hope that Early Action Plan investments, such as the North Park- Mid City Bikeways projects, will address some of these deficiencies.

Based on our community outreach there is strong community support in City Heights for the transit and active transportation projects that SANDAG is proposing in San Diego Forward. However, there are community concerns with freeway expansion in City Heights. Residents are concerned about more vehicle trips through the heart of their already impacted community.

2. *What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?*

Though we reached out to residents and organizations in the greater Mid-City and Southeast area, we concentrated our efforts on individual leaders and groups in City Heights. We worked with and involved the following groups:

- City Heights Town Council
- City Heights Area Planning Committee
- Eastern Area Planning Committee
- San Diego Canyonlands
- Improving Transportation in City Heights (ITCH) Momentum Team
- Built Environment Team (BET)
- City Heights Business Association
- Building Healthy Communities initiative grantees
- El Cajon Boulevard Business Improvement Association
- Environmental Health Coalition
- City Heights Seniors – Colina Park
- Bikes Del Pueblo
- Hoover High School Students
- Hoover Parent Club
- Copley-Price YMCA
- Somali Bantu Association
- Partnership for the Advancement of New Americans
- Mid City Bike Corridor Community Advisory Group Members
- Urban Collaborative
- United Taxi Workers
- Cherokee Point Elementary School Parents group
- Asociación de Liderazgo Comunitario
- Safe Passage
- SD Bike Train
- Little Saigon Foundation
- Corridor and Teralta Neighborhood Alliance
- Mid City Parking District
- Teralta Park Action Team
- SR15 CenterLine BRT Working Group Members

The level of engagement of the groups above has ranged from informal conversation on the issue, one-on-one conversations with leadership to presentations on the regional plan at one of their meetings.

The main resident groups we work with on regional transportation issues include the City Heights Built Environment Team (BET) and the Improving Transportation in City Heights (ITCH) groups; both meet monthly in City Heights. CHCDC and MCCAN staff help facilitate meetings, working with the residents to chart next steps, actions, and advocacy strategy.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

As one of the few partner community- based organizations, with a dedicated transportation program, CHCDC is uniquely positioned to conduct successful outreach, as our regional plan outreach dovetails with our on-going outreach efforts. For instance, we engaged new residents through fun, unique, active transportation-promoting demonstrations such as ACT: The Blvd (Art + Community + Transit) placemaking demonstration event for the Rapid 215, Bike To Work Day, PARK(ing) Day, and Project

Based Learning curriculum at our local high school. These kinds of events and efforts bring new voices to the input process rather than relying on the easier-to-engage older white homeowner. In low-income communities of color, any outreach has to take into the needs of multi-lingual families, therefore, food, childcare, and translations must be provided.

The most successful method for deeper engagement is the one-on-one meeting with a leader or resident. These meetings allow for a fuller understanding of the person's perspective and improve trust in the process. These meetings also build to the public workshops because they serve as a recruitment tool and a chance for individuals to enter the workshop better prepared to offer formal input.

It was helpful to have a suite of materials provided by SANDAG to use in our outreach from which to choose. The most helpful, in our experience, are the deck of powerpoint slides from which to build and contextualize our outreach presentations and the map boards of the Networks. The trick in outreach is how to present meaningful information in digestible bites—graphical information is extremely useful to this end, especially for residents with low English proficiency and/or low literacy.

Our outreach was very successful in large part because we have a base of engaged residents who participate in the BET and ITCH on a monthly basis; therefore, we didn't have to 're-educate' our audience on the regional planning process at every meeting. In addition, we have staff longevity that aids in our accumulation of knowledge and insight into the regional planning process. These long-term commitments on the part of residents and staff produce meaningful and insightful input into the regional plan.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

While we recognize the timeline to conduct a new Regional Plan every 4 years can be tight, we found that the Unconstrained Plan was an important step for the plan's overall development. We recommend that SANDAG explore ways to create a more robust public engagement process for the Unconstrained Plan. The Unconstrained Plan is an important step for input on new project ideas and to have those projects modeled.

Consider ways to demonstrate how the Network Scenarios may score differently on social equity metrics.

Consider extending the public comment period for the Alternative Scenarios process.

Continue to use the trusted CBOs to contextualize and reach their communities to gain meaningful and diverse input.

Consider utilizing CBOs and the CBO model to conduct public engagement and outreach for specific projects.

Fiscal Year 2015

Task 5: Final Report

Community Based Outreach Services

www.chulavistacc.org

511 G Street, Chula Vista CA 91910

Community-based Outreach Services - CVCC

Task 5: Final Report

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings from your communities, articulating both current and future concerns and desirable outcomes.

The CVCC has partnered with SANDAG since 2009. We have conducted extensive outreach in the South Bay community of San Diego County. Our Director, Margarita Holguin, has taken the lead as the project manager for this work.

In our work conducting community based outreach, we were able to strengthen partnership and extend our reach within our community. We had the opportunity to reach out and present to various groups and became even more known in South Bay.

Our outreach efforts concentrated in reaching the Latino community, mostly monolingual Spanish speaking community residents. We found that residents felt empowered at being given the opportunity to share their thoughts and needs; and readily shared their concerns.

During July 2014- June 2015, CVCC conducted the following outreach:

<u>Date</u>	<u>Audience</u>
8/12/14	Community members English
8/14/14	Community members Spanish
2/6/15	Promotores
5/12/15	CVCC Partners
5/14/15	CVCC Partners
5/15/15	Community members and Promotores
5/19/15	Community members and Promotores
5/21/15	CVCC Partners

In addition, CVCC hosted two community workshops:

6/5/15	Community members – English
6/11/15	Community members – Spanish

Part 1 Continues

Findings:

In listening to our community members, we learned that many of them utilize public transportation, however, they find that the current system is not meeting their needs. Current concerns include the frequency of transportation, as they report that bus schedules are limiting and spread out and not as often as needed. Furthermore, residents feel that they must take multiple buses/other to get to locations outside of South Bay. They report that it can take hours to get to some places.

In addition, residents in South Bay are extremely concerned about the cost of public transportation. Public transportation is not an option to many due to the cost. Bus fares are expensive and many cannot afford to get on a bus and definitely cannot purchase a monthly pass.

This is an important social justice issue, as these residents are stuck at home without employment or entertainment options outside of their immediate neighborhoods. The community of west Chula Vista is an older community and does not have the amenities of smart growth, and therefore its residents are disconnected and many times socially isolated.

Future concerns for South Bay residents are the needs for more connections between eastern and western Chula Vista. Specifically to and from the Otay Border. Residents report the need to have transportation options to get to and from the Border, specifically the Otay Border. Many also noted the need to have more transportation options to get to the beaches and other entertainment venues. They feel isolated and unable to reach venues outside of South Bay.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

CVCC reached out to residents and stakeholders in the South Bay. We specifically targeted Spanish speaking residents, and those that are disconnected and vulnerable. CVCC reached out to the most difficult populations to engage in the South Bay. Western Chula Vista was our primary target outreach community. This community is disproportionately disadvantaged and the health and social inequities are evident.

Outreach was conducted through our network of five Family Resource Centers located in western Chula Vista. In addition our Promotoras (Community Health Workers) invited residents as they (the Promotoras) conducted outreach for various programs out in the community.

As an example, for the August 2014 workshops, CVCC conducted outreach and invited residents through outreach events at local schools at their back to school, open house, or other events. This gave us the opportunity to reach hundreds of residents and share about SANDAG and the RTP.

In addition, CVCC conducted outreach through community events, health fairs, Day of the Child community fair, and other venues and events in South Bay.

CVCC leveraged opportunities and exposure to residents in South Bay.

Q2 - Continues

We found that residents easily engaged in conversation and seemed genuinely interested. They felt empowered by being provided the information and having the opportunity to provide feedback. Many reported that they felt comfortable with the information because it came from a trusted source (CVCC). As an example, during a Language Assistance program workshop, residents reported that although they see the sign (freeway signs) they do not understand a lot of the information. They noted that they need more discussion and hear it from a trusted source, otherwise they feel the information is not applicable to them.

We solicited input through conversation and true engagement. We presented information in terms that were understood by our community. We explained terms and used culturally appropriate methods. At one time, we developed a "loteria" game (bingo game) to play with residents and reinforce the learning from the presentation. Community members were asked their opinion and given the opportunity to ask questions and clarify concerns. The fact that CVCC is a trusted organization in South Bay opened doors for community dialogue.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

Due to the complex nature of the work of SANDAG and transportation plans, the information had to be translated beyond the language. Many of the materials presented by SANDAG are complicated and overwhelming. Terms are technical and require a more in-depth study. We could not just give residents the materials or surveys, they needed a more culturally appropriate presentation of the information.

The PowerPoint presentations had to be explained in terms that residents could relate to. The fact that a lot of the information is relevant to 2050 is already a challenge in engaging residents, this was many times multiplied for people who could not speak English and who even in their language have a low education level.

The handouts provided were also complicated and had too much technical information. We (CVCC) had to be very selective of the material distributed as to not overwhelm people.

Furthermore, many of our community members are more concerned with their day to day needs and challenges and are not able to fit in or prioritize 2050.

CVCC's personal approach to outreach is appropriate for the target population. During our presentation, community members were engaged and interested. They asked a lot of questions and eagerly shared their personal situations and concerns. Most of our participants were low income and low education level. They wanted a more personal approach and more of a one-on-one conversation and education.

Due to CVCC already having Family Resource Centers and an established community presence, we were able to engage residents in a meaningful discussion.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

The beginning of this contract year, July 2014, was challenging. The expectations were not clear and the materials needed to outreach were not ready. This created delays in startup of outreach activities. Furthermore, the objective of outreach was not clearly defined.

The population CVCC reached is a challenging population. They are more concerned with meeting day-to-day needs than looking at 2050. Therefore, we had to find a way to connect 2050 to today and demonstrated how “we” have to set up the future. This was difficult to do with technical and difficult to understand material.

A more concrete purpose of why we are conducting outreach – for example, answer to specific questions is a more concrete activity.

The use of CBOs who are established and trusted in their community is the best option to reach difficult populations. The fact that we already have a community presence opens the doors for true engagement of the target community.

El Cajon Collaborative

July 7, 2015

El Cajon Collaborative

Community-based Outreach Services

Task 7: Final Report

Date

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.
 - Last year our CBO Workgroup established populations of concern throughout San Diego County. This year, the group focused on reviewing these populations and how the new SD Forward Regional Plan would impact these groups. The El Cajon Collaborative acted as a working group to update the communities that we serve in East Region about the Regional Plan. Updates and feedback was collected at various partner and community meetings each month and reported back to SANDAG. Some of the meetings that we participated in were: El Cajon Collaborative (60 social service agencies), East Region Collaborative Network (6 East County Collaboratives and several partner agencies), El Cajon Collaborative CORE Team (15 social service executives and city leaders), Live Well East Region Leadership Team (30 social service leaders, Supervisor Dianne Jacob and HHS staff), and local service club meetings.
 - El Cajon Collaborative organized a Resident Leadership Academy (RLA) in September, 2014. With participation from twenty-two members of the community of El Cajon, the residents gained knowledge and tools to make positive change within their community. Many of the residents that participated were from our Iraqi and Chaldean refugee populations. RLA is a program of HHS and teaches four key strategies including: Building a better delivery system, supporting positive changes, pursuing policy and environmental changes, and improving the culture within. The residents participated in many activities including walking assessments of parks, retail grocery stores, schools and public services. They evaluated the efficiency, safety, "walkability" and overall health of their neighborhoods. They also conducted surveys at local businesses, events and apartment complexes. They focused on low-income, limited English-speaking, minority, and limited mobility communities of concern identified through the SANDAG CBO process. The program lasted ten weeks and the group identified challenges facing these groups with public transportation. They were given regular updates of the Social Equity piece of the Regional Plan and were happy to learn that these issues would be addressed in the new Plan. They wanted to be sure that public transportation remained affordable, increased services in frequency and additional bus routes, education on how to use the transportation services, and increased translation signage and services were available.
 - In August, 2014, six outreach workshops were conducted in the unincorporated communities of Spring Valley and Mountain Empire, and the cities of Santee and El Cajon. The presentations were on SANDAG's Alternative Scenarios for the Regional Plan. The Alternative Scenario, involving an earlier investment in "rapid" transit services in dense urban areas, appeared to be the scenario of preference for our communities of concern in East County. A concern about the "last mile" and access to transit services is ongoing among East County residents. Many feel that East County's access to transportation resources is inadequate. After identifying their preferred scenario, they were afraid that people would not use the "rapid" services given our automobile focused California culture. An additional consistent theme is the lack of affordability of transit services and cutbacks in bus routes. They understand the need for system-wide investment in maintenance and development of existing infrastructure, including managed lanes. The data

collected from these six workshops and documentation were added to SANDAG's We Transfer account to be used in a final report to the Board of Directors.

- At our September, 2014, CBO meeting, the group was debriefed on the results of the twenty workshops that were conducted around the region and the 1,600 individual comments regarding the Alternative Transportation Scenarios. The new Blended Scenario contained the Social Equity Appendix that we were working to create. After reviewing the communities of concern that we had established; minorities, low income families that are at 200% federal poverty level and seniors age 75 and over, we agreed that there weren't any significant disparate impacts for any of the populations of concern. This information was taken back to all of the meetings that the El Cajon Collaborative was participating in. The comments that we received were that increased access to key amenities such as job/higher education, healthcare and parks/beaches for minorities is critical. There was still concern that rural populations of San Diego County are not reflected on the maps for the Regional Plan.
- With a project for the county with the El Cajon Collaborative, our Resident Leaders conducted a survey with one hundred participants throughout Spring Valley, Santee, El Cajon and La Mesa in September and October. The surveys focused on access to food, transportation and healthcare. They were given to residents at a low-income apartment complex with a high population of refugee families, as well as at community events including two Fire Station Open Houses and a health fair. The results of the surveys showed that the transportation concerns of the community members were:
 1. More bike lanes
 2. More pedestrian friendly sidewalks
 3. Alternate fuels and more charging stations
 4. Buses need to run regular schedules including weekends (every half hour or more)
 5. Buses need to go between the two community college campuses in East County.
 6. More lighting at bus/trolley locations
 7. More covered bus shelters
 8. Better security at trolley stops
 9. More routes for trolleys and buses.
 10. Increase loyalty with consistent drivers
 11. Personal safety on buses
 12. Personal comfort-clean buses, trolleys and stations
 13. Easier access to bus schedules for seniors
 14. More rural routes-Access for rural residents is almost non-existent
 15. Reduce stigma through marketing and education
 16. Reduced rates or free for seniors, students and persons with disabilities
 17. Clean restroom access at bus/trolley stations
 18. Economic incentives for using public transportation
 19. Rate increases continue to burden the rider
 20. Multilingual bus schedules and information readily accessible and posted at stops
 21. Culturally sensitive bus drivers and riders

This information was used to develop a two year plan for the Community Action Partnership of San Diego. It was also shared with the agencies and residents that helped participate in the assessment as well as the groups that were working with the El Cajon Collaborative on the Regional Plan Social Equity Appendix.

- On November 20th, El Cajon Collaborative held a Community Needs Assessment Forum with 34 attendees. The Regional Plan and the Social Equity Appendix were discussed with the group. One of the workshops for the attendees was transportation needs for our disparate populations. The most common response that we found was that transportation continues to be a challenge for our seniors and persons with disabilities. Many of the bus routes were reduced a few years ago and more frequent stops along with extended schedules (earlier in the morning and later in the evening) need to be added. It is difficult for seniors to access their health care visits because the bus stops were still several blocks from their physician. Many just don't have the stamina it requires to wait for transportation and then travel up to one hour each way for their visits. If they need to have assistance or an escort, it is expensive to pay for the additional rider and often not an option for a disabled or senior client.
- In April, 2015, the El Cajon Collaborative held a language-focus transportation focus group with our Middle Eastern, Arabic refugee residents. The purpose of the focus group was to educate them on the services offered by SANDAG, but also to learn how SANDAG should outreach to this difficult to reach population. The focus group was conducted in Arabic. A recurring point was that many of them feel afraid of strangers on the bus or trolley. It is a new country and the transit system is very new to them. They also agreed that the best way to educate the refugees and new immigrants is through their acculturation classes and flyers distributed through churches and social gathering events. We had eight participants at this event.
- El Cajon Collaborative conducted seven workshops and presentations throughout East County for the San Diego Forward Draft Regional Plan in May, June and July. We assembled all of the information that we received into summaries for each event and entered the Public Comments into the SANDAG data base.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

Our outreach efforts concentrated on getting the information out to as many communities in East County as we could to ensure that we were reaching our most at-risk communities of concern. By reaching out to our social service agencies, we were able to assess the needs of these populations. We also concentrated our efforts in reaching members of the Middle Eastern refugee population that are limited English speaking, low-income and low mobility communities of concern. This was due to the concentration of this population, and health and social service providers working with our refugees in the city of El Cajon and neighboring communities.

With help from our Resident Leadership Academy participants we were able to reach out to a large population of residents to assess their needs, especially regarding transportation. They were able to cover a large area with their surveys, walking assessments and special event participation. We tried to have SANDAG information at every health fair in East County and resource tables at events and meetings.

The monthly meetings that we attended helped disseminate news and updates across all of the social service organizations, school district and county & city offices to their communities to help gather input. It helped broaden our scope of information gathering and a way to quickly get information out there as needed.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

Our outreach plan made the most of the resources that were available to us. The outreach to the community through our Resident Leaders made the information less intimidating and the residents were more willing to share with fellow community members. The outreach methods we employed were appropriate for the groups that we reached. In all settings community members were fully engaged and offered helpful insight.

By engaging our social service agencies, we reached our most in-need populations and our limited English speaking refugees. It also created a consistent message by giving them updates each month that they could share with their staff and clients. One-shot presentations cannot produce the type of community engagement or quality of participation required to adequately represent them.

SANDAG produced printed materials and videos helped provide an overview of the process and helped educate our participants in a more efficient way. It would have been wonderful to have the materials translated into more languages before each workshop or event. The large format maps were useful in our cities, but didn't show much of the rural areas so they weren't used for those presentations.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

I was happy that we were able to extend our outreach into Mountain Empire when they dropped out of the network. It is so important that we continue to outreach to our rural communities even if they aren't represented much in the new San Diego Forward Regional Plan. They continue to be a large population of concern that continue to pay taxes to our county. Transportation services are scarce and resources are few. We continued to bring updates to this group of residents throughout the year, and made sure to bring a presentation of the Regional Plan Draft to them for Public Comment.

It will be helpful to establish best practices for future projects that SANDAG will need to bring to the public. By engaging the community-based organizations, outreach was extended to large groups that may not have received information in the past. Because we were able to extend the outreach to our refugees and immigrants, it is important to bring them information in their native language. It will also be helpful to more efficiently schedule workshops and forums so that SANDAG will have the information readily available.

It was a wonderful experience and a great way for me to learn more about my community. I was able to connect with groups of individuals that I hadn't met before and to educate myself about their culture. It was also great to work with other community-based organizations in this capacity and learn from their strengths. Jane Clough was a strong leader who helped direct this whole process and make it easier for us to understand the information before sharing it out in the community. I appreciated her expertise and guidance.

Community-based Outreach Services

Task 7: Final Report

Date

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

IRC worked diligently throughout the year to outreach to groups that traditionally and historically have not had a voice in transportation planning throughout the county. With two offices located in the City Heights neighborhood of San Diego and the City of El Cajon, IRC brought together not only those individuals that were already receiving services through internal programs but also the greater community at large. By distributing flyers throughout the community IRC not only reached the Iraqi, Burmese and Somali communities but also long term residents in both neighborhoods.

IRC specifically focused on students attending citizenship classes in El Cajon. Students attending citizenship class have been living in the United States for approximately 5 years or more on average but are unfortunately frequently unaware of the intricacies of local and county governments as well as how their voices can influence future planning. Particularly in East County they are an important group to engage with and IRC was eager to introduce the community to SANDAG and SDForward.

In addition to several workshops in IRC's citizenship classes, IRC hosted a viewing of the SANDAG public workshop held at the Jacob's Center. Although due to technical difficulties we were unable to view that live version we did show the archived CalTRANS public workshop. This viewing was attended by El Cajon community residents that IRC typically does not serve. As demonstrated in the comments submitted on behalf of these residents they have not often had the opportunity to share their opinions on the public transportation that is an essential part of their day.

Throughout the outreach workshops IRC heard similar comments repeatedly. Buses need to run later and more frequently, language access (especially for the Arabic, Somali and Burmese communities) was a huge barrier to accessing public transit, lack of lighting at certain trolley stations raised security concerns and there aren't enough bus routes to make taking public transportation a viable option. The cost of the bus and trolley were also strong barriers to access. El Cajon residents also remarked that driving was much faster and more practical as it took too long to take public transportation and wasn't convenient.

Although not unexpected, very few residents that attended workshops knew what SANDAG was or understood how transportation planning is implemented and can be influenced by residents. This is perhaps the most important finding that IRC made in that more long term and regular education is needed on topics such as local and regional governments and transportation planning to continue and further engage these communities.

As a result of this outreach IRC and the residents of City Heights and El Cajon would like to see easier access to digestible information regarding transportation planning. Many of the residents IRC

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

IRC was able to successfully reach out to partner organizations in addition to reaching inward to the over 8,000 clients IRC serves yearly. Reaching out to the Refugee and Asylee communities in both the San Diego neighborhood of City Heights and the city of El Cajon, IRC was able to get the feedback of a communities that are not only LEP but historically isolated. These are also the communities that most likely rely on public transportation on a daily basis.

IRC approached organizations like the Union of Pan Asian Communities (UPAC) and the Karen Organization of San Diego (KOSD). These organizations serve not only the refugee but the general immigrant communities Vietnam, Cambodia, Laos, and Burma. IRC Staff reached out to colleagues in these organization for their staff to directly solicit their clients for feedback or attendance at an IRC hosted SANDAG event.

Reaching inward IRC staff made announcements at staff meetings of SANDAG events and conducted follow up with varies Program Managers of different departments. IRC staff invited SANDAG events into their Citizenship Classes and Vocational ESL classes in both City Heights and El Cajon. Participants ranged in country of origin, age, education level, length of time in the U.S. and English level. IRC often found those who had been in the U.S. the shortest times with the lowest English level that most regularly used or solely relied upon public transportation. Information was gathered by having initiating basic conversations with participants, often the use of an interpreter was required. Most feedback was given verbally, as not all were literate in English nor their native language.

IRC also reached out to the general public of City Heights and El Cajon. Distributing flyers in areas around the El Cajon Marshall transportation center in addition to public access points around City Heights (public libraries, supermarket parking lots, SDSU transit center and bus shelters along University Ave.) Powerpoint presentations were created using SANDAG materials but were often modified for a lower level English learners. Presentations were used to guide the conversation and

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

IRC faced a few challenges in engaging the refugee and immigrant communities served by both offices. While SANDAG proved many great outreach materials they were typically created in English and Spanish only. The communities IRC outreached to in this project were Arabic, Somali, Vietnamese and Burmese speakers with an often low English literacy and speaking levels. In addition to language barriers many of the residents were relatively new arrivals to the United States having typically arrive in the last 5 years. Not only did IRC work to educate these residents regarding SDForward but also about the local and government players in transportation planning, why it should matter to them and how it affects their daily lives. Having come from very different countries and cultures, often areas in which actively voicing your opinion regarding the government would likely result in severe punishment it is no easy task.

In order to appropriately engage the refugee and immigrant communities it will be important to establish regular outreach workshops and opportunities for residents to share their opinions as well as to build a foundation of trust between staff, residents, and local government agencies.

- Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

IRC would like to make a few minor suggestions regarding procedure, such as scheduling events, document availability and reporting. Although able to attend all scheduled SANDAG CBO meetings, many were scheduled with little advanced warning or were rescheduled multiple times. It would be helpful to IRC in future participation of SANDAG events to schedule meetings well in advance. Likewise, if documents could be available as early as possible to CBOs. Often documents were only available in English and Spanish with little time given for translation. IRC in an effort to fully prepare and present information effectively would need to translate documents into other languages, such as Arabic. At times in the past documents have been given to CBOs within the week that presentations, outreach or workshops were to be completed.

IRC would also encourage SANDAG to have a stronger focus on lower literate communities both in their outreach and solicitation of feedback approach but also when marketing phone applications or internet access sites.

Jacobs Center for Neighborhood Innovation

Community-Based Outreach Services

Fiscal Year 2015

Community-based Outreach Services

Task 5: Final Report

Final report should be approximately 3-5 pages, not including attachments (high resolution photos, sign-in sheets, samples of materials used)

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings from your communities, articulating both current and future concerns and desirable outcomes.

Over the course of FY15, we engaged a diverse set of community residents to participate in the SD Forward Regional Plan process. The participants represented different sectors of the local population who brought different experiences and insights into the transportation system they want to see in the region. Of particular note is that we were able to engage the oft silent Latino community in the process and provide them with the opportunity to get to know and understand the plan as well as engage in their own language.

Of main concern to all participants were the following items:

- Routes that connect people to jobs – people want the ability to access transportation options that can get them to work easier and faster. Public transit users want to see shorter wait times on both bus and trolley lines, more bus rapid transit options that get them to job centers (particularly downtown, Old Town, UTC/University areas, north county & the I-15 corridor). People using vehicles like the option of having HOV lanes that help curb traffic and get them to their destination faster.
- Cost of fares – frequent users, particularly seniors and larger families, shared that the cost of riding public transportation is one of the main deterrents to their use of the system. For seniors on a limited income the cost is prohibitive They would like to see the time of the transfer be extended because due to the short turnaround time many have had to buy a whole day pass or have found themselves walking far distances. For large families, travelling as a unit is incredibly expensive especially if they end up missing out on the transfer time to switch modes of transportation.
- Safety in accessing the trolley – the three trolley stations in Southeastern San Diego pose unique safety issues for transit users.
 - 47th Street trolley is unsafe due to darkness in the station parking lot and underneath the Trolley bridge. There is also unsafe street crossing due to the location of the trolley located at a significant distance from designated crosswalks.
 - Euclid Avenue is a crime hot-spot as people loiter and make the station undesirable and unsafe. Several people have been assaulted or pick-pocketed. Several have witnessed fights break out at the station or in the parking lot. Lighting and overall upkeep of the Euclid Trolley Station is lacking and add to the feeling of fear in using the station.
- Trolley congestion caused by the trolley: Ease traffic congestion on Euclid Avenue caused by the trolley travelling through Southeastern San Diego.
- Add bike lockers at the Euclid Trolley station.

People selected the transportation scenario that prioritized Bus Rapid Transit through the neighborhood. Of special interest was also the addition of the new trolley line that would travel along the 805 & 15 corridor. This idea met some of the concerns the community expressed about getting to job centers that have higher paying job options. Participants also really like the idea of making the Euclid Trolley Station an intermodal transportation center. Thought he Intermodal Center is not included in the final draft of the plan the idea was highly applauded.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

The main groups that we outreached to and engaged in the planning process were:

Paticando con mi Gente – a Spanish speaking leadership group

Urban Collaborative

We held educational workshops at the Jacob Center and invited residents and organizational partners to participate. At each of these workshops we collected comments in the SD Forward comment cards provided by SANDAG and also had people turn in comment via the online portal.

We also attended regular meetings of local organizations and presented to their membership. The groups we outreached to were: BAPAC, NAACP, Southeast Collaborative, United African American Ministerial Action Council, Urban League, Pillars of the Community and several of the local neighborhood councils.

We did turnout to the larger SANDAG led workshops so people could ask the traffic engineers and planners their questions.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

I think all the information, flyers, and PowerPoints were great. They were clear, concise and easy to understand. People enjoyed the videos and actually learning about the vision, the process for the plan and the opportunities to engage at different levels. The different scenario maps and network graphics that depicted the vision for the plan were really helpful in having people understand the progression of the plan and how it will look in the future. Having the information in Spanish was also a great help and made Spanish speakers feel that their participation was welcome.

I think the most difficult part of the process was the Project Manager's learning and understanding of the plan. The project manager for this grant came on board in the last year of the planning process and had to learn the plan and engage people at the same time. It was at time frustrating to not fully understand the logic behind the plan or be able to answer questions about funding the implementation for the plan – especially when the question was incredibly specific.

In the future I think a combination of community-based outreach and a deeper online engagement effort can be helpful in engaging even more San Diegans in the process, especially in engaging younger generations.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

There is a steep learning curve when it comes to understanding the plan, terms, concepts, etc. Also translating those concepts to regular people can be difficult. As someone who came in at the latter end of the process some more basic 101 training on transportation planning and/or specifics on the plan would have been helpful. I can see how someone who went through the whole planning process can be able to answer some of the deeper, more complex questions that people had when it came to the plan.

"Building healthier and happier communities together."

Operation Samahan, Inc.
Community-based Outreach Services

Task 7: Final Report
Date: 7/14/2015

1428 Highland Ave, National City, CA 91950 • Phone (619) 477-4451 • Fax (619) 474-4008
www.operationsamahan.org

1. Explain your organization's accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings, thus far, from your communities, articulating both current and future concerns and desirable outcomes.

During the SANDAG Scenario Analysis workshop in August 2014, we were able to bring together a community of generations that expressed deep interest in the transit system in San Diego. Many of the attendees that came to this event equally represented both populations that used both private and public transportation as means of traveling on a daily basis and have learned that many seniors utilize public transportation as part of their regular routine.

Based on the activities that were conducted during the workshop, many attendees have mentioned that

After looking at both scenarios that focused on the expansion of public transportation versus freeway expansion, both parties expressed high concern for each scenario. For seniors, the issue is that wait time for public transportation is already long, causing them to be late for their activities. They also complain that certain routes are not as frequent on Sunday, which is their time to go to church and participate in other similar activities. For those that own vehicles, their concern is street congestion with more public transportation. Another issue that was brought up primarily with the younger adults is the environmental damage that lane expansion would cause, especially to residents that live along the freeways. The younger adults (ages between 18-39) that normally bike as transportation also state that it is unsafe for them in many areas due to a lack of bike lanes, which poses them at higher risk for accidental deaths. For all those in attendance, cost proved to be the major issue and where the funding will come from, should one of the scenarios happen in full effect.

The public's overall suggestion is to find a way to merge both scenarios into one that can work to diminish the majority of their concerns. While the seniors (65+) state that this will not be too much of their concern, they're concern is for their children and grandchildren when 2050 comes around and how it will affect their lifestyle.

In regards to our Language Assistance Plan Focus Group that was held in April 2015, the attendees for this focus group were 8 males and females that identified as either Asian or Pacific Islander descent, with an income bracket of less than \$22,051.00 with no disabilities. All were above the age of 40 with the exception of 3 attendees. While many of them drove, they expressed that the trolley would be a preferred means of transportation since it was faster. Their main reasoning for not using public transportation is their fear of getting lost. The signs for public transportation are not clear for many, although one participant mentioned that there is a mobile APP that allows you to know the various bus stops. Another issue is the accessibility of public transportation. Participants state that they do not live close to any bus stop which makes it difficult for them to access it.

Their overall suggestion is to have information regarding public transportation shown on various forms of ethnic media in order to reach the population that they would like to reach. Suggestions include putting information on the Filipino Channel (TFC), any ethnic media newspaper or social media in their respective languages.

In May 2015, attendees participated at the Regional Plan Public Comment Community Workshop that was also held at Operation Samahan. Attendees included Asian and Pacific Islander Young Adults between the ages of 20-39. All attendees but 1 utilize vehicle transportation, while one attendee utilizes public transit. After showing the PowerPoint, many attendees were interested in learning more about the regional plan but voiced concerns about those that commute and where the money will come from to build such an expansion. While looking at the map, many attendees stated that the design looked extremely intricate like "colored spaghetti" and felt it was just too busy. The suggestion was to ensure that SANDAG continues to work with community partners to understand the needs of those that commute using public transportation and those that commute by car and create a clearer understanding of their plan.

2. What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?

The groups and or communities we reached out to throughout the year include:

1. **The Y2Y Center** – Youths between 13-17 years old that attend local San Diego high schools
2. **The United Filipino American Senior Citizens Organization of San Diego (UFASCO SD)** – seniors 65+ that meet regularly at Operation Samahan.
3. Young adults from various advocacy organizations that range from 18-39.
4. Community members between 18-65+ with English as their second language.

The level of engagement varied between the various attendees. For the youth and community members with English as their second language, it was more informative with minimal to moderate participation in the conversation. For the young adults and Filipino seniors, the level of engagement was much more involved as both parties provided input, potential solutions and raised key concerns they felt SANDAG needed to understand.

To solicit input, various activities provided by SANDAG were used to engage the attendees. Activities which included visuals, interactive posters and discussions gave allowed for us to solicit input in different levels which worked well for those who were more vocal and those who preferred not to speak as often as others. Surveys and questionnaires soliciting for feedback about the workshops and focus groups were given to attendees as well to help better serve their needs.

A group we'd really like to focus on in the upcoming months are our health center patients. As our patient population includes, immigrants, low-income, and uninsured families and individuals. These groups can benefit from the programs SANDAG offers. Moving forward we'd like to create a stronger connection between our health center patients and SANDAG.

3. Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?

Overall, the public involvement/outreach plan did in fact engage the community and allowed them to speak on transportation issues. What helped most were the interactive activities that allowed attendees to see the trends in transportation that was shared across the board with other attendees that may or may not share their same situations. Unfortunately, the PowerPoints were not as engaging as the other activities do to the length of explanation that was required for certain slides. The videos are a bit more helpful showing how housing and transportation has evolved throughout the years and what SANDAG plans to do to meet these changes. It proved to be a stunning revelation for those viewing the video of how much San Diego has changed in the last decade.

It was a huge benefit to receive materials from SANDAG to utilize in our outreach in the community. This creates a unified message when various organizations are conducting outreach in diverse communities. However, moving forward, culturally appropriate materials should be considered in order to engage the community to its fullest potential.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

In regards to the next phase of this project and considering the feedback from the community attendees, it would be helpful to provide a much more clearer and understanding map of the various scenarios SANDAG wishes to pursue for the regional plan. The interactive activities were a huge part to the success of these workshops, so it is recommended that such activities should be continued for future events in order to keep participants engaged. In addition, collaboration among the different CBOs in the network should be emphasized as well. This can be done through group workshops, brainstorm sessions, and combined presentations or appearances in the community.

Vista Community Clinic Community-Based Outreach Services

Fiscal Year 2015
Task 5: Final Report

Community-Based Outreach Services

Task 5: Final Report – Vista Community Clinic

1. Explain your organization’s accomplishments in terms of Community-based Outreach Services for the Regional Plan. Summarize the findings from your communities, articulating both current and future concerns and desirable outcomes.

We continued many of the same outreach strategies that started in FY 13/14 to reach the Spanish speaking population and key stakeholders serving those communities in Vista, Oceanside and surrounding North County. Outreach included going regularly to a Vista food distribution site, conducting presentations in schools and community groups, distributing flyers, and having one-on-one conversations with partnering organizations such as Poder Popular and Iglesia Discípulos de Cristo in Vista. In summary for FY 2015 we conducted:

- Three workshops and presentations on the draft scenarios in August 2014 involving 73 participants;
- Five presentations on the preferred scenarios between February and April 2015 involving 60 participants; and
- Two workshops on the draft San Diego Forward: the Regional Plan in June 2015 involving 58 participants.

Although we disseminated thousands of flyers at the food distribution, and through various organizations including the Migrant Education Services and North County Lifeline, workshop attendance was lower this fiscal year. Nevertheless, residents who attended the workshops and presentations provided valuable information on many aspects of San Diego Forward. Many of the participants have been community leaders for years and spoke on behalf of the residents that they work with. Staff spent hours at monthly food distributions educating residents in their native language (Spanish) about what San Diego Forward is and how it affects them. In addition, staff scheduled several presentations through the Vista Unified School District Learning Center, neighborhood associations, faith-based organizations, and community groups. Through the schools, we were able to reach out to youth, ELAC and DELAC parents; and through the church we were able to reach out to entire families and members of all age groups and backgrounds.

By approaching the community through various venues, we were able to reach hundreds of people.

Alternative Transportation Scenarios: We partnered with Iglesia Discípulos de Cristo in Vista to host the Alternative transportation Scenarios workshop in Spanish on August 18, 2014 and 18 people participated. There are many benefits to this partnership. First of all, the church hosts a food distribution twice a month and CBO staff talks to participants on a regular basis. The church is located in Vista's Townsite neighborhood, one of the poorest neighborhoods in the City. In addition, it is within walking distance for many residents. Over 300 people participate in the food distribution, and most of them walk to get around. In addition to the Spanish workshop, an English workshop was conducted with 32 Vista Community Clinic Health Promotion Center (HPC) staff on August 8, 2014. Most of the HPC programs focus their efforts on underserved communities. They offer various resources to clients such as providing transportation to those who have difficulty getting to and from the clinic, providing individual case management, and linking clients to extensive health education and referrals if needed. HPC Staff have been long-time advocates for clients and have provided feedback on behalf of their clients. For this reason, we believed HPC staff would have valuable insight regarding the needs of low-income minority populations in North County. Finally, a Scenarios presentation was given at the monthly North Coastal Prevention Coalition meeting in August with 23 attendees to encourage their interest and involvement in regional planning.

Although participants from both groups were excited about all the improvements that have been made in San Diego, they felt that there was not a good balance between the scenarios. The biggest concern was that most projects in the two scenarios were concentrated in the south part of the County. Consequently, they urged SANDAG to do the following:

- Review the budget and allocate or find funds to use on the rail system project and make those projects a priority for the next four years. Double tracking and expansion of the Sprinter will benefit many college students who are currently attending Palomar College and California State University San Marcos, as well as many seniors who use the Sprinter on a regular basis to get to places.
- Affordability: most people who use the Sprinter are students, seniors, and people who do not own a car. Fare should be affordable for students, seniors and low income families.
- Frequency: Improve frequency of the buses, Sprinter, and Coaster.
- Cultural Competency: Train staff to provide services linguistically and culturally appropriate.

- Managed lanes are needed on the 78. These may reduce accidents in the area and alleviate traffic. People are spending hours on this freeway.
- Rapid bus services should be expanded to other areas in North County, including Oceanside, Vista, San Marcos and Escondido.

Preferred Transportation Network: Five presentations were conducted on the Preferred Scenarios from February to April 2015. It was challenging in all of the presentations to keep the residents focused on the regional plan. The residents were concerned about sidewalks in their neighborhoods. This is due to the fact that residents have been requesting sidewalk improvements for as long as they can remember; sidewalks are often in poor condition, or don't even exist where needed. Many of the residents walk to get places since the bus does not meet their needs, and they do not have access to other modes of transportation. Priorities expressed during these presentations include:

- For many residents who do not own a car, the double tracking and expansion of the Sprinter is something to look forward to. However, 35 years is a long period of time. Many seniors, college students, and families ride the Sprinter on a regular basis to get to school, doctor appointments, and work. Projects like these should be accelerated.
- Many residents agree that improvements along the border will alleviate the long crossing lines. Many people from Tijuana bring business to San Diego. Every day hundreds of people come to shop and enjoy entertainment. In addition, many people from San Diego travel to Mexico to visit the tourist places such as Ensenada and Rosarito.
- Many residents use the rapid bus and shared that they have had very good experiences. It is clean, fast, and affordable so they want SANDAG to consider its expansion in other areas of North County.
- Multimodal projects will help everyone save time and money since they will provide not only multiple means of transportation, but also many goods in the same area.

Draft plan for San Diego Forward: Since we wanted to educate most of the sectors of the community, we joined efforts with Poder Popular leaders to host our workshop at one of Vista Community Clinic's branches so that people who live on the Eastside of the City of Vista would have an opportunity to participate. Poder Popular lideres have been very active in the community: some of them are part of the English Learner Advisory Committee (ELAC) and District English Learner Advisory Committee (DLAC) boards at their respective schools and districts;

some are members of the Safe Routes to School programs, and others were affiliated with the CX3 program. Poder Popular has been working in the communities of Oceanside, Vista, Pala and Fallbrook. The purpose of the group is to improve health, living, and working conditions of agricultural workers by strengthening and engaging them in grassroots leadership. The goal is to increase local health, develop individual and organizational leadership, and increase advocacy capacity to improve long-term health conditions of farm-workers through systems change. The English workshop was prepared to receive feedback from HPC staff that often serves as the eyes and ears of many members of the community. They are very knowledgeable of the needs of their clients. Many of VCC's programs are designed to provide home visits to clients since transportation has been a barrier for many of them. The following bullets reflect findings and concerns of the community.

- Participants urge SANDAG to pay special attention to housing costs. Many residents do not own a house because they cannot afford one. Policies are needed to keep landlords from increasing rent. Although participants support Smart Growth principals, they feel that they will eventually be displaced since these new communities will be unaffordable to them. More low-income and affordable housing programs on the project are needed. There is a long waiting list for low income housing and requirements are out of reach. Some programs require applicants to make "less than minimum wage" and some require too high of an income. SANDAG may want to review those policies to make housing more affordable to low income families.
- Rural areas are left out of the project. With all the improvements concentrated in the urban areas, life will be unaffordable. People with minimum wage jobs will have no other option in the future than to move out of the cities and move into more rural areas in order to be able to afford living in San Diego. Low income residents will be driving from rural areas to the cities to work and go to school; they will not get the chance to enjoy the San Diego Forward. They will spend hours on the road instead of enjoying their time with their families.
- The expansion of the Sprinter and improvements of the schedule of both Sprinter and Coaster are priorities for residents in North County. If one of the goals for SANDAG is to reduce GHG emissions, rail systems should be prioritized. Efficient transportation systems will take many cars off the roads, especially off the freeways. Freeways are crowded all the time because most people commute by car.
- Managed lanes on the 78 should be a priority for the next two years. This freeway is one of the connections to the I-15 and I-5, so managed lanes are needed.

2. **What groups and/or communities did your organization reach out to? What was the level of engagement? How did you solicit input?**

We were very successful in reaching out to the community through the Vista Unified School District Learning center, North County Lifeline, Iglesia Discípulos de Cristo, and Poder Popular. We partnered with these organizations on different levels. At the beginning of the project, we hosted one of our first workshops in January 2014 in collaboration with North County Lifeline and the Learning Center, in one of North County Lifeline facilities. Over 80 participants attended this workshop and were all highly engaged in the discussion. Eight members of North County Lifeline volunteered to assist us with ice breakers and group facilitation. The Learning Center contacted all the Spanish speaking parents through the district phone system and invited them to participate in the workshop. Also, they provided childcare during the workshop. Unfortunately, the Learning Center closed many of its services due to budget cuts this past year and was not able to collaborate to the same degree. North County Lifeline also changed priorities to focus their efforts more on gang prevention, so they could no longer participate with us in planning workshops; however, they were very helpful in promoting our workshop by handing out flyers to their clients. Our collaboration with Iglesia Discípulos de Cristo and Poder Popular remained strong this year. We hosted the Alternative Scenarios Workshop at the church. The pastor allowed us to promote our workshops during his services and even helped us recruit volunteers to assist us with child care during the workshop. Poder Popular offered one of its meetings for us to host the Draft of the San Diego Forward workshop. They assisted us in disseminating flyers during food distributions as well as in their neighborhoods. Furthermore, they provided us with food during our workshops with them. Because of our long history of collaboration with these groups and organizations, we received ongoing support.

3. **Do you feel that your Public Involvement/Outreach Plan appropriately engaged your community? Were the materials, methods, and mechanisms used successful? Were some more effective than others?**

The methods we used to involve the community were successful. Collaborating with our community partners such as the Learning Center, North County Lifeline, Iglesia Discípulos de Cristo, Poder Popular, ELAC and DELAC programs in Oceanside and Vista opened the doors for us to reach out to a broad audience in North County. This allowed more residents to be able to participate and provide their feedback on the San Diego Forward. We were meeting with these groups on a regular basis so we could keep them engaged in the conversation. People seemed more open to talk during one-on-one conversations and in small groups as opposed to large groups.

The strategies that worked best for us in recruiting people to assist with presentations and workshops were phone calls and one-on-one conversations. Flyers did not give us a good outcome; we handed out thousands of flyers to promote our workshops, but we found not a single individual that received a flyer attended any of our workshops or presentations.

4. Other reflections on the process that you would like to share with SANDAG and the CBO network that we can learn from and incorporate into the next phase?

It was a challenge to engage the community in the process. There is a lack of understanding among the community about the importance of being involved in the decision making process. Because of the demographics in North County, our target population was the Latino Community. Many in this community come from an oppressed system, making it difficult for them to talk about and share their opinions since they are rarely given the opportunity in their native countries. In addition, many of these residents live in communities that have been neglected for so long that they believe their past petitions have not been heard. Residents were often more concerned about sidewalks, poor lighting, safety, and high rent cost than in long-range regional planning. We believe the dialogue, input and feedback we received was valuable, and should be incorporated as an ongoing process in SANDAG's planning efforts. On several occasions, participating CBO's have requested 'case study' examples of how input from low-income, minority populations has been incorporated and influenced project planning. While various examples have been discussed in meetings, we have not received anything concrete (write-ups, powerpoints, news stories, etc.) that we can use in our communities to help convince them that their input matters. Such examples would be very beneficial for CBO staff and the communities they serve to inspire ongoing participation in this complicated process.

Attachment 6 - San Diego Forward: The Regional Plan Public Involvement Efforts regarding SB 375 Requirements

Senate Bill 375 (Steinberg, 2008) contains a number of references to guide public participation efforts in developing San Diego Forward: The Regional Plan and its Sustainable Communities Strategy (SCS). This table outlines references in the legislation and how SANDAG is meeting or will meet the requirements. All public outreach and involvement efforts, meetings, and activities are detailed in Appendix F Public Involvement Program.

Government Code Section 65080 (a) provides: Each transportation planning agency designated under Section 29532 or 29532.1 shall prepare and adopt a regional transportation plan directed at achieving a coordinated and balanced regional transportation system, including, but not limited to, mass transportation, highway, railroad, maritime, bicycle, pedestrian, goods movement, and aviation facilities and services. The plan shall be action-oriented and pragmatic, considering both the short-term and long-term future, and shall present clear, concise policy guidance to local and state officials. The regional transportation plan shall consider factors specified in Section 134 of Title 23 of the United States Code. Each transportation planning agency shall consider and incorporate, as appropriate, the transportation plans of cities, counties, districts, private organizations, and state and federal agencies.

SB 375 Requirement	Date Requirement Met	Outreach Activity/Event
Section 65080(b)(2) A sustainable communities strategy prepared by each metropolitan planning organization as follows:		
Section 65080(b)(2)(A)(ii) The metropolitan planning organization shall hold at least one public workshop within the region after receipt of the report from the Regional Targets Advisory Committee.	May 2010	This requirement fulfilled in the 2050 Regional Transportation Plan/Sustainable Communities Strategy (2050 RTP/SCS). Public Workshop providing overview and target setting information. SANDAG Board Policy Meeting, May 14, 2010. Regional Planning Stakeholders Working Group, June 15, 2010.

SB 375 Requirement	Date Requirement Met	Outreach Activity/Event
<p>Section 65080(b)(2)(E) The metropolitan planning organization shall conduct one informational meeting on the sustainable communities strategy and alternative planning strategy, if any. The metropolitan planning organization may conduct only one informational meeting if it is attended by representatives of the county board of supervisors and city council members representing a majority of the cities representing a majority of the population in the incorporated areas of that county.</p>	<p>March 27, 2015</p>	<p>SCS information discussed at the March 27, 2015 meeting of the Board of Directors. Minutes and Board attendance of the March 27, 2015, meeting are located at: http://www.sandag.org/uploads/meetingid/meetingid_4078_19048.pdf</p>

SB 375 Requirement	Date Requirement Met	Outreach Activity/Event
Section 65080(b)(2)(F) Each metropolitan planning organization shall adopt a public participation plan, for development of the sustainable communities strategy and an alternative planning strategy	December 21, 2012	SANDAG Board of Directors updated and adopted the agencywide Public Participation Plan (PPP). The Public Participation Plan guides public outreach and involvement for all agency programs, plans, projects.

SB 375 Requirement	Date Requirement Met	Outreach Activity/Event
<p>Section 65080(b)(2)(F)(i) Outreach efforts to encourage the active participation of a broad range of stakeholder groups in the planning process, consistent with the agency's adopted Federal Public Participation Plan, including, but not limited to, affordable housing advocates, transportation advocates, neighborhood and community groups, environmental advocates, home builder representatives, broad-based business organizations, landowners, commercial property interests, and homeowner associations.</p>	<p>Ongoing – PPP updated and adopted December 21, 2012; PIP presented to Board of Directors on February 22, 2013</p>	<p>The Regional Plan and SCS Public Involvement Plan (PIP) is an element of Federal Public Participation Plan required under 23 CFR part 450.316(a). The Regional Plan and SCS PIP describe specific activities, audiences, etc., to secure input on Regional Plan and SCS. Appendix B of the PIP includes the Regional Plan Stakeholders List, a broad range of stakeholder groups that were invited to participate in the planning process. The 14 community based organizations (CBOs), representing disadvantaged communities in the region that served as partners in developing the Regional Plan, are listed under the Community Based Outreach section of Appendix F. Appendix F, Attachments 4A and 4B provide comprehensive listings of presentations, public meetings, and workshops by SANDAG and by SANDAG's CBO network, and Attachments 5A and 5B provide the SANDAG and CBO workshop summaries from all of the Regional Plan workshops. . Public outreach and involvement efforts include public meetings, workshops, email updates and newsletters, media outreach, website updates, speakers' bureau, and other activities.</p>

SB 375 Requirement	Date Requirement Met	Outreach Activity/Event
Section 65080(b)(2)(F)(ii) Consultation with congestion management agencies, transportation agencies, and transportation commissions.	Ongoing	SANDAG Board of Directors is forum for these agencies. SANDAG is the Congestion Management Agency for the San Diego region as well as the San Diego County Regional Transportation Commission. Caltrans and both transit operators – San Diego Metropolitan Transit System and North County Transit District – are among the advisory members of the SANDAG Board.
Section 65080(b)(2)(F)(iii) Three workshops throughout the region to provide the public with the information and tools necessary to provide a clear understanding of the issues and policy choices. Each workshop, to the extent practicable, shall include urban simulation computer modeling to create visual representations of the SCS and the alternative planning strategy.	Spring 2015	SANDAG held seven Public Workshops and two Public Hearings on the Draft Regional Plan and SCS in May and June of 2015.

SB 375 Requirement	Date Requirement Met	Outreach Activity/Event
<p>Section 65080(b)(2)(F)(iv) Preparation and circulation of a draft SCS and an alternative planning strategy, if one is prepared, not less than 55 days before adoption of a final regional transportation plan.</p>	<p>55 days before adoption of final Regional Plan</p>	<p>The draft Sustainable Communities Strategy was released on April 24, 2015, which is more than 55 days before adoption of the Regional Plan anticipated in October 2015</p>
<p>Section 65080(b)(2)(F)(v) Two public hearings shall be held. To the maximum extent feasible, the hearings shall be in different parts of the region to maximize the opportunity for participation by members of the public throughout the region.</p>	<p>Spring 2015</p>	<p>SANDAG held two Public Hearings on the Draft Regional Plan and SCS. One of the public hearings was held as part of a regularly scheduled SANDAG meeting on June 12, 2015. The other hearing was held in North County at the offices of the North County Transit District on June 18, 2015.</p>
<p>Section 65080(2)(F)(vi) A process for enabling members of the public to provide a single request to receive notices, information, and updates.</p>	<p>Ongoing - Launched 2013</p>	<p>Dedicated website, email, and phone number established for inquiries and information requests. Process promoted on fact sheets, meeting notices, reports, newsletters, email newsletters, and other materials.</p>

SB 375 Requirement	Date Requirement Met	Outreach Activity/Event
<p>Section 65080(b)(2)(J)(i) Prior to starting the public participation process adopted pursuant to subparagraph (F), the metropolitan planning organization shall submit a description to the state board of the technical methodology it intends to use to estimate the greenhouse gas emissions from its sustainable communities strategy and, if appropriate, its alternative planning strategy.</p>	<p>June 7, 2013</p>	<p>Technical methodology submitted to state board.</p>
<p>Government Code Section 65584.04</p>

BOARD OF DIRECTORS AGENDA

Friday, March 27, 2015

9 a.m. to 12 noon

**SANDAG Board Room
401 B Street, 7th Floor
San Diego**

Beginning in February, the parking garage elevators at Wells Fargo Plaza will undergo a six-month mechanical modernization. During this period, only one garage elevator will be in service. Please allow yourself extra time to make your way up from the garage to the SANDAG offices and Board Room. For those requiring special assistance, please call the SANDAG front desk in advance of any meetings at (619) 699-1900.

AGENDA HIGHLIGHTS

- **DRAFT FY 2016 PROGRAM BUDGET**
- **PROPOSED SANDAG EVALUATION CRITERIA FOR THE FY 2014-2015 CAP-AND-TRADE PROGRAM: AFFORDABLE HOUSING AND SUSTAINABLE COMMUNITIES PROGRAM**
- **SAN DIEGO FORWARD: THE REGIONAL PLAN: PLAN COMPONENTS AND PUBLIC OUTREACH EFFORTS IN SUPPORT OF THE RELEASE OF THE DRAFT REGIONAL PLAN, ITS SUSTAINABLE COMMUNITIES STRATEGY, AND THE ASSOCIATED ENVIRONMENTAL IMPACT REPORT**

PLEASE SILENCE ALL ELECTRONIC DEVICES DURING THE MEETING

**YOU CAN LISTEN TO THE BOARD OF DIRECTORS
MEETING BY VISITING OUR WEBSITE AT SANDAG.ORG**

MESSAGE FROM THE CLERK

In compliance with Government Code §54952.3, the Clerk hereby announces that the compensation for legislative body members attending the following simultaneous or serial meetings is: Executive Committee (EC) \$100, Board of Directors (BOD) \$150, and Regional Transportation Commission (RTC) \$100. Compensation rates for the EC and BOD are set pursuant to the SANDAG Bylaws and the compensation rate for the RTC is set pursuant to state law.

MISSION STATEMENT

The 18 cities and county government are SANDAG serving as the forum for regional decision-making. SANDAG builds consensus, makes strategic plans, obtains and allocates resources, plans, engineers, and builds public transit, and provides information on a broad range of topics pertinent to the region's quality of life.

Welcome to SANDAG. Members of the public may speak to the Board of Directors on any item at the time the Board is considering the item. Please complete a Speaker's Slip, which is located in the rear of the room, and then present the slip to the Clerk of the Board seated at the front table. Members of the public may address the Board on any issue under the agenda item entitled Public Comments/Communications/Member Comments. Public speakers are limited to three minutes or less per person. The Board of Directors may take action on any item appearing on the agenda.

Public comments regarding the agenda can be sent to SANDAG via comment@sandag.org. Please include the agenda item, your name, and your organization. Email comments should be received no later than 12 noon, two working days prior to the Board of Directors meeting. **Any handouts, presentations, or other materials from the public intended for distribution at the Board of Directors meeting should be received by the Clerk of the Board no later than 12 noon, two working days prior to the meeting.**

In order to keep the public informed in an efficient manner and facilitate public participation, SANDAG also provides access to all agenda and meeting materials online at www.sandag.org/meetings. Additionally, interested persons can sign up for e-notifications via our e-distribution list at either the SANDAG website or by sending an email request to webmaster@sandag.org.

SANDAG operates its programs without regard to race, color, and national origin in compliance with Title VI of the Civil Rights Act. SANDAG has developed procedures for investigating and tracking Title VI complaints and the procedures for filing a complaint are available to the public upon request. Questions concerning SANDAG nondiscrimination obligations or complaint procedures should be directed to SANDAG General Counsel, John Kirk, at (619) 699-1997 or john.kirk@sandag.org. Any person who believes himself or herself or any specific class of persons to be subjected to discrimination prohibited by Title VI also may file a written complaint with the Federal Transit Administration.

In compliance with the Americans with Disabilities Act (ADA), SANDAG will accommodate persons who require assistance in order to participate in SANDAG meetings. If such assistance is required, please contact SANDAG at (619) 699-1900 at least 72 hours in advance of the meeting. To request this document or related reports in an alternative format, please call (619) 699-1900, (619) 699-1904 (TTY), or fax (619) 699-1905.

SANDAG agenda materials can be made available in alternative languages. To make a request call (619) 699-1900 at least 72 hours in advance of the meeting.

Los materiales de la agenda de SANDAG están disponibles en otros idiomas. Para hacer una solicitud, llame al (619) 699-1900 al menos 72 horas antes de la reunión.

如有需要, 我们可以把SANDAG议程材料翻译成其他语言.

请在会议前至少 72 小时打电话 (619) 699-1900 提出请求.

SANDAG offices are accessible by public transit. Phone 511 or see 511sd.com for route information. Bicycle parking is available in the parking garage of the SANDAG offices.

BOARD OF DIRECTORS COMMITTEE

Friday, March 27, 2015

ITEM NO.		RECOMMENDATION
+1.	APPROVAL OF MEETING MINUTES +1A. February 13, 2015, Board Policy Meeting Minutes +1B. February 27, 2015, Board Business Meeting Minutes	APPROVE
2.	PUBLIC COMMENTS/COMMUNICATIONS/MEMBER COMMENTS Public comments under this agenda item will be limited to five public speakers. Members of the public shall have the opportunity to address the Board on any issue within the jurisdiction of SANDAG that is not on this agenda. Other public comments will be heard during the items under the heading "Reports." Anyone desiring to speak shall reserve time by completing a "Request to Speak" form and giving it to the Clerk of the Board prior to speaking. Public speakers should notify the Clerk of the Board if they have a handout for distribution to Board members. Public speakers are limited to three minutes or less per person. Board members also may provide information and announcements under this agenda item.	
+3.	ACTIONS FROM POLICY ADVISORY COMMITTEES (Robyn Wapner) This item summarizes the actions taken by the Policy Advisory Committees since the last Board Business Meeting. The Board of Directors is asked to ratify these actions.	APPROVE
CONSENT		
+4.	APPROVAL OF REVISED SOLICITATION VALUE (Laura Coté)* The Board of Directors is asked to authorize the Executive Director to increase capacity of the on-call construction management services contracts.	APPROVE
+5.	BIKE MONTH 2015 (Antoinette Meier) The Board of Directors is asked to adopt Resolution No. 2015-19 in support of May as Bike Month 2015, and to encourage member agencies to approve similar proclamations and promote Bike Month activities, encouraging individuals and organizations to GO by BIKE.	ADOPT
+6.	FY 2014 REQUESTS FOR EXCEPTION TO <i>TransNet</i> EXTENSION ORDINANCE REQUIREMENTS (Lisa Kondrat-Dauphin)* The North County Transit District (NCTD) and the City of National City did not meet certain eligibility requirements as noted in their draft FY 2014 <i>TransNet</i> annual compliance audits. The Transportation Committee recommends that the Board of Directors, acting as the San Diego County Regional Transportation Commission, approve the requests of the NCTD and the City of National City to grant those exceptions to the <i>TransNet</i> Extension Ordinance as permitted under the Extension Ordinance.	APPROVE

- | | | |
|-----|--|-------------|
| +7. | <p>PROPOSED AMENDMENTS TO CONFLICT OF INTEREST CODE (John Kirk)</p> <p>Staff has reviewed the SANDAG Conflict of Interest Code (Code) and determined that updates are needed. The Board of Directors is asked to approve the proposed amendments to the Code.</p> | APPROVE |
| +8. | <p>FY 2016 REGIONAL TRANSIT CAPITAL IMPROVEMENT PROGRAM (Kimberly Monasi)*</p> <p>The Transportation Committee recommends that the Board of Directors: (1) approve the FY 2016 transit Capital Improvement Programs for the San Diego region; (2) approve the submittal of Federal Transit Administration grant applications for the San Diego region; and (3) adopt Resolution No. 2015-22, approving Amendment No. 2 to the 2014 Regional Transportation Improvement Program.</p> | APPROVE |
| +9. | <p>REPORT SUMMARIZING DELEGATED ACTIONS TAKEN BY THE EXECUTIVE DIRECTOR (André Douzjian)*</p> <p>In accordance with various SANDAG Board Policies, this report summarizes certain delegated actions taken by the Executive Director since the last Board of Directors meeting.</p> | INFORMATION |

REPORTS

- | | | |
|------|--|---------|
| +10. | <p>DRAFT FY 2016 PROGRAM BUDGET (Vice Chair Ron Roberts; André Douzjian, Tim Watson)*</p> <p>SANDAG Bylaws require the Board of Directors to approve a preliminary budget by April 1 of each year. The Executive Committee recommends that the Board of Directors approve the Draft FY 2016 Program Budget and authorize distribution of the document to member agencies and other interested parties for review.</p> | APPROVE |
| +11. | <p>PROPOSED FY 2015 PROGRAM BUDGET AMENDMENT: INTERSTATE 5/GILMAN DRIVE BRIDGE PROJECT (San Diego Councilmember Todd Gloria, Transportation Committee Chair; Allan Kosup, Caltrans)*</p> <p>The Transportation Committee recommends that the Board of Directors approve an amendment to the FY 2015 Program Budget to fund the Interstate 5/Gilman Drive Bridge Project.</p> | APPROVE |
| +12. | <p>CALIFORNIA ENERGY COMMISSION GRANT FUNDS: IMPLEMENTATION OF THE PLUG-IN ELECTRIC VEHICLE READINESS PLAN (Solana Beach Mayor Lesa Heebner, Regional Planning Committee Chair; Allison Wood)</p> <p>SANDAG received a notice of proposed award from the California Energy Commission (CEC) to implement recommendations from the San Diego Regional Plug-in Electric Vehicle Readiness Plan. The Regional Planning Committee recommends that the Board of Directors: (1) adopt Resolution No. 2015-18, approving the acceptance of Grant Award ARV-14-036 for \$300,000 from the CEC; and (2) authorize the Executive Director, on behalf of SANDAG, to enter into an Agreement with the CEC to implement recommendations from the San Diego Regional Plug-in Electric Vehicle Readiness Plan.</p> | ADOPT |

+13. **PROPOSED SANDAG EVALUATION CRITERIA FOR THE FY 2014-2015 CAP-AND-TRADE PROGRAM: AFFORDABLE HOUSING AND SUSTAINABLE COMMUNITIES PROGRAM (San Diego Councilmember Todd Gloria, Transportation Committee Chair; Coleen Clementson)** **APPROVE**

The Transportation and Regional Planning Committees recommend that the Board of Directors approve the quantitative criteria used in the *TransNet* Smart Growth Incentive Program capital grants for the evaluation of the full applications invited to apply for the FY 2014-2015 Cap-and-Trade Program: Affordable Housing and Sustainable Communities Program in the San Diego region.

+14A. **FY 2014-2015 CAP-AND-TRADE: PROPOSED TARGETED CAR SHARING AND MOBILITY OPTIONS IN DISADVANTAGED COMMUNITIES PILOT PROJECT (Councilmember Todd Gloria, Transportation Committee Chair; Robyn Wapner)** **APPROVE**

The Board of Directors is asked to approve the submittal of the proposed Car Sharing Pilot Project for the FY 2014-2015 Cap-and-Trade: Targeted Car Sharing and Mobility Options in Disadvantaged Communities Pilot Project Program.

+14B. **FY 2014-2015 CAP-AND-TRADE: AFFORDABLE HOUSING AND SUSTAINABLE COMMUNITIES PROGRAM RESOLUTION (Robyn Wapner)** **ADOPT**

At its February 27, 2015, meeting, the Board of Directors approved the submission of full applications for the South Bay Bus Rapid Transit and Inland Rail Trail projects to the state's cap-and-trade FY 2014-2015 Affordable Housing and Sustainable Communities Program. The full application requires a resolution by the Board of Directors that authorizes and directs the submission of these applications and the execution of an agreement with the state to receive any awarded funds. In accordance with this requirement, the Board of Directors is asked to adopt Resolution No. 2015-23.

+15. **SAN DIEGO FORWARD: THE REGIONAL PLAN: PLAN COMPONENTS AND PUBLIC OUTREACH EFFORTS IN SUPPORT OF THE RELEASE OF THE DRAFT REGIONAL PLAN, ITS SUSTAINABLE COMMUNITIES STRATEGY, AND THE ASSOCIATED ENVIRONMENTAL IMPACT REPORT (San Diego Councilmember Todd Gloria, Transportation Committee Chair; Philip Trom)*** **INFORMATION**

In April 2015, the Board of Directors will be asked to release a draft of San Diego Forward: The Regional Plan, its Sustainable Communities Strategy (SCS), and its Draft Air Quality Conformity Analysis, as well as the accompanying Draft Environmental Impact Report – all for public review and comment. The SCS will be an integral part of the Regional Plan, demonstrating how the regional development pattern, transportation network, policies, and programs can work together to achieve greenhouse gas emission targets for cars and light trucks. Staff will provide an overview of the SCS along with other components of the Regional Plan and the proposed approach for public outreach.

+16. **CLOSED SESSION: CONFERENCE WITH LEGAL COUNSEL – EXISTING LITIGATION - PURSUANT TO GOVERNMENT CODE SECTION 54956.9(a) – CLEVELAND NATIONAL FOREST FOUNDATION ET AL. V. SANDAG (CASE NO. 37-2011-00101593-CU-TT-CTL), AND CREED-21 ET AL. V. SANDAG (CASE NO. 37-2011-00101660-CU-TT-CTL)**

17. CONTINUED PUBLIC COMMENTS

If the five speaker limit for public comments was exceeded at the beginning of this agenda, other public comments will be taken at this time. Subjects of previous agenda items may not again be addressed under public comment.

18. UPCOMING MEETINGS

INFORMATION

The next Board Policy meeting is scheduled for Friday, April 10, 2015, at 10 a.m. The next Board Business meeting is scheduled for Friday, April 24, 2015, at 9 a.m.

19. ADJOURNMENT

+ next to an agenda item indicates an attachment

* next to an agenda item indicates that the Board of Directors also is acting as the San Diego Regional Transportation Commission for that item

BOARD OF DIRECTORS
APRIL 24, 2015

AGENDA ITEM NO. 15-04-1B
ACTION REQUESTED - APPROVE

BOARD OF DIRECTORS DISCUSSION AND ACTIONS
MARCH 27, 2015

Chair Jack Dale (Santee) called the meeting of the SANDAG Board of Directors to order at 9:04 a.m. The attendance sheet for the meeting is attached.

1. APPROVAL OF MEETING MINUTES

Action: Upon a motion by Mayor Sam Abed (Escondido) and a second by Councilmember Lisa Shaffer (Encinitas), the Board of Directors approved the minutes from the February 13, 2015, Board Policy meeting and the February 27, 2015, Board Business meeting. Yes – Chair Dale, Vice Chair Ron Roberts (County of San Diego), Councilmember Lorraine Wood (Carlsbad), Mayor Mary Salas (Chula Vista), Councilmember Mike Woiwode (Coronado), Councilmember Terry Sinnott (Del Mar), Mayor Bill Wells (El Cajon), Councilmember Shaffer, Mayor Abed, Councilmember Jerry Jones (Lemon Grove), Deputy Mayor Chuck Lowery (Oceanside), Mayor Steve Vaus (Poway), Councilmember Lorie Zapf (City of San Diego), Councilmember Chris Orlando (San Marcos), Mayor Lesa Heebner (Solana Beach), Mayor Judy Ritter (Vista), and Supervisor Bill Horn (Chair, County of San Diego) (weighted vote, 100%). No – None (weighted vote, 0%). Abstain – None (weighted vote, 0%). Absent – Imperial Beach, La Mesa, National City, and San Diego B.

2. PUBLIC COMMENTS/COMMUNICATIONS/MEMBER COMMENTS

Chair Dale introduced Mayor Silvano Abarca, City of Playas de Rosarito.

Mayor Abarca shared information about Playas de Rosarito, including tourist attractions and new projects happening within the municipality.

Chair Dale presented Mayor Abarca and Juan Tintos, Advisor for International Relations of Mayor Abarca, with small gifts of appreciation.

Chair Dale presented Councilmember Mona Rios, Metropolitan Transit System (MTS), a proclamation for Stand Up for Transportation Day.

Kimberly Edwards, member of the public, spoke in opposition of the proposed Uptown Regional Bike Project Corridor and asked the Board of Directors to consider recommendations heard at last week's Uptown Planners Meeting.

Carol Wilson, member of the public, spoke in opposition of the proposed Uptown Regional Bike Project Corridor.

Warren Lambert, member of the public, spoke about concerns related to Americans with Disabilities Act compliance on certain transit services.

3. ACTIONS FROM POLICY ADVISORY COMMITTEES (APPROVE)

This item summarized the actions taken by the Policy Advisory Committees since the last Board Business Meeting. The Board of Directors was asked to ratify these actions.

Action: Upon a motion by Mayor Heebner and a second by Mayor Morrison, the Board of Directors approved Item No. 3. Yes – Chair Dale, Vice Chair Roberts, Councilmember Wood, Mayor Salas, Councilmember Woiwode, Councilmember Sinnott, Mayor Wells, Councilmember Shaffer, Mayor Abed, Councilmember Brian Bilbray (Imperial Beach), Councilmember Kristine Alessio (La Mesa), Councilmember Jones, Mayor Ron Morrison (National City), Deputy Mayor Lowery, Mayor Vaus, Councilmember Zapf, Councilmember Orlando, Mayor Heebner, Mayor Ritter, and Supervisor Horn (weighted vote, 100%). No – None (weighted vote, 0%). Abstain – 0 (weighted vote, 0%). Absent – San Diego B.

CONSENT

4. APPROVAL OF REVISED SOLICITATION VALUE (APPROVE)

The Board of Directors was asked to authorize the Executive Director to increase capacity of the on-call construction management services contracts.

5. BIKE MONTH 2015 (ADOPT)

The Board of Directors was asked to adopt Resolution No. 2015-19 in support of May as Bike Month 2015, and to encourage member agencies to approve similar proclamations and promote Bike Month activities, encouraging individuals and organizations to GO by BIKE.

Andy Kopp, Bike San Diego, spoke in favor of the Uptown Regional Bike Project Corridor.

6. FY 2014 REQUESTS FOR EXCEPTION TO *TransNet* EXTENSION ORDINANCE REQUIREMENTS (APPROVE)

The North County Transit District (NCTD) and the City of National City did not meet certain eligibility requirements as noted in their draft FY 2014 *TransNet* annual compliance audits. The Transportation Committee recommended that the Board of Directors, acting as the San Diego County Regional Transportation Commission, approve the requests of the NCTD and the City of National City to grant those exceptions to the *TransNet* Extension Ordinance as permitted under the Extension Ordinance.

7. PROPOSED AMENDMENTS TO CONFLICT OF INTEREST CODE (APPROVE)

Staff has reviewed the SANDAG Conflict of Interest Code (Code) and determined that updates are needed. The Board of Directors was asked to approve the proposed amendments to the Code.

8. FY 2016 REGIONAL TRANSIT CAPITAL IMPROVEMENT PROGRAM (APPROVE)

The Transportation Committee recommended that the Board of Directors: (1) approve the FY 2016 Transit Capital Improvement Programs for the San Diego region; (2) approve the submittal of Federal Transit Administration grant applications for the San Diego region; and (3) adopt Resolution No. 2015-22, approving Amendment No. 2 to the 2014 Regional Transportation Improvement Program.

9. REPORT SUMMARIZING DELEGATED ACTIONS TAKEN BY THE EXECUTIVE DIRECTOR (INFORMATION)

In accordance with various SANDAG Board Policies, this report summarized certain delegated actions taken by the Executive Director since the last Board of Directors meeting.

Action: Upon a motion by Councilmember Woiwode and a second by Councilmember Orlando, the Board of Directors approved Consent Items 4 through 9. Yes – Chair Dale, Vice Chair Roberts, Councilmember Wood, Mayor Salas, Councilmember Woiwode, Councilmember Sinnott, Mayor Wells, Councilmember Shaffer, Mayor Abed, Councilmember Bilbray, Councilmember Alessio, Councilmember Jones, Mayor Morrison, Deputy Mayor Lowery, Mayor Vaus, Councilmember Zapf, Councilmember Orlando, Mayor Heebner, Mayor Ritter, and Supervisor Horn (weighted vote, 100%). No – None (weighted vote, 0%). Abstain – 0 (weighted vote, 0%). Absent – San Diego B.

REPORTS

10. DRAFT FY 2016 PROGRAM BUDGET (APPROVE)

SANDAG Bylaws require the Board of Directors to approve a preliminary budget by April 1 of each year. The Executive Committee recommended that the Board of Directors approve the Draft FY 2016 Program Budget and authorize distribution of the document to member agencies and other interested parties for review.

Vice Chair Roberts introduced the item.

André Douzdjian, Finance Director, presented the item.

Action: Upon a motion by Mayor Abed and a second by Mayor Wells, the Board of Directors approved the Draft FY 2016 Program Budget and authorized distribution of the document to member agencies and other interested parties for review. Yes – Chair Dale, Vice Chair Roberts, Councilmember Wood, Mayor Salas, Councilmember Woiwode, Councilmember Sinnott, Mayor Wells, Councilmember Shaffer, Mayor Abed, Councilmember Bilbray, Councilmember Alessio, Councilmember Jones, Mayor Morrison, Deputy Mayor Lowery, Mayor Vaus, Councilmember Zapf, Councilmember Orlando, Mayor Heebner, Mayor Ritter, and Supervisor Horn (weighted vote, 100%). No – None (weighted vote, 0%). Abstain – 0 (weighted vote, 0%). Absent – San Diego B.

11. PROPOSED FY 2015 PROGRAM BUDGET AMENDMENT: INTERSTATE 5/GILMAN DRIVE BRIDGE PROJECT (APPROVE)

The Transportation Committee recommended that the Board of Directors approve an amendment to the FY 2015 Program Budget to fund the Interstate 5/Gilman Drive Bridge Project.

Mayor Salas, Transportation Committee Vice Chair, introduced the item.

Gary Matthews, UC San Diego Vice Chancellor, spoke in support of the item.

Allan Kosup, Caltrans Corridor Director, presented the item.

Action: Upon a motion by Councilmember Zapf and a second by Mayor Salas, the Board of Directors approved an amendment to the FY 2015 Program Budget to fund the Interstate 5/Gilman Drive Bridge Project. Yes – Chair Dale, Vice Chair Roberts, Councilmember Wood, Mayor Salas, Councilmember Woiwode, Councilmember Sinnott, Mayor Wells, Councilmember Shaffer, Mayor Abed, Councilmember Bilbray, Councilmember Alessio, Councilmember Jones, Mayor Morrison, Deputy Mayor Lowery, Mayor Vaus, Councilmember Zapf, Councilmember Orlando, Mayor Heebner, Mayor Ritter, and Supervisor Horn (weighted vote, 100%). No – None (weighted vote, 0%). Abstain – 0 (weighted vote, 0%). Absent – San Diego B.

12. CALIFORNIA ENERGY COMMISSION GRANT FUNDS: IMPLEMENTATION OF THE PLUG-IN ELECTRIC VEHICLE READINESS PLAN (ADOPT)

SANDAG received a notice of proposed award from the California Energy Commission (CEC) to implement recommendations from the San Diego Regional Plug-in Electric Vehicle Readiness Plan. The Regional Planning Committee recommended that the Board of Directors: (1) adopt Resolution No. 2015-18, approving the acceptance of Grant Award ARV-14-036 for \$300,000 from the CEC; and (2) authorize the Executive Director, on behalf of SANDAG, to enter into an Agreement with the CEC to implement recommendations from the San Diego Regional Plug-in Electric Vehicle Readiness Plan.

Mayor Heebner, Regional Planning Committee Chair, introduced the item.

Allison Wood, Associate Regional Planner, presented the item.

Action: Upon a motion by Mayor Heebner and a second by Councilmember Shaffer, the Board of Directors: (1) adopted Resolution No. 2015-18, approving the acceptance of Grant Award ARV-14-036 for \$300,000 from the CEC; and (2) authorized the Executive Director, on behalf of SANDAG, to enter into an Agreement with the CEC to implement recommendations from the San Diego Regional Plug-in Electric Vehicle Readiness Plan. Yes – Chair Dale, Vice Chair Roberts, Councilmember Wood, Mayor Salas, Councilmember Woiwode, Councilmember Sinnott, Mayor Wells, Councilmember Shaffer, Mayor Abed, Councilmember Bilbray, Councilmember Alessio, Councilmember Jones, Mayor Morrison, Deputy Mayor Lowery, Mayor Vaus, Councilmember Zapf, Councilmember Todd Gloria (City of San Diego), Councilmember Orlando, Mayor Heebner, Mayor Ritter, and Supervisor Horn (weighted vote, 100%). No – None (weighted vote, 0%). Abstain – 0 (weighted vote, 0%). Absent – None.

13. PROPOSED SANDAG EVALUATION CRITERIA FOR THE FY 2014-2015 CAP-AND-TRADE PROGRAM: AFFORDABLE HOUSING AND SUSTAINABLE COMMUNITIES PROGRAM (APPROVE)

The Transportation and Regional Planning Committees recommended that the Board of Directors approve the quantitative criteria used in the *TransNet* Smart Growth Incentive Program capital grants for the evaluation of the full applications invited to apply for the FY 2014-2015 Cap-and-Trade Program: Affordable Housing and Sustainable Communities Program in the San Diego region.

Councilmember Gloria, Transportation Committee Chair, introduced the item.

Coleen Clementson, Principal Regional Planner, presented the item.

Action: Upon a motion by Mayor Heebner and a second by Mayor Abed, the Board of Directors approved the quantitative criteria used in the *TransNet* Smart Growth Incentive Program capital grants for the evaluation of the full applications invited to apply for the FY 2014-2015 Cap-and-Trade Program: Affordable Housing and Sustainable Communities Program in the San Diego region. Yes – Chair Dale, Vice Chair Roberts, Councilmember Wood, Mayor Salas, Councilmember Woiwode, Councilmember Sinnott, Mayor Wells, Councilmember Shaffer, Mayor Abed, Councilmember Bilbray, Councilmember Alessio, Mayor Morrison, Deputy Mayor Lowery, Mayor Vaus, Councilmember Zapf, Councilmember Gloria, Councilmember Orlando, Mayor Heebner, Mayor Ritter, and Supervisor Horn (weighted vote, 100%). No – None (weighted vote, 0%). Abstain – 0 (weighted vote, 0%). Absent – Lemon Grove.

14A. FY 2014-2015 CAP-AND-TRADE: PROPOSED TARGETED CAR SHARING AND MOBILITY OPTIONS IN DISADVANTAGED COMMUNITIES PILOT PROJECT (APPROVE)

The Board of Directors was asked to approve the submittal of the proposed Car Sharing Pilot Project for the FY 2014-2015 Cap-and-Trade: Targeted Car Sharing and Mobility Options in Disadvantaged Communities Pilot Project Program.

Councilmember Gloria introduced the item.

Robyn Wapner, Senior Legislative Analyst, presented the item.

Action: Upon a motion by Councilmember Gloria and a second by Mayor Salas, the Board of Directors approved the submittal of the proposed Car Sharing Pilot Project for the FY 2014-2015 Cap-and-Trade: Targeted Car Sharing and Mobility Options in Disadvantaged Communities Pilot Project Program. Yes – Chair Dale, Vice Chair Roberts, Councilmember Wood, Mayor Salas, Councilmember Woiwode, Councilmember Sinnott, Councilmember Shaffer, Mayor Abed, Councilmember Bilbray, Councilmember Alessio, Councilmember Jones, Mayor Morrison, Deputy Mayor Lowery, Mayor Vaus, Councilmember Zapf, Councilmember Gloria, Councilmember Orlando, Mayor Heebner, Mayor Ritter, and Supervisor Horn (weighted vote, 100%). No – None (weighted vote, 0%). Abstain – 0 (weighted vote, 0%). Absent – El Cajon.

14B. FY 2014-2015 CAP-AND-TRADE: AFFORDABLE HOUSING AND SUSTAINABLE COMMUNITIES PROGRAM RESOLUTION (ADOPT)

Ms. Wapner presented the item.

Action: Upon a motion by Councilmember Orlando and a second by Councilmember Bilbray, the Board of Directors: (1) adopted Resolution No. 2015-23, authorizing and directing the submission of the South Bay *Rapid* Transit and Inland Rail Trail projects to the state's cap-and-trade FY 2014-2015 Affordable Housing and Sustainable Communities Program; and (2) approved the execution of an agreement with the state to receive any awarded funds. Yes – Chair Dale, Vice Chair Roberts, Councilmember Wood, Mayor Salas, Councilmember Woiwode, Councilmember Sinnott, Mayor Wells, Councilmember Shaffer, Mayor Abed, Councilmember Bilbray, Councilmember Alessio, Councilmember Jones, Mayor Morrison, Deputy Mayor Lowery, Mayor Vaus, Councilmember Zapf,

Councilmember Gloria, Councilmember Orlando, Mayor Heebner, Mayor Ritter, and Supervisor Horn (weighted vote, 100%). No – None (weighted vote, 0%). Abstain – 0 (weighted vote, 0%). Absent – None.

15. SAN DIEGO FORWARD: THE REGIONAL PLAN: PLAN COMPONENTS AND PUBLIC OUTREACH EFFORTS IN SUPPORT OF THE RELEASE OF THE DRAFT REGIONAL PLAN, ITS SUSTAINABLE COMMUNITIES STRATEGY, AND THE ASSOCIATED ENVIRONMENTAL IMPACT REPORT (INFORMATION)

In April 2015, the Board of Directors will be asked to release a draft of San Diego Forward: The Regional Plan, its Sustainable Communities Strategy (SCS), and its Draft Air Quality Conformity Analysis, as well as the accompanying Draft Environmental Impact Report – all for public review and comment. The SCS will be an integral part of the Regional Plan, demonstrating how the regional development pattern, transportation network, policies, and programs can work together to achieve greenhouse gas emission targets for cars and light trucks.

Councilmember Gloria introduced the item.

Phil Trom, Senior Regional Planner, provided an overview of the SCS along with other components of the Regional Plan and the proposed approach for public outreach.

Action: This item was presented for information.

Chair Dale adjourned the meeting to closed session at 10:29 a.m.

16. CLOSED SESSION: CONFERENCE WITH LEGAL COUNSEL – EXISTING LITIGATION - PURSUANT TO GOVERNMENT CODE SECTION 54956.9(a) – CLEVELAND NATIONAL FOREST FOUNDATION ET AL. V. SANDAG (CASE NO. 37-2011-00101593-CU-TT-CTL), AND CREED-21 ET AL. V. SANDAG (CASE NO. 37-2011-00101660-CU-TT-CTL)

Chair Dale reconvened the meeting to open session at 11:03 a.m.

John Kirk, General Counsel, reported the following out of closed session: On Item No. 16, the SANDAG Board of Directors was briefed and no reportable action was taken.

17. CONTINUED PUBLIC COMMENTS

There were no continued public comments.

18. UPCOMING MEETINGS

The next Board Policy meeting is scheduled for Friday, April 10, 2015, at 10 a.m. The next Board Business meeting is scheduled for Friday, April 24, 2015, at 9 a.m.

19. ADJOURNMENT

Chair Dale adjourned the meeting at 11:03 a.m.

BOARD OF DIRECTORS AGENDA

**Friday, June 12, 2015
10 a.m. to 12 noon
SANDAG Board Room
401 B Street, 7th Floor
San Diego**

Beginning in February, the parking garage elevators at Wells Fargo Plaza will undergo a six-month mechanical modernization. During this period, only one garage elevator will be in service. Please allow yourself extra time to make your way up from the garage to the SANDAG offices and Board Room. For those requiring special assistance, please call the SANDAG front desk in advance of any meetings at (619) 699-1900.

AGENDA HIGHLIGHTS

- **OVERVIEW OF THE DRAFT ENVIRONMENTAL IMPACT REPORT FOR SAN DIEGO FORWARD: THE REGIONAL PLAN AND ITS SUSTAINABLE COMMUNITIES STRATEGY**
- **PUBLIC HEARING: DRAFT SAN DIEGO FORWARD: THE REGIONAL PLAN AND ITS SUSTAINABLE COMMUNITIES STRATEGY**

A court reporter will be available at the public hearing to record the public testimony: Mazon and Associates, 2631 Imperial Avenue, San Diego, CA 92102, (619) 884-6828

PLEASE SILENCE ALL ELECTRONIC DEVICES DURING THE MEETING

YOU CAN LISTEN TO THE BOARD OF DIRECTORS MEETING BY VISITING OUR WEBSITE AT SANDAG.ORG

MESSAGE FROM THE CLERK

In compliance with Government Code §54952.3, the Clerk hereby announces that the compensation for legislative body members attending the following simultaneous or serial meetings is: Executive Committee (EC) \$100, Board of Directors (BOD) \$150, and Regional Transportation Commission (RTC) \$100. Compensation rates for the EC and BOD are set pursuant to the SANDAG Bylaws and the compensation rate for the RTC is set pursuant to state law.

MISSION STATEMENT

The 18 cities and county government are SANDAG serving as the forum for regional decision-making. SANDAG builds consensus, makes strategic plans, obtains and allocates resources, plans, engineers, and builds public transit, and provides information on a broad range of topics pertinent to the region's quality of life.

Welcome to SANDAG. Members of the public may speak to the Board of Directors on any item at the time the Board is considering the item. Please complete a Speaker's Slip, which is located in the rear of the room, and then present the slip to the Clerk of the Board seated at the front table. Members of the public may address the Board on any issue under the agenda item entitled Public Comments/Communications/Member Comments. Public speakers are limited to three minutes or less per person. The Board of Directors may take action on any item appearing on the agenda.

Public comments regarding the agenda can be sent to SANDAG via comment@sandag.org. Please include the agenda item, your name, and your organization. Email comments should be received no later than 12 noon, two working days prior to the Board of Directors meeting. **Any handouts, presentations, or other materials from the public intended for distribution at the Board of Directors meeting should be received by the Clerk of the Board no later than 12 noon, two working days prior to the meeting.**

In order to keep the public informed in an efficient manner and facilitate public participation, SANDAG also provides access to all agenda and meeting materials online at www.sandag.org/meetings. Additionally, interested persons can sign up for e-notifications via our e-distribution list at either the SANDAG website or by sending an email request to webmaster@sandag.org.

SANDAG operates its programs without regard to race, color, and national origin in compliance with Title VI of the Civil Rights Act. SANDAG has developed procedures for investigating and tracking Title VI complaints and the procedures for filing a complaint are available to the public upon request. Questions concerning SANDAG nondiscrimination obligations or complaint procedures should be directed to SANDAG General Counsel, John Kirk, at (619) 699-1997 or john.kirk@sandag.org. Any person who believes himself or herself or any specific class of persons to be subjected to discrimination prohibited by Title VI also may file a written complaint with the Federal Transit Administration.

In compliance with the Americans with Disabilities Act (ADA), SANDAG will accommodate persons who require assistance in order to participate in SANDAG meetings. If such assistance is required, please contact SANDAG at (619) 699-1900 at least 72 hours in advance of the meeting. To request this document or related reports in an alternative format, please call (619) 699-1900, (619) 699-1904 (TTY), or fax (619) 699-1905.

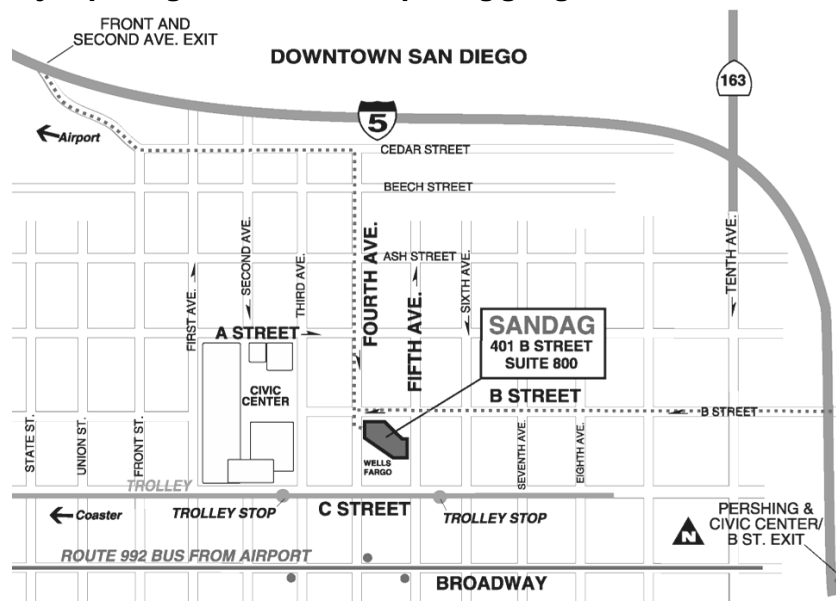

SANDAG agenda materials can be made available in alternative languages. To make a request call (619) 699-1900 at least 72 hours in advance of the meeting.

Los materiales de la agenda de SANDAG están disponibles en otros idiomas. Para hacer una solicitud, llame al (619) 699-1900 al menos 72 horas antes de la reunión.

如有需要, 我们可以把SANDAG议程材料翻译成其他语言.

请在会议前至少 72 小时打电话 (619) 699-1900 提出请求.

SANDAG offices are accessible by public transit. Phone 511 or see 511sd.com for route information. Bicycle parking is available in the parking garage of the SANDAG offices.

BOARD OF DIRECTORS

Friday, June 12, 2015

ITEM NO.

RECOMMENDATION

1. PUBLIC COMMENTS/COMMUNICATIONS/MEMBER COMMENTS

Public comments under this agenda item will be limited to five public speakers. Members of the public shall have the opportunity to address the Board on any issue within the jurisdiction of SANDAG that is not on this agenda. Other public comments will be heard during the items under the heading "Reports." Anyone desiring to speak shall reserve time by completing a "Request to Speak" form and giving it to the Clerk of the Board prior to speaking. Public speakers should notify the Clerk of the Board if they have a handout for distribution to Board members. Public speakers are limited to three minutes or less per person. Board members also may provide information and announcements under this agenda item.

REPORTS

+2. OVERVIEW OF THE DRAFT ENVIRONMENTAL IMPACT REPORT FOR SAN DIEGO FORWARD: THE REGIONAL PLAN AND ITS SUSTAINABLE COMMUNITIES STRATEGY (San Diego Councilmember Todd Gloria, Transportation Committee Chair; Rob Rundle, Andrew Martin)

INFORMATION

On May 21, 2015, SANDAG released the Draft Environmental Impact Report (EIR) for San Diego Forward: The Regional Plan and its Sustainable Communities Strategy for a 55-day public review and comment period. Staff will provide the Board of Directors with an overview of the Draft EIR.

+3. PUBLIC HEARING: DRAFT SAN DIEGO FORWARD: THE REGIONAL PLAN AND ITS SUSTAINABLE COMMUNITIES STRATEGY (San Diego Councilmember Todd Gloria, Transportation Committee Chair; Philip Trom)

DISCUSSION

The Board of Directors is asked to accept public testimony on the Draft San Diego Forward: The Regional Plan (Draft Regional Plan) and its Sustainable Communities Strategy (SCS). The public comment period for the Draft Regional Plan, its SCS, and the Draft Environmental Impact Report will close on July 15, 2015.

4. CONTINUED PUBLIC COMMENTS

If the five speaker limit for public comments was exceeded at the beginning of this agenda, other public comments will be taken at this time. Subjects of previous agenda items may not again be addressed under public comment.

5. UPCOMING MEETINGS

INFORMATION

The next Board Business meeting is scheduled for Friday, June 26, 2015, at 9 a.m.

6. ADJOURNMENT

**BOARD OF DIRECTORS
JUNE 12, 2015**

ACTION REQUESTED – INFORMATION

**OVERVIEW OF THE
DRAFT ENVIRONMENTAL IMPACT REPORT FOR
SAN DIEGO FORWARD: THE REGIONAL PLAN AND ITS
SUSTAINABLE COMMUNITIES STRATEGY**

File Number 3102000

Introduction

On May 21, 2015, SANDAG released the Draft Environmental Impact Report (EIR) for the Draft San Diego Forward: The Regional Plan (Regional Plan) (and its Sustainable Communities Strategy [SCS]) for a 55-day public review and comment period. Prepared in accordance with the California Environmental Quality Act (CEQA), the Draft EIR is designed to inform the Board of Directors and the public about the significant environmental impacts of the Regional Plan and its SCS, and to identify mitigation measures and alternatives to avoid or reduce those significant impacts. This report provides an overview of the Draft EIR and its contents, with emphasis on the analysis of certain environmental issues: air quality, greenhouse gas (GHG) emissions, transportation, mitigation, and alternatives. It also summarizes the process that will be used to present the Final EIR to the Board of Directors for its consideration prior to making a decision on the adoption of the Regional Plan in fall 2015.

Discussion

Contents of the Draft EIR

The Draft EIR is a program-level document that analyzes the impacts of the entire Regional Plan – both its planned investments in transportation network improvements and programs, as well as the San Diego region’s forecasted growth and land use pattern. These characteristics of the Regional Plan are described in the Project Description chapter of the Draft EIR. The impact analysis uses the best available information to project future environmental conditions under Regional Plan implementation out to the year 2050, and then compares them to existing environmental conditions in the year 2012, the starting point for preparation of the Regional Plan and this EIR.

In addition to the year 2050, the impact analysis looks at the years 2020 and 2035 in order to identify the incremental impacts to the environment that would occur as the Regional Plan is implemented over the next 35 years. Given the uncertainty and limitations inherent in predicting the environmental impacts of varied transportation capital projects, operational improvements, and programs, as well as land use changes resulting from the region’s forecasted growth across a long-term period for the entire region, the projections of future environmental conditions are

indications of relative changes that would be caused by the Regional Plan, based on the best information and tools that are available today; they are not precise predictions.

The impact analysis identifies significance criteria used to determine when the future change in the environment caused by the Regional Plan constitutes a “significant” impact. Where the analysis shows that the Regional Plan would cause significant impacts, the Draft EIR identifies mitigation measures that, if adopted, would avoid or substantially lessen the significant impact. In addition, a separate Draft EIR chapter identifies and evaluates alternative transportation and land use assumptions that would avoid or substantially lessen the significant impacts of implementing the Regional Plan, while still meeting the Regional Plan’s basic objectives.

The Draft EIR impact analysis addresses the impacts of the Regional Plan’s regional growth and land use change, and transportation network improvements and programs for 2020, 2035, and 2050 for the following 16 distinct resource areas:

- Aesthetics and Visual Resources
- Agricultural and Forestry Resources
- Air Quality
- Biological Resources
- Cultural and Paleontological Resources
- Energy
- Geology, Soils, and Mineral Resources
- GHG Emissions
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use
- Noise and Vibration
- Population and Housing
- Public Services and Utilities
- Transportation
- Water Supply

In addition to the impact analysis and alternatives analysis, the Draft EIR also addresses other topics required by CEQA, including cumulative impacts, growth inducement, and significant irreversible impacts.

While all aspects of the Draft EIR are important to understand the environmental impacts of implementing the Regional Plan, the following topics have been the subject of the majority of the discussion by the public: air quality, GHG emissions, transportation, mitigation, and alternatives.

Air Quality

The Draft EIR identifies five significance criteria to cover various issues related to air quality. Of particular note are significance criteria AQ-2 and AQ-4, which address the health impacts of exposure to particulate emissions and toxic air contaminant emissions, respectively. Both AQ-2 and AQ-4 account for emissions generated by the Regional Plan’s transportation network improvements and programs, and also where people within the land use patterns in the Regional Plan would be exposed to substantial pollutant concentrations. As described previously, both analyses use the best available tools and information, but given modeling limitations and the uncertainty of estimates, the results show relative exposure to pollution rather than precise predictions.

Health Impacts from Exposure to Particulate Emissions

In AQ-2, the Draft EIR identifies the areas along the San Diego region's freeways and highways where, under Regional Plan implementation, localized concentrations of particulate matter (called PM₁₀ and PM_{2.5}) would exceed air quality standards. The Draft EIR estimates the number of residents, housing units, and schools in these areas, and describes the health impacts associated with short-term and long-term exposure to PM₁₀ and PM_{2.5}, including aggravated asthma, chronic bronchitis, and decreased lung function. By 2050, the Draft EIR estimates that approximately 8,000 people, 2,500 housing units, and 5 schools would be located in areas in which PM₁₀ concentrations exceed the 24-hour California standard. These areas are located throughout the region, including along Interstate 15 in Fallbrook, State Route 125 in Otay Mesa, Interstate 805 in southeastern San Diego, Interstate 5 (I-5) near State Route 56, and State Route 78 near I-5.

Cancer Risk and Noncancer Health Impacts from Exposure to Toxic Air Contaminants

In AQ-4, the Draft EIR identifies locations where the Regional Plan is expected to expose people to substantial concentrations of toxic air contaminants (TACs), the resulting cancer risks, and noncancer health impacts. To conduct this analysis, SANDAG asked the following three questions, which are used in EIRs prepared by agencies throughout California:

1. Does the Regional Plan increase cancer risk by more than 10 chances in 1 million compared to the total risk in 2012?
2. Does the Regional Plan expose sensitive receptors¹ to total cancer risks above 100 in 1 million?
3. Does the Regional Plan increase noncancer health impacts as measured by a total hazard index above 1.0?

The cancer risk of a given area is a measure of any one person's likelihood of contracting cancer; it is not a measure of how many people will contract cancer. For example, for an area with an increase in cancer risk of 10 in 1 million, any one person's likelihood of contracting cancer would increase by 10 chances in 1 million (i.e., increased likelihood of contracting cancer would increase by 0.001 percent); for an area with a total cancer risk of 100 in 1 million, any one person's likelihood of contracting cancer is 100 in 1 million, or 0.01 percent. In estimating any one person's cancer risk, the analysis assumes, in accordance with State of California guidelines, that person would stay in the same place for 30 years, 7 days a week, 24 hours a day, 350 days a year. The analysis follows the most recent state guidance and utilizes conservative assumptions to calculate exposure to TACs. Accordingly, it is designed to provide a conservative estimate of cancer risk and likely overestimates actual impacts that would occur.

Similar to AQ-2, the Draft EIR estimates the number of residents, housing units, and schools in these areas. By 2050, the Draft EIR estimates that approximately 220,000 people, more than 74,000 housing units, and 93 schools would be exposed to increases in cancer risk that exceed 10 chances in 1 million; about 164,000 people, more than 58,000 housing units, and 86 schools are expected to be exposed to total cancer risks that exceed 100 chances in 1 million. By 2050, these

¹ Sensitive receptors include but are not limited to hospitals, schools, daycare facilities, elderly housing, and convalescent facilities. These are areas where the occupants are thought to be more susceptible to the adverse effects of exposure to toxic chemicals, pesticides, and other pollutants.

areas would be located throughout the region along significant portions of most major freeways and highways.

Greenhouse Gas Emissions

The Draft EIR identifies four significance criteria to address GHG emissions impacts, including GHG-2 and GHG-3, in which the analysis concludes the Regional Plan would not conflict with Assembly Bill 32 (Pavley, 2002) or Senate Bill 375 (Steinberg, 2008). Of particular note is significance criterion GHG-4, which examines whether the Regional Plan is inconsistent with the goals of two Executive Orders: one which calls for reduction of California's GHG emissions to 40 percent below 1990 levels by 2030, and the other for 80 percent reduction below 1990 levels by 2050 (EO-B-30-15 and EO S-3-05). While noting that there is no requirement that the San Diego region's emissions be reduced by the same percentages ("equal share") called for in the Executive Orders' statewide goals for all emission sectors, the analysis identifies 2035 and 2050 emissions reduction reference points for the region using the Executive Orders' statewide reduction goals. It concludes that while total regional emissions in 2035 and 2050 would be about 28 percent and 27 percent lower, respectively, than the 2012 emissions level, total GHG emissions would be higher than the region's "equal share" of statewide emissions reduction goals expressed in the Executive Orders. Therefore, the region's total GHG emissions levels are considered significant impacts in 2035 and 2050 under GHG-4.

Transportation

The Draft EIR identifies four significance criteria to address transportation issues. Of particular note is significance criterion T-1, which addresses changes in per capita and total Vehicle Miles Traveled (VMT). While noting that average daily VMT per capita decreases under the Regional Plan, from about 25.2 miles per day in 2012 to 23.4 miles per day in 2050, the analysis reports that total VMT would increase under the Regional Plan from about 79 million miles per year in 2012 to just over 95 million miles per year in 2050, an increase of about 20 percent, which is lower than the forecasted population increase of 29 percent by 2050. While population growth is the main cause of the total VMT increase and the amount of driving per person would decrease under the Plan, the analysis nevertheless concludes that the total VMT increases are considered a significant impact.

Mitigation Measures to Reduce Significant Impacts

For each issue area analyzed in the Draft EIR, a conclusion is made to indicate if the Regional Plan would have a significant impact on the environment. For those issue areas where a significant impact has been identified, mitigation measures or project alternatives are identified to reduce the significant impact. For the issue areas described above (Air Quality, GHG Emissions, and Transportation), many of the mitigation measures outlined in the Draft EIR would relate to all three impact areas due to their interconnected nature. Described in detail in the Draft EIR, some of the mitigation measures include:

- Modify grant criteria to award projects that reduce GHG emissions
- Adopt a Mobility Hub Strategy to reduce GHG emissions
- Fund electric vehicle charging infrastructure
- Adopt Plan for Alternative Transportation Fuels

- Assist local agencies with the preparation of climate action plans

In addition to the measures outlined above, the Draft EIR identifies measures that SANDAG will implement to reduce impacts associated with construction projects. Further, the Draft EIR identifies mitigation measures that local agencies can and should adopt during planning, design, and implementation of the projects they approve. SANDAG has identified these measures, because the Regional Plan addresses impacts of regional growth and transportation, which includes implementation of projects over which SANDAG will not have authority.

Alternatives

In Chapter 6.0, the Draft EIR examines alternative transportation and land use assumptions that would avoid or substantially lessen the significant impacts of implementing the Regional Plan, while still meeting the Regional Plan's basic objectives. In addition to the CEQA-required 'No Project' Alternative, the Draft EIR considers seven alternatives in detail (Attachment 1). The characteristics of the alternatives are in large part based on major transportation investments and policy options that members of the public and stakeholders suggested would lead to major reductions in VMT and related reductions in GHG emissions and air quality impacts, including but not limited to:

- Advancing public transit (capital and operations) and active transportation investments to 2025 (the first 10 years of the Regional Plan)
- Including investments from the unconstrained transit network (e.g., investments for which available funding was not identified in the Regional Plan)
- Delaying and eliminating general purpose highway and Managed Lane investments
- Converting existing general purpose lanes to Managed Lanes
- Providing more compact land use patterns
- Substantially lowering transit fares
- Substantially increasing the price of parking
- Substantially increasing the cost of driving

Alternative 5D is considered the environmentally superior alternative, and would achieve the greatest reductions in total VMT, GHG emissions, and air pollutant emissions, although total VMT would still increase by about 7.2 million miles per year, or 9 percent, by 2050, compared to an increase of about 15.7 million miles per year, or 20 percent, under the Regional Plan. To be implemented, however, Alternative 5D would require a major state road pricing policy change, and major changes in land use policies, parking policies, and transit funding. The results indicate that total reductions in VMT below the 2012 level are not feasible in light of the forecasted increase of nearly one million more people in the region by 2050.

Process to Complete the Final EIR

The public review period for the Draft EIR ends on July 15, 2015. At that time, SANDAG will prepare written responses to all comments received regarding the adequacy of the Draft EIR. SANDAG will make any appropriate modifications to the Draft EIR, and along with the public comments and responses, will present the information to the Board of Directors for its consideration prior to making a decision on the adoption of The Regional Plan.

GARY L. GALLEGOS
Executive Director

Attachment: 1. Summary of Action Alternatives Considered in the EIR

Key Staff Contacts: Rob Rundle, (619) 699-6949, rob.rundle@sandag.org
Andrew Martin, (619) 595-5375, andrew.martin@sandag.org

**Summary of Action Alternatives Considered in the Draft EIR for the
Regional Plan and Sustainable Communities Strategy (SCS)**

Alternative	Assumptions ¹				
	A. Transit ²	B. Active ³	C. Managed Lanes ⁴	D. Highway ⁵	E. Land Use
2	All revenue constrained by 2025	All projects by 2025	If support <i>Rapid</i> , same as column A. If not, same as column D.	No change	SCS Land Use
3	All revenue constrained by 2025	All projects by 2025	If support <i>Rapid</i> , same as column A. If not, same as column D.	Delay all to 2050	SCS Land Use
4	All revenue constrained and unconstrained by 2025	All projects by 2025	If support <i>Rapid</i> , same as column A. If not, same as column D. Reduce scope of MLs: Eliminate proposed increases to 4ML where 2ML already exist, reduce proposed increases to 4ML to 2ML	Eliminate	Smart Growth Area Intensification
5A	All revenue constrained and unconstrained by 2025	All projects by 2025	Eliminate. Convert existing general purpose lanes to MLs to operate proposed <i>Rapid</i> routes.	Eliminate	SCS Land Use
5B	Same as Alternative 5A				Dense Cores
5C	Same as Alternative 5A + New Transit and Parking Policies				Dense Cores
5D	Same as Alternative 5A + New Transit and Parking Policies + Increased Auto Operating Cost				Dense Cores

¹ Each action alternative makes the following assumptions: Advance Urban Core bus route 10-minute all-day frequency improvements to 2025 (2035 under proposed Regional Plan). New toll lanes remain the same as the proposed Regional Plan. Removal of tolls on State Route 125 remains the same as the proposed Regional Plan.

² Transit = COASTER, SPRINTER, Trolley, *Rapid*, Streetcar, San Marcos Shuttle, Airport Express, Intermodal, and Other (vehicles, system rehabilitation, regulatory compliance, park-and-ride).

³ Active = Regional Bike Network Project List.

⁴ Managed Lanes (ML) = managed lanes and managed lane connectors.

⁵ Highway = general purpose lanes, operational improvements, freeway connectors.

**BOARD OF DIRECTORS
JUNE 12, 2015**

ACTION REQUESTED - DISCUSSION

**PUBLIC HEARING: DRAFT SAN DIEGO FORWARD:
THE REGIONAL PLAN AND ITS
SUSTAINABLE COMMUNITIES STRATEGY**

File Number 3102000

Introduction

The Draft San Diego Forward: The Regional Plan (Regional Plan) combines the big-picture vision for how our region will grow over the next 35 years, with an implementation program to help make that vision a reality. On April 24, 2015, the Board of Directors accepted the Draft Regional Plan, including its Sustainable Communities Strategy (SCS), and Draft Air Quality Conformity Determination (AQCD) for distribution for public review and comment. The Draft Environmental Impact Report (EIR) was released for public review and comment on May 21, 2015. The close of the public comment period for the Draft Regional Plan and Draft EIR is July 15, 2015.

Two public hearings in June will provide additional opportunity for public comment on the Draft Regional Plan, its SCS, and Draft AQCD. They include today's public hearing at SANDAG and one on June 18, 2015, at 11:30 a.m. in the North County Transit District (NCTD) Board Room. Attachment 1 provides the dates, times, and locations of the public hearings.

Discussion

Draft San Diego Forward: The Regional Plan

The Draft Regional Plan and its SCS outline nearly \$204 billion in transportation investments, paid for by local, state, and federal tax dollars. The investment strategy focuses heavily on expanding public transit and active transportation (biking and walking), while also reconfiguring existing highways to promote carpooling, public transit, and other alternatives to driving alone.

All transportation improvements outlined in the Draft Regional Plan are designed to serve new patterns of land use – a future with increasingly compact communities that demand a mix of easy-to-use and efficient public transit, more opportunities to walk and bike, and more efficient roadways.

Meeting these demands will support healthier communities, while protecting the environment and preserving more open space. Air quality has improved significantly over the past four decades, and the transportation investments detailed in the Regional Plan, coupled with improvements in fuel and vehicle technologies, will continue to help improve air quality throughout the San Diego region while lowering greenhouse gas emissions.

Public Outreach and Involvement

To obtain public input on the development of the Draft Regional Plan and its SCS, a broad range of media and communication avenues are being utilized to provide information, solicit participation and input, and allow for ongoing feedback and updates. In May, SANDAG hosted a series of seven public meetings throughout the San Diego region to obtain public input. Spanish translation was available at all of the workshops, and one workshop was conducted entirely in Spanish. Three workshops also were streamed live over the internet, allowing for remote access. The workshops schedule was as follows:

May 2015 Public Meetings on the Draft Regional Plan and its SCS

Date	Location	Venue	Time
Tuesday, May 12th	North County Inland	Escondido City Hall	6 to 8:30 p.m.
Wednesday, May 13th	East County	La Mesa Community Center	6 to 8:30 p.m.
Thursday, May 14th	Central	Caltrans District 11 Headquarters	1 to 3:30 p.m.
Wednesday, May 20th	North County Coastal	Oceanside City Hall	6 to 8:30 p.m.
Thursday, May 21st	South County	Casa Familiar	6 to 8:30 p.m.
Wednesday, May 27th	Mid-City/Southeast	Jacobs Center	6 to 8:30 p.m.
Thursday, May 28th	Central	University Town Center Forum Hall	6 to 8:30 p.m.

Simultaneous to SANDAG staff efforts, Community Based Organizations working with SANDAG to engage disadvantaged populations (lower-income, senior, and minority communities) are conducting outreach throughout the region.

Next Steps

At the June public hearings, comments may be provided in person and directly to the Board of Directors or its public meeting officer. Until July 15, 2015, the public also can make comments using the following methods:

- Online at SDForward.com
- Telephone at (619) 699-1934, toll free (877) 277-5736, and TTY (619) 699-1904
- Fax to (619) 699-1905
- Mail to:

Attn: Regional Plan
401 B Street, Suite 800
San Diego, CA 92101

- In person at the SANDAG offices at the address above
- Email to sdforward@sandag.org

The anticipated major milestones for the Draft Regional Plan, its SCS, and Draft EIR include the following:

- June 18, 2015, 11:30 a.m.: Public hearing overseen by a SANDAG public hearing officer at the NCTD, Board Room, 810 Mission Avenue, Oceanside, CA 92054
- July 15, 2015: Close of public comment period for the Draft Regional Plan and its SCS
- Fall 2015: Board of Directors certifies Final EIR, approves air quality conformity finding, and adopts Final Regional Plan and its SCS

Note: The Draft Regional Plan, SCS, and Appendices may be obtained from the SANDAG website at www.sandag.org or from the San Diego Forward: The Regional Plan website at www.sdfoward.com. CDs of the entire document are available free of charge by contacting the SANDAG Public Information Office at (619) 699-1950. Copies of the Draft Regional Plan and Appendices A through C in printed format may be purchased for the cost of reproduction.

Provide Your Opinion on the Plan for our Region's Future

San Diego Forward: The Regional Plan – Public Hearings

For almost three years now, you — community members, stakeholders, and local agencies — have helped the San Diego Association of Governments (SANDAG) develop San Diego Forward: The Regional Plan.

Your input helped shape the Draft Regional Plan's vision, goals, and policy objectives as well as the transportation investments that will serve the region for many years to come.

The Draft Regional Plan proposes a strategy for a more sustainable future which includes investing in transportation projects that will provide people more travel choices, protecting the environment, creating healthy communities, and stimulating the economy.

The SANDAG Board released the Draft Regional Plan on April 24, 2015. A series of workshops were held in May that provided the public a chance to learn about the Draft Regional Plan and provide comments on the record. Additionally, SANDAG has scheduled two public hearings in June to give everyone a chance to make comments directly to the Board and SANDAG staff. The first hearing will occur during a SANDAG Board meeting and the second hearing will occur in front of a SANDAG hearing officer in the North County Transit District board room.

SANDAG is offering two additional chances for the public to provide oral and written comment on the Draft Regional Plan, in addition to its Sustainable Communities Strategy, the Draft Environmental Impact Report, and the Draft Air Quality Conformity Analysis.

Public Hearing Dates

Central

June 12, 10 a.m.

SANDAG Board meeting
401 B Street, Suite 800
San Diego, CA 92101
Hearing conducted by SANDAG Board

North County

June 18, 11:30 a.m.

North County Transit District Board Room
810 Mission Avenue
Oceanside, CA 92054
Hearing conducted by SANDAG public meeting officer

If you require translation assistance or a disability accommodation assistance in order to participate, please contact SANDAG at (619) 699-1900 at least 72 hours in advance of the meeting. TTY: (619) 699-1904

All locations are transit accessible. Call 511 or visit 511sd.com/transit for route information.

Submit Your Comments

Comments on the Draft Regional Plan also may be submitted through the following outlets:

- Via SDForward.com
- Directly through email at SDForward@sandag.org
- Via telephone at (619) 699-1934, toll free (877) 277-5736, and TTY (619) 699-1904
- Via fax at (619) 699-1905
- Through the mail to Attention: Regional Plan. SANDAG offices at 401 B Street, Suite 800, San Diego, CA 92101
- In person by dropping off written comments to SANDAG offices at 401 B Street, Suite 800, San Diego, CA 92101

Brinde su opinión sobre el plan para el futuro de nuestra región

San Diego Forward: El Plan Regional – Audiencia Pública

Durante casi tres años, usted — miembros de la comunidad, partes interesadas y agencias locales — ayudó a la Asociación de Gobiernos de San Diego (SANDAG) a desarrollar San Diego Forward: El Plan Regional

Sus comentarios ayudaron a darle forma a la visión, las metas y los objetivos de las políticas del Borrador del Plan Regional, así como a las inversiones en transporte que ayudarán a la región por muchos años venideros.

El Borrador del Plan Regional propone una estrategia para un futuro más sustentable, que incluye inversiones en proyectos de transporte que le brindarán a la gente más opciones de viaje y, al mismo tiempo, protegerán el medio ambiente, crearán comunidades saludables y estimularán la economía.

La Mesa Directiva de SANDAG publicó el Borrador del Plan Regional el 24 de abril de 2015. Una serie de talleres se llevaron a cabo en mayo que dieron al público la oportunidad de saber más sobre el Borrador del Plan Regional y brindar comentarios.

Adicionalmente, SANDAG ha programado dos audiencias públicas en junio para dar a todos la oportunidad de brindar opiniones directamente a la Mesa Directiva y al personal de SANDAG. La primera audiencia se llevará a cabo durante una junta de la Mesa Directiva de SANDAG y la segunda audiencia se llevará a cabo frente a un oficial de audiencia de SANDAG en la sala de juntas en North County Transit District.

SANDAG está ofreciendo dos oportunidades adicionales al público para que brinde comentarios orales y escritos sobre el Borrador del Plan Regional, aunado a su Estrategia de Comunidades Sustentables, el Borrador del Reporte de Impacto Ambiental, y el Análisis de Conformidad de Calidad del Aire.

SANDAG

San Diego
FORWARD
The Regional Plan

Draft Environmental Impact Report
June 12, 2015

Scope and Content of Draft EIR

- Forecasted growth and land use pattern
- Transportation network improvements and programs
- Three horizon years (2020, 2035, 2050)
- Significance Thresholds
- Mitigation Measures
- Plan Alternatives

SANDAG 2 

Resource Areas Analyzed

- Aesthetics and Visual Resources
- Agricultural and Forestry Resources
- Air Quality
- Biological Resources
- Cultural and Paleontological Resources
- Energy
- Geology, Soils, and Mineral Resources
- Greenhouse Gas Emissions
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use
- Noise and Vibration
- Population and Housing
- Public Services and Utilities
- Transportation
- Water Supply

Air Quality

- Five significance criteria, including:
 - AQ-2: health impacts from exposure to particulate matter emissions (PM_{10} and $PM_{2.5}$)
 - AQ-4: cancer risk from exposure to toxic air contaminants (TACs)
- Based on best available information and modeling tools
- Results are indications of relative changes; they are not precise predictions

Air Quality (AQ-2)

AQ-2: Would the Plan violate any air quality standard or contribute to an existing or projected air quality violation?

- Where would standards for particulates be exceeded?
- How many people would be exposed?
- What health impacts would result?

Air Quality (AQ-2)

Maximum 24-hour PM₁₀ violations in 2050

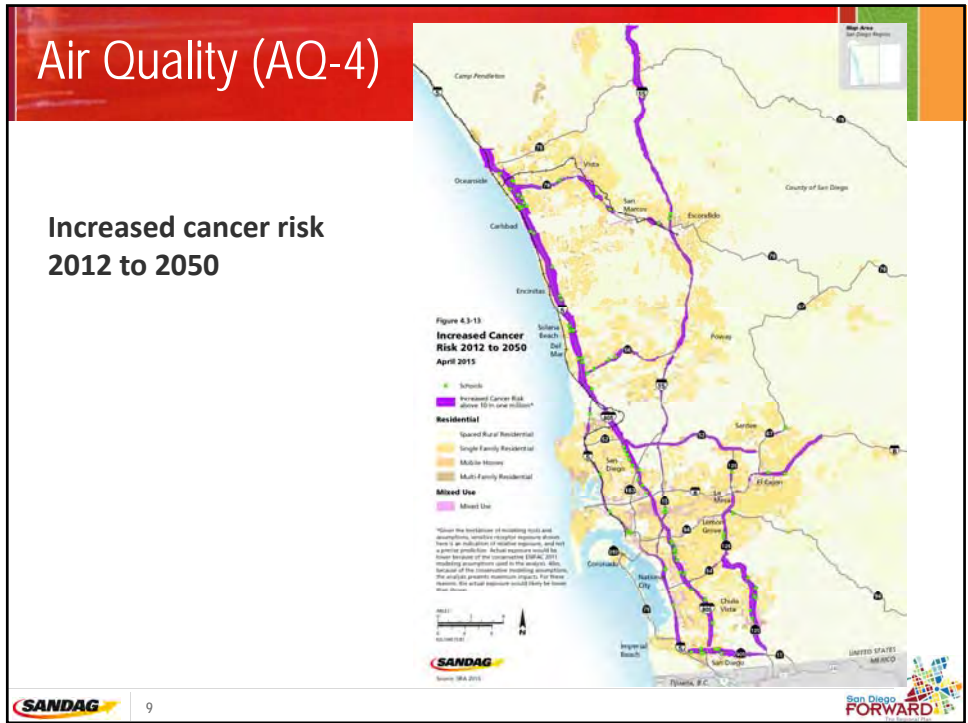

Air Quality (AQ-4)

AQ-4: Would the Plan expose sensitive receptors to substantial pollutant concentrations?

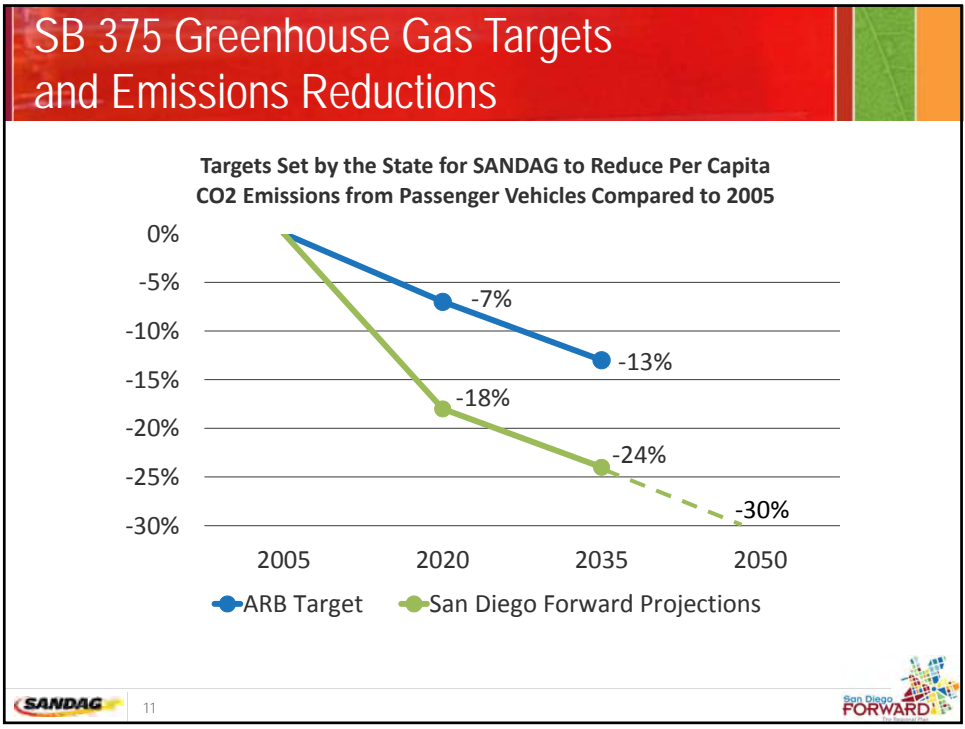

- Expose people to **increased** cancer risk greater than 10 chances in 1 million?
- Expose people to **total** cancer risk greater than 100 chances in 1 million?
- Increase non-cancer health impacts?

Air Quality (AQ-4)

- What cancer risk means:
 - Any one person's likelihood of contracting cancer
 - It is not a measure of how many people will contract cancer
- For example:
 - Increased cancer risk of 10 in 1 million means any one person's likelihood of contracting cancer increases by 10 chances in 1 million, or 0.001%
 - It does not mean 10 people will get cancer

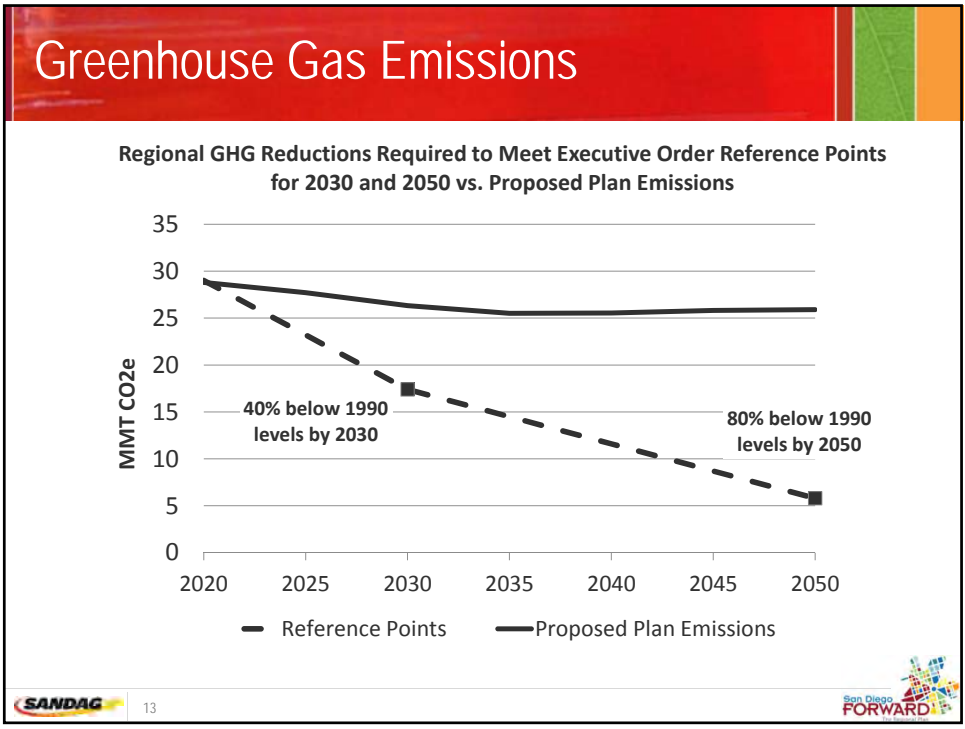

- ## GHG Emissions
- Four significance criteria, including:
- GHG-1: Increase emissions over 2012 levels
 - GHG-2: Conflict with AB 32, SANDAG Climate Action Strategy, or local climate plans
 - Reduce California emissions to 1990 levels by 2020
 - GHG-3: Conflict with SB 375 GHG targets
 - GHG-4: Be inconsistent with governor’s executive order goals
 - Order S-3-05: Reduce California’s emissions to 80 percent below the 1990 level by 2050
 - Order B-30-15: Reduce California’s emissions to 40 percent below 1990 level by 2030
- SANDAG 10 San Diego FORWARD

GHG Emissions (GHG-4)

- *GHG-4: Would the Plan be inconsistent with the state’s ability to achieve the Executive Order B-30-15 and S-3-05 goals of reducing California’s GHG emissions to **40 percent below 1990 levels by 2030** and **80 percent 1990 levels by 2050**?*
- Identify regional “reference points” for 2035 and 2050 based on “equal share” of statewide goals
- No requirement for regions’ to achieve “equal share” of statewide goals

SANDAG 12 San Diego FORWARD

Transportation (T-1)

T-1: Would the Plan increase average vehicle miles traveled per capita or total vehicle miles traveled?

- Amount of driving per person would decrease under the Plan
- Total VMT would increase, mainly because of population growth

SANDAG 14
San Diego FORWARD

Mitigation Measures

- Modify grant criteria to award projects that reduce GHG emissions
- Adopt a mobility hub strategy to reduce GHG emissions
- Assist local agencies with the preparation of climate action plans
- Fund electric vehicle charging infrastructure
- Adopt a plan for alternative transportation fuels

Alternatives Considered in Detail

- Complete all public transit and active transportation projects by 2025
- Include “unconstrained” transit projects in transit network
- Delay or eliminate general purpose highway lanes and new Managed Lanes
- Convert general purpose lanes to Managed Lanes
- Plan for more compact land use pattern
- Lower transit fares
- Increase cost of parking
- Increase cost of driving

"Environmentally Superior" Alternative 5D

- More concentrated land use
- All revenue constrained/unconstrained transit by 2025
- All active transportation projects by 2025
- No new Managed Lane investments
- No new highway investments
- Convert general purpose lanes to Managed Lanes where Rapid bus will operate
- Cut transit fares in half
- Increase auto operating costs by 50 percent
- Increase transit frequencies
- Double cost of parking

Process to Complete Final EIR

- 55 day review period ends July 15
- Written responses to all comments
- Final EIR for Board consideration in fall 2015

sandag.org/SanDiegoForward

19

**Southeastern San Diego Intermodal Transit Station
SANDAG, June 12, 2015**

Robert C. Leif, Ph.D.

rleif@rleif.com, 3345 Hopi Place, San Diego, CA 92117

In a large, continuing study of upward mobility based at Harvard, commuting time has emerged as the single strongest factor in the odds of escaping poverty. The longer an average commute in a given county, the worse the chances of low-income families there moving up the ladder.

The relationship between transportation and social mobility is stronger than that between mobility and several other factors, like crime, elementary-school test scores or the percentage of two-parent families in a community, said Nathaniel Hendren, a Harvard economist and one of the researchers on the study

**Affordable Housing and Sustainable Communities
Program Guidelines Article I. General
(FUNDED BY GREENHOUSE GAS REDUCTION FUND)**

Section 100. Purpose and Scope

- (4) improving connectivity and accessibility to jobs, housing, and services;
- (6) increasing transit ridership;

Solution

Connect the Trolley Orange Line with the I-15 Bus Rapid Transit at the crossing of I-15 and Imperial Ave. by constructing an intermodal trolley station.

Location of the present trolley station and proposed new location for the future intermodal trolley station that connects with the I-15 BRT, the Imperial Ave and the rapid bus on 32nd St. The land just north of the proposed station might be developed or used to park cars.

Top view of the proposed intermodal station showing its I-15 level. The station, includes an elevator and staircase to the trolley station below. Since I-15 BRT buses will be stopped and were travelling near the center of the image, the auto lanes have been placed on the outside.

Comparison of the BRT (Top) and Trolley Orange Line (bottom) downtown stops. They are sufficiently close to walk between them.

Observations

- The proposed Intermodal Trolley Station will connect the Orange Line, the I-15 BRT, the Imperial Ave. Bus, and the proposed 32nd St. Rapid Bus.
- Since the downtown trolley stations and the proposed BRT stations are close to each other, the extension of the BRT is not absolutely required.
- Even if the BRT is, required, the intermodal transit station should be faster to construct than SR-94 improvements.
- Construction of the Trolley I-15 connection will require only a small part of the funds for SR-94.

Observations Cont.

- Orange Line passengers including those that transferred from the I-15 BRT could transfer between the 3 trolley lines at either the America Plaza or the 12th and Imperial Ave. The I-15 BRT riders could then go South as far as San Ysidro and Northeast as far as Santee.
- The southern extension of the BRT and the creation of a new Trolley station on Commercial St. in the vicinity of 28th St. would also help the community.
- The rest of the money can be spent on the uses specified by the local planning groups when they voted against the extension of the BRT on to SR-94.

Trolley Stop, Bus and I-15 Rapid Transit Bus Intermodal Transfer Point

(May 12, 2015)

Robert C. Leif, Ph.D.
3345 Hopi Place,
San Diego, CA 92117-3516
Tel. (619)582-0437
Email rleif@rleif.com

Southeastern San Diego Planning Group Goals:

- 1). Initiate a study for a Intermodal trolley station that connects the Orange Line with the I-15 Bus Rapid Transit at the crossing of I-15 and the Orange Line Trolley.
- 2) Construct the Intermodal trolley station that connects the Orange Line with the I-15 Bus Rapid Transit.
- 3) Construct the planned rapid bus route that connects North Park and the 32nd Street Intermodal trolley Station.
- 4) Move and reuse the present 32nd St. and Commercial trolley stop to 28th St. and Commercial St.
- 5) Install amenities including benches, streetscapes, renovation of existing bench areas to include roofed shelters and arrival time information devices, etc.
- 6) Save the money to pay for the above by not constructing a Bus Rapid Transit that duplicates access to stops that are already served by the Orange line.
- 7) Replace the left-hand exit lanes on ST-94 with standard right-hand exit lanes.

History

This is an upgrade to the material that was presented to the San Diego Planning Department in 2013. The Southeastern San Diego Planning Group, SSDPG, passed a Resolution of General Interest:

Presently, the I-5 BRT does not connect with the Trolley and the I-15 BRT, which results in the I-5 BRT neither having or even having planned stops in Southeastern San Diego. The I-15 BRT provides 2 stops for City Heights (El Cajon and University Ave, which are the only ones in low income areas. There are 8 stops in middle and high income areas.

The Southeastern San Diego Planning Group passed a resolution which states:

“Replace the bus on SR-94 with a connection between SR-15 and the trolley, with the saving being used on the left-hand lanes and putting in amenities such as benches and streetscapes. Passed October 14, 2013”

Comments

Maps

An intelligent, complete discussion of the establishment of intermodal transfers of any of these rapid transit entities required the map below, which shows the three rapid transport modalities together (I-15 BRT, I-805 BRT and the Orange Trolley line as well as the Imperial Ave. Bus and the Planned Rapid Bus on SR 637. There is one connection of the Trolley Orange Line to the I-805 BRT, which is located at 47th St. to I-805, which will be described below and is endorsed by the San Diego Community Plan June 2014 Draft Mobility Element. Presentations on transportation should include maps which show the major transit modes including: automobiles, railroads, trollies, buses, bicycling and walking. Each of these modes should be on its own layer, which will permit simplifying the image, as necessary.

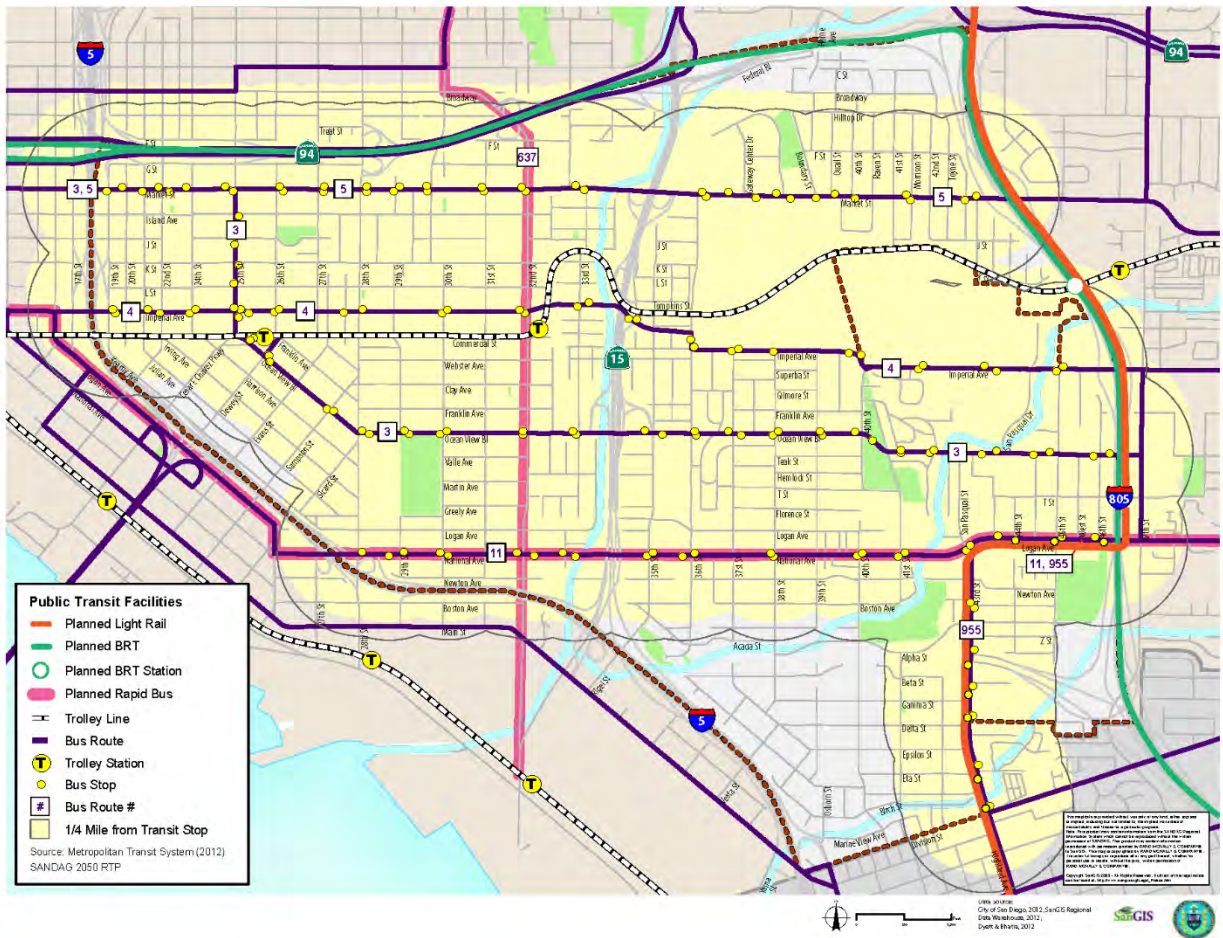

Economics

A recent Article, “Transportation Emerges as Crucial to Escaping Poverty”, by Mikayla Bouchard in the N.Y. Times MAY 7, 2015, (http://www.nytimes.com/2015/05/07/upshot/transportation-emerges-as-crucial-to-escaping-poverty.html?_r=0&abt=0002&abg=1) stated,

“In a large, continuing [study](#) of upward mobility based at Harvard, commuting time has emerged as the single strongest factor in the odds of escaping poverty. The longer an average commute in a given county, the worse the chances of low-income families there moving up the ladder.”

“The relationship between transportation and social mobility is stronger than that between mobility and several other factors, like crime, elementary-school test scores or the percentage of two-parent families in a community, said Nathaniel Hendren, a Harvard economist and one of the researchers on the study.”

FIGURE 3-3: Public Transit Facilities

3-8

Figure 1, Figure 3-3 from the San Diego Community Plan June 2014 Draft Mobility Element

Figure 1.1 blow-up of Loop area of Orange Trolley Line, showing the planned rapid bus on the left and the proposed connecting trolley station on the right which is adjacent to I-15 and on Imperial Ave. The Imperial Ave bus stations are represented by yellow filled circles. The distance on Imperial Ave. between both the present bus and the Proposed Rapid Bus to the Proposed Multimodal Transit Station is approximately 0.28 miles, which is walkable.

As is shown in Figure 1, the Orange Trolley Line provides good East-West public transportation for many of the residents of Southeastern San Diego. Unfortunately the lack of similar North-South transportation restricts opportunities for employment and education, as well as access to medical care facilities particularly those North of I-8 and those adjacent to I-8 including San Diego State University. The ability to use the I-15 Bus Rapid Transit (BRT) would increase these opportunities because it includes the following transit station locations (Figure 2): Mid- City (University Avenue and El Cajon Blvd.), Mission Valley, Kearney Mesa, Mira Mesa/Scripps Ranch, Sabre Springs/Penasquitos, Rancho Bernardo, Del Lago, and Escondido. The creation of a trolley station that would permit reciprocal access between the: Orange Line Trolley, I-15 BRT, I-805 BRT, Imperial Ave Bus, and Proposed Rapid Bus would improve and unify the San Diego Rapid Transfer. It would also provide the BRT riders with access to those trolley that connect with the Orange Line.

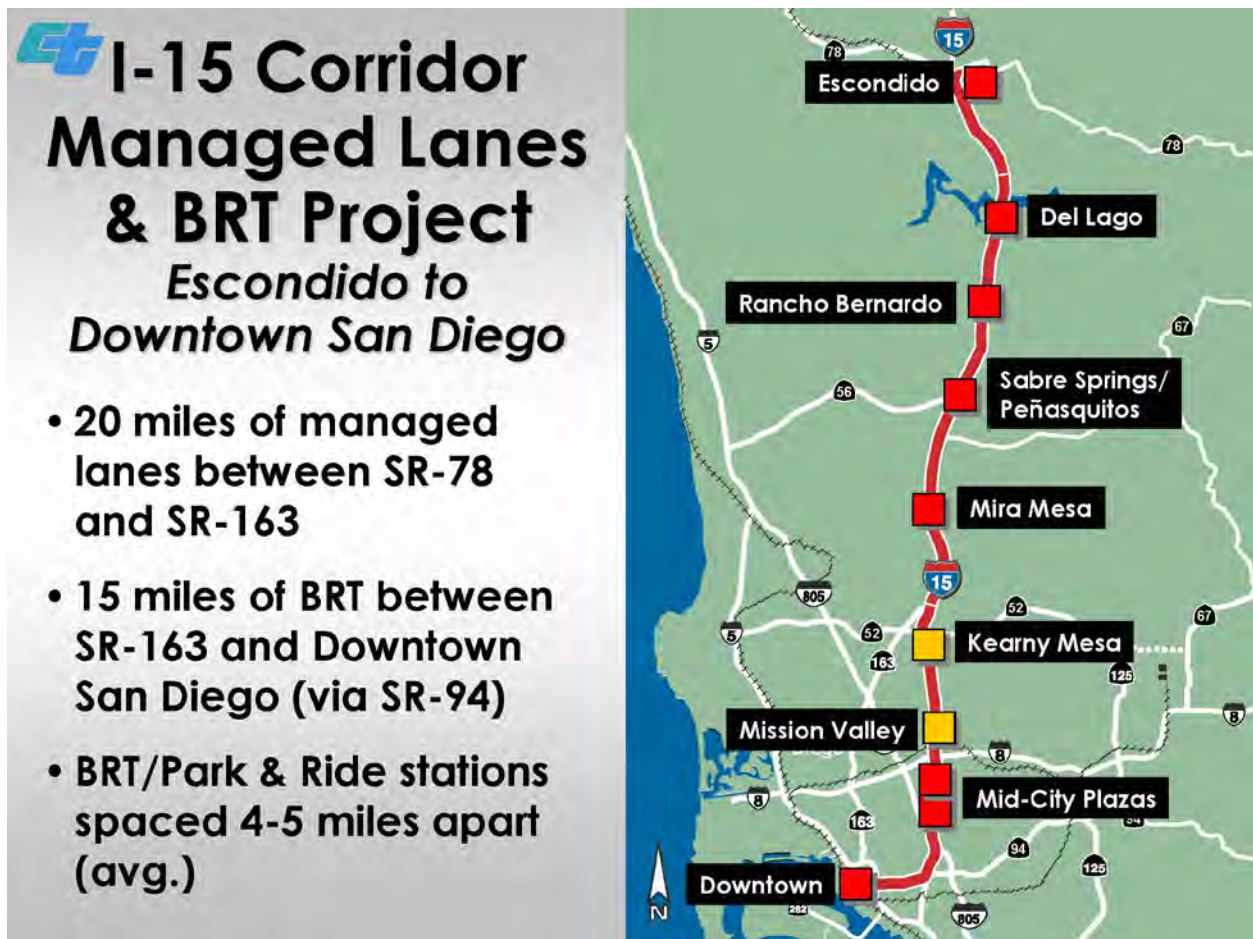

Figure 2, I-15 BRT Project

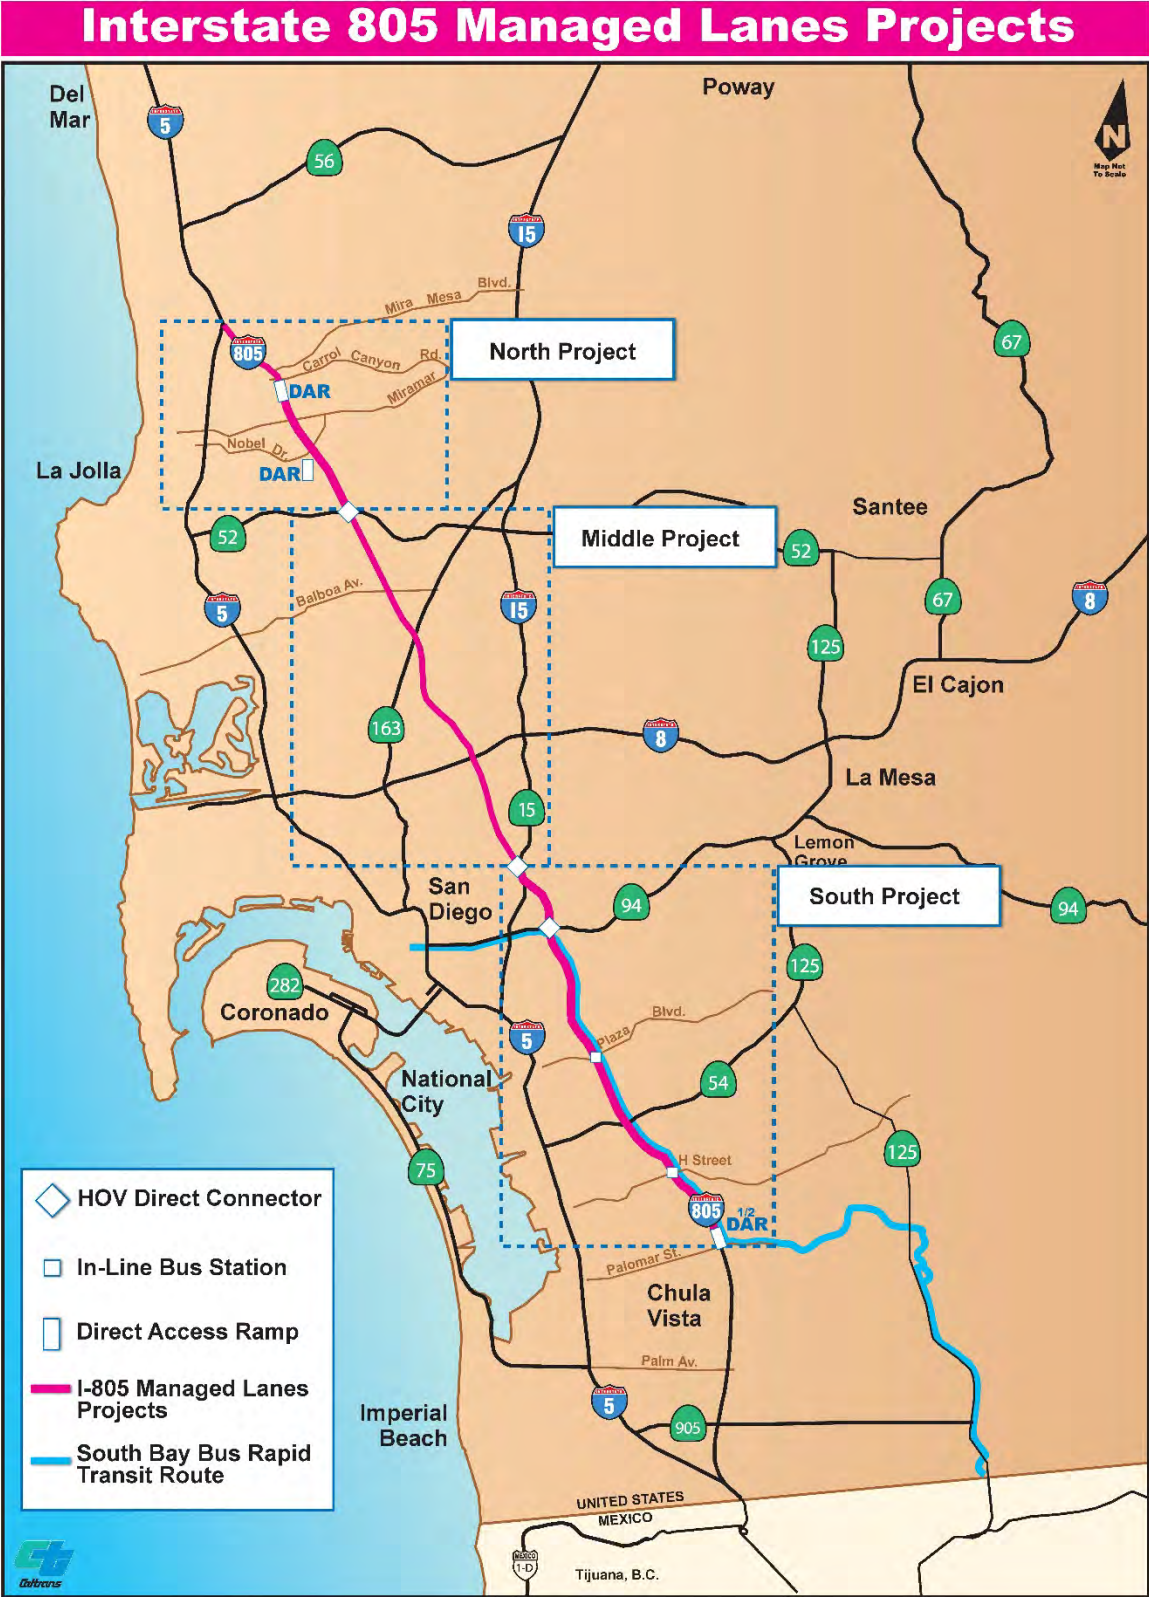

Figure 3 I-805 Managed Lanes Projects

CT I-805 Corridor / South Bay BRT 22
Otay Mesa to Downtown San Diego

Figure 3.2 I-805 BRT showing 47th St. Station, which will connect to the Trolley. The other Future station, Top left, was not shown in the Caltrans presentation before the Southeastern San Diego Planning Group.

The I-805 BRT extends into the 94 Freeway. It presently does not go into the Northern part of San Diego.

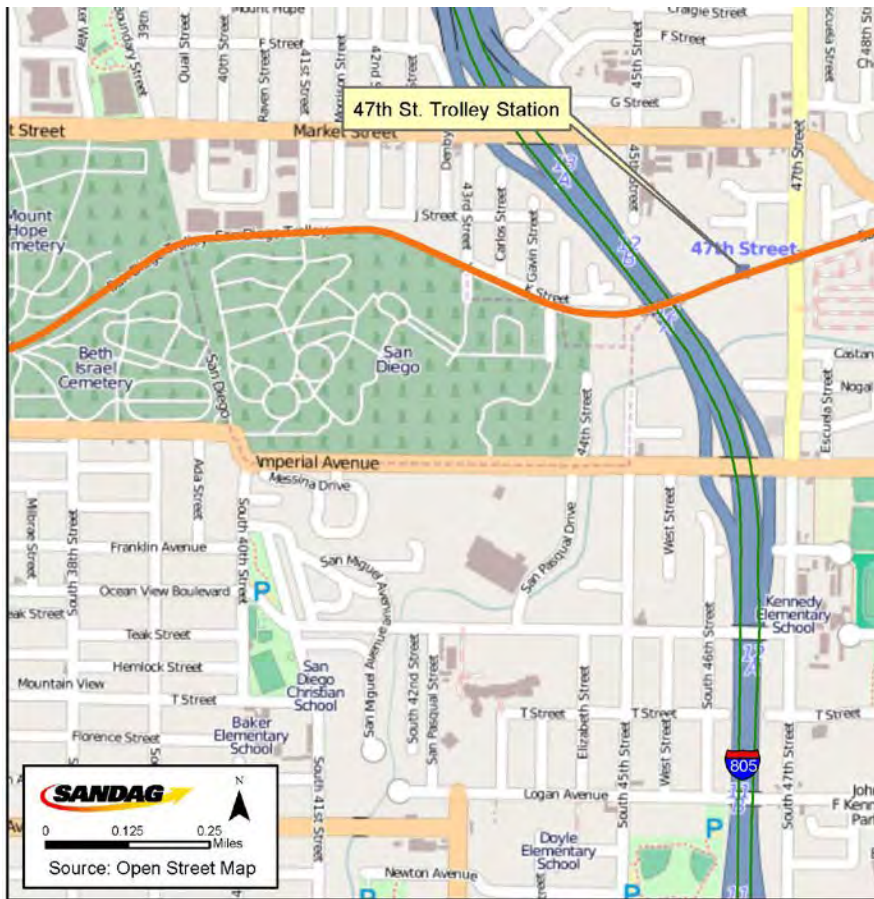

Figure 3.3 shows the location of the 47th St. trolley station

The location of the 47th St station relative to I-805 is sufficiently similar to that of the proposed trolley station at Imperial Ave and I-15 that a good part of the design of the 47th St. station could be reused.

The present 32nd St Orange Line Station is located at 3220 Commercial St (Figure 4). At the place of the proposed junction, the trolley is at ground level and the I-15 freeway is elevated. In order to permit passengers to transfer from the Bus Rapid Transit on the I-15 freeway to the trolley and the converse, the only required vertical motion is for people. As opposed to the present design of the new freeway Direct Access Ramps (DARs) for rapid bus transit stations on freeways, complete on and off ramps are not required. Elevators and/or staircases are sufficient for the vertical movement of people. However, the dual use of the HOV lanes for buses and automobiles requires that the rapid transit buses exit the HOV lane prior to entering the Bus station and after picking up and discharging the passengers reenter the freeway. The location of the HOV lanes are on the left side adjacent to the median, which strongly suggests that the bus station be located in the center and that the regular automobile lanes be shifted to the right (See Figure 4 below). Similar designs are envisaged in Bus Rapid Transit, The Caltrans

Role

http://www.dot.ca.gov/dist11/departments/planning/pdfs/CEAL_BRT_CT_Role.pdf

Figure 4 medium resolution image showing the location of the present trolley station and the location to which it should be relocated.

Note: Because of global warming, all new construction should be high enough to withstand floods that are above the 100 year and 500 year flood plains.

Figure 5 high resolution image showing the proposed moved auto – BRT lanes and station.

The new trolley stop is located underneath the freeway bridge that crosses Imperial Ave. Access to the trolley stop(s) would be via Imperial Ave. or Francis St. Besides intersecting with the BRT, this new trolley stop would permit transfers from the buses that run on Imperial Ave east and west of I-15 to the Orange Line Trolley.

As shown in Figure 1.1, the pink lines on the left are the Planned Rapid Bus, which would connect with a short walk to the 32nd St. Station and runs between North Park and Barrio Logan. If the connection between the Trolley, the I-15 Bus Rapid Transit (BRT) and the Imperial Avenue Bus were made, the passengers on the Trolley and the I-15 Bus Rapid Transit (BRT) can take the Imperial Bus and shop on a revitalized Imperial Ave or the passengers on the BRT or the Imperial Ave. Bus can take the Trolley to Downtown or transfer to another trolley line and go South as far as San Ysidro and North and East as far as Santee.

This juncture together with the proposed I-805 junction with the Orange Line eliminates the need and problems associated with the I-805 BRT running on SR-94. The increase in the ridership of the Orange Line resulting from the juncture described above make it economically feasible to reduce the times between trolley arrivals.

It looks from the image below that land just north of the proposed junction could be used to park cars.

Since the downtown trolley stations and the proposed BRT stations are close to each other, the extension of the BRT is redundant; however, it may be beyond reversing. Construction of the new stations will require only part of the funds for that BRT project to be used and the connection of the Trolley, BRT and the Imperial Ave. Bus, as well as accelerate the southern extension of the BRT. If there is any money left-over, it can be spent on the uses specified by the local planning groups when they voted against the extension of the BRT on to SR-94.

Conclusions

Initially, only the 32nd St. Trolley stop needs to be moved. It is understood that projects that involve significant alterations to a freeway require significant amounts of time and effort just to be approved, and subsequently to be engineered, and completed. However, the lifetime of this plan will be longer than twenty years. Another advantage of moving the trolley station is that it will provide easier access in the area East of I-15 and be sufficiently separated from the 25th St. station that the present objections to an intermediate station will be overcome and a new station created in the vicinity of 28 or 29 St. and the new station for the I-805 BRT shown in Figure 3.3 should also be constructed. This connection of the Trolley to the I-15 together with the addition of 2 trolley stops would provide Southeastern San Diego with valuable rapid transit linkages to the rest of the City.

Since the Orange Line Trolley downtown stations are each near one of the proposed Bus Rapid Transit stops, many of the modifications to California State Route 94 (SR 94) will not be needed, the extension of the BRT is redundant. This redundancy of the proposed I-805 BRT section that runs on SR-94 and the Orange Line is sufficient as to split the riders between them. A single modality that carried all of the riders would permit an increase in frequency of the Trolley, which would also generate more riders. This elimination of redundancy would increase the cost-effectiveness of San Diego's transit system. The construction of the new Intermodal stations will require only part of the funds for that project to be used and the connection of the Trolley. The saved money can be used to accelerate the southern extension of I-BRT to the South. The rest of the money can be spent on the uses specified by the local planning groups when they voted against the extension of the BRT on to SR-94, namely "putting in amenities such as benches and streetscapes".

The passengers on both the I-15 BRT and the I-805 will have access to all of the Orange Lines stops including its downtown stops, as well as after transfer to those of the Blue and Green lines, as shown in Figure 6, the BRT passengers will be able to go from San Ysidro to Gillespie Field.

New Trolley Network Map

Figure 6 new Trolley Network Map, which includes transfers to between the 3 trolley lines at America Plaza as well as 12th and Imperial

**BOARD OF DIRECTORS
JULY 24, 2015**

**AGENDA ITEM NO. 15-07-1A
ACTION REQUESTED - APPROVE**

**BOARD OF DIRECTORS DISCUSSION AND ACTIONS
JUNE 12, 2015**

Chair Jack Dale (Santee) called the meeting of the SANDAG Board of Directors to order at 10:04 a.m. The attendance sheet for the meeting is attached.

1. PUBLIC COMMENTS/COMMUNICATIONS/MEMBER COMMENTS

There were no public or member comments.

REPORTS

2. OVERVIEW OF THE DRAFT ENVIRONMENTAL IMPACT REPORT FOR SAN DIEGO FORWARD: THE REGIONAL PLAN AND ITS SUSTAINABLE COMMUNITIES STRATEGY (INFORMATION)

On May 21, 2015, SANDAG released the Draft Environmental Impact Report (EIR) for San Diego Forward: The Regional Plan and its Sustainable Communities Strategy for a 55-day public review and comment period. Staff provided the Board of Directors with an overview of the Draft EIR.

Councilmember Todd Gloria (City of San Diego), Transportation Committee Chair, introduced the item.

Rob Rundle, Principal Regional Planner, and Andrew Martin, Associate Regional Planner, presented the item.

Action: This item was presented for information.

3. PUBLIC HEARING: DRAFT SAN DIEGO FORWARD: THE REGIONAL PLAN AND ITS SUSTAINABLE COMMUNITIES STRATEGY (DISCUSSION)

The Board of Directors was asked to accept public testimony on the Draft San Diego Forward: The Regional Plan (Draft Regional Plan) and its Sustainable Communities Strategy (SCS). The public comment period for the Draft Regional Plan, its SCS, and the Draft Environmental Impact Report will close on July 15, 2015.

Councilmember Gloria introduced the item.

Philip Trom, Senior Regional Planner, presented the item.

Chair Dale opened the public hearing at 11:12 a.m.

Roya Golchoobian, American Public Works Association, spoke in support of this item.

Theresa Andrews, San Diego County Taxpayers Association, spoke in support of this item.

Melanie Nally, BIOCUM, spoke in support of this item.

Clive Richards, a member of the public, spoke in opposition to this item.

Harry Jensen, a member of the public, spoke in opposition to this item.

Rob Hixson, Otay Mesa Planning Group, spoke in support of this item.

Brad Barnum, Associated General Contractors, spoke in support of this item.

Sean Karafin, San Diego Regional Chamber of Commerce, spoke in support of this item.

Ted Shaw, NAICP, spoke in support of this item.

Jo Marie Diamond, East County Economic Development Council, spoke in support of this item.

Alejandra Mier y Teran, Otay Mesa Chamber of Commerce, spoke in support of this item.

Robert C. Leif, a member of the public, gave a brief presentation and spoke in opposition to this item.

Chair Dale closed the public hearing at 11:30 a.m.

Action: This item was presented for discussion.

4. CONTINUED PUBLIC COMMENTS

There were no continued public comments.

5. UPCOMING MEETINGS

The next Board Business meeting is scheduled for Friday, June 26, 2015, at 9 a.m.

6. ADJOURNMENT

Chair Dale adjourned the meeting at 11:31 a.m.

MR. DALE: For the record, this the time and place for the public hearing concerning the draft San Diego Forward, the Regional Plan, its Sustainable Communities Strategy, the draft air quality conformity determination, the draft Environmental Impact Report. If you wish to speak, as you know, put in a speaker slip. We invite you to tell us your name and address. A court reporter Erin, to my right here, is with us tonight -- or today.

Ladies and gentlemen, I'm sorry. I know you've been waiting a long time. I've got close to 20 speakers. I need to hold you to two minutes, I beg your pardon. And I will call two or three names in a row so we can keep as much time as listening to you, so not waiting for people to come to the podium. Our first speaker is Roya Golchoobian to be followed by Theresa Andrews.

MS. GOLCHOOBIAN: Good morning. My name is Roya Golchoobian. I am the president and life of the San Diego chapter of the American Public Works Association. I'm

3

1 here today to express American Public Works support for
2 the San Diego Forward Regional Plan. We find the main
3 objectives of your plan in line with our organizations
4 mission and philosophy in such areas as identifying short-
5 and long-term transportation alternatives that cover all
6 options, including highway, transit, and pedestrian
7 facilities, identifying the strategies for sustainability

6-12 Public Hearing Court Reporter Transcript
8 of growth without jeopardizing future plans, and for
9 keeping our eye on the big picture, while accommodating
10 growth in ways that protect our quality of life. We are
11 very encouraged by your plans for creating mobility
12 choices that protect the environment while stimulating
13 economic growth for protecting -- for projection of an
14 annual increase of 53,000 new jobs in the region, for 14.4
15 billion dollars increasing our GDP, and 5.9 billion
16 dollars increase in local income, and for accommodating
17 population in housing growth while presenting 55 percent
18 of the region's open space. Thank you.

19 MR. DALE: Thank you. Theresa Andrews to be followed
20 by Melanie Nally.

21 MS. ANDREWS: Good morning. My name is Theresa
22 Andrews, and I'm the interim president and CEO of the
23 San Diego County Tax Payers Association. Few issues are
24 as inherently relevant to taxpayers as transportation and
25 infrastructure. Our board has not yet taken formal

4

1 position on the San Diego Forward Plan, but we have a long
2 history of support for SANDAG transportation investment.
3 We supported the TransNet half-cent sales tax because we
4 recognize the need for investment in San Diego's
5 transportation infrastructure. The benefits of that
6 investment are now becoming evident, as we see the
7 expansion of trolley, light rail, and freeways from those
8 dollars. With our population continuing to -- continuing
9 to grow and the expected addition of about one million new
10 San Diegans over the next 35 years, it is wise to plan

11 now, to accommodate the new jobs, homes, commutes, and
12 movement -- and movement of goods and services. SANDAG
13 has put together a balanced plan of transit, road, and
14 freeway improvements, and upgrades for active
15 transportation that addresses the GHD -- GHG reduction
16 goals realistically and honestly. We will continue our
17 analysis of the plan as it moves forward in the process.
18 But at this stage, we believe it shows great promise for
19 handling San Diego's population and economic growth over
20 the next several decades. Thank you.

21 MR. DALE: Thank you. Melanie Nally to be followed by
22 Clive Richards.

23 MS. GOLCHOOBIAN: Good morning. I'm Melanie Nally
24 with BLOCOM, and we're here in support of the plan as
25 well. BLOCOM leads the advocacy efforts for the Southern

5

1 California life science community with more than 650
2 members, including biotechnology and medical device
3 companies, universities, basic research institutions, and
4 support service firms. San Diego's life science cluster
5 employs 60,000 people, and supports another 158,000 jobs,
6 for a total county-wide impact of over 218,000 jobs. This
7 represents 37 -- 37 billion dollars in economic activity.
8 As an advocacy organization, we are engaged in ensuring
9 that the life science industry has every tool for success,
10 including the necessary infrastructure for the
11 transportation of employees and products. SANDAG has
12 worked closely with the public, including BLOCOM, to

6-12 Public Hearing Court Reporter Transcript
13 create a balanced plan that includes both public transit
14 and highway improvements. This balance is a necessary and
15 realistic approach to transportation in our region.
16 Effective, efficient transportation systems are vital to
17 our companies, both as employers and manufacturers, and
18 will be critical to San Diego's economic future. Thank
19 you.

20 MR. DALE: Thank you. Clive to be followed by Harry
21 Jensen.

22 MR. RICHARDS: Thank you. Mr. Chairman and members of
23 the Board of Directors, my name is Clive Richards, and I'm
24 on the 79th Counsel District of the City of San Diego and
25 the 2nd supervisory district of the County of San Diego.

6

1 I'm not going to take very much time on this. I'm going
2 to let you hear other people I'm sure you haven't heard
3 before, and, I'll be interested in hearing how they
4 approach this. Thank you.

5 MR. DALE: Thank you. Harry Jensen followed by Rob
6 Hixson.

7 MR. JENSEN: Hi, I'm Harry Jensen. I have a business
8 down on Morena Boulevard, native San Diegan. First 18
9 years of my life, I grew up in Linda Vista, graduated
10 Kearny, graduated San Diego State. All of that being
11 said, I'm here to ask for the cessation of all northern
12 trolley extension plans. In other words, don't build a
13 northern trolley center from Old Town to USD -- or UCSD.
14 We recommend -- the people that support me recommend that
15 you reallocate your resources to a trolley from Santa Fe

6-12 Public Hearing Court Reporter Transcript
16 Station out to the airport via Harbor -- via Broadway to
17 Harbor. And I've been told that this is impossible, but
18 it's just an engineering problem. You've got elevated
19 tracks all over San Diego County. You have three rail
20 systems right now -- that between Santee, line two, and
21 South Bay, one; and you're losing -- that -- the
22 June 30th, 2014, 10-day San Diego Metropolitan Transit
23 System states that you lost -- that trolley system lost 27
24 million dollars. If you build a northern trolley
25 extension, that's probably going to add another 8 million

7

1 dollars to that deficit. So -- so you're asking, okay,
2 subsidized ridership. You can build the trolley rails out
3 to the airport, and you probably -- the cost could be
4 about \$12.50. \$6.00 would be operational costs, 6 and a
5 half dollars would be to repay the bonds necessary to
6 build that. You are facing right now legal problems from
7 the Cleveland National Foundation, friends of Rosecrans,
8 Sierra, and people of the sort -- me. You also have a
9 financial problem in building, so don't build the northern
10 trolley extension.

11 MR. DALE: Thank you. Rob Hixson to be followed by
12 Brad Barnum.

13 MR. HIXSON: Good morning. My name's Rob Hixson. I'm
14 the chairperson of the Otay Mesa Planning Group and also a
15 commercial real estate broker for the last 28 years, chair
16 of the planning group for the last eight years. Nobody
17 else wants the job. We are grateful for SANDAG and the
18 Caltrans for giving us our great freeways that we now have

Page 7

19 down in Otay Mesa. We are looking for future
20 transportation to -- and as you can see on page 18,
21 there's a highlight there that the future jobs will all be
22 down in Otay Mesa, and I want to bring that to your
23 attention from my commercial real estate background.
24 Right now, there is no more industrial land in the central
25 part of the city of San Diego or all city -- central part

8

1 of San Diego. The remaining land is up in North County
2 and also down at the border and also some at Chula Vista.
3 So I'm very concerned about that and also the amount of
4 cost it is to improve these properties. Now, with all the
5 mitigation for this Burrowing Owl that we still think is a
6 species of interest, it's not endangered. And also this
7 new stormwater regulations that we have is quite
8 extensive. So I'm very concerned about it. Right now,
9 the commercial crossing in Otay Mesa is served by a city
10 street, so we've got trucks from all over the United
11 States and California using the city street to access the
12 border crossing. We're hopeful in the future that we're
13 going to get Otay too and have a new crossing that'll make
14 it so that these streets are easier to drive on and
15 access. We're grateful for all the stuff we've got, all
16 the transportation we got so far, and we'd like additional
17 transportation for those trucks. Thank you.

18 MR. DALE: Thank you. Brad Barnum to be followed by
19 Sean Karafin.

20 MR. BARNUM: Thank you, Mr. Board member. Brad

6-12 Public Hearing Court Reporter Transcript
21 Barnum -- Brad Barnum, board member of the Associated
22 General Contractors, that are building your
23 infrastructure. We support the Regional Plan, and we ask
24 you to stay the course. I'm not sure how many of you know
25 of a Grateful Dead song called, "Truckin," and the quote

9

1 is, "What a long strange trip it's been." And I'll tell
2 you, if you were all there in 2004 when, two or three
3 weeks after the November election, Transnet won. The
4 coalition that surrounded that was incredible. And thank
5 you for helping that make that happen. Since that time,
6 you've had SD's 468, the keyhole bill. Agency attended
7 the hearing in Solana Beach in 2011 in January and
8 February. I can tell you the opposition from that bill
9 and the opponents of that up the 5 corridor was
10 incredible. You never thought that would come around, and
11 that passed. And that was a big coalition, and that was
12 needed to get you where you are at now. The culture
13 commission approval of The North Coast Corridor Project --
14 can you believe you got that through? That's a great
15 success story for everybody that was involved. Labor was
16 behind you, the business community, and the transportation
17 construction community was behind you. Now you have the
18 EIR. It sounds like you're going to be there in a few
19 weeks, and we wish you the best on that. We will be
20 behind you as you go forward. In 2004 voters wanted you
21 to have a balanced approach, and you're doing that, so we
22 ask you to continue to stay the course. Thank you.

23 MR. DALE: Thanks Brad. Sean Karafin to be followed
Page 9

24 by Ted Shaw.

25 MR. KARAFIN: Thanks so much. Sean Karafin, the

10

1 Executive Director of Public Policy and Economic Research
2 at the Regional Chamber of Commerce. Thanks so much.
3 It's so important that we approach this growth that we've
4 been talking about in a thoughtful way. We need to
5 protect our environment. We obviously need to protect our
6 quality of life, and we also need to protect and allow for
7 our economy to grow with the population. The concepts
8 included in this plan, looking at accommodating more
9 compact development, multi-mobile transportation system
10 connecting housing to job centers -- these are all very
11 important things. And I don't have to tell people in this
12 room how diverse our region is and how each of our
13 communities have such unique needs. We need more fast and
14 reliable transit. We do need a broad and safe active
15 transportation network. And we need to target our
16 investments and our roads and our highways so that those
17 investments support transit service, carpools, and the
18 efficient movement of goods. And the people in this room,
19 again, know that that's code for jobs. That's how we
20 create jobs in this region. This plan directs investments
21 to keep our economy moving, creating jobs, and helping us
22 meet those greenhouse gas reduction targets that we're
23 trying so hard to do. Thank you.

24 MR. DALE: Thank you. Ted Shaw to be followed by Dana
25 Qui ttner.

1 MR. SHAW: Good morning everyone. Thank you for
2 having us. Ted Shaw with the Atlantis Group. I'm here
3 today on behalf of NAIOP San Diego. We are a commercial,
4 industrial, and office trade association. We have over
5 500 members representing tens of thousands of individual
6 employees. We support the balanced approach in the
7 San Diego Forward Plan. We believe that we need to
8 address both the current and future needs, excluding one
9 or the other is not the appropriate response. The
10 movement of goods, services, employees across this county
11 is critical to our economic health. We urge you to move
12 forward with the plan.

13 MR. DALE: Thank you. Dana to be followed by JoMarie.

14 MS. DIAMOND: Well, Dana is on a conference call, so
15 he doesn't know you were going to be so fast, sir. So --

16 MR. DALE: Jomarie, join us.

17 MS. DIAMOND: -- I'll do it then. Hello, my name is
18 Joemarie Diamond. I'm CEO of the East County Economic
19 Development Council. I've participated in the development
20 of the San Diego Forward in many ways, specifically in
21 technical working groups, public focus groups, and
22 recently was on the panel at the May 13 East County
23 meeting. In my review of the plan and also at my comments
24 on the panel, I wanted to underscore here again today how
25 critical it is to create jobs where people already live

1 and to develop the integrated transportation
2 infrastructure underneath it that allows those jobs to be
3 created. That's what we're doing in East County. We've
4 recently -- the cities of Santee and El Cajon and the
5 county of San Diego -- joined together to put the
6 first-ever-tried jurisdiction, special youth center on the
7 smart growth concept map. The intent of that center is to
8 ensure that the integrated multi-mobile transportation
9 will be what's required to produce the really good jobs
10 where people already live. That includes transit, which
11 is balanced within the plan, but it also includes the
12 ability to move goods and services. You're not going to
13 move goods produced, like Taylor Guitars on transit
14 systems. So we applaud you for having a balanced
15 approach, and thank you very much.

16 MR. DALE: Thank you. Alejandra.

17 MS. TERAN: Good morning. My name is Alejandra Mier y
18 Teran, and I'm the executive director of the Otay Mesa
19 Chamber of Commerce, and I appreciate the opportunity to
20 be here. I would like to express the chamber's full
21 support of, basically, highways, reconfiguring highways,
22 and potentially expanding them to support freight
23 management. We have a very important cross-border
24 manufacturing community in San Diego County from DJO
25 Orthopedics in Vista to Scanti Bodies in Santee, to Hunter

13

1 in San Marcos, as well as the many cross-border

2 6-12 Public Hearing Court Reporter Transcript
manufacturers in the city of San Diego, including
3 Honeywell, Kyocera. We need to support these companies
4 that are fueling our economy. We need to support highways
5 that are so important to truck, traffic, and our freight
6 management system. Thank you.

7 MR. DALE: Thank you. Our final speaker is Robert
8 Leif. Board members, Robert got a lot of time from some
9 other people, and we negotiated down to four minutes.
10 Robert?

11 MR. LEIF: I'm Robert Leif. I'm speaking about
12 southeast of San Diego needing an intermodal transit stop.
13 Because with all of these wonderful things, we got
14 nothing. We don't have any access going north. And we
15 have poor people who need jobs north -- you can see all
16 about jobs. Please read the full document I gave you
17 because I'm going to go fast. Next slide, please.

18 This will improve connectivity and access to jobs,
19 housing and services, and increased ridership. And what
20 we want to do is take the Orange Line Trolley and connect
21 it with the I-15 Bus Rapid Transit at the crossing of I-15
22 and Imperial Avenue by constructing an intermodal trolley
23 station. Next slide, please.

24 If you look on the left of the loop, right down at
25 the bottom, there's a little white arrow that you will see

14

1 is where the present station is. If you go around onto
2 Imperial, right underneath I-15, which is where it should
3 have been, if you put it together with the Bus Rapid
4 Transit, you have an intermodal connection. Next slide.

6-12 Public Hearing Court Reporter Transcript

5 In order to build this, you're going to have to
6 widen the freeway because of the fact is the -- the buses
7 are in on the left-hand side, which means they're in the
8 center. You have to put a station in there, but you have
9 to be able to take the cars around so they don't hit the
10 buses. And you then put an elevator, which is the cheapest
11 form of Rapid Transit I know -- now going up and down --
12 and you -- of course, you have the stairs. Now you have
13 them connected, and the connections are phenomenal because
14 you also hit the Imperial Avenue bus, the newly planned
15 bus on 32nd Street, and you can get your passengers on the
16 Bus Rapid Transit down to downtown without even touching
17 State Road 84. Now, it doesn't say you shouldn't do it in
18 the long run, but this would get it done fast because it's
19 a one-shot, very small addition to your plan. And that
20 would allow them to get there as quickly as possible, so
21 you would maintain the ridership because they want to go
22 downtown. So they have to take an elevator. That's not
23 too much. So in other words, we're going to connect the
24 Orange Trolley Line with the I-15 BRT Imperial Bus and
25 propose the 32nd Street Rapid Bus. That is intermodal.

15

1 And you can use it at least for the time being as a
2 connection to get your people downtown who want to come
3 down from north. So we have three trolley lines that the
4 bus route and transit can connect to at America's Plaza on
5 12th and Imperial, a ride -- BRT riders can then go south
6 as far as San Ysidro, and the trolley riders to the

6-12 Public Hearing Court Reporter Transcript
7 northern part of the area, such as Escondido, Rancho
8 Bernardo, Sabre Springs, UTC, and UCSD. There are many
9 well-paying jobs. We have people with lousy jobs. They
10 can also go to school at UCSD and get into the middle
11 class and break out of poverty. So I think this will help
12 our community and everyone else. I am on the planning
13 group for Southeastern. I'm also on for City Heights and
14 a member of the CPC, but I'm speaking for myself. And
15 lastly, keep the northern trolley. I want to use it.

16 MR. DALE: Okay. Thank you very much. Members that
17 brings the end of all of our public speakers. We will now
18 declare the public hearing closed.

19

20 (Whereupon at 11:30 a.m. the hearing was concluded.)

Charles Muggs Stoll - Director of Land Use & Transportation Planning

Phil Trom - Senior Regional Planner

6-18 Public Hearing Court Reporter Transcript

1 SANDAG PUBLIC HEARING, THURSDAY, JUNE 18, 2015
2 NORTH COUNTY TRANSIT DISTRICT BOARD ROOM
3 810 MISSION AVENUE, OCEANSIDE, CALIFORNIA 92054
4 11:30 p.m. - 12:01 p.m.

5 * * *

6
7 MR. STOLL: It's 11:32, so I am going to go
8 ahead and call the meeting to order, if that's okay.

9 And so, we're here for a public hearing on the
10 "San Diego Forward and Regional Plans." I'm Charles
11 Muggs Stoll. I'm the Planning Director at SANDAG and
12 I'll probably be the Hearing Officer today.

13 And so, if we start with our agenda, Item No. 1
14 on the agenda is any public comments that are not on the
15 agenda and I have one speaker for that and that's Michael
16 Bullock; you have three minutes up there.

17 Come forward.

18 (Mr. Bullock complies.)

19 MR. BULLOCK: Yes; thank you very much.

20 Good morning. My name is Mike Bullock. I live
21 here in Oceanside, just by way of identification, I am a
22 member of the, elected member of the "California
23 Democratic Party Central Committee," and also I have
24 submitted four papers that have been accepted for
25 presentation by the "Air and Waste Management

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 3

♀

1 Association. "

2 But what I want to talk about today, is
3 something that I just recently learned about and I think
4 it is important to SANDAG, and this is a resolution that
5 was adopted by the "California PTA." I didn't know the
6 PTA was organized as a statewide organization, but it is
7 and this was adopted by convention delegates on -- in May
8 15. In May of 2015, so this is very recent.

9 And the resolution says: "Climate change is a
10 children's issue ..."

11 So I think it's important that SANDAG
12 understand that this is becoming an issue in all walks of
13 life and so, the PTA -- and it was very interesting to
14 hear how this came about. It actually took two years
15 when they brought this resolution. The first year it was
16 not successful and had to go back and get more local
17 support.

18 However, when they finally got it on the floor
19 of the convention it was nearly unanimous. There were a
20 few no votes in Orange County, so they didn't think that
21 climate change is a children's issue.

22 There's four whereas's, and I just want to
23 state the fourth one, which I think is the most
24 important. It says, "The Greenhouse Gases emitted into
25 the atmosphere will accumulate over the coming decades

♀

1 and will profoundly impact today's children as adults and
Page 4

2 future generations . . ."

3 And then, they resolve and what I really like
4 about this is there's one, two, three, four, five, six
5 resolves and they're all very good and they start with
6 the education and the education even needs to be of
7 parents and I think that's important.

8 But I'll just end with the fourth one down,
9 which I like and this first phrase is used over and over
10 again.

11 It is that, "The California state PTA, it's
12 unit councils and District; districts urge school
13 districts to serve as role models for practices that
14 promote energy conservation, alternative energy
15 sources --" this is what I like -- "reducing dependency
16 on automobile travel and encouraging sustainable
17 practices.

18 So I just thought you might be interested in
19 that. I think it does impact on SANDAG's work; thank you
20 very much.

21 MR. STOLL: Thank you.

22 I have another request to speak under public
23 nonagenda comment.

24 Joseph Nevins; is that correct?

25 MR. NEVINS: Correct.

♀

1 MR. STOLL: Thank you.

2 MR. NEVINS: Okay; good morning.
Page 5

6-18 Public Hearing Court Reporter Transcript

3 MR. STOLL: Good morning.
4 MR. NEVINS: I'm assuming this is about the I-5
5 and 78 expansion?
6 MR. STOLL: Well I'll tell you what, that is
7 part of our, this is a public hearing on our overall
8 Regional Plan of which I-5 is part of --
9 MR. NEVINS: Okay.
10 So I'm going to address that now more
11 specifically, then the rest of the regional plan right
12 now.
13 MR. STOLL: Okay.
14 MR. NEVINS: But anyway, my concerns are, the
15 Regional Plan incorporates --
16 MR. STOLL: Okay; hold on one second.
17 If you want to talk about the Regional Plan and
18 I-5, what I would suggest is that you put that under
19 "Item 2," which is the actual public hearing where we
20 take the comments and put it on the record --
21 MR. NEVINS: Okay.
22 MR. STOLL: -- so, just I understand --
23 MR. NEVINS: Okay; no problem.
24 MR. STOLL: -- the confusion, so we'll do that.
25 I'll call you up first on that.

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 6

♀

1 Those were all the nonagenda comments that we
2 received for the meeting, so we'll move on to Item No. 2.
3 This is the time and place set for a public
Page 6

6-18 Public Hearing Court Reporter Transcript

4 hearing concerning the Draft San Diego Forward, the
5 Regional Plan. It's Sustainable Community Strategy. The
6 Draft Air Quality Conformity Determination and the Draft
7 Environmental Impact Report.

8 Just a reminder, if you wish to speak, please
9 complete a speaker slip and place it, or you can bring it
10 right up to our Clerk, Tessa here and then as we go
11 through, I'll call your name.

12 And when called, we appreciate if you state
13 your name and address for the record and limit your
14 comment to three minutes; court reporter is here and will
15 be recording all of your comments today with Gloria.

16 The Staff will compile and respond to your
17 comments and the comments and responses will be provided
18 to the Board of Directors before the Regional Plan, NCIR
19 are finalized.

20 So before we start calling the speakers, Phil
21 Trom, our Project Manager is going to give just a brief
22 overview before we get things started and then we'll
23 start calling folks up; okay.

24 (Brief pause for presentation.)

25 (Off the record.)

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 7

♀

1 (Back on the record.)

2 I will now start the public hearing.

3 And the first speaker I have is Joseph Nevins.

4 This way it'll get on the record and have it all taken
Page 7

5 care of.

6 MR. NEVINS: Okay; thank you.

7 Josph Nevins 1724 Broadway, Oceanside,
8 California; all right.

9 Now, basically I'm going to address primarily
10 the 78 flyover issue and the I-5 expansion, you know, I'm
11 well aware of the stated goals that Caltrans is
12 undertaken to achieve concerning vehicle miles reduction,
13 air quality, et cetera, et cetera and also that SANDAG is
14 undertaken similar goals and yet, we see this project is
15 in direct conflict and contradictory goals.

16 Now, not only is the project contradictory to
17 the stated goals and objectives of both SANDAG and
18 Caltrans, but having lost in court twice, the agencies
19 are continuing to press on and continue in a manner where
20 they assume the public is going to finally accept it,
21 where they assume, it seems by their presentations that
22 they've already committed to this project, even though
23 they've lost twice in court and it's contrary and in
24 direct conflict of the stated goals in both department
25 and organization.

♀

1 So what I'd like SANDAG and the member cities
2 to do, is request from Attorney General Harris, an
3 investigation into whether or not there may be some
4 conflict of interest among staff and potential
5 contractors or Members of the Board or Directors and in
Page 8

6 particular, District 11, seems to be an outlier and not
7 in compliance with Caltrans's overall goals and the other
8 projects that are going out throughout the State.

9 And so, I urge the Members of SANDAG to request
10 an investigation by the State Attorney General into
11 whether or not there may be corruption; corrupt practices
12 or illegal conflicts of interest.

13 MR. STOLL: Thank you.

14 So the next speaker is Bob Spencer.

15 MR. SPENCER: Hi, Bob Spencer, 1202 North
16 Pacific Street, Oceanside, California. Thank you very
17 much for hosting the comments.

18 I'm a little chagrin. I don't think you did
19 quite the job in publicizing the meeting. I got it last
20 minute from a City Council Member in Oceanside and it
21 just zipped over, so anyway in any event, I appreciate
22 the meeting. I don't know that the general public heard
23 about it in quite the manner that I thought it might be,
24 just that aside. I want to talk a little less about
25 specifics and more about globaling the project.

1 I understand the -- I'm going to do a
2 rudimentary cost benefit analysis of it -- I understand
3 the major benefit is to alleviate traffic down the I-5
4 corridor, make things a little faster. I don't know if
5 all of the cost have been calculated in this global, you
6 know, laudable goal.

7 All of the data that I've seen, it's going to
8 take a long time for this project to be completed. It's
9 a major project; you're going to be doing it in small
10 segments.

11 So the data -- I might be misinformed, but I
12 think it was like, 25 or 30 years it was going to take to
13 accomplish this. During those 25 or 30 years, you're
14 actually going to slow up traffic when you build
15 traffic -- I mean, anybody can see when they did I-15,
16 when they did the 210, when they built freeways, you have
17 to work on it; when you work on it, you have to lessen
18 the traffic, so that has to be into the cost benefit
19 equation.

20 All of the traffic delays for the next 30
21 years, if you make them through the court system and
22 break ground and start, then once you get this project
23 made, assuming it does, I don't think it's going to
24 happen but it may, I will agree it's -- there's a good
25 chance that you could alleviate traffic for maybe a

♀

1 long-term, for sure a short-term.

2 However, if -- we just need to look at history.
3 If you look at our neighbors to the north, Los Angeles
4 has tried to build their way out of freeway problems.
5 They haven't added lanes. They've added all freeway
6 systems and it's made the congestion worse. People that
7 were, that were sharing rides, finding other ways to

6-18 Public Hearing Court Reporter Transcript

8 travel have gotten back on the freeways. I think that
9 it's very shortsighted and if we take into the account --
10 I know I'm just slightly over time -- I'll sum up.

11 If we take into account, that the new drivers
12 coming on and also, in 30 years who's to say what
13 transportation is going to be jetpacks, more busing, more
14 things.

15 Do we even know the internal combustion engine
16 is going to be moving people at that rate?

17 I appreciate the little extra time I got and I
18 appreciate the hearing.

19 MR. STOLL: Okay; thank you.

20 Okay. Our next speaker is Jack Shu.

21 Good morning, Jack.

22 MR. SHU: Good morning.

23 Thank you, Muggs, and SANDAG Staff for coming
24 up here. I guess I have up here as well.

25 I have a few points to make. One is kind of

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 11

‡

1 curious how these two hearings, both last Friday and
2 today came about. It'd be interesting to know, perhaps
3 there's some other information you can give me later as
4 what brought about these two hearings, because they seem
5 like it was their last minute item.

6 But I wanted to comment, the bid on the
7 general -- the Regional Transportation Plan -- it is very
8 interesting that when one looks at the actual projects

9 laid out in the plan, that we have actually the same
10 number of road and highway projects as in the previous
11 RTP.

12 In fact, the total cost of them presumed due to
13 inflation or other reasons, we're going to be spending
14 more money on freeways and roads than the last Regional
15 Transportation Plan had called for, even though the
16 public meetings I've attended for the past three years
17 all call for additional Transit development, rather than
18 road development.

19 The other point that is very curious and I hope
20 SANDAG Staff can clarify, is how it's going to achieve
21 it's Greenhouse Gas Emission goals to meet the, I guess,
22 voters that have been put out as well as legislation.

23 So I was curious how those can be achieved when
24 the previous one three years ago was not achieving those
25 goals into 2050 and all of a sudden, there's a thought

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 12

♀

1 that they can.

2 And if it is through lower emission vehicles
3 and nonemission vehicles, how they model that. How did
4 you come about this idea that 75 percent of our vehicles
5 by 2050 would be not emitting any clues at all?

6 So that to me is kind of a curious calculation.
7 If I can get some clarification or information on how
8 SANDAG modeled that, that would be very good.

9 I think it's something that is necessary in a

10 EIR; thank you.
11 MR. STOLL: Thank you.
12 Our next speaker is Cindy Rocco.
13 MS. ROCCO: Yeah; one second.
14 This is all last minute, so I didn't even get
15 to prepare, but hang on a second.
16 (Brief pause.)
17 MR. STOLL: Would you prefer if we ask the next
18 person and then you can --
19 MS. ROCCO: Yeah, you know what --
20 MR. STOLL: Okay.
21 That's fine. We just want to make sure we hear
22 from you. So ...
23 MS. ROCCO: Thank you.
24 MR. STOLL: So the next speaker I have is Mike
25 Bullock.

♀

1 Mike looks prepared.
2 MR. BULLOCK: Not really.
3 MR. STOLL: Okay.
4 MR. BULLOCK: Thank you very much, Director
5 Stoll, and I appreciate the way you're running this
6 meeting up here and thank you for having the meeting up
7 here.
8 As I said earlier, I am a citizen of Oceanside
9 and I live at 1800 Mayberry Drive here in Oceanside and
10 as I said, I am an elected member of the "California

11 Democratic Party Central Committee."

12 And I have written four papers that were
13 accepted for presentation by the "Air and Waste
14 Management Association," so that's a lot of what I've
15 been doing since I retired.

16 Regarding your Regional Transportation Plan, I
17 believe that under CEQA, you need to consider negative
18 impacts, and one very important negative impact, of
19 course, is climate destabilization and what that would
20 mean and how that would come about and how that can get
21 avoided and so forth and so forth, and that's what you
22 have to do to consider it under CEQA.

23 Therefore, your Regional Transportation Plan
24 should have a clearly stated science-based climate
25 stabilizing target, and how you would achieve that

♀

1 target.

2 The Regional Transportation Plan should achieve
3 that target, or at least show how that target could be
4 achieved. Now by latest, Air and Waste Management
5 Association paper has both. It has a clearly stated
6 climate stabilizing target and it has a plan for cars and
7 light duty trucks to achieve that target. Its title is
8 "The Development of California Light Duty Vehicle
9 Requirements to Support Climate Stabilization," and
10 there's a colon because there's two categories of these
11 requirements.

12 The first is "fleet emissions rate." We really
13 need to adopt a lot of zero emission vehicles and so, in
14 the paper it shows exactly the rate at which we'll do
15 that, the percentage of new car sales that will need to
16 meet these steps and per capita driving, that's the other
17 category, and it's just one single number and it happens
18 to be 32 percent reduction in per capita driving with
19 respect to year 2005.

20 And my target is 2030, that's the target share
21 and it is 80 percent below 1990 levels; certainly that
22 should ring a bell if anyone is at all interested in
23 climate, because that is the point if the worlds vision
24 average that, that we will cap the atmospheric CO2, so
25 that's the first step.

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 15

♀

1 And many riders have been talking about the
2 decarbonization by 2030. It will have to do and minus
3 more lenient than that, it still allows 20 percent, but
4 the paper also shows clearly how you would achieve this.

5 And, first of all, you stop expanding
6 roads and you reallocate Transnet money that's been
7 allocated to highways to Transit why we would so call,
8 break a promise to the voters because we have a crises.
9 A life and death situation.

10 And that's why we should certainly have a super
11 majority to do that and stop expanding highways and spend
12 all of that money on Transit, mainly because we need to

13 reduce driving so much, we don't need the additional
14 capacity.

15 The other thing we need to do, is we need to
16 improve the way we pay for car parking and roads.

17 And I'll submit detail on that and you've seen
18 details on that over the years.

19 So thank you very much.

20 MR. STOLL: Thank you. Okay.

21 Cindy, you're the last speaker slip I have
22 left.

23 MS. ROCCO: Okay.

24 MR. STOLL: Okay.

25 MS. ROCCO: Sorry about that. It was actually

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 16

♀

1 in there.

2 I'm Cindy Rocco. I live on Alvarado Street in
3 South Cal and I did present this to City Council, but
4 this primarily has to do with the interchange and the
5 widening, and I think my main concern is the environment.

6 One of the things is with the lagoons. I have
7 several documents. I'm not sure where the reference
8 point is, but the other lagoons along six or five others,
9 they are actually getting a lot of mitigation from bike
10 paths, pedestrians. They're getting restoration efforts.
11 They're getting a lot of wetland for the production, et
12 cetera.

13 But from what I saw for our point of vista
Page 16

14 alone, was I think it was kind of handed off to -- I'm
15 not sure if it's somebody took over and it's a
16 restoration and they're trying to decide fresh water or
17 whatever, but there's no -- it doesn't seem to be any
18 other accountability or umbrella there.

19 And then, I also read -- oh, by the way,
20 Caltrans said that they didn't have any plans for
21 mitigations or anything, as if they didn't know what I
22 was talking about two weeks ago.

23 And then, for us the money funds go to the
24 other lagoons, so we don't get the money towards
25 allocation towards ours. I'm not sure whose budget that

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 17

‡

1 is and, you know, we already -- it's going to be a wet --
2 filled up or wetland in 50 years; okay. We already gave
3 half away from the mall. I think it has more diversity
4 in birds and animals, et cetera, et cetera, and tying in
5 to -- so I would want to have more consideration for our
6 water bodies because even Loma Alta Creek got
7 contaminated or whatever with the railroad, et cetera.

8 The other thing is, when they build now -- a
9 fellow said, "You can't look at 100 years," but we can
10 project things how things are going, and when they build
11 now, they should build the bridges for the train three-
12 wide.

13 In anticipation he said, "Well --" the Mayor
14 said, "Well we're having enough trouble getting two, but

15 anticipate."

16 And then also with the 5, no matter how wide
17 you make it, make it higher because the sea level
18 projections, I think with floodplains, et cetera, wave
19 height, it's going to come up five feet.

20 And I was reading where they said, "Oh, Well,
21 we'll do jacks. It can be remedied through jacks and
22 shins," but why would we do that if we know now what's
23 going to happen?

24 And -- what was I going say? Hang on. Oh,
25 wait. I have to sum up; okay.

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 18

♀

1 Oh, so what you ended up doing is, disturbing
2 the lagoon again and again and again and it was like the
3 first ecological reserve. It was supposed to be a State
4 Park, but there's a lot of history to that lagoon.

5 And my thought was, because of financial issues like
6 the corridor up in Orange County ended up like, doubling
7 their budget once they started getting -- started -- so
8 if you look at present dollars, future value of the
9 present dollars, it's going to actually be a better
10 return in payoff in the long run if you prepare now.

11 And, um -- okay, you know, just based on bonds
12 and et cetera. I mean, you're going to end up paying a
13 lot more now and we're going to take on and it's sort of
14 like being the stewards for the future.

15 I have a lot more stuff, but that was just my

16 basic feedback.

17 MR. STOLL: Okay; thank you.

18 MS. ROCCO: Oh, and maybe a diamond --

19 divergent diamond; just the other idea.

20 MR. STOLL: Okay. All right.

21 Well thank you for the comments, the public
22 hearing. I don't have any other speaker slips.

23 If anybody else wants to fill one out, if not,
24 I'm going to go ahead and close the public hearing.

25 I just remind all of you and Cindy in

SANDAG PUBLIC HEARING - DRAFT SAN DIEGO FORWARD 19

♀

1 particular at the end, you know, we're taking written
2 comments through July 15, so there's still plenty of
3 opportunity for you to get any other comments that you
4 have on the record for that.

5 (Whereupon the Public Hearing concluded at
6 12:01 p.m.)

“Community News for Sunday, June 17, 2013”

U-T San Diego, 06/17/13

<http://www.utsandiego.com/news/2013/Jun/17/tp-community-news-for-monday-june-17-2013/?#article-copy>

Calendar listing for June 20 public workshop in Oceanside.

“SANDAG Transportation Planning Workshop: Fri, Jun 21”

Ocean Beach Planning Board, 06/19/13

<http://oceanbeachplanning.org/archives/710>

This article talks about SANDAG’s series of workshops for the regional plan.

“SANDAG Evening Community Workshops, Thursdays in June”

Bike SD, 06/27/13

Link expired.

This article talks about SANDAG’s series of workshops for the regional plan.

July 2013

“La Mesa SANDAG meeting considers the future”

San Diego Reader, 07/01/13

<http://www.sandiegoreader.com/news/2013/jul/01/stringers-la-mesa-sandag-meeting-considers-/>

This article is about the June 27 workshop in La Mesa.

“National City seeks representation in SANDAG 2050 plan”

U-T San Diego, 07/08/13

<http://www.utsandiego.com/news/2013/jul/08/national-city-sandag-2050-plan/>

This article explains that the National City council members would like more of a say in the planning process for San Diego Forward.

August 2013

“New SANDAG System Aims to Reprioritize Highway, Transit Projects”

Voice of San Diego, 08/07/13

<http://voiceofsandiego.org/2013/08/07/new-sandag-system-aims-to-reprioritize-highway-transit-projects/>

This article discusses how the new Regional Plan would take into account public health, social equity, and other factors in ranking projects.

“Weekly Update from the Office of Councilmember Myrtle Cole”

San Diego City Council, District 4 Newsletters, 08/30/13

<http://www.sandiego.gov/citycouncil/cd4/pdf/2013/newsletter130830.pdf>

This Newsletter mentions that District Four constituents were invited to share ideas and make recommendations at the SANDAG Regional Plan Workshop.

January 2014

“San Diego Forward: The Regional Plan”

Greater Golden Hill Community Development Corporation, 01/29/14

<http://goldenhillcdc.org/san-diego-forward-the-regional-plan/>

Blurb about regional plan and SANDAG’s San Diego Forward YouTube video

August 2014

"Transportation Scenarios" San Diego Forward - The Regional Plan
Lakeside Chamber of Commerce, 08/04/14

<http://lakesidechamber.org/m/events/view/-Transportation-Scenarios-San-Diego-Forward-The-Regional-Plan>

Calendar listing for August 4 workshop (includes SANDAG flier).

"City Heights Grinds on Community Health in Urban Planning"

Voice of San Diego, 08/25/14

<http://voiceofsandiego.org/2014/08/25/city-heights-grinds-on-community-health-in-urban-planning/>

This article, about a health impact assessment of a skate park in City Heights, mentions that SANDAG will include a health impact assessment in San Diego Forward: The Regional Plan.

"City Heights Skaters Look At Environmental — And Health — Impacts Of Building A Skate Park"

KPBS, 08/25/14

“Connecting communities with better transportation choices”

San Diego Union Tribune, 09/09/15

<http://www.sandiegouniontribune.com/news/2015/sep/09/connecting-communities-with-better-transportation>

YOU'RE INVITED!

JOIN SANDAG IN CREATING AN AMBITIOUS REGIONAL PLAN

Get involved in shaping our future.

The San Diego Association of Governments (SANDAG) wants to hear your voice on how best to engage the community and all stakeholders in creating the region's first-ever combined regional plan. Participate in this journey to address the community's most critical issues, including transportation, land use, economic prosperity, affordable housing, social equity, public health, and the environment.

Share your voice with SANDAG on October 19th:

- » Learn about the integration of the 2050 Regional Transportation Plan and Sustainable Communities Strategy with the Regional Comprehensive Plan — the region's two primary long-term planning documents.
- » Dig into the proposed content of the new plan and voice your priorities.
- » Try out web-based public participation tools.
- » And, most importantly...tell us how YOU see yourself, your organization, and your community being involved in this process!

JOIN US FOR THIS PUBLIC WORKSHOP

(Free Event with Complimentary Lunch)

Friday, October 19, 2012

11:30 a.m. to 2 p.m.

Caltrans District 11 Headquarters

**4050 Taylor Street
Garcia Room
San Diego, CA 92110**

Take COASTER, Trolley, or bus to Old Town Transit Center and cross Taylor Street to Caltrans' offices. Phone 511 or visit 511sd.com/transit for route information. Limited parking also available.

RSVP Paula Zamudio, SANDAG community outreach coordinator, at paula.zamudio@sandag.org, (619) 595-5610, or via the SANDAGRegion Facebook page by attending the "Regional Plan Workshop" event.

¡ESTÁ INVITADO!

ÚNASE A SANDAG PARA CREAR UN AMBICIOSO PLAN REGIONAL

Participe en dar forma a nuestro futuro.

La Asociación de Gobiernos de San Diego (SANDAG, por sus siglas en inglés) desea escuchar su opinión sobre la mejor forma de involucrar a la comunidad y a todas las partes interesadas en crear el primer plan regional combinado de la región. Participe en este trayecto para atender los asuntos más críticos de la comunidad, incluyendo el transporte, el uso de suelos, la prosperidad económica, las viviendas accesibles, la equidad social, la salud pública y el medio ambiente.

Comparta su opinión con SANDAG el 19 de octubre:

- » Obtenga más información sobre la integración del Plan Regional de Transporte y la Estrategia de Comunidades Sustentable 2050 con el Plan Regional Integral: los dos principales documentos de planificación a largo plazo de la región.
- » Analice detalladamente el contenido propuesto del nuevo plan y exprese sus prioridades.
- » Pruebe las herramientas de participación pública basadas en internet.
- » Y, lo más importante de todo...cuéntenos cómo se ve a USTED mismo, a su organización y a su comunidad participando en este proceso.

ÚNASE A NOSOTROS EN ESTE IMPORTANTE TALLER PÚBLICO

(Evento gratuito con almuerzo de cortesía)

Viernes, 19 de octubre de 2012

De 11:30 a.m. a 2 p.m.

**Oficinas centrales de Caltrans
Distrito 11**

**4050 Taylor Street
Garcia Room
San Diego, CA 92110**

Tome el COASTER, Trolley o autobús hasta el Centro de Transporte Público Old Town y cruce la Calle Taylor hasta llegar a las oficinas de Caltrans. Llame al 511 o visite 511sd.com/transit para obtener información sobre las rutas. También hay espacio limitado de estacionamiento.

Confirmar asistencia con Paula Zamudio, coordinadora de enlace con la comunidad de SANDAG, en paula.zamudio@sandag.org, (619) 595-5610, o a través de la página de Facebook SANDAGRegion señalando que asistirá al evento "Taller del plan regional."

Dr. Jennifer Dill

Professor, Nohad A. Toulan School of Urban Studies & Planning, Portland State University

Dr. Jennifer Dill is a professor in the Nohad A. Toulan School of Urban Studies and Planning at Portland State University and Director of the Oregon Transportation Research and Education Consortium (OTREC). Dr. Dill's research interests include the relationship between transportation policy and planning and land use, health, and the environment, with a focus on non-motorized travel behavior. Prior to entering academia, Dr. Dill worked as an environmental and transportation planner for the Bay Area Air Quality Management District and US Environmental Protection Agency. She was also research director at the Local Government Commission, where she worked on energy, land use, and transportation issues. Dr. Dill has a Ph.D. in City and Regional Planning from UC Berkeley, an MA in Urban Planning from UCLA, and a BS in Environmental Policy Analysis and Planning from UC Davis.

Joel Freedman

Manager, Systems Analysis Technical Resource Center, Parsons Brinckerhoff

Joel Freedman is a manager in the Systems Analysis Technical Resource Center at Parsons Brinckerhoff. He specializes in the development of travel demand forecasting models, software applications, and the analysis of travel demand modeling results. He is also an expert in developing integrated land-use/transport models. He has successfully applied models for transportation planning, toll and revenue studies, as well as major Federal Transit Administration New Starts projects. His experience estimating and/or applying travel demand models spans metropolitan areas throughout the United States, including San Diego, Atlanta, Honolulu, Houston, Las Vegas, Phoenix, Portland, San Francisco, and Tucson. Joel has served as adjunct faculty to the School of Urban Planning at Portland State University, and is the lead instructor for the National Highway Institute course on travel demand forecasting.

Charlie Howard

Transportation Planning Director, Puget Sound Regional Council

Charlie Howard is the Transportation Planning Director for the Puget Sound Regional Council, a position that he has held since February 2005. Prior to joining PSRC, Charlie worked with the Washington State Department of Transportation for 18 years, most recently as the Director of Strategic Planning and Programming. Charlie has been involved in state and regional transportation issues for the past 30 years, including an active role in developing and implementing the state's growth management act.

David Vautin

Associate Transportation Planner, Metropolitan Transportation Commission

David Vautin is a Transportation Planner at the Metropolitan Transportation Commission (MTC) in Oakland, California, specializing in transportation performance assessment. His analytical work informs regional policy decisions by monitoring adherence to adopted goals and targets and by identifying high-performing transportation investments that support the region's sustainability objectives. As part of Plan Bay Area, the region's first Sustainable Communities Strategy, David's work on project-level performance assessment helped policymakers to prioritize the region's top transit expansion priorities for future New Starts and Small Starts funding opportunities, in addition to highlighting cost-ineffective and sprawl-inducing projects as low performers.

Martin Wachs

Senior Principal Researcher at RAND,

Distinguished Professor Emeritus in Urban Planning, UCLA Luskin School of Public Affairs

Martin Wachs is a senior principal researcher at RAND. He formerly served as director of the RAND Transportation, Space, and Technology Program. Prior to joining RAND, he was professor of civil and environmental engineering and professor of city and regional planning at the University of California, Berkeley, where he was also director of the Institute of Transportation Studies. Prior to this, he spent 25 years at UCLA. Wachs is the author of 160 articles and four books on subjects related to relationships between transportation, land use, and air quality; transportation finance and policy; transportation needs of the elderly; techniques for the evaluation of transportation systems and performance measurement in transportation planning. His research also addresses issues of equity in transportation policy.

Help Shape Our Region's Future

Workshops Tackle Important Issues Facing the Region

Bring your ideas to the table on the biggest issues facing the San Diego region between now and 2050 — issues like the economy, the environment, transportation, public health, and social equity.

Get involved in the on-going conversation about how best to tackle our challenges today, and preserve our quality of life for the future.

The San Diego Association of Governments (SANDAG) and its partners have embarked on creating San Diego Forward: The Regional Plan. It will build upon local planning efforts, and incorporate emerging issues and innovative concepts, to form an overall vision for the region's future, including specific actions aimed at turning that vision into reality.

Now is the time to make your voice heard! Take part in a series of workshops that will be held throughout the region in May, June, and July 2013 — in the daytime and in the evening.

Evening Community Workshops

Every Thursday in June — all include complimentary sandwiches, cookies, and beverages

All four community workshops will seek input on the same topics — land use, transportation, housing, healthy environment, public health, economic prosperity, public facilities, energy, climate change, and borders.

South County

June 6, 6 to 8 p.m.

*Casa Familiar Civic Center
212 W. Park Avenue, San Ysidro*

North County Inland

June 13, 6 to 8 p.m.

*Escondido City Hall, Mitchell Room
201 North Broadway, Escondido*

North County Coastal

June 20, 6 to 8 p.m.

*Oceanside City Hall Community Rooms
300 North Coast Highway, Oceanside*

East County

June 27, 6 to 8 p.m.

*La Mesa Community Center,
Arbor View Room
4975 Memorial Drive, La Mesa*

Weekday Central Workshops

The third Fridays in May, June, and July — all include complimentary sandwiches, cookies, and beverages

May 17 – Focused discussions on healthy environment, energy, climate change, and public health

June 21 – Focused discussions on land use and transportation

July 19 – Focused discussions on economic prosperity, public facilities, and borders

Caltrans District 11

**All weekday workshops from
11:30 a.m. to 1:30 p.m.**

*Garcia Room & Gallegos Room
4050 Taylor Street, San Diego*

Spanish-speaking staff members will be available at all seven workshops and Spanish translators will be available at the four evening workshops. All locations are transit accessible. Call 511 or visit 511sd.com/transit for route information. Limited parking also available.

RSVP to Sarah Strand at sarah.strand@sandag.org, (619) 595-5609, or via the SANDAGRegion Facebook page by attending “Regional Plan Workshop” events.

For more information, visit sandag.org/sandiegoforward

Ayude a determinar el futuro de nuestra región

Los talleres abordarán cuestiones importantes que enfrenta la región

Aporte sus ideas sobre los asuntos más importantes que la región de San Diego enfrentará de ahora al año 2050; cuestiones como la economía, el medio ambiente, el transporte, la salud pública y la justicia social.

Participe en un diálogo abierto sobre cómo abordar, de la mejor manera, nuestros retos actuales y preservar nuestra calidad de vida para el futuro.

La Asociación de Gobiernos de San Diego (SANDAG, por sus siglas en inglés) y sus socios han iniciado el desarrollo de San Diego Forward: The Regional Plan (San Diego Adelante: El Plan Regional). Se basará en los esfuerzos de planificación local e incorporará cuestiones emergentes y conceptos innovadores para formar una visión general del futuro de la región, incluyendo acciones específicas para convertir esa visión en una realidad.

¡Ahora es el momento de hacer que su voz se escuche! Participe en una serie de talleres que se llevarán a cabo por toda la región en mayo, junio y julio de 2013, durante el día y por la noche.

Talleres comunitarios por la noche

Cada jueves del mes de junio. En todos los talleres se ofrecerán sándwiches, galletas y bebidas de cortesía

En los cuatro talleres comunitarios se solicitará retroalimentación sobre los mismos temas: usos de suelo, transporte, vivienda, medio ambiente saludable, salud pública, prosperidad económica, instalaciones públicas, energía, cambio climático y fronteras.

Help Shape Our Region's Future

Join Us! Workshop Tackling Important Issues Facing the Region

Bring your ideas to the table on the biggest issues facing our community and the San Diego region between now and 2050 – issues like the economy, the environment, transportation, public health, and social equity. Get involved in the on-going conversation about how best to tackle our challenges today, and preserve our quality of life for the future.

Now is the time to make your voice heard!

RSVP *Marcus Bush at marcus.bush@sandag.org or (619) 595-5383, or via the SANDAGRegion Facebook page by attending the "Regional Plan Workshops" event.*

About San Diego Forward: The Regional Plan

The San Diego Association of Governments (SANDAG) and its partners have embarked on creating San Diego Forward: The Regional Plan. It will build upon local planning efforts and incorporate emerging issues and innovative concepts, to form an overall vision for the region's future, including specific actions aimed at turning that vision into reality.

Wednesday August 21 ~ 6 - 8pm

Joe & Vi Jacobs Center
404 Euclid Ave., San Diego, CA 92114

For more information, visit www.sandag.org/sandiegoforward.

Ayude a determinar el futuro de nuestra región

¡Únase a Nosotros!

Los talleres abordarán cuestiones importantes que enfrenta la región

Aporte sus ideas sobre los asuntos más importantes que la región de San Diego enfrentará de ahora al año 2050; cuestiones como la economía, el medio ambiente, el transporte, la salud pública y la justicia social. Participe en un diálogo abierto sobre cómo abordar, de la mejor manera, nuestros retos actuales y preservar nuestra calidad de vida para el futuro.

¡Ahora es el momento de hacer que su voz se escuche!

RSVP *Marcus Bush at marcus.bush@sandag.org or (619) 595-5383, or via the SANDAGRegion Facebook page by attending the "Regional Plan Workshops" event.*

Transportation Network Performance Measures Workshop

Join Us!

for the Transportation Network Performance Measures Workshop

(Free Event with Complimentary Lunch)

What measurements are most important to take into account as we evaluate the possible transportation networks of the future? As we look at what infrastructure we will build in the coming decades, should we put emphasis on the economy? The environment? Public health? Social equity? The San Diego Association of Governments (SANDAG) wants your input on the relative importance of those factors and others in evaluating the performance of transportation networks in San Diego Forward: The Regional Plan.

Monday, November 4, 2013

11:30 a.m. to 1:00 p.m.

*Balboa Park Club, Santa Fe Room
2144 Pan American Road West
San Diego, CA 92101*

Spanish-speaking staff members will be available at the workshop. Take the Route 7 bus with connection to the Trolley to Balboa Park and follow Presidents Way to Pan American Road West. Phone 511 or visit 511sd.com/transit for route information.

Limited parking also available.

RSVP Nikolas Kennedy, SANDAG Regional Planning, at nikolas.kennedy@sandag.org, (619) 699-1954, or via the SANDAGRegion Facebook page by attending the "Performance Measures Workshop."

About San Diego Forward: The Regional Plan

San Diego Forward: The Regional Plan will build upon local planning efforts, and incorporate emerging issues and innovative concepts, to form an overall vision for the region's future, including specific actions aimed at turning that vision into reality.

SANDAG kicked off the new regional plan effort in October 2012. Since then, we have been working together in partnership with a wide range of stakeholders to complete the regional plan in 2015. For more information, visit sandag.org/sandiegoforward.

Taller sobre Medidas de Rendimiento de la Red de Transporte

Acompáñenos en el taller de Medidas de Rendimiento

(Entrada libre e incluye almuerzo gratuito)

¿Cuáles son las medidas más importantes que debemos considerar al evaluar las posibles redes de transporte en el futuro? Si nos fijamos en la infraestructura que se construirá en las próximas décadas, ¿deberíamos poner énfasis en la economía? ¿El medio ambiente? ¿La salud pública? ¿Equidad social? La Asociación de Gobiernos de San Diego (SANDAG, por sus siglas en inglés) quiere sus opiniones sobre la importancia de esos y otros factores en la evaluación de rendimiento de redes de transporte en Adelante San Diego: El Plan Regional.

Lunes, 4 de noviembre de 2013
11:30 a.m. a 1:00 p.m.

Balboa Park Club, Cuarto Santa Fé
2144 Pan American Road West
San Diego, CA 92101

Kick off Workshop with Tribal Nations

Hosted by the San Pasqual Band of Diegueño Indians

San Diego Forward: The Regional Plan. The branding of this plan was the result of a culmination of events that began last year when the SANDAG Board of Directors approved merging the Regional Comprehensive Plan (RCP) update with the next Regional Transportation Plan/Sustainable Communities Strategy (2050 RTP/SCS). Combining these two major planning efforts will give citizens a single, easily accessible document that includes an overall vision for the San Diego region, as well as a concrete implementation program for a large portion of that vision.

As sovereign nations within the boundaries of the San Diego region it is critical that tribes be engaged in the shaping of this plan. The SCTCA Board approved a Tribal Consultation Plan for *San Diego Forward: The Regional Plan* at its November 20, 2012 meeting. This workshop is the first in a series of activities to create a dialogue with tribal nations on policy issues at a regional level that impact tribes or that tribes can impact. The purpose of this first workshop is to provide an overview of regional planning and the approach for developing *San Diego Forward: The Regional Plan*. Participants also will brainstorm tribal policy issues related to regional planning that should be addressed in depth through this process, laying the groundwork for future focused workshops through December 2013. The outcomes and strategies of these workshops will form the basis for the tribal perspective in *San Diego Forward: The Regional Plan* and be the subject of the 2014 San Diego Regional Tribal Summit.

EVENT DETAILS:

**Thursday,
March 21, 2013**

9 a.m. to Noon

Luncheon to follow,
hosted by the San
Pasqual Tribal Council

**San Pasqual

JOINT WORKSHOP FOR SANDAG WORKING GROUPS

Weigh in on Transportation Network Scenarios

SANDAG Working Groups are invited to join us for an interactive workshop to discuss the two transportation scenarios under consideration for San Diego Forward: The Regional Plan. Come learn about the current regional transportation system, the investment choices in two possible scenarios, and the performance of each scenario. Interactive exercises are planned. Your feedback is needed on the scenarios – we encourage you to attend!

About San Diego Forward

Over the past two years, the SANDAG and its partners have been working with communities and stakeholders from throughout the region to develop a vision that works for the economy, the environment, and our daily lives. The SANDAG Board will be asked to adopt San Diego Forward: The Regional Plan next summer. Previous workshops have focused on a wide range of topics to help provide the foundation for the plan. This workshop is focused specifically on mobility... Come provide your input on the transportation network scenarios. Your contributions are valuable!

Wednesday, August 6, 2014,
11:30 a.m. – 2:00 p.m.
Lunch is 11:30 a.m. to noon
Workshop begins promptly at noon

SANDAG INVITES THE PUBLIC TO GET INVOLVED IN CREATING AN AMBITIOUS REGIONAL PLAN

WHEN: Friday, October 19, 2012
 11:30 a.m. to 2 p.m.

WHERE: Caltrans District 11 Headquarters
 Garcia Room
 4050 Taylor Street
 Old Town (San Diego)

WHAT: The public is invited to think big about the region's future at a workshop this Friday. SANDAG is holding the event to seek ideas on how best to engage the community in creating the region's first-ever combined regional plan to guide the future direction of the county. Workshop participants will get to dig into the proposed content of the new plan and voice their priorities on transportation, economic development, and a host of quality of life issues. In addition, participants will be invited to try out web-based public participation tools.

VISUAL: Break-out sessions and web-based public participation tools.

About SANDAG

The [San Diego Association of Governments](#) (SANDAG) is the San Diego region's primary public planning, transportation, and research agency, providing the public forum for regional policy decisions about growth, transportation planning and construction, environmental management, housing, open space, energy, public safety, and binational topics. SANDAG is governed by a Board of Directors composed of mayors, council members, and supervisors from each of the region's 18 cities and the county government.

DRAFT PUBLIC INVOLVEMENT PLAN FOR REGIONAL PLAN RELEASED FOR PUBLIC REVIEW

SANDAG invites the public to review and comment on the [draft Public Involvement Plan](#) (PIP) that will be used to support the development of a consolidated regional plan. The review period ends February 7, 2013. Comments should be directed to David Hicks at david.hicks@sandag.org.

The Public Involvement Plan outlines a variety of opportunities for individuals, organizations, agencies, and other stakeholders to provide meaningful input into the regional plan development process. Outreach efforts will include consultation with Native American tribes and partnerships with community-based organizations to engage low-income and minority populations. Furthermore, the plan includes a series of public workshops, use of social media, visualizations, and other best practices for involving the public and receiving input.

The future of the San Diego region is currently guided by two primary long-range planning documents: the [Regional Comprehensive Plan](#) and the [2050 Regional Transportation Plan/Sustainable Communities Strategy](#). In May 2012, the SANDAG Board of Directors approved merging the updates for these plans to give citizens a single, easily accessible document. The new regional plan is scheduled to be adopted in 2015. More information is available at www.sandag.org/regionalplan.

Seven Community Workshops to Tackle Important Regional Issues

Public invited to attend workshops in May, June, and July

Starting Friday, May 17, SANDAG will hold a series of daytime and evening community workshops throughout San Diego County to solicit public input on the biggest issues facing the region between now and 2050 - issues like the economy, environment, transportation, public health, and social equity.

The input gathered at these workshops will be used to develop [San Diego Forward: The Regional Plan](#). This new regional plan will build upon local planning efforts, and incorporate emerging issues and innovative concepts, to form an overall vision for the region's future, including specific actions to turn that vision into reality. The SANDAG Board is expected to adopt the plan in 2015.

Evening workshops will be held every Thursday in June from 6-8 p.m. at different locations countywide. These workshops will seek input on the same topics - land use, transportation, housing, healthy environment, public health, economic prosperity, public facilities, energy, climate change, and borders.

Daytime workshops will be held on the third Fridays in May, June, and July from 11:30 a.m. to 1:30 p.m. at Caltrans District 11, Garcia Room & Gallegos Room, 4050 Taylor Street, San Diego. Each workshop will focus on specific topics.

Complimentary meals will be served at all the workshops. A printable version of the workshop flyer in English and Spanish is available at: http://www.sandag.org/uploads/projectid/projectid_428_15908.pdf.

Evening Workshops:

South County

June 6, 6-8 p.m.
Casa Familiar Civic Center
212 W. Park Avenue, San Ysidro

North County Inland

June 13, 6-8 p.m.
Escondido City Hall, Mitchell Room
201 North Broadway, Escondido

North County Coastal

June 20, 6 to 8 p.m.
Oceanside City Hall Community Rooms
300 North Coast Highway, Oceanside

East County

June 27, 6-8 p.m.
La Mesa Community Center, Arbor View Room
4975 Memorial Drive, La Mesa

Daytime Workshops:

May 17 - Healthy environment, energy, climate change, and public health

June 21 - Land use and transportation

July 19 - Economic prosperity, public facilities, and borders

Attendees should RVSP to sarah.strand@sandag.org, (619) 595-5609, or via the SANDAGRegion Facebook page by attending "Regional Plan Workshop" events.

About SANDAG

The [San Diego Association of Governments](#) (SANDAG) is the San Diego region's primary public planning, transportation, and research agency, providing the public forum for regional policy decisions about growth, transportation planning and construction, environmental management, housing, open space, energy, public safety, and binational topics. SANDAG is governed by a Board of Directors composed of mayors, council members, and supervisors from each of the region's 18 cities and the county government.

SANDAG HOLDS PUBLIC WORKSHOPS TO GET INPUT ON THE REGION'S FUTURE TRANSPORTATION SYSTEMS

WHEN: Monday, August 4, 2014
 Afternoon workshop - 11:30 a.m. to 2 p.m.
 Evening workshop - 5:30 to 8 p.m.

WHERE: Caltrans District 11 Headquarters
 Garcia Room
 4050 Taylor St.
 San Diego

WHAT: SANDAG will hold two identical workshops on Monday to solicit public input on transportation scenarios under consideration for [San Diego Forward: The Regional Plan](#). This long-term blueprint for the region's future, which is scheduled for adoption in summer 2015, governs the investment choices the region will make on transportation infrastructure through 2050. At the workshop, attendees will learn about the performance of two scenarios in terms of mobility, air quality, and other factors. They also will learn about potential transit, highway, and pedestrian/bicycle projects that would be built over the next few decades. Everyone is invited to participate in the free workshops (which include light refreshments). For more information and to RSVP, view the workshop flier at sdforward.com.

PUBLIC NOTICE OF AVAILABILITY OF THE DRAFT SAN DIEGO FORWARD: THE REGIONAL PLAN, AND ITS SUSTAINABLE COMMUNITIES STRATEGY, THE DRAFT AIR QUALITY CONFORMITY ANALYSIS AND NOTICE OF PUBLIC WORKSHOPS

Notice is hereby given that the San Diego Association of Governments (SANDAG) Board of Directors accepted the draft San Diego Forward: The Regional Plan (Regional Plan) and its Sustainable Communities Strategy (SCS) for public distribution and set the closing date for public comments on the draft Regional Plan/SCS to 55 days after distribution of the draft Environmental Impact Report (EIR) that relates to the Regional Plan. Distribution of the draft EIR is planned for May with a comment deadline 55 days after its release.

The draft Regional Plan combines the big-picture vision for how our region will grow over the next 35 years with an implementation program to help make that vision a reality. The Regional Plan/SCS is built on an integrated set of public policies, strategies, and investments to maintain, manage, and improve the transportation system so that it meets the diverse needs of our region through 2050. The Regional Plan also includes the draft Air Quality Conformity Determination demonstrating the Regional Plan's conformity with the State Implementation Plans for air quality, in accordance with the Transportation Conformity Requirements in 40 C.F.R. 51 and 93, as required by the 1990 Clean Air Act Amendments.

The SANDAG Board of Directors has scheduled a series of workshops on the draft Regional Plan to accept additional public comment. The workshops are scheduled as follows:

- May 12, 6 to 8:30 pm – Escondido City Hall, Mitchell Room, 201 North Broadway, Escondido, 92025
- May 13, 6 to 8:30 pm – La Mesa Community Center, Arbor View Room, 4975 Memorial Drive, La Mesa, 91942
- May 14, 1 to 3:30 pm – Caltrans, District 11, Garcia Room, 4050 Taylor Street, San Diego, 92110
- May 20, 6 to 8:30 pm – Oceanside City Hall Community Rooms, 300 N. Coast Highway, Oceanside, 92054
- May 21, 6 to 8:30 pm – Casa Familiar Civic Center, 212 W. Park Avenue, San Ysidro, 92173
- May 27, 6 to 8:30 pm – Jacobs Center Community Room, 404 Euclid Avenue, San Diego, 92114
- May 28, 6 to 8:30 pm – UTC Forum Hall Community Room, 4545 La Jolla Village Drive, Suite E-25, San Diego, 92122

Spanish-speaking staff members and translators will be available at all seven workshops. The workshop at Casa Familiar will be conducted in Spanish with English translation available. All locations are transit accessible and family members of all ages are welcome. Call 511 or visit 511sd.com/transit for route information. If you require assistance in a language other than Spanish or special equipment to accommodate a disability in order to participate, please contact SANDAG at (619) 699-1900 at least 72 hours in advance of the meeting. TTY: (619) 699-1904.

During the workshops, participants will be afforded a variety of means to submit comments on the draft Regional Plan, including filling out comment cards and speaking to a court reporter. Comments also may be submitted via sdforward.com, directly through email at sdforward@sandag.org; via telephone at (619) 699-1934, toll free (877) 277-5736 and TTY (619) 699-1904, via fax at (619) 699-1905; through the mail to Attention: Regional Plan, 401 B Street, Suite 800, San Diego CA, 92101; and in person by dropping off written comments at SANDAG offices at the last written address. pub: 4/27/15

Nike

(Continued from page 9)
 shirt simultaneously in Las Vegas and Manila," he said. "The slogan is about Manny defying fate to do the impossible things. At Nike, we set defying expectations is Manny's strength. They said he couldn't make something out of his life after dropping out of elementary school, he couldn't win eight world titles in different divisions. But Manny did all of that. Now, he's not to do what 47 others failed to do before, to become the first man to beat Manny weather."

Pacquiao has been a Nike athlete since 2006. Through the years, Nike has produced several models of Pacquiao training shoes and various designs of apparel, including T-shirts, hoodies and shorts. For the Mannyweather fight, Nike has provided Pacquiao with a wide range of training gear and filmed a three-minute, black-and-white documentary to showcase his "inner strength."

Reyes said the documentary mimics Pacquiao in the gym, on the track and working out to get ready for the biggest fight of his life. Pacquiao himself narrates the documentary in English with Filipino subtitles. "Manny's a elite athlete and we thought of going behind the scenes of his training to reveal his inner strength, his mental toughness and focus, the things that make him a champion," said Reyes. "It's remarkable to listen to Manny talk about what's on his mind while training. It gives you an idea of why Manny is such a global figure and a popular champion."

Reyes said Nike will supply Pacquiao's fighting shorts and gear for the Mannyweather fight. "We're giving Manny two options for his fighting shorts and he'll choose which colors he wants to wear," said Reyes. "The shorts and shoes were to be delivered yesterday. We've got our marketing guys Jino Ferrer and Jappy Parolan in Las Vegas to make sure Manny and his team are provided their gear."

The documentary on Pacquiao is the third in a series featuring Nike athletes in training. The others are American Irish professional golfer Rory McIlroy and Hawaii-born football quarterback and Heisman Trophy winner Marcus Mariota.

Nike also recently unveiled a Pacquiao line of training gear available in line. The apparel consists of a Team Pacquiao dri-fit T-shirt in dark grey with the NIKE logo in gold for \$30, a dri-fit tank featuring a short-sleeve T-shirt in seven colors for \$35, hypoxycord knit shorts in seven colors for \$40, two hypoxycord compression tights in five designs for \$55, a five 5.0 V6 training shoe with hexagonal flex grooves and rubber pods in four colorways for \$100 and a half-ankle, no-show sock in three pairs for \$18. Nike's new line also includes soft, cooling, moisture-wicking, short-sleeve T-shirts in three colors for \$29.97 and the hypoxycord knit shorts in three colors for \$29.97.

Pacquiao's inner strength is defined by his focus and mental toughness. "When you add up the amount of potential distractions he faces on any given day, focus becomes the most important element of Pacquiao's training and preparation," said Reyes. "In the area around the gym where he trains in Los Angeles, Pacquiao has become a special spectacle sport. Pacquiao's relentless training regimen may not be solitary but he has trained his mind to shut out the distractions surrounding him while training, side-stepping stadium steps, doing core workouts and heavy ball throws."

The Nike documentary captures Pacquiao going through the rigorous regimen. "I love to have people around me while I'm training," said Pacquiao. "When you focus, you don't have to worry about 'Oh, what am I gonna do? Maybe I'm not ready' or anything like that. But you have peace of mind and you're ready to fight. You have to prepare your mind, train your mind, how you're gonna do every day, how you're gonna be training, training in the gym. You have to focus on that particular training. Preparing physically, spiritually and mentally - it will ensure victory. If you're not physically prepared for the fight, only your mind can think about it but your body cannot respond to you. You're not in shape or you're tired. When you put in the hard work in training before the fight, you set up being able to do whatever you want in the ring. Whatever reason, if you want to move, you can move. All because you've done the hard work in the gym."

PUBLIC NOTICE OF AVAILABILITY OF THE DRAFT SAN DIEGO FORWARD: THE REGIONAL PLAN, AND ITS SUSTAINABLE COMMUNITIES STRATEGY, THE DRAFT AIR QUALITY CONFORMITY ANALYSIS AND NOTICE OF PUBLIC WORKSHOPS

Notice is hereby given that the San Diego Association of Governments (SANDAG) Board of Directors accepted the draft San Diego Forward: The Regional Plan (Regional Plan) and its Sustainable Communities Strategy (SCS) for public distribution and set the closing date for public comments on the draft Regional Plan/SCS to 55 days after distribution of the draft Environmental Impact Report (EIR) that relates to the Regional Plan. Distribution of the draft EIR is planned for May with a comment deadline 55 days after its release. The draft Regional Plan contains the big-picture vision for how our region will govern over the next 35 years with an implementation program to help make that vision a reality. The Regional Plan/SCS is built on an integrated set of public policies, strategies, and investments to maintain, manage, and improve the transportation system so that it meets the diverse needs of our region through 2050. Obama

(Continued from page 1)
 sibility for its own security as well as regional defense.

Japan's military is considering joining the US in maritime air patrols in the South China Sea in response to China's increasingly assertive pursuit of territorial claims. Japanese and US sources familiar with the discussions said.

While no concrete plans had yet been finalized, Japan could join US patrols in the South China Sea, or operate patrols in relation from the Japanese island of Okinawa on the edge of the East China Sea, the Japanese source said, speaking on condition of anonymity. Headlines (Article MTRC), page-mach1, section-mach1

His for the discussion is within the Japanese military, but my move to begin patrols would need civilian approval. Japanese air patrols in an area where China is pushing disputed territorial claims, including through a missile program of land reclamation, would risk antagonizing Beijing.

But defense officials in Tokyo worry that doing nothing would allow China to eventually impose its authority over a region through its \$5 trillion of sea-borne trade passes every year - much of it heading to and from Japan. "We have to show China that it doesn't own the sea," said the Japanese source.

A US military source said a decision to begin flights in the South China Sea could prompt Tokyo to ask the Philippines for access to air bases under disaster relief training and other joint training exercises. This would give Japanese aircraft added range to stay on patrol longer, he said, also speaking on condition of anonymity.

A senior Philippine military source said such access would not currently be possible, because Manila does not have any military co-operation agreement with Tokyo similar to the pact it has with Washington, which allows US ships to use its bases to refuel, resupply and make emergency repairs. But President Aquino, one of the most vocal regional critics of China's reclamation program, is due to meet Abe in Tokyo in June, when the South China Sea issue is certain to be discussed.

Obama told reporters after talks with Abe on Tuesday that the two countries shared concerns about China's reclamation and construction activities in the South China Sea and were "united in our commitment to freedom of navigation and respect for international law."

He said the new defense guidelines meant US and Japanese forces would be more flexible, and that Japan would "take on greater roles and responsibilities in the Asia-Pacific."

Neither he nor Abe detailed what those roles might be.

Japanese Defense Minister Gen Nakatani and Foreign Minister Fumio Kishida designed questions about the possibility of joint patrolling of a claim sea lanes when met at a news conference with US counterparts on Monday, saying legislation in Japan had still to be worked out and regional countries consulted.

The United States has a squadron of at least four P-3 Orion patrol planes and a squadron of new Boeing P-8 Poseidon sub-hunting aircraft in the region, six of which are stationed in Okinawa.

Japan operates a fleet of 70 P-3s in the second Japan and is due to deploy about 20 new Kawasaki Heavy P-1 patrol aircraft with twice the range of the older Orions over the next five years.

Regional tensions
 Japan is in direct dispute with Beijing over Japanese-administered East China Sea islands known as the Senkaku Islands and the Diaoyu Islands in China.

But an even greater source of regional tension has been China's rapid reclamation effort around seven reefs in the Spratly sub-plateau of the South China Sea, which has alarmed claimants such as the Philippines and Vietnam.

While inviting the United States to welcome China's "peaceful rise," Obama said "I don't want to minimize that there are some real tensions that have arisen with China around its approach to maritime issues and its claims."

Obama said the Chinese "feel that rather than resolve these issues through normal international dispute settlements, they are flexing their muscles. That's the wrong way to go about it."

Worries have persisted in Tokyo that Washington may not come to Japan's defense if needed one day in a maritime clash with China.

Obama sought to reassure the Japanese when he revealed a certain hint, made during his visit to Tokyo last April. To defend Japan against any threat to its territory, but US officials have made clear they want to avoid any such military engagement.

Abe's speech to Congress was clearly criticized for what he says about Japan's wartime past, still a sensitive issue for Asian neighbors, including China and US ally South Korea, nearly 70 years after the end of World War Two.

He is under pressure from critics to ease concerns that he wants to whitewash Japan's role of wartime aggression. His conservative domestic allies feel fresh apologies are needed.

"Extremely concerned"

Chinese Foreign Ministry spokesman Hong Lei said that China was "extremely concerned" that the closing statement of the leaders' summit of the Association of Southeast Asian Nations in Kuala Lumpur earlier this week addressed the South China Sea issue, which he said was not a problem between China and ASEAN.

"On this issue China has exercised extreme restraint," Hong said, repeating that China believed the dispute should be resolved via direct talks between the claimants.

There were no problems with freedom of navigation in the waters, he told a daily news briefing.

In a speech to ASEAN levels of state on Monday, President Aquino said the "unwise reclamation" by China posed a threat to the security and stability of the region.

Hong said that China had a right to build on islands in the South China Sea. "China resolutely opposes individual countries making unilateral claims to China for their own selfish interests and taking hostage the China-ASEAN relationship," he added. - Paolo Romero, Jimmie Lamale

Malacanang

(Continued from page 1)
 open, explaining that it will provide more room for the Philippine government.

He said that until midnight of Tuesday, Foreign Affairs Secretary Albert Del Rosario and Justice Secretary Leila de Lima were unable to contact Indonesian Attorney-General to inquire if the latest communication sent for the case of Veloso was received and acknowledge by the Indonesian government.

It was only Wednesday early morning when he got the good news.

"Got my message from Secretary Del Rosario, who was still awake at that time as late as 11 o'clock and was still trying to push for that conversation with the Attorney-General. I got this text from him from SPA at 2:20 am. Cabos, we did it. Albert, period," said Almendras.

While the Philippine government is thankful, Almendras clarified that there is no reason to celebrate.

He noted that Indonesia still pushed through with the executions of other foreigners with drug-related offenses Wednesday.

Malacanang said it is not important who gets the credit for the stay of execution. What is important, according to Almendras, is everyone is in a position to help.

Palawan

(Continued from page 1)
 Rade Ramos, in a post on Facebook, said the electric coop would need around 15,000 consumers to turn off most of their appliances to cover the shortfall.

"Only 15,000 households would switch off their refrigerators, then the 2-MW power deficit is gone. Everybody will have a chance in watch live the fight of the century," he said.

Ramos also urged consumers to refrain from using power-guzzling appliances like electric irons, washing machines and air-conditioning units to enable the electric grid to have enough power for everyone.

Paleo's campaign was met with varied reactions from consumers.

Mary Rose Meacast, in a post on Facebook, urged other consumers to cooperate with Paleo's measure as it would mean "savings" for them.

"Be wise and be vigilant" in the use of unnecessary electricity in households," she said.

But Michael Exibia, in another post, said in jest, "Nood no lang kami ng (We will just watch the) Pacquiao-Mannyweather through the power of the mind."

The service area of Paleo is Puerto Princesa City and the towns of Aborlan, Narra, Rizal, Quezon, Brooke's Point and Roxas.

undergoing His holiness or of standing when He shall appear.

What, then, is to be our stance in light of the many things too great for us to know and which God mercifully conceals from us? We should have the humility of a child, who knows what he does not know and is content that his father knows. One of the psalms says, *O Lord, my heart is not proud; my humility my eyes.*

How many things I do not know; how many things I do not understand; how many things I do not know beyond me.

Truly I have not my mind in silence and peace.

Like a weaned child on its mother's lap, even so is my mind.

O Lord, hope in the Lord both now and forever.

A Meditation

(Continued from page 10)
 "seven thunders" indicates that these hidden utterances are of fearful weightiness. Seven is a number that refers to the fullness of something, so these are loud and devastating thunders, God, in His mercy to us, does not reveal all the fearful words that will come on this awful world, which cannot endure the glorious and fiery presence of His glory. So much for this world and the arrows of His quiver, which are not exhausted. Besides the seven already foretold in Scripture, the seven thunders may well conceal others that are unnumberable and too horrifying for the world to endure, a world that is incapable of

(Psalms 131 in toto)
 Scripture says, Beyond these created wonders many things lie hid. Only a few of God's works have we seen (Sirach 43:34).
 "Thank you, Lord, for what you have taught us and revealed to us. Thank you, too, for what you have mercifully kept hidden and which is too much for us to know. Thank you, Lord! Help us learn and keep us humble, like little children

AVISO PÚBLICO DE DISPONIBILIDAD DEL BORRADOR DE SAN DIEGO FORWARD:THE REGIONAL PLAN (BORRADOR DEL PLAN REGIONAL), Y SU ESTRATEGIA DE COMUNIDADES SUSTENTABLES, BORRADOR DE ANÁLISIS DE CONFORMIDAD DE LA CALIDAD DEL AIRE Y AVISO DE TALLERES PÚBLICOS

Se informa por el presente aviso que la Junta Directiva de la Asociación de Gobiernos de San Diego aceptó el Borrador de San Diego Forward: The Regional Plan (Borrador del Plan Regional) y su Estrategia de Comunidades Sustentables (Sustainable Communities Strategy, SCS) para su distribución pública y estableció la fecha límite para recibir comentarios públicos sobre The Regional Plan (Borrador del Plan Regional) y su SCS hasta 55 días después de la distribución del Borrador del Informe del Impacto Ambiental (Borrador EIR) que se relaciona con el Plan Regional. La distribución del Borrador EIR está prevista para mayo con una fecha límite para comentarios de 55 días después de su publicación.

The Regional Plan (Borrador del Plan Regional) combina la visión general de cómo nuestra región crecerá en los próximos 35 años con un programa de implementación para ayudar a hacer realidad esa visión. El Plan Regional y su SCS están elaborados en función de un conjunto integrado de políticas públicas, estrategias e inversiones para mantener, administrar y mejorar el sistema de transporte de modo que satisfaga las diversas necesidades de nuestra región hasta 2050. El Plan también incluye el Borrador de la Determinación de Conformidad de la Calidad de Aire que demuestra la conformidad del plan con los Planes Estatales de Implementación para la calidad del aire, de acuerdo con los Requisitos de Conformidad del Transporte en el Título 40 del CFR (Código de Regulaciones Federales), Parte 51 y Parte 93, según lo requieran las Enmiendas de la Ley de Aire Limpio de 1990.

La Junta Directiva de la Asociación de Gobiernos de San Diego (San Diego Association of Governments, SANDAG) ha programado una serie de talleres sobre The Regional Plan (Borrador del Plan Regional) para aceptar comentarios públicos adicionales. Los talleres están programados de la siguiente manera:

- 12 de mayo de 6:00 a 8:30 p. m.: Escondido City Hall, Mitchell Room, 201 North Broadway, Escondido, 92025
- 13 de mayo de 6:00 a 8:30 p. m.: La Mesa Community Center, Arbor View Room, 4975 Memorial Drive, La Mesa, 91942
- 14 de mayo de 1:00 a 3:30 p. m.: Caltrans, District 11, García Room, 4050 Taylor Street, San Diego, 92110
- 20 de mayo de 6:00 a 8:30 p. m.: Oceanside City Hall Community Rooms, 300 N. Coast Highway, Oceanside, 92054
- 21 de mayo de 6:00 a 8:30 p. m.: Casa Familiar Civic Center, 212 W. Park Avenue, San Ysidro, 92173
- 27 de mayo de 6:00 a 8:30 p. m.: Jacobs Center Community Room, 404 Euclid Avenue, San Diego, 92114
- 28 de mayo de 6:00 a 8:30 p. m.: UTC Forum Hall Community Room, 4545 La Jolla Village Drive, Suite E-25, San Diego, 92122

Miembros hispanohablantes del personal y traductores estarán disponibles en todos los talleres. El taller en Casa Familiar se llevará a cabo en español con traducción en inglés disponible. Todos los lugares son accesibles al tránsito, y son bienvenidos los familiares de todas las edades. Llame al 511 o visite 511sd.com/transit para obtener información sobre las rutas. Si necesita ayuda en cualquier otro idioma que no sea español o algún equipo especial por motivos de discapacidad para poder participar, comuníquese con SANDAG al (619) 699-1900 por lo menos 72 horas antes de la reunión. Teletipo: (619) 699-1904.

Durante los talleres, a los participantes se les brindará una variedad de medios para presentar sus comentarios sobre el borrador del plan, como completar tarjetas de comentarios y hablar con un periodista del tribunal. Además, los comentarios se pueden enviar a través de sdfoward.com, directamente a través de correo electrónico a sdfoward@sandag.org; por teléfono al (619) 699-1934, al número gratuito (877) 277-5736 y al teletipo (619) 699-1904, por fax al (619) 699-1905; y a través del correo a ATTN: Plan Regional, 401 B Street, Suite 800, San Diego CA, 92101. Además, puede dejar en persona sus comentarios por escrito en las oficinas de SANDAG en la última dirección escrita.

LA VIDA EN EL TRABAJO

Sara Gurling
Para El Latino

¿Que le hace si no voto en el 2016?

Hay un refrán que creo tiene mucho sentido. Con certeza de sabio escuché a un señor decir "hay veces que nada el pato y hay veces que ni agua bebe".

En aquel entonces, yo no tenía ni la menor idea a que se refería. Pensaba yo- ¿cual pato?

Hoy que la vida me ha costado sacrificios y trabajo duro, puedo ver con claridad que en realidad la vida nos trae olas de bien y olas de barreras que a veces vemos como insuperables. Cuando uno es persona muy trabajadora y dedicada a su oficio, los años pasan a veces sin mayores interrupciones. Pero cuando menos lo espera uno, algo puede pasar y ese algo nos hace sufrir o temer por nuestro futuro.

En mi carrera como representante de trabajadores, he visto como el despido de un trabajador puede ser devastador para toda su familia. Pero hay veces que la falta de empleo no viene por un despido si no por algún accidente o enfermedad que aflija al trabajador.

La carrera del trabajador depende de muchas cosas. Típicamente se supone que estaremos trabajando la mayoría de nuestros años como adultos. Pero hay veces que no se puede. Por eso en este y muchos otros países existen programas de seguro para los discapacitados, los desempleados y los jubilados a temprana edad.

Muchos de estos programas han estado al alcance de quienes califican para ellos siempre y cuando hallan trabajado cierta cantidad de años para acumular créditos. O, en el caso del seguro social al discapacitado, el derecho se otorga por el hecho de certificación de un médico que lo designa como discapacitado.

Pero año tras año estos programas tan claves para mantener a las personas mas vulnerables a flote, son atacados en las legislaturas. Los recortes y amenazas por parte de muchos legisladores ponen a muchas personas nerviosas. Si estos programas sufren recortes o eliminación, dejaríamos desamparados a los ex-trabajadores y personas ancianas y discapacitadas que no pueden valerse por si mismos.

La forma de salvar estos programas de seguro para las personas mas vulnerables, como algún día lo seremos todos, es apoyando a sus defensores. Es nuestra responsabilidad elegir a candidatos que apoyan estos programas.

Los candidatos en el senado y el congreso estadounidense son quienes aportan fondos para estos programas. Los votantes deben ser cuidadosos con sus votos en las elecciones para elegir a candidatos que apoyan a los trabajadores y a los programas que benefician a los trabajadores así como a las personas que ya no pueden trabajar.

Ya vienen las elecciones para un nuevo presidente y muchos candidatos para congresista y senador se van a decidir en las aulas en el 2016.

Es de suma importancia que los Latinos que son elegibles, estén registrados para votar y que los que todavía no son ciudadanos empiecen a procesar sus papeles para hacerse ciudadanos lo antes posible.

Hay mucho que decidir en las elecciones del 2016. La elección de representantes defensores de los beneficios de seguro social, beneficios del desempleo y para discapacitados es muy importante.

La falta de acción por nuestra parte nos puede dejar en la situación del pato que no tiene ni que beber.

El seguro social y los demás beneficios que existen no van a dar abasto para la manutención de los trabajadores por completo- pero en el charco de la vida estar a flote y poder aunque sea nadar es mejor que estar estancado y sin agua de beber.

****Sara Gurling fue la directora de organización comunitaria de la Unión Americana de Libertades Civiles (ACLU) de San Diego y Condado de Imperial. Es conocida como activista humanitaria laboral pro-justicia. Es presidenta de la organización humanitaria Ángeles de La Frontera. Ha laborado como representante de trabajadores por diecisiete años. Fue vicepresidente del Concilio Laboral del Condado de Orange y es maestra de estudios laborales en San Diego City College*

Public Notice

San Diego Forward:
The Regional Plan, its Environmental Impact Report, the 2014 Regional Transportation Improvement Program Amendment No. 7, Air Quality Conformity Analysis, and Other Related Actions

The San Diego Association of Governments (SANDAG) Board of Directors will consider the following actions at its regularly scheduled meeting on October 9, 2015: certification of the Final Environmental Impact Report for San Diego Forward: The Regional Plan, approval of the Regional Plan and adoption of the Findings, Statement of Overriding Considerations, and Mitigation Monitoring and Reporting Program for the Regional Plan; finding the Regional Plan Revenue Constrained Plan in conformance with the State Implementation Plans for air quality; adoption of the Air Quality Conformity determination; finding that the Regional Plan and its Sustainable Communities Strategy (SCS) meet the greenhouse gas reduction targets established by the California Air Resources Board and other requirements in Government Code §65080(b) et seq.; and approval of Amendment No. 7 to the Regional Transportation Improvement Program (RTIP).

The meeting will take place starting at 10 a.m. at 401 B Street, San Di-

ego, California, in the 7th floor Boardroom. The Regional Plan serves as a blueprint for how the San Diego region will grow, and how SANDAG and other agencies in the region will invest in transportation infrastructure that will provide more choices, strengthen the economy, promote a healthy environment, and support thriving communities. The Regional Plan serves as the Regional Transportation Plan and it includes the mandatory policy, action, and financial elements as identified in the Code of Federal Regulations Title 23 Part 450 and Title 49, Part 613, in addition to the SCS as identified in California Government Code Section 65080.

The revised draft Air Quality Conformity Analysis prepared for the Regional Plan and 2014 RTIP Amendment No. 7 was released for public comment on August 19, 2015, and is available at the SANDAG offices at the above address, from the SANDAG website at sandag.org, or by calling (619) 699-1929. Written comments on the Air Quality Conformity Analysis will be accepted via letter, fax, or email and must be received no later than September 24, 2015. Comments should be addressed to SANDAG, Attention: Rachel Kennedy, Senior Regional Planner, 401 B Street, Suite 800, San Diego, CA 92101; fax (619) 699 1905; or email rachel.kennedy@sandag.org.

1,355 beds for graduate and professional student and students with dependents. Approximately 900 parking spaces would be provided in a new structure with some surface parking located adjacent to key access points. Hensel Phelps is the Design/Build Contractor.

The selected firm will provide testing, inspection and observations of work installed by the University's contractor as required by applicable state building codes. Services will be required starting no later than November 2015 and will continue through December 2017.

The complete scope of work is delineated in the project plans and specifications. Respondents are to provide an estimate for material testing and inspection services based upon the schedule, plan and specifications referenced and current prevailing wage criteria. Due to the size of the files, the documents will be issued on a compact disc. The CDs are available for pickup at UC San Diego, Facilities Design & Construction, 10280 North Torrey Pines Road, Suite 465, La Jolla, CA 92037. Should you need a cd overnighted to you, at your cost please contact Jennifer Mora at 858.822.6401, jmora@ucsd.edu.

NOTICE OF PUBLIC HEARING & PUBLIC REVIEW

CITY OF SAN DIEGO DRAFT FISCAL YEAR 2015

Consolidated Annual Performance and Evaluation Report (CAPER)

NOTICE IS HEREBY GIVEN that the City of San Diego will hold a public hearing on September 22, 2015 at 2:00 p.m. or sometime thereafter to receive comments on the Consolidated Annual Performance and Evaluation Report (CAPER) for Fiscal Year (FY) 2015.

The CAPER is an annual report that assesses of the City's progress toward meeting its goals and high priority needs for the following federal programs: Community Development Block Grant (CDBG); HOME Investment

LEGAL NOTICES

Quality Conformity Analysis, and Other Related Actions

The San Diego Association of Governments (SANDAG) Board of Directors will consider the following actions at its regularly scheduled meeting on October 9, 2015: certification of the Final Environmental Impact Report for San Diego Forward: The Regional Plan, approval of the Regional Plan and adoption of the Findings, Statement of Overriding Considerations, and Mitigation Monitoring and Reporting Program for the Regional Plan; finding the Regional Plan Revenue Constrained Plan in conformance with the State Implementation Plans for air quality; adoption of the Air Quality Conformity determination; finding that the Regional Plan and its Sustainable Communities Strategy (SCS) meet the greenhouse gas reduction targets established by the California Air Resources Board and other requirements in Government Code §65080(b) et seq.; and approval of Amendment No. 7 to the Regional Transportation Improvement Program (RTIP).

The meeting will take place starting at 10 a.m. at 401 B Street, San Diego, California, in the 7th floor Boardroom. The Regional Plan serves as a blueprint for how the San Diego region will grow, and how SANDAG and other agencies in the region will invest in transportation infrastructure that will provide more choices, strengthen the economy, promote a healthy environment, and support thriving communities. The Regional Plan serves as the Regional Transportation Plan and it includes the mandatory policy, action, and financial elements as identified in the Code of Federal Regulations Title 23 Part 450 and Title 49, Part 613, in addition to the SCS as identified in California Government Code Section 65080.

LEGAL NOTICES

of California Contractor's Licensing Board. Bidders must comply with all Buy America requirements. Projects may be funded in part with FTA and/or FHWA funding. The SANDAG DBE goal will be set at the Job Order level based on Scope of Work and funding source, and fall within an estimated range of 0-25%.

A non-mandatory prebid meeting will be held on Thursday September 24, 2015 at SANDAG, 401 B Street, 7th Floor, San Diego, in the Wells Fargo Building. Networking for subs and primes: 9:30-10:00 a.m. Pre-bid starts at 10:00 a.m. Contact Susana Tello at susana.tello@sandag.org with a copy to constructioncontracts@sandag.org for questions.

This IFB package can be downloaded at no charge from the SANDAG website at www.sandag.org/contracts. Register in SANDAG's online database and download the IFB and plans. SANDAG is the only source of accurate information about SANDAG projects. The IFB may be reviewed at SANDAG and/or the Contracting Opportunities Center located at 4007 Camino Del Rio South, Suite 210, San Diego, CA.

Bids must be received by 2:00 p.m., on Friday October 23, 2015 at SANDAG, on the 8th Floor, attention: Susana Tello. Bids arriving later than 2:00 p.m., or at a location other than 401 B Street, on the 8th Floor, will not be considered.

SANDAG is an equal opportunity employer and, as a matter of policy, encourages the participation of small businesses that are owned and controlled by minorities and women. Joint ventures are also encouraged where feasible.

President, we have a lot. We have chicharon bituka, chicharon bulaklak, kilawin, azusena, and others," thinking Bush was referring to "pulutan" dish eaten during a drinking spree. Rico said that when FPJ told detained ex-president Joseph Estrada, a movie actor and a drinker, about the incident, Erap replied, "Ganoon din ang isasagot ko (that will also be my answer)."

Rico said that when he visited Erap in his detention hospital, they talked about Erap's petition for a knee operation abroad. Noticing that the ex-president was walking bow-legged, he told him: "Mr. President, kung ganyan kasakit ang knee ninyo, dapat talagang payagan kayong magpaopera sa abroad (If your knee ailment is that serious, they should really allow you to have a knee operation abroad). Erap replied: "A hindi sa sakit sa knee ito. Mataas ang cholesterol ko, kaya iniwasan ko ang itlog (This is not due to my knee ailment. I have high cholesterol; that is why I am avoiding eggs [referring to his balls])."

When a cargo forwarding company was mentioned as one of the sponsors of the show, Rico narrated an incident that happened one time he arrived in the Philippines. He saw a girl at the airport crying upon opening the casket of her mother who was shipped from the United States. Her mom's faced was pressed against the glass cover of the casket.

"How could they do this to my mother?" she asked. But then they found a letter inside the casket: "Ate, pasensiya ka na at hindi ko naihatid ang bangkay ng nanay dahil magastos sa pamasaha. Naglagay ako ng dalawampung lata ng kame norte sa likod ng nanay, paghati-hatian ninyo na. Iyong Nike shoes na hinihingi ni Boy nakasuot sa paa ng nanay. Yong Victoria Secret na bilin mo, suot din ng nanay... (Dear Sister: Sorry I was not able to accompany the remains of our mother. I cannot afford the cost of airfare. I placed twenty cans of corned beef at the back of our mother. The Nike shoes that Boy was asking for are on her feet. The Victoria Secret underwear you wanted is also worn by mother...)"

As their aging fans are preoccupied with the serious task of securing the future of their families rather than idolizing pop stars, Rico J. Puno and Hajji Alejandro are digging deeper into their arsenal of talents like cracking jokes or performing funny antics. While they had a good and productive run, it is nice to know these singing legends can stretch their career through their versatile talents and the loyalty of their fans. - AJ

wishes, he remained a loving and obedient child.

A passionate student and a loving son to his family, Joey will go through different setbacks in life but will continue to be patient and understanding.

All these positive qualities will outweigh life's challenges and Joey will become a stronger person in her new life as Destiny Rose.

As time passes, Joey faces more challenges in his journey towards becoming a renowned writer and a full-fledged woman. Joey is now known as Destiny Rose.

Now that Destiny Rose has fulfilled her dreams, all she wants is to be with the love of her life and for her family to be complete once again. But what if her family, especially her estranged father, refuses to accept her? And what if the love of her life finds out that she only had sex reassignment surgery to become a woman? Will Destiny Rose still find happiness?

Playing opposite Ken is Fabio Ide as Gabriele Antonioni, Joey's Fil-Italian penpal. He will make Joey/Destiny Rose's life more colourful as he becomes her one true love.

Completing the cast are esteemed TV and movie actors and actresses: Manilyn Reyes as Daisy Flores Vergara, Joey's loving mother; Michael de Mesa as Rosaura Armani Vitto, a rich philanthropist who will be

Public Notice – San Diego Forward: The Regional Plan, its Environmental Impact Report, the 2014 Regional Transportation Improvement Program Amendment No. 7, Air Quality Conformity Analysis, and Other Related Actions

The San Diego Association of Governments (SANDAG) Board of Directors will consider the following actions at its regularly scheduled meeting on October 9, 2015: certification of the Final Environmental Impact Report for San Diego Forward: The Regional Plan, approval of the Regional Plan and adoption of the Findings, Statement of Overriding Considerations, and Mitigation Monitoring and Reporting Program for the Regional Plan; finding the Regional Plan Revenue Constrained Plan in conformance with the State Implementation Plans for air quality; adoption of the Air Quality Conformity determination; finding that the Regional Plan and its Sustainable Communities Strategy (SCS) meet the greenhouse gas reduction targets established by the California Air Resources Board and other requirements in Government Code §65080(b) et seq.; and approval of Amendment No. 7 to the Regional Transportation Improvement Program (RTIP).

The meeting will take place starting at 10 a.m. at 401 B Street, San Diego, California, in the 7th floor Boardroom. The Regional Plan serves as a blueprint for how the San Diego region will grow, and how SANDAG and other agencies in the region will invest in transportation infrastructure that will provide more choices, strengthen the economy, promote a healthy environment, and support thriving communities. The Regional Plan serves as the Regional Transportation Plan and it includes the mandatory policy, action, and financial elements as identified in the Code of Federal Regulations Title 23 Part 450 and Title 49, Part 613, in addition to the SCS as identified in California Government Code Section 65080.

The revised draft Air Quality Conformity Analysis prepared for the Regional Plan and 2014 RTIP Amendment No. 7 was released for public comment on August 19, 2015, and is available at the SANDAG offices at the above address, from the SANDAG website at sandag.org, or by calling (619) 699-1929. Written comments on the Air Quality Conformity Analysis will be accepted via letter, fax, or email and must be received no later than September 24, 2015. Comments should be addressed to SANDAG, Attention: Rachel Kennedy, Senior Regional Planner, 401 B Street, Suite 800, San Diego, CA 92101; fax (619) 699-1905; or email rachel.kennedy@sandag.org.

Advertisement for Bids

Notice is hereby given that the San Diego Unified School District, acting by and through its governing board, will receive sealed bids for the furnishing of all labor, materials, transportation, equipment, and services to:

MEDIUM VOLTAGE PREVENTATIVE MAINTENANCE AND EMERGENCY REPAIRS ON AN AS-NEEDED BASIS (IDIQ)

A mandatory pre-bid is scheduled for 9:00 a.m. on SEPTEMBER 25, 2015 at the Strategic Sourcing and Contracts Department, 2351 Cardinal Lane, Bldg. M (west door), San Diego, CA 92123. PLEASE SEE BID FOR DETAILS (No.CP-16-0351-08).

All bids must be received at or before 1:00 p.m. on OCTOBER 9, 2015, at the Strategic Sourcing and Contracts Department, 2351 Cardinal Lane, Bldg. M, San Diego, CA 92123, at which time bids will be publicly opened and read aloud.

The project estimate is not-to-exceed \$450,000.00. This is not a PSA project and does not require prequalification. The District requires that Bidders possess any of the following classification(s) of California State Contractors License(s), valid and in good standing, at the time of bid opening and contract award: C-10.

All late bids shall be deemed non-responsive and not opened. Each bid shall be in accordance with all terms, conditions, plans, specifications and any other documents that comprise the bid package. The Bid and Contract Documents are available in three formats, hard copy, CD, or online from Plan Well. Hard copy bid documents are available at ARC Document Solutions, LLC, 1200 4th Avenue (4th and B Street), San Diego, CA 92101, phone number 619-232-8440, for a refundable payment of Two Hundred Dollars (\$200) per set; CD's are available for a non-refundable charge of \$50. Payments shall be made by check payable to SAN DIEGO UNIFIED SCHOOL DISTRICT. If the payment for Bid and Contract Documents is refundable, refunds will be processed by the District only if the Bid and Contract Documents, including all addendums, are returned intact and in good order to ARC within ten (10) days of the issuance of the Final Bid Tabulation. Online documents are available for download free of charge on PlanWell through ARC. Go to www.crplanwell.com, click on Public Planroom, search SDUSD (Questions? 714-424-8525). All bids shall be submitted on bid forms furnished by the District in the bid package beginning September 15, 2015. Bid packages will not be faxed.

SENATE BILL (SB) 854 REQUIREMENTS: Effective July 1, 2014, no contractor or subcontractor may be listed on a bid proposal, or awarded a contract for a public works project (awarded on or after April 1, 2015) unless registered with the Department of Industrial Relations (DIR) pursuant to Labor Code §1725.5 [with limited exceptions from this requirement for bid purposes only under Labor Code §1771.1(a)]. This project is subject to compliance monitoring and enforcement by the DIR. Prime contractors must add the DIR Registration Number for each of their listed subcontractors to the Subcontractors List AND submit a certificate of registration for their own firm and those of their listed subcontractors upon request by the District. Failure of the bidding prime contractor to list their subcontractors DIR Registration Number on the Subcontractors List at time of bid will result in rejection of their bid as non-responsive. Refer to the following DIR Website for further information: www.dir.ca.gov/Public-Works/PublicWorks.html

PREVAILING WAGES: Prevailing wage requirements apply to all public works projects and must be followed per Article 17 of the General Conditions of this bid.

DISABLED VETERAN BUSINESS ENTERPRISE PARTICIPATION PROGRAM: Pursuant to Resolution In Support of Service Disabled Veterans Owned Businesses (SDVOB) and Disabled Veteran Business Enterprises (DVBE) approved on May 10, 2011 by the Board of Education, the Bidder is required to satisfy a minimum DVBE participation percentage of at least three percent (3%) for this project. In compliance with this Program, the Bidder shall satisfy all requirements enumerated in the bid package.

Each bid must be submitted on the Bid Form provided in the bid package and shall be accompanied by a satisfactory bid security in the form of either a bid bond executed by the bidder and Surety Company, or a certified or cashier's check in favor of the San Diego Unified School District, in an amount equal to ten percent (10%) of their bid value. Said bid security shall be given to guarantee that the Bidder will execute the contract as specified, within five (5) working days of notification by the District.

The District reserves the right to reject any and all bids and to waive any irregularities or informalities in any bids or in the bidding. No bidder may withdraw his bid for a period of 120 days after the date set for the opening of bids. For information regarding bidding, please call 858-522-5825.

PRE-QUALIFICATION OF BIDDERS: Pursuant to Public Contract Code (PCC) §20111.6, each contractor wishing to bid as a prime to the District for projects estimated at \$1,000,000 or over, or any subcontractor performing the license classifications of A, B [if performing the work of] C-4, C-7, C-10, C-16, C-20, C-34, C-36, C-38, C-42, C-43 and/or C-46 wishing to submit a bid to a bidding prime contractor must be prequalified in order to bid. You can apply online by going to <https://prequal.sandi.net> or contact Glenda Burberry at gburberry@sandi.net to request a pre-qualification questionnaire. Completed questionnaires must be submitted to the District no later than 10 business days before the bid opening due date. Any questionnaires submitted later than this deadline will not be processed for this Invitation for Bids. The District encourages all general contractors bidding as a prime contractor, and all MEP subcontractors to request a questionnaire, complete it and submit it as soon as possible.

Notice of Public Review and Comment - Draft Public Involvement Plan for the San Diego Regional Plan

The future growth and development of the San Diego region is currently guided by two primary long-range planning documents: the [Regional Comprehensive Plan](#) (RCP) adopted in 2004 and the [2050 Regional Transportation Plan/Sustainable Communities Strategy](#) (RTP/SCS) adopted in 2011.

In May 2012, the SANDAG Board of Directors approved merging the RCP update with the next RTP/SCS. Combining these two major planning efforts will give citizens a single, easily accessible document that includes an overall vision for the San Diego region and an implementation program to make that vision a reality. In addition, the consolidation will enhance public participation opportunities, as well as save staff time and resources.

A comprehensive and innovative [draft public involvement plan](#) (PIP) to support the development of the regional plan has been released for a 30-day review and comment period through February 7, 2013. Among various public engagement techniques, the PIP includes a tribal consultation plan and a process to engage low-income and minority populations through a network of community-based organizations. Furthermore, the plan will include a series of public workshops, use of social media, visualizations, and other means for involving the public and receiving input. Please direct comments on the PIP to David Hicks at david.hicks@sandag.org.

More information, including the summary from the regional plan public workshop held on October 19, 2012, is available at www.sandag.org/regionalplan.

Please feel free to forward this information to others that might be interested.

Aviso de Revisión y Comentarios Públicos - Borrador del Plan de Participación Pública del Plan Regional de San Diego

El crecimiento futuro y el desarrollo de la región de San Diego es actualmente guiado principalmente por dos documentos de planeación a largo plazo: el [Plan Regional Integral](#) (RCP, por sus siglas en inglés) aprobado en 2004 y el [Plan Regional de Transporte 2050/Estrategia de Comunidades Sustentables](#) (RTP/SCS, por sus siglas en inglés) aprobados en 2011.

[En mayo de 2012, la Mesa Directiva de SANDAG aprobó combinar la actualización del RCP con el siguiente RTP/SCS. Combinando estos grandes esfuerzos dará a los ciudadanos fácil acceso a un sólo documento, que incluye una visión general para la región de San Diego y un programa de implementación que haga de esa visión una realidad. Adicionalmente, la consolidación ampliará las oportunidades de participación pública, al igual que ahorrará horas-hombre y recursos.](#)

-

[Para apoyar el desarrollo del plan regional se ha presentado para su revisión un borrador del plan de participación pública](#) (PIP, por sus siglas en inglés) integral e innovador, por un período de 30 días hasta el 7 de febrero de 2013. Entre las varias técnicas de acercamiento con la comunidad, el PIP incluye un plan de consulta con las tribus y un proceso para involucrar a la población de bajos recursos y minorías a través de una red de organizaciones comunitarias. Más allá, el plan incluirá una serie de talleres público, el uso de redes sociales, visualizaciones, y otras formas de participación pública y de retroalimentación. Por favor dirija sus comentarios sobre el PIP a David Hicks al correo electrónico david.hicks@sandag.org.

Más información, incluyendo el resumen del taller público del plan regional llevado a cabo el 19 de octubre de 2012, está disponible en www.sandag.org/regionalplan.

Por favor no dude en retransmitir esta información a otros que crea pudieran estar interesados.

May 6, 2013 –

Everyone is invited to a series of SANDAG workshops starting on May 17th to gather input for San Diego Forward: The Regional Plan. Workshops will be held all over the region on a wide variety of topics – during the day and in the evening.

Complimentary lunch/dinner will be served at all of the events. Check out the flyer below for the details. Come to a workshop and provide your thoughts on the biggest issues facing the region, and please forward this flyer to people or organizations you think might be interested in participating.

Help Shape Our Region's Future

Bring your ideas to the table on the biggest issues facing the San Diego region between now and 2050 — issues like the economy, the environment, transportation, public health, and social equity.

Get involved in the on-going conversation about how best to tackle our challenges today, and preserve our quality of life for the future.

The San Diego Association of Governments (SANDAG) and its partners have embarked on creating San Diego Forward: The Regional Plan. It will build upon local planning efforts, and incorporate emerging issues and innovative concepts, to form an overall vision for the region's future, including specific actions aimed at turning that vision into reality.

Now is the time to make your voice heard! Take part in a series of workshops that will be held throughout the region in May, June, and July 2013 — in the daytime and in the evening.

Evening Community Workshops

Every Thursday in June — all include complimentary sandwiches, cookies, and beverages

All four community workshops will seek input on the same topics — land use, transportation, housing, healthy environment, public health, economic prosperity, public facilities, energy, climate change, and borders.

South County

June 6, 6 to 8 p.m., Casa Familiar Civic Center, 212 W. Park Avenue, San Ysidro

North County Inland

June 13, 6 to 8 p.m., Escondido City Hall, Mitchell Room, 201 North Broadway, Escondido

North County Coastal

June 20, 6 to 8 p.m., Oceanside City Hall Community Rooms, 300 North Coast Highway, Oceanside

East County

June 27, 6 to 8 p.m., La Mesa Community Center, Arbor View Room, 4975 Memorial Drive, La Mesa

Weekday Central Workshops

The third Fridays in May, June, and July — all include complimentary sandwiches, cookies, and beverages

May 17 – Focused discussions on healthy environment, energy, climate change, and public health

June 21 – Focused discussions on land use and transportation

July 19 – Focused discussions on economic prosperity, public facilities, and borders Caltrans District 11

All weekday workshops from 11:30 a.m. to 1:30 p.m., Garcia Room & Gallegos Room, 4050 Taylor Street, San Diego

All locations are transit accessible. Call 511 or visit 511sd.com/transit for route information. Limited parking also available.

RSVP

to Sarah Strand at sarah.strand@sandag.org, (619) 595-5609, or via the SANDAGRegion Facebook page by attending “Regional Plan Workshop” events.

May 10, 2013 –

Join SANDAG on May 17 for the first of seven public workshops to help inform the region's big-picture plan for the future.

This first workshop will focus on the environment, public health, climate change, and energy. Take part in the conversation – and enjoy a complimentary lunch while you help shape San Diego Forward: The Regional Plan.

By the way, May 17 is also Bike-to-Work Day, so feel free to ride your bicycle to this event, which will be at Caltrans District 11 headquarters across from the Old Town Transit Center. Check out the flyer below for more details – and please forward it to anyone who might be interested.

Help Shape Our Region's Future

Bring your ideas to the table on the biggest issues facing the San Diego region between now and 2050 — issues like the economy, the environment, transportation, public health, and social equity.

Get involved in the on-going conversation about how best to tackle our challenges today, and preserve our quality of life for the future.

The San Diego Association of Governments (SANDAG) and its partners have embarked on creating San Diego Forward: The Regional Plan. It will build upon local planning efforts, and incorporate emerging issues and innovative concepts, to form an overall vision for the region's future, including specific actions aimed at turning that vision into reality.

May 22, 2013 –

WORKSHOP SUMMARY: FOCUS ON HEALTHY ENVIRONMENT, ENERGY, CLIMATE CHANGE AND PUBLIC HEALTH - MAY 17, 2013, AT CALTRANS

Thank you to the more than 150 participants who took part in last Friday's workshop on San Diego Forward: The Regional Plan on Regional Bike to Work Day!

Your input and feedback are keys to the process of creating a vision and plan that will keep the San Diego region a great place to live now and in the future. If you attended Friday - remember, there are more workshops coming up, so please stay involved. And if you couldn't make it, consider attending an upcoming event - the next one will be held in the evening of June 6, in English and Spanish, at Casa Familiar Civic Center in San Ysidro. For more information, visit www.sandag.org/sandiegoforward.

Below is a summary of the thoughtful and extensive input provided by stakeholders during 30 facilitated roundtable sessions held at the May 17 event. This input will be used to shape policy objectives related to healthy environment, energy, public health, and climate change in San Diego Forward: The Regional Plan.

Listed below are just some of the ideas and concerns expressed by participants at the workshop, and some pictures, too.

Thanks again - and we hope to see you at one of our upcoming workshops.

Climate Change

- Prepare for the impacts of climate change on both the natural and built environments. Key concerns include increases in wildfires and heat waves, sea-level rise, water supply and demand, public health impacts, agriculture and food-security, and disproportionate impacts on low-income, minority, and senior populations.
- Pursue regional coordination on climate change and adaptation efforts. We need scalable solutions - from the parcel to the regional to the state level.
- Promote best practices that provide co-benefits, such as xeriscaping, graywater re-use, tree planting, and other low-impact development solutions.
- Prioritize transportation investments based on their benefits to the environment.
- SANDAG should provide a forum for regional collaboration, incentives for adaptation and mitigation, guidance on design standards, and other resources to address climate change.
- Build transportation infrastructure that can withstand the adverse effects of climate change, like sea level rise.
- Incorporate greenhouse gas (GHG) reduction and climate change efforts into the regional plan (including goals, policy measures, and funding opportunities).
- Plant more vegetation/trees now as a low-cost mitigation measure that will ultimately absorb more GHGs in the future and enhance communities.
- Empower the community to address climate-related behaviors at an individual and neighborhood level. Start with educating the children.

Air & Water Quality

- Address respiratory problems with better public transportation, more carpooling and vanpooling, and communities where people can bike and walk more.
- Bring air quality issues down to the micro level, for example, by bringing small hand-held air quality monitoring devices to community members.
- More urban forestry/vegetation can help reduce air and water pollution, and improve economic conditions in local communities.
- Work within the environment: create more attractive spaces using native species - these don't require a lot of water and fertilizer.
- Create a regionally driven policy for reclaimed water.
- Look at all impacts related to water quality, not just the impacts related to new development projects.
- Address both health and social equity issues related to air and water quality - need to focus on impacted communities, those that suffer the most.

Habitat & Shoreline

- San Diego has been successful in preserving habitat. Focus on restoring and providing access to these areas.
- Incentivize higher density development around transit. That would allow people to get around easier and also preserve open space.
- Make access to open spaces more equitable.
- Wetlands protection needs to be done on a larger scale; wetlands protect shorelines and act as carbon sinks.
- Wetland rehabilitation efforts that remove concrete linings of channels and restore the riparian habitat are important, and we should also incorporate bike lanes so that people can enjoy it.
- Make policy changes that incorporate permeability and other green infrastructure codes that help mitigate urban run-off.
- Create open spaces and trails for residents in developed areas.
- Create policies that require upland development projects to include a sand mitigation component as this material can no longer flow naturally from inland to the coast.
- Balance preservation and recreation – providing access while protecting habitat.
- Develop bicycle trails along the San Diego River to mix the green corridor into open space – like the San Antonio River Walk.

Healthy Communities

- The ability to walk and bike within communities and to school is important.
- Consider rethinking the methodology of how trips are calculated within a complete streets framework, using something other than Level of Service (LOS) and moving toward a multi-modal analysis.
- Look at the inequities and health disparities between neighborhoods and focus the investments in areas of need.
- Look at areas with concentrations of obesity and diabetes and examine current transportation infrastructure to find the gaps. Shift transportation modes toward active transportation.
- Make public health a line item within the policy making process, and not an afterthought – focus on how to bridge disparities.
- Consider the needs of all populations including the aging population.
- Create bike facilities for commuting AND recreation.
- Marry functionality and safety in neighborhood design to encourage more walkable communities which can lead to greater social interaction.
- Need walkability connections to grocery stores, creating access to healthy foods.
- Leverage existing resources with the Human Health and Services Agency (HHS) and other organizations.
- Provide more diverse bike options. Class 1 lanes are not very common in California, but for women in particular, they could help lower stress levels for biking.
- Social equity is important to address with public health because many communities have suffered from years of disinvestments, and have higher rates of chronic diseases, including diabetes.
- Healthy communities and public facilities should address the needs of the homeless.
- Healthy communities should have a robust urban forestry program, and a lot of green space. This can impact food, safety, and health.
- Where one lives should not determine the quality and length of life.
- Promote policies that motivate healthier food options to move into low-income neighborhoods, and provide incentives to those companies which promote healthy eating.

Clean Energy, Clean Fuels & Innovation

- Place a high value on issues that will be important for the younger generations.
- Plan and build facilities for safely riding bikes to and from school.

- Alternative energy sources:
 - Energy efficiency and roof-top energy needs to be a priority in making communities more self-sufficient.
 - Need to fit the communities that we already have with photovoltaics, and deemphasize fitting the back country with large energy plants.
- Transit centers could have conference rooms attached so people can rent a room and hold meetings at a place that is accessible by transit.
- The net energy use by communities should be evaluated.
- Encourage roof-top photovoltaic: public buildings, industrial and residential.
- The only practical way to get people to use the good stuff is to highly tax the bad stuff. This is politically unpopular, but economically popular.
- Presentations to high school students nearing driving age should be made regarding affordable energy-efficient cars.
- Car2Go is good program because buying a zero-emission vehicle is out of reach to many families
- There are programs that help seniors with the bills and they talk to them about other ways to save money. Many seniors have inquired about ways they can be more environmentally friendly
- Border crossing wait-times should be improved to reduce emissions and health impacts.
- Provide opportunities for and promote mobility options that produce low emissions or no emissions at all (bicycling and walking).
- Create community garden opportunities to reduce emissions related to the transportation of fruits and vegetables.
- Focus on renewable energy (e.g. wind, solar, geothermal) and increasing low carbon fuel standards.
- Focus on distributed (on-site) generation of green energy. Solar, wind, biofuel require less infrastructure and protect open space/habitat areas; industrialized solar/wind energy is destructive and requires transmission lines.
- Build more infrastructure to support electric cars.
- Develop apps or ways people can determine how much water and energy they are consuming to help them conserve and use these resources more efficiently.
- Focus on green jobs related to transportation, buildings, etc.; support entrepreneurs.
- Reduce energy use by buying local food and creating food hubs.

June 4, 2013 –

Come to the next SANDAG workshop on the region's future this Thursday evening in San Ysidro. Everyone is invited to give their input into San Diego Forward: The Regional Plan. Workshops will be held all over the region on a wide variety of topics – during the day and in the evening. Check out the flyer below for more information.

Venga al próximo taller de SANDAG sobre el futuro de la región este jueves por la noche en San Ysidro. Todos están invitados a proveer retroalimentación a San Diego Forward: The Regional Plan (San Diego Adelante: El Plan Regional). Los talleres se llevarán a cabo en toda la región en una amplia variedad de temas - durante el día y por la noche. Vea el folleto a continuación para obtener más información.

Para ver esta información en español, visite http://www.sandag.org/uploads/projectid/projectid_428_15910.pdf

Bring your ideas to the table on the biggest issues facing the San Diego region between now and 2050 — issues like the economy, the environment, transportation, public health, and social equity.

Get involved in the on-going conversation about how best to tackle our challenges today, and preserve our quality of life for the future.

The San Diego Association of Governments (SANDAG) and its partners have embarked on creating San Diego Forward: The Regional Plan. It will build upon local planning efforts, and incorporate emerging issues and innovative concepts, to form an overall vision for the region's future, including specific actions aimed at turning that vision into reality.

Now is the time to make your voice heard! Take part in a series of workshops that will be held throughout the region in May, June, and July 2013 — in the daytime and in the evening.

Evening Community Workshops

Every Thursday in June — all include complimentary sandwiches, cookies, and beverages

All four community workshops will seek input on the same topics — land use, transportation, housing, healthy environment, public health, economic prosperity, public facilities, energy, climate change, and borders.

South County

June 6, 6 to 8 p.m., Casa Familiar Civic Center, 212 W. Park Avenue, San Ysidro

North County Inland

June 13, 6 to 8 p.m., Escondido City Hall, Mitchell Room, 201 North Broadway, Escondido

North County Coastal

June 20, 6 to 8 p.m., Oceanside City Hall Community Rooms, 300 North Coast Highway, Oceanside

East County

June 27, 6 to 8 p.m., La Mesa Community Center, Arbor View Room, 4975 Memorial Drive, La Mesa

Weekday Central Workshops

The third Fridays in May, June, and July — all include complimentary sandwiches, cookies, and beverages

June 21 – Focused discussions on land use and transportation

July 19 – Focused discussions on economic prosperity, public facilities, and borders Caltrans District 11

All weekday workshops from 11:30 a.m. to 1:30 p.m., Garcia Room & Gallegos Room, 4050 Taylor Street, San Diego

All locations are transit accessible. Call 511 or visit 511sd.com/transit for route information. Limited parking also available.

RSVP

to Sarah Strand at sarah.strand@sandag.org, (619) 595-5609, or via the SANDAGRegion Facebook page by attending “Regional Plan Workshop” events.

**WORKSHOP SUMMARY / RESUMEN DEL TALLER:
JUNE 6, 2013 / 6 DE JUNIO DE 2013
CASA FAMILIAR, SAN YSIDRO**

Thank you to the almost 100 participants who took part in the June 6th workshop on San Diego Forward: The Regional Plan!

Your input and feedback are keys to the process of creating a vision and plan that will keep the San Diego region a great place to live now and in the future. If you attended - remember, there are more workshops coming up, so please stay involved. And if you couldn't make it, consider attending an upcoming event - the next one will be held on the evening of June 13 in Escondido. For more information, visit sandag.org/sandiegoforward.

Below is a summary of the thoughtful and extensive input provided by stakeholders during 30 facilitated roundtable sessions held at the June 6 event. This input will be used to shape policy objectives in San Diego Forward: The Regional Plan.

In addition to this summary, a complete set of notetakers' notes has been posted on the website. We have also added notetakers' notes from the May 17 workshop to the website.

Mobility

- Promote a well-integrated, multimodal transportation system with an emphasis on transit access and frequent service, safe walkable streets for all ages, and bikeable communities to provide access to daily uses such as groceries, healthcare, and jobs, and to promote healthy lifestyles and a strong sense of family and community.

¡Gracias a los casi 100 participantes que tomaron parte en el taller del jueves 6 de junio en Adelante San Diego: El Plan Regional!

Su aporte y retroalimentación son claves para el proceso de crear una visión y un plan que mantendrá la región de San Diego como un gran lugar para vivir ahora y en el futuro. Si usted asistió al taller, le recordamos que habrá más talleres para seguir involucrado. Y si no pudo participar, considere asistir a un próximo evento. El próximo taller se llevará a cabo en la tarde del 13 de junio en la ciudad de Escondido. Para obtener más información, visite sandag.org/sandiegoforward.

A continuación se encuentra un resumen de las ideas y reflexiones que los participantes expresaron en las 30 mesas redondas facilitadas en el taller del 6 de junio. Esta retroalimentación será utilizada para dar forma a los objetivos de política en Adelante San Diego: El Plan Regional.

Además, un resumen completo con las notas que se tomaron en el taller se ha publicado en la página de internet. También hemos agregado las notas del taller del 17 de mayo a la página de internet.

Movilidad

- Se necesitan rutas de transporte público más directas, rápidas y con mejores conexiones.
- El tipo de transporte público cerca de la frontera está en malas condiciones. Los Trolleys hacia el norte son más nuevos y están en mejor condición.

- Add more frequent Trolley services at the border, recognizing that the Trolley provides transportation for both the local community and international travelers.
- Add localized transportation options, such as jitneys, within the San Ysidro community.
- Focus on walkability as a key priority for residents in San Ysidro. Barriers include wide roads, large parking lots, missing/inadequate sidewalks, and not enough street lighting.
- Balance regional and local transportation needs by adding criteria considering transit service to particular neighborhoods.
- The San Ysidro Transit Center is the busiest Trolley station in the region and represents the beginning of the Trolley line at the border. It is a perfect opportunity to take it above grade.
- Adopt policy changes similar to Portland's that build upon a pyramid of pedestrians first, bicyclists next, transit, commercial vehicles, taxis, then single vehicles last.
- Focus on infrastructure for pedestrians and bicyclists to improve safety, especially safe routes to schools.
- Explore better greenhouse gas (GHG) emission reduction alternatives.
- Use urban growth boundaries to maximize infill opportunities.
- Provide more security on the bus/trolley.

Healthy Communities

- Provide more access to organic products and healthy foods.
- Invest in more public transit and bike paths.
- Create a more attractive pedestrian environment - wider sidewalks; places to sit; shaded areas, trees.
- To improve air quality, create more green areas, plant more trees, and provide a natural buffer between homes and freeways.
- Add security to the Trolley and remove trash from the Trolley cars.
- Address idling from cars at the border crossing.
- Reduce high levels of toxins in the soil to promote gardening.
- Invest in special paint that attracts carbon to the walls.
- Improve crosswalks; design streets and communities for people, not cars; promote more ways to connect.
- Address safety concerns of children when there aren't enough sidewalks near schools - they have to go through paths in canyons - no lighting, sometimes encounter dangerous wildlife.
- Provide more open spaces such as small pocket parks that can be within the neighborhood for families to stop by; place

- En los fines de semana, el servicio de transporte público no cumple con las necesidades y no es suficiente.
- Los operadores de los autobuses no tienen paciencia con los adultos mayores.
- No hay espacio en el Trolley o autobuses durante las horas pico.
- Hacen falta pasos a desnivel en la ruta del Trolley.
- Compass Card no es adecuado y es muy caro. Una familia de cuatro personas sin carro no puede pagar el costo para cuatro pases mensuales.
- Se necesitan baños en las estaciones.
- Se necesitan banquetas para acceder a las escuelas. No hay la seguridad para caminar.
- No hay rutas disponibles para bicicletas.
- Cuando atardece, es peligroso para los niños que caminan y no hay suficientes autobuses.
- Se necesita más transporte público para los niños. Caminar no es posible cuando hay distancias largas a la escuela.

Comunidades Saludables

- Atraer mercados que ofrezcan comidas y productos orgánicos.
- Mejorar la promoción del uso del transporte público a la comunidad.
- Mejores calles; arreglar los hoyos que existen en las calles; construir más banquetas para la seguridad del peatón y la juventud.
- Deben de haber rutas seguras a la escuela para los alumnos.
- Crear mejor acceso para el peatón al transporte público.
- Se necesitan mercados que sean más económicos, saludables y sustentables.
- Combatir y eliminar el uso de drogas dentro de la comunidad.
- Contaminación - el smog ha causado el incremento de casos de asma; se debe reducir el uso de carros para reducir la contaminación.
- El tiempo que se toma para cruzar la frontera es demasiado. La demora causa una "tortura" y causa un estrés muy grande.
- Necesitamos educación para el ciclista, el conductor, y para la comunidad para mejorar la seguridad de todos.
- Se debe ampliar los carriles para ciclistas sobre la calle para mejorar la seguridad.
- Necesitamos sembradillos locales - se debe usar lotes vacíos para la educación y para mejorar la comunidad.
- No hay hospital en San Ysidro.
- Necesitamos mejores parques y que estén bien cuidados y seguros y que cuenten con baños.
- Crear un programa como "Park and Ride" en

to socialize.

- Provide access to The Tijuana River Valley - beautiful but no trails.
- Close down a street for a street fair or farmers market and promote a community garden.
- Provide incentives/shared bike program for people who use their bikes at the border.
- Build a Class 1 Bicycle path from the international border to the Bayshore Bikeway.

Healthy Environment

- Manage water runoff more effectively since the water eventually goes out to our beaches.
- There is a new global climate law in Mexico, so work together to achieve certain greenhouse (GHG) emission goals.
- Address air pollution and the negative health impacts caused by idling cars at the border.
- Promote more connections to the Tijuana Estuary so that people can appreciate the natural resources and become more active in that area.
- Address beach closures in Imperial Beach due to high levels of contamination and sewage.
- Encourage more public areas to be non-smoking.
- Climate change and sea level rise is a concern. Everything is interconnected and sea level rise will make crops harder to grow.
- Work with the Environmental Health Coalition, Wildcoast, and Ocean Force to look at salinity of the oceans, tide levels, and effects on ecosystems.
- Reinstate the bike incentive for crossing the border.
- Reduce crime. Crime is an aspect of healthy environment, because it restricts people from going out on walks or letting their children outside when it is not safe, and this limits activity levels and community participation.
- Increase children's education programs focused on the outdoors.

Energy and Climate Change

- Increase awareness and understanding of how climate change relates to the average person.
- Tailor the message to different population segments, taking factors such as language and culture into consideration.
- Provide more green space, which can help address pollution and climate change.
- Expand Car2Go car-sharing throughout the region.

la comunidad y aumentar el acceso a "van pools".

Medio Ambiente Saludable

- Se necesitan más árboles.
- Hay que conservar el agua y usarla en forma más restringida.
- Hacen falta más baños en los parques.
- La contaminación del aire en San Ysidro es cuatro veces peor que en otras comunidades de San Diego.
- La línea azul del Trolley paga por el sistema; es la línea que funciona mejor.
- Sería bueno tener un tren como el COASTER que fuera hasta la frontera.
- San Ysidro debe ser un centro de transporte; mucha gente se va hasta Los Ángeles.
- Hacen falta campañas de educación para que la gente entienda como sus acciones impactan al medio ambiente. Se necesita una campaña dirigida a las empresas también.
- No hay confianza en el agua potable.
- El agua es caro; no se puede usar la de la canilla.
- Debe haber usos distintos de agua (agua de riego versus potable).
- Necesitamos más arborización de las calles.
- Promover en las escuelas la protección de la playa.

Energía y Cambio Climático

- En la frontera, hay más contaminación que se siente más por la cercanía a la garita.
- Revisar las emisiones de vehículos que cruzan la frontera.
- Educar más a los niños acerca del cambio climático.
- Publicar los horarios de la escuela y qué relación tienen con los niveles de emisiones.
- Simplificar la información para que gente entienda.
- Agilizar el cruce fronterizo para los peatones.
- Implementar paneles solares y sistemas eólicos.
- Difundir la información de planes y programas de desarrollo en lenguaje coloquial.
- Sembrar más áreas verdes y jardines para respirar aire más puro.
- Aprovechar la energía solar.
- Mejorar la eficiencia de los vehículos y reducir las emisiones.
- Caminar y andar en bicicleta como medio de transporte.
- Usar transporte público y compartir carro

- Demonstrate the benefits of making individual changes to reduce GHG emissions.
- Invest more in sustainable energy.
- Increase gas prices to encourage alternative forms of transportation.
- Synchronize stoplights to reduce idling, traffic, and pollution.
- Proactively and naturally reduce fuel for wildfires, for example, by using goats.
- Change building codes to allow gray water to drain directly into gardens/landscaping.
- Collect rain water as a sustainable way of conserving water.
- Provide electric vehicle (EV) charging stations, raise gas prices, and offer incentives to encourage people to use alternative fuel vehicles.
- Demonstrate cost comparisons and provide education on the benefits of electric/alternative fuel cars.
- Build better bike lanes and dedicated bike lanes.
- Spend less money on highways and more on public transit.
- Invest more money into each individual community, not just transportation but infrastructure, so that people don't have to leave the community in order to find medical services or grocery stores, or meet other basic needs.

Economic Prosperity and Borders

- Reduce border wait times. Lengthy wait times affect prosperity, health, pollution, and the environment.
- Invest more in border infrastructure as this can lead to more jobs and a healthier environment.
- SR 905 interstate was a great addition.
- Assist seniors. Currently it is difficult for seniors to find work since finding ways to commute can be a challenge. They also have difficulty accessing social services, groceries, medical care, and housing.
- Address the mismatch between skills of individuals and skills needed in jobs.
- Invest more in schools and motivate students.
- Invest more in communities that haven't received as much; social equity.
- Increase the focus on education & school achievement. In San Ysidro, create more STEM (science, technology, engineering, math) programs and add a college in South Bay.
- Recognize that many people own business in Tijuana but live in San Diego, and that they are contributing to both economies.
- Think of San Diego and Tijuana as a mega-region.

para reducir emisiones.

- Informar a la gente acerca de cómo reducir el cambio climático y la contaminación, usando impuestos de negocios contaminantes.
- Plantar más áreas verdes en San Ysidro y promover campañas de forestación.

Prosperidad Económica y Fronteras

- La frontera y la prosperidad económica están profundamente vinculadas porque hay mucho comercio entre las comunidades de San Diego y Tijuana.
- Por los altos costos de vida en San Diego, mucha gente se va a vivir a Tijuana. Rentar una casa puede costar \$300 dólares, lo que en San Diego no existe.
- No se puede cruzar la frontera para ir de visita o de compras debido a las demoras actuales, y eso está impactando de manera negativa la economía fronteriza; muchos negocios están cerrando porque no hay suficiente comercio.
- Hay que hacer la gestión de la frontera una prioridad.
- Los tiempos actuales de espera impactan de manera negativa la salud mental y física de las personas quienes tienen que cruzar.
- Hay que invitar a los agentes federales a eventos comunitarios para que participen en las discusiones sobre cómo mejorar el funcionamiento de la frontera y para que escuchen las preocupaciones de la comunidad, pues ellos viven aquí, van a nuestras escuelas, usan nuestras calles, etc.
- Se deberían enfocar más recursos en las instalaciones públicas para la comunidad en lugar de invertirlos en el turismo.
- Se debe generar más trabajos mejor remunerados para que la gente pueda salir adelante económicamente.
- Se deben aumentar las opciones o alternativas de transporte público en la frontera.
- Deben de haber más carriles para peatones que cruzan la frontera.
- Se tiene que desarrollar un centro de transporte y comercio en la frontera de San Ysidro que inspire orgullo y brinde a la gente los servicios que necesita.
- Para lograr la prosperidad económica hay que atender también la educación y la salud pública de las comunidades fronterizas.
- La ciudad de San Diego junto al sector privado debe de invertir fondos para construir un nuevo centro de transporte en San Ysidro
- Hay una gran oportunidad para prosperidad económica en la región fronteriza de Tijuana-San Diego, pero solamente se podría aprovechar de ella si se mejora la

organización del cruce fronterizo.

- Collaborate on transportation. Continue rail service south of the border. Integrate rapid transit from Baja to Alta California, with no need to transfer at the border.
- Acknowledge that trade at our border affects many states. For example, items manufactured in maquiladoras don't just stay in San Diego...what happens if they are delayed due to border crossing waits?
- Learn from each other regardless of language or cultural barriers.
- Consider smart parking; build up instead of across.
- Implement a marketing campaign with San Diego and Tijuana ambassadors, including tours on how Tijuana really is. Should be able to say "Let's go to Tijuana to grab dinner, see a show and come back." It's done in other borders throughout the world, why not this one?
- There is a need for more:
 - Understanding of diversity.
 - Community action to bridge the border.
 - Blur the separation, as we move forward... it seems like the division gets stronger and we need more collaboration.
 - Easier border crossing system - enhances the regional economy & better relations.
 - Concerted campaign to engage everyone.

**WORKSHOP SUMMARY / RESUMEN DEL TALLER:
JUNE 6, 2013 / 6 DE JUNIO DE 2013
CASA FAMILIAR, SAN YSIDRO**

Thank you to the almost 100 participants who took part in the June 6th workshop on San Diego Forward: The Regional Plan!

Your input and feedback are keys to the process of creating a vision and plan that will keep the San Diego region a great place to live now and in the future. If you attended - remember, there are more workshops coming up, so please stay involved. And if you couldn't make it, consider attending an upcoming event - the next one will be held on the evening of June 13 in Escondido. For more information, visit sandag.org/sandiegoforward.

Below is a summary of the thoughtful and extensive input provided by stakeholders during 30 facilitated roundtable sessions held at the June 6 event. This input will be used to shape policy objectives in San Diego Forward: The Regional Plan.

In addition to this summary, a complete set of notetakers' notes has been posted on the website. We have also added notetakers' notes from the May 17 workshop to the website.

Mobility

- Promote a well-integrated, multimodal transportation system with an emphasis on transit access and frequent service, safe walkable streets for all ages, and bikeable communities to provide access to daily uses such as groceries, healthcare, and jobs, and to promote healthy lifestyles and a strong sense of family and community.

¡Gracias a los casi 100 participantes que tomaron parte en el taller del jueves 6 de junio en Adelante San Diego: El Plan Regional!

Su aporte y retroalimentación son claves para el proceso de crear una visión y un plan que mantendrá la región de San Diego como un gran lugar para vivir ahora y en el futuro. Si usted asistió al taller, le recordamos que habrá más talleres para seguir involucrado. Y si no pudo participar, considere asistir a un próximo evento. El próximo taller se llevará a cabo en la tarde del 13 de junio en la ciudad de Escondido. Para obtener más información, visite sandag.org/sandiegoforward.

A continuación se encuentra un resumen de las ideas y reflexiones que los participantes expresaron en las 30 mesas redondas facilitadas en el taller del 6 de junio. Esta retroalimentación será utilizada para dar forma a los objetivos de política en Adelante San Diego: El Plan Regional.

Además, un resumen completo con las notas que se tomaron en el taller se ha publicado en la página de internet. También hemos agregado las notas del taller del 17 de mayo a la página de internet.

Movilidad

- Se necesitan rutas de transporte público más directas, rápidas y con mejores conexiones.
- El tipo de transporte público cerca de la frontera está en malas condiciones. Los Trolleys hacia el norte son más nuevos y están en mejor condición.

- Add more frequent Trolley services at the border, recognizing that the Trolley provides transportation for both the local community and international travelers.
- Add localized transportation options, such as jitneys, within the San Ysidro community.
- Focus on walkability as a key priority for residents in San Ysidro. Barriers include wide roads, large parking lots, missing/inadequate sidewalks, and not enough street lighting.
- Balance regional and local transportation needs by adding criteria considering transit service to particular neighborhoods.
- The San Ysidro Transit Center is the busiest Trolley station in the region and represents the beginning of the Trolley line at the border. It is a perfect opportunity to take it above grade.
- Adopt policy changes similar to Portland's that build upon a pyramid of pedestrians first, bicyclists next, transit, commercial vehicles, taxis, then single vehicles last.
- Focus on infrastructure for pedestrians and bicyclists to improve safety, especially safe routes to schools.
- Explore better greenhouse gas (GHG) emission reduction alternatives.
- Use urban growth boundaries to maximize infill opportunities.
- Provide more security on the bus/trolley.

Healthy Communities

- Provide more access to organic products and healthy foods.
- Invest in more public transit and bike paths.
- Create a more attractive pedestrian environment - wider sidewalks; places to sit; shaded areas, trees.
- To improve air quality, create more green areas, plant more trees, and provide a natural buffer between homes and freeways.
- Add security to the Trolley and remove trash from the Trolley cars.
- Address idling from cars at the border crossing.
- Reduce high levels of toxins in the soil to promote gardening.
- Invest in special paint that attracts carbon to the walls.
- Improve crosswalks; design streets and communities for people, not cars; promote more ways to connect.
- Address safety concerns of children when there aren't enough sidewalks near schools - they have to go through paths in canyons - no lighting, sometimes encounter dangerous wildlife.
- Provide more open spaces such as small pocket parks that can be within the neighborhood for families to stop by; place

- En los fines de semana, el servicio de transporte público no cumple con las necesidades y no es suficiente.
- Los operadores de los autobuses no tienen paciencia con los adultos mayores.
- No hay espacio en el Trolley o autobuses durante las horas pico.
- Hacen falta pasos a desnivel en la ruta del Trolley.
- Compass Card no es adecuado y es muy caro. Una familia de cuatro personas sin carro no puede pagar el costo para cuatro pases mensuales.
- Se necesitan baños en las estaciones.
- Se necesitan banquetas para acceder a las escuelas. No hay la seguridad para caminar.
- No hay rutas disponibles para bicicletas.
- Cuando atardece, es peligroso para los niños que caminan y no hay suficientes autobuses.
- Se necesita más transporte público para los niños. Caminar no es posible cuando hay distancias largas a la escuela.

Comunidades Saludables

- Atraer mercados que ofrezcan comidas y productos orgánicos.
- Mejorar la promoción del uso del transporte público a la comunidad.
- Mejores calles; arreglar los hoyos que existen en las calles; construir más banquetas para la seguridad del peatón y la juventud.
- Deben de haber rutas seguras a la escuela para los alumnos.
- Crear mejor acceso para el peatón al transporte público.
- Se necesitan mercados que sean más económicos, saludables y sustentables.
- Combatir y eliminar el uso de drogas dentro de la comunidad.
- Contaminación - el smog ha causado el incremento de casos de asma; se debe reducir el uso de carros para reducir la contaminación.
- El tiempo que se toma para cruzar la frontera es demasiado. La demora causa una "tortura" y causa un estrés muy grande.
- Necesitamos educación para el ciclista, el conductor, y para la comunidad para mejorar la seguridad de todos.
- Se debe ampliar los carriles para ciclistas sobre la calle para mejorar la seguridad.
- Necesitamos sembradillos locales - se debe usar lotes vacíos para la educación y para mejorar la comunidad.
- No hay hospital en San Ysidro.
- Necesitamos mejores parques y que estén bien cuidados y seguros y que cuenten con baños.
- Crear un programa como "Park and Ride" en

to socialize.

- Provide access to The Tijuana River Valley - beautiful but no trails.
- Close down a street for a street fair or farmers market and promote a community garden.
- Provide incentives/shared bike program for people who use their bikes at the border.
- Build a Class 1 Bicycle path from the international border to the Bayshore Bikeway.

Healthy Environment

- Manage water runoff more effectively since the water eventually goes out to our beaches.
- There is a new global climate law in Mexico, so work together to achieve certain greenhouse (GHG) emission goals.
- Address air pollution and the negative health impacts caused by idling cars at the border.
- Promote more connections to the Tijuana Estuary so that people can appreciate the natural resources and become more active in that area.
- Address beach closures in Imperial Beach due to high levels of contamination and sewage.
- Encourage more public areas to be non-smoking.
- Climate change and sea level rise is a concern. Everything is interconnected and sea level rise will make crops harder to grow.
- Work with the Environmental Health Coalition, Wildcoast, and Ocean Force to look at salinity of the oceans, tide levels, and effects on ecosystems.
- Reinstate the bike incentive for crossing the border.
- Reduce crime. Crime is an aspect of healthy environment, because it restricts people from going out on walks or letting their children outside when it is not safe, and this limits activity levels and community participation.
- Increase children's education programs focused on the outdoors.

Energy and Climate Change

- Increase awareness and understanding of how climate change relates to the average person.
- Tailor the message to different population segments, taking factors such as language and culture into consideration.
- Provide more green space, which can help address pollution and climate change.
- Expand Car2Go car-sharing throughout the region.

la comunidad y aumentar el acceso a "van pools".

Medio Ambiente Saludable

- Se necesitan más árboles.
- Hay que conservar el agua y usarla en forma más restringida.
- Hacen falta más baños en los parques.
- La contaminación del aire en San Ysidro es cuatro veces peor que en otras comunidades de San Diego.
- La línea azul del Trolley paga por el sistema; es la línea que funciona mejor.
- Sería bueno tener un tren como el COASTER que fuera hasta la frontera.
- San Ysidro debe ser un centro de transporte; mucha gente se va hasta Los Ángeles.
- Hacen falta campañas de educación para que la gente entienda como sus acciones impactan al medio ambiente. Se necesita una campaña dirigida a las empresas también.
- No hay confianza en el agua potable.
- El agua es caro; no se puede usar la de la canilla.
- Debe haber usos distintos de agua (agua de riego versus potable).
- Necesitamos más arborización de las calles.
- Promover en las escuelas la protección de la playa.

Energía y Cambio Climático

- En la frontera, hay más contaminación que se siente más por la cercanía a la garita.
- Revisar las emisiones de vehículos que cruzan la frontera.
- Educar más a los niños acerca del cambio climático.
- Publicar los horarios de la escuela y qué relación tienen con los niveles de emisiones.
- Simplificar la información para que gente entienda.
- Agilizar el cruce fronterizo para los peatones.
- Implementar paneles solares y sistemas eólicos.
- Difundir la información de planes y programas de desarrollo en lenguaje coloquial.
- Sembrar más áreas verdes y jardines para respirar aire más puro.
- Aprovechar la energía solar.
- Mejorar la eficiencia de los vehículos y reducir las emisiones.
- Caminar y andar en bicicleta como medio de transporte.
- Usar transporte público y compartir carro

- Demonstrate the benefits of making individual changes to reduce GHG emissions.
- Invest more in sustainable energy.
- Increase gas prices to encourage alternative forms of transportation.
- Synchronize stoplights to reduce idling, traffic, and pollution.
- Proactively and naturally reduce fuel for wildfires, for example, by using goats.
- Change building codes to allow gray water to drain directly into gardens/landscaping.
- Collect rain water as a sustainable way of conserving water.
- Provide electric vehicle (EV) charging stations, raise gas prices, and offer incentives to encourage people to use alternative fuel vehicles.
- Demonstrate cost comparisons and provide education on the benefits of electric/alternative fuel cars.
- Build better bike lanes and dedicated bike lanes.
- Spend less money on highways and more on public transit.
- Invest more money into each individual community, not just transportation but infrastructure, so that people don't have to leave the community in order to find medical services or grocery stores, or meet other basic needs.

Economic Prosperity and Borders

- Reduce border wait times. Lengthy wait times affect prosperity, health, pollution, and the environment.
- Invest more in border infrastructure as this can lead to more jobs and a healthier environment.
- SR 905 interstate was a great addition.
- Assist seniors. Currently it is difficult for seniors to find work since finding ways to commute can be a challenge. They also have difficulty accessing social services, groceries, medical care, and housing.
- Address the mismatch between skills of individuals and skills needed in jobs.
- Invest more in schools and motivate students.
- Invest more in communities that haven't received as much; social equity.
- Increase the focus on education & school achievement. In San Ysidro, create more STEM (science, technology, engineering, math) programs and add a college in South Bay.
- Recognize that many people own business in Tijuana but live in San Diego, and that they are contributing to both economies.
- Think of San Diego and Tijuana as a mega-region.

para reducir emisiones.

- Informar a la gente acerca de cómo reducir el cambio climático y la contaminación, usando impuestos de negocios contaminantes.
- Plantar más áreas verdes en San Ysidro y promover campañas de forestación.

Prosperidad Económica y Fronteras

- La frontera y la prosperidad económica están profundamente vinculadas porque hay mucho comercio entre las comunidades de San Diego y Tijuana.
- Por los altos costos de vida en San Diego, mucha gente se va a vivir a Tijuana. Rentar una casa puede costar \$300 dólares, lo que en San Diego no existe.
- No se puede cruzar la frontera para ir de visita o de compras debido a las demoras actuales, y eso está impactando de manera negativa la economía fronteriza; muchos negocios están cerrando porque no hay suficiente comercio.
- Hay que hacer la gestión de la frontera una prioridad.
- Los tiempos actuales de espera impactan de manera negativa la salud mental y física de las personas quienes tienen que cruzar.
- Hay que invitar a los agentes federales a eventos comunitarios para que participen en las discusiones sobre cómo mejorar el funcionamiento de la frontera y para que escuchen las preocupaciones de la comunidad, pues ellos viven aquí, van a nuestras escuelas, usan nuestras calles, etc.
- Se deberían enfocar más recursos en las instalaciones públicas para la comunidad en lugar de invertirlos en el turismo.
- Se debe generar más trabajos mejor remunerados para que la gente pueda salir adelante económicamente.
- Se deben aumentar las opciones o alternativas de transporte público en la frontera.
- Deben de haber más carriles para peatones que cruzan la frontera.
- Se tiene que desarrollar un centro de transporte y comercio en la frontera de San Ysidro que inspire orgullo y brinde a la gente los servicios que necesita.
- Para lograr la prosperidad económica hay que atender también la educación y la salud pública de las comunidades fronterizas.
- La ciudad de San Diego junto al sector privado debe de invertir fondos para construir un nuevo centro de transporte en San Ysidro
- Hay una gran oportunidad para prosperidad económica en la región fronteriza de Tijuana-San Diego, pero solamente se podría aprovechar de ella si se mejora la

organización del cruce fronterizo.

- Collaborate on transportation. Continue rail service south of the border. Integrate rapid transit from Baja to Alta California, with no need to transfer at the border.
- Acknowledge that trade at our border affects many states. For example, items manufactured in maquiladoras don't just stay in San Diego...what happens if they are delayed due to border crossing waits?
- Learn from each other regardless of language or cultural barriers.
- Consider smart parking; build up instead of across.
- Implement a marketing campaign with San Diego and Tijuana ambassadors, including tours on how Tijuana really is. Should be able to say "Let's go to Tijuana to grab dinner, see a show and come back." It's done in other borders throughout the world, why not this one?
- There is a need for more:
 - Understanding of diversity.
 - Community action to bridge the border.
 - Blur the separation, as we move forward... it seems like the division gets stronger and we need more collaboration.
 - Easier border crossing system - enhances the regional economy & better relations.
 - Concerted campaign to engage everyone.

WORKSHOP SUMMARY JUNE 13, 2013 ESCONDIDO

Thank you to the 30 participants who took part in the June 13th workshop on San Diego Forward: The Regional Plan! Your input and feedback are keys to the process of creating a vision and plan that will keep the San Diego region a great place to live now and in the future. Below is a summary of the input provided by stakeholders during the facilitated roundtable sessions. This input will be used to shape policy objectives in San Diego Forward: The Regional Plan.

For more information and the detailed Note-takers Notes, visit www.sandag.org/sandiegoforward.

Mobility

- Provide more transportation options to people as they age.
- Address barriers to transit, including: infrequent transit service, transfers, the timing of connections, and the design of the pedestrian environment (small sidewalks, massive parking lots, auto-centric roadway design).
- Provide more flexible pricing for transit passes, such as options that allow for two days a month, one day a week, ten uses, etc.
- In Fallbrook, use a mini-bus rather than large buses during off-peak periods.
- Focus on family mobility concepts, such as riding bikes, skateboards, walking, safety, and sidewalks, particularly around schools.
- Decrease bus fares, provide shade at bus stops, and increase transit frequencies.
- Consider raising gas taxes to generate money for more transit options. Revenue from gas tax could be used for transit along the I-15 corridor that would provide equivalent transit travel times compared to a car.
- Front-load the construction of transit projects, and push back freeway projects.
- Recognize that our region is very car dependent.
- Invest in simple infrastructure improvements such as crosswalks and street lights to promote walkability and safety.
- Address traffic congestion during commute times, especially from Escondido to Oceanside.
- In North County, make improvements such as more bike lanes, creek flood mitigation,

and increased frequencies on the SPRINTER, COASTER, and buses.

- From the North County perspective, the region should balance transportation investments around the county, even if the majority live in San Diego.
- Explain how the plan will incorporate all of this feedback.

Healthy Communities

- Increase access to active recreation spaces to address childhood obesity.
- Include greater emphasis on “making connections” in grant criteria to improve connectivity from creek crossings or major arterials to schools and parks.
- Provide pedestrian access to destinations that provide social and family services.
- Include greater emphasis on walkability and multi-modal transportation as part of the transportation project evaluation criteria.
- Create clean and aesthetically pleasing streets to encourage walking and being on the street.
- Provide multiple options for accessing healthy foods.
- Concentrate services such as clinics, dentists, and grocery stores in central locations accessible by walking and transit.
- Increase the number of bikes that can fit on a bus rack to help support active lifestyles.
- Don’t invest in bike infrastructure for commuters. Commuting to work by bike is not convenient or efficient.
- Increase pedestrian safety by addressing dangerously wide boulevards.
- Focus bike and pedestrian infrastructure in areas where fewer people own cars, for example, in college communities.

Healthy Environment

- Include buffer zones/set-backs from freeways for new housing developments.
- Maintain existing agricultural lands and industrial zones for a diverse economy.
- Focus on indirect potable water reuse and conservation in addition to imported water.
- Decrease the amount of water used on landscaping in our arid region.
- Use grey water to water plants and yards.
- Focus on the resilience of our food supply as related to climate change.
- Work harder toward the goal of zero emissions at the ports and borders.
- Encourage more grey water use and rainwater harvesting for residents.
- Preserve open spaces to provide people with places to walk, hike, bike, etc.
- Plan neighborhoods in a way that draws people to walking, biking, and using transit to get to places. Make the walkable areas more inviting.
- Support beach sand nourishment along the shoreline.
- Distinguish between conservation and preservation. Some land should be off limits to the public and the public should be informed why.
- Encourage the construction of underground parking garages and underground parking lots.
- Provide continuity between open space trails. Pursue a complete Trail Master Plan to help connect the city trails with county, state, and federal trails.
- For water quality, tie in green infrastructure and permeability.
- Provide incentives for projects that go above and beyond Best Management Practices.
- Encourage water pricing to protect crop production.
- Address zoning issues related to community gardens and use empty lots for growing crops, like in Seattle.

Energy & Climate Change

- Expand installation of solar panels in urban areas.
- Incorporate solar panels into new developments, and use “wasted spaces,” i.e. rooftops, parking lots, etc. for solar.
- Increase use of solar energy in transportation - it has the portability/utility of gasoline and can work with our existing infrastructure.
- Reduce passenger trips and make vehicles more efficient.
- Increase alternative fuel vehicles.
- Encourage the development and use of virtual meetings.
- Promote electrified truck stops in Otay Mesa.
- Continue expanding port on-shore electricity connections for ships.
- Promote organic farming throughout the county’s farms.
- Increase community gardens in urban areas, especially as a teaching tool for children.
- Generate electricity from garbage incineration.
- Install more reservoirs that can capture rain water and install more rain water recovery systems.
- Expand grey water infrastructure and availability.
- Do not expect the business community or developers to finance everything.
- If the cost of doing business increases too drastically, then it becomes economically infeasible for companies to stay here.
- Support strong climate action plans at the city level.

Economic Prosperity & Borders

- Educational debt is a big issue. Reduce high student debt rates and increase job opportunities for graduating students.
- Provide transportation options, especially for college kids who can’t afford a car and gas.
- Explore how the increasing use of online education will affect travel patterns.
- Build more border crossing lanes to reduce border wait times.
- Ensure that there’s a level of prosperity for everyone, not just the top end of income groups.
- Promote jobs with livable wages.
- Coordinate more bike and pedestrian infrastructure in the county - many studies show that these types of investments have positive localized economic impacts.
- Need more job opportunities for people who don’t earn degrees; this has correlation with crime.
- Charge a “cover charge” for commuters coming down the I-15 from the Temecula area.
- Developments within tribal nations can have regional impacts on water quality. Coordinate discussions with tribal nations.
- Retrofit suburbia to draw people in; SANDAG can serve as a partner.
- Increase the reliability of our transportation system to take people to job interviews and work. People are shut out of jobs if the transportation system is not reliable.

San Diego Association of Governments | info@sandag.org | Paula Zamudio | 401 B Street, Suite 800 | San Diego, CA 92101

**WORKSHOP SUMMARY / RESUMEN DEL TALLER:
JUNE 20, 2013 / 20 DE JUNIO DE 2013
OCEANSIDE**

Thank you to the 75 participants who took part in the June 20th workshop on San Diego Forward: The Regional Plan! Your input and feedback are keys to the process of creating a vision and plan that will keep the San Diego region a great place to live now and in the future.

Below is a summary of the input provided by stakeholders during the facilitated roundtable sessions. This input will be used to shape policy objectives in San Diego Forward: The Regional Plan.

For more information and the detailed note-takers notes, visit sandag.org/sandiegoforward.

Mobility

- Place higher priority on transportation projects in North County, especially to alleviate congestion on the north end of I-5 near Camp Pendleton.
- Accommodate more travel alternatives to the freeway.
- Overcome the LOGUT (Let the other guy use transit) mentality.
- Explore the transportation needs of each unique community - Downtown/urban areas differ greatly from suburban neighborhoods.
- Increase transit frequency and operating hours, especially on Sundays and in the evenings.
- Make bike paths work. Learn from Frankfurt, Germany, where bike paths exist throughout the city on sidewalks rather than in the way

¡Gracias a los 75 participantes que tomaron parte en el taller del jueves 20 de junio en Adelante San Diego: El Plan Regional! Su aporte y retroalimentación son claves para el proceso de crear una visión y un plan que mantendrá la región de San Diego como un gran lugar para vivir ahora y en el futuro.

A continuación se encuentra un resumen de las ideas y reflexiones que los participantes expresaron. Esta retroalimentación será utilizada para dar forma a los objetivos de política en Adelante San Diego: El Plan Regional.

Para obtener más información y un resumen completo con las notas que se tomaron en el taller, visite sandag.org/sandiegoforward.

Comunidades Saludables

- Necesitamos acceso a comida saludable y económica, incluyendo verduras frescas.
- Queremos una ciudad limpia; que no tiren basura en la calle y que controlen los animales e insectos.
- Necesitamos calles bien pavimentadas sin baches y hoyos y con banquetas.
- Banquetas son importantes para la gente con discapacidad.
- Es un riesgo para los niños caminar a la orilla de la calle sin banquetas.
- Necesitamos centros comunitarios para que los jóvenes tengan acceso a actividades educativas.
- Es importante alocar los recursos de manera

of oncoming traffic.

- Promote and build bike corrals, like was done in City of Long Beach.
- Place greater focus on bike security at transit stations.
- Prioritize the double-tracking of the COASTER to make this project happen sooner.
- Move the COASTER station from Sorrento Valley to the University Town Center (UTC).
- Promote reciprocal fare arrangements between Amtrak and COASTER/SPRINTER.
- Improve connectivity across the COASTER rail tracks, particularly in Encinitas for individuals trying to get to school.
- Add transportation connections and safe places to park bicycles at SPRINTER stops.
- Apply I-15 principles (e.g. FasTrak, premium express buses, vanpools, etc.) to I-5.
- Extend car-sharing to North County.
- Support electric bicycles.
- Use technology to its full extent in terms of transportation planning.
- Unbundle parking.
- Consider physically impaired veterans who have special parking and transportation needs and the aging population since many Baby Boomers will be incapable of driving in the future.
- Put a price on carbon emissions to promote market incentives for sustainable travel behaviors.

Healthy Communities

- Offer active transportation options and convenient multi-modal travel choices for all age groups that reduce greenhouse gas emissions.
- Widen and improve sidewalks to promote walking, bicycling, wheel-chair access, and stroller accessibility, and to provide safety and connectivity within the community.
- Provide affordable access to basic necessities such as food, water, and housing.
- Employ local residents, regardless of age, income level, or ethnicity.
- Accommodate and prioritize the needs of the homeless, the aging population, and those with mental illnesses.
- Provide multi-modal and complete streets, increased access to transit for seniors, more senior-friendly buses, and safe housing options for the elderly.
- Promote farmers markets.
- Promote a Walk to Work Day.
- Do more to limit smoking in public areas.
- Encourage new sustainable farming concepts such as the “key-hole garden” - a drought tolerant circular raised bed with a compost pile in center which distributes nutrients to

equitativa.

- Deberían plantar árboles en las calles y en los parques.
- Necesitamos más alumbrado/iluminación.
- SANDAG debe de invitar a más jóvenes para escuchar sus puntos de vista también.

Energía y Cambio Climático

- Debemos disminuir el uso de la energía para frenar el cambio climático.
- Los calentadores solares son buenos para ahorrar energía al largo plazo.
- Los paneles solares son ahora más accesibles que antes, pero hay que educar a la gente sobre los beneficios de instalar los paneles solares.
- Hay una falta de infraestructura para cargar vehículos eléctricos.
- Si uno no gana suficiente dinero, no puede comprar una casa, y si uno renta su casa, no se puede instalar paneles solares, o hacer otras renovaciones que ayudan ahorrar energía.
- Deben de haber programas de asistencia que eduquen a la gente sobre cuales tecnologías alternativas se pueden implementar.
- Deben de haber programas de incentivar a la gente tomar medidas de disminuir el uso de la energía, y también utilizar tecnologías alternativas.
- Se necesita reforestar por el bien del medio ambiente y también para el beneficio de la gente y las comunidades.
- Se debe plantar árboles, y también mantenerlos.
- Tenemos que estar preparados para los efectos causados por el cambio climático.
- El cambio climático está conectado al transporte y la salud pública.
- Toma demasiado tiempo usar el transporte público, y el servicio debe ser más frecuente y deben de haber más rutas.
- Las paradas de autobús y del Trolley deben de contar con tejados ya que hay muchas que no los tienen.

Prosperidad Económica y Fronteras

- Queremos mejores sueldos, más trabajos, más oportunidades de educación, y también programas de entrenamiento.
- Empresas privadas deben de ofrecer programas de entrenamiento laboral.
- Necesitamos inversiones económicas en nuestras comunidades.
- La movilidad impacta a la economía; hay comunidades en que no es fácil trasladarse a ciertos destinos.
- Demora de 2 a 4 horas para cruzar la

surrounding areas.

- Develop and embody characteristics of resilient communities.

Healthy Environment

- Encourage replacing non-native plants that are used in landscaping by native plants to help conserve water.
- Provide more incentives, such as competitions, to encourage reductions of energy and water use.
- Build more community gardens in the North County Coastal area.
- Create better habitat protection links with watersheds.
- Improve water quality of oceans - can't swim in the water because of sewage system breakdowns in North County related to old water pipeline infrastructure. Modernize sewage infrastructure.
- Acknowledge that population growth will affect everything; think proactively about ecological and economic issues.
- Recognize and address the barriers to achieving our goals, which include: 1) public mind-set, 2) political mind-set and division of jurisdictional lines, and 3) honest assessment of costs.
- Ensure steady supply of water.
- Consider requiring each city to have a certain percentage of open space.
- Focus on climate stabilization; if we don't do that, we will lose everything, including habitat.
- Do more than the bare minimum with regard to climate change and environmental issues.
- Build better and more sustainably - everything should be sustainable.
- Understand the trade-offs between desalinization to increase water supply and impacts to the environment and marine life.
- Focus on the quality of drinking water as a #1 priority.

Energy & Climate Change

- Use existing and proven technologies, such as solar power.
- Expand installation of solar panels in urban areas.
- Shade parking lots with solar panels.
- Promote electric-powered vehicles.
- Implement a carbon fee to help solve the GHG emissions problem.
- Promote free markets to handle GHG reductions.
- Strengthen legislation for reducing GHG emissions and keep agencies accountable.
- Promote more public education in schools

frontera, tanto en coche como a pie.

- Mucha gente, especialmente los de la tercera edad, cruzan a Tijuana para obtener servicios y bienes más económicos, y debe de ser más fácil cruzar.
- Los carros que esperan en la línea fronteriza causan mucha contaminación del aire.
- El smog que está saliendo de los carros en la frontera causa un impacto negativo.
- Las largas esperas en la frontera impactan negativamente a la economía porque personas quiénes quisieran cruzar la frontera para fines comerciales o para hacer compras no lo hace por las demoras.
- Sería una buena idea tener un carril dedicado a las bicicletas, pero tendrían que controlar el tráfico para que la gente no lo abuse.
- Sería buena idea empezar un programa de compartir bicicletas en la frontera.

about climate change at all levels.

- Provide more options for public transportation.
- Create reliable technology for bus stop times on computers and cell phones.
- Work with employers to incentivize ride share and shuttle programs.
- Create tools for disaster planning.
- Create safer and complete streets (cars, biking, walking).
- Maximize “low technologies” such as active transportation (bikeways, walking).
- Support programs that allow individuals to produce biofuels.
- Include regional water issues in the new plan (desalination is very energy intensive).
- Raise personal awareness about energy and water footprint through visual tools.
- Make transportation maps and data more accessible.
- Look for strategies to reduce growth. Population growth is directly correlated with energy use. The easiest way to reduce our energy demand is to reduce growth.

Economic Prosperity & Borders

- Focus on the kinds of businesses you want to attract, such as business clusters with green tech.
- Reduce regulations. The free market will come up with ideas to protect the environment and deal with growth. Regulation is stifling businesses from creating innovative ideas and causing businesses to leave California.
- Encourage job creation closer to people living in Oceanside to improve commutes.
- Increase public transportation between Escondido and Temecula.
- Move people more efficiently across our international border crossings. It takes less time to travel on a plane from Mexico to the United States than to cross the border at San Ysidro.
- Encourage cooperation and cross-border economic development.
- Improve utilization of all border crossing lanes, including the SENTRI and Ready Lanes.
- Address the conflicts between security and ease of crossing at the international border.
- Protect our borders because there are many types of potential threats.
- Consider a train that travels across the U.S./Mexico border. This could help with the time it takes to process individuals through customs.
- Decrease water rates to promote and preserve agriculture in the region.
- Improve wages for lower paying jobs.

- Provide education as a means for acquiring higher paying jobs.
- Encourage apprentice programs and job training programs.

July 3, 2013 –

WORKSHOP SUMMARY JUNE 21, 2013 Caltrans

Thank you to the more than 125 participants who took part in the June 21 workshop on San Diego Forward: The Regional Plan!

Your input and feedback are keys to the process of creating a plan that will keep the San Diego region a great place to live now and in the future. Below is a summary of the input provided by stakeholders during the facilitated roundtable sessions. This input will be used to shape policy objectives and other core components of San Diego Forward: The Regional Plan.

For more information and the detailed note-takers notes, visit www.sandag.org/sandiegoforward.

Mobility

- Focus on intra-regional mobility which can bring money to outlying areas which can foster regional economic vitality.
- Consider a child bike-share program with helmets as a part of a larger bike-share program.

- Create reliability for developers to invest around transit stations.
- Consider moving air freight travel out of Lindbergh, separating passenger from freight and moving freight to Carlsbad or Brown Field.
- Any type of bike-share program needs to include infrastructure to support safer routes to ride.
- Expand traveler information to ease of use of the systems (e.g., "Next Bus" signs)
- Develop a "transit ambassador" program for seniors.
- Make transit competitive with driving in terms of travel time.
- Apply a complete streets model for main boulevards accommodating multiple modes of travel.
- Provide transit service that reaches hard-to-access job centers (e.g. North County).
- Design transit so that it accounts for different areas (e.g. higher density areas merit light rail projects).
- Improve walk/bike/other connections between bus and rail and to/from destinations.
- Direct growth through transportation investments.
- Encourage growth along Smart Growth transportation corridors.
- Consider public health in decision-making.
- Consider including punitive measures to effect change, rather than just incentivizing change; the 18 cities and Port District should be required to follow the Regional Plan goals and principles.
- Include transportation options for all demographics (e.g. youth without licenses trying to get to beach as well as aging population of baby boomers).
- Promote telecommuting and encourage businesses to offer telecommuting to their employees 1-2 days per week.
- Consider sidewalk access and improvements.
- Look at impacts of freight movement versus other modes - do the needs of trucks conflict with the needs of bikes, for example.
- Make transit convenient, cost-effective, and reliable so that transit is competitive with driving.

Parking and Pricing

- Integrate parking with purposeful economic returns.
- Balance demand management strategies (congestion pricing) with alternative transportation modes (public transit, active transportation, etc.).
- Make car-sharing a more attractive option for transit users.
- Develop park-once strategies where people are encouraged to 'park once' during a day/trip.
- Use metered parking in a manner that creates turnover of spaces in high demand (for shopping or dining purposes, for example) and allows longer term metered parking (for work/employment) further away.
- Use emerging technologies to connect the public with available parking (available parking spots/vacant lots, variably priced metered parking, etc.).
- Survey communities to better understand their specific needs, in order to create more tailored solutions rather than a one-size-fits-all.
- Consider shared parking strategies that balance the peak AM/PM use and off-peak uses.
- Allocate the parking revenues to contribute to not only to the enhancement of the transit experience, but the walkability of the street.
- On the private side, we need to give carpools priority parking. Cities should require it.
- Companies should be incentivized to reduce employee parking and to subsidize transit passes.

Land Use Scenarios

- Give more priority to protecting our urban open space, recreation, and habitat areas.
- Expand the higher density core to include Chula Vista and the border area.
- Include the area south of the border for affordable housing opportunities.
- Explore the impacts of each scenario on the economy, health, environment, and quality of life.
- Explore smart growth scenarios that help with transportation choices, transportation costs, and health benefits.
- Consider second units close to the transit oriented development areas.
- Look at the redevelopment of the region's commercial areas and development of shopping malls near transit hubs.
- Address jobs/housing fit and try to do a better job of matching income levels with housing choices to address the range of types of income levels in a job place (i.e., high-paying jobs versus service workers working in high-tech buildings). SANDAG's modeling process should look at the implications of jobs/housing fit.
- Modify scenarios to acknowledge and better integrate the major employment clusters.
- Conduct a market feasibility analysis on all of the scenarios.
- Map topographic land constraints; many slopes are uninhabitable for human development. River valleys and steep slopes are not suitable for human development.
- Create a scenario with urban growth boundaries.
- Address sea level rise in the scenarios.
- Consider placing just as much emphasis on creating more walkable and bikeable communities than is placed on transit oriented (TOD) communities so we do not have to invest in so much public transit.
- The TOD scenario is more reflective of where job centers are throughout the region.
- Consider housing costs and affordability in scenarios.
- Consider quality of life issues and transit access to parks, healthcare, education, family resource centers, clinics, childcare, and other community resources/social service facilities.
- Adapt to current trends such as telecommuting, co-work spaces, etc. which are becoming more popular and more sustainable.

Active Transportation

- Focus on Safe Routes to Transit as a key goal.
- SANDAG is doing an admirable job at trying to connect with communities but needs to do a better job in reaching out.
- SANDAG's efforts to reach-out and invite participation from groups that traditionally are not engaged in the process are appreciated and beneficial.
- Broaden the active transportation goal to include skateboarding, scooters, etc.
- Implement separated bicycle infrastructure facilities on major corridors.
- Plan according to younger generations that want to live in communities where they can walk and bike.
- Improve systems for carrying bicycles on transit vehicles.
- Engage schools as a method of encouraging kids to walk and bike to school.
- Consider expanding wayfinding signage to direct users to transit stops which would encourage people to bike.
- Develop infrastructure like bike stations to encourage more people to bike to transit.
- Separation between bicyclists and vehicles is critical because safety concerns are a barrier to cycling.
- Incorporate the complete streets concept into SANDAG planning.
- Offer incentives to encourage more biking; encourage employers to provide more shower and locker room facilities to employees.
- Encourage bicycle education.

- Emphasize utilitarian trips and not just commuter trips.
- Having an Active Transportation discussion puts health first and foremost including individual and environmental health.

Emerging Technologies

- The ability to track the bus is important when people are going somewhere.
- Self-driving vehicles can help reduce accidents.
- The idea of crowd sourcing would be easy to focus on and easy to do. Provide the cloud to interested individuals and go beyond what is traditionally done.
- Expand Car2Go system geographically so that there is coverage across the whole county.
- Use technology for information such as real-time traffic information. This would help people decide what mode of transit to take and what route.
- Apply emerging technology to infrastructure improvements that reduce reliance on vehicles.
- Keep up with technology - signal detection, loops, etc.
- Autonomous vehicles are an easy solution to reckless drivers; they would allow more cars on the road without building more lanes, and the idea holds promise.
- Provide better traveler information.
- Consider equity as an issue since there are barriers to entry for technology, and not everyone can afford a smart phone, car, or Google glasses.
- When considering emerging technologies, include sustainability, mobility/accessibility, and safety.
- Expand the availability of plug-in charging.
- Provide a greenhouse gas calculator application to help change peoples' behavior
- Consider security and loss of privacy.
- Technology can help with lowering costs.
- The shared economy (Car2Go, etc.) is growing. Consider this in the planning process.

**WORKSHOP SUMMARY / RESUMEN DEL TALLER:
JUNE 29, 2013 / 29 DE JUNIO DE 2013
NATIONAL CITY**

Thank you to the almost participants who took part in last Saturday's workshop on June 29th on San Diego Forward: The Regional Plan!

Your input and feedback are keys to the process of creating a vision and plan that will keep the San Diego region a great place to live now and in the future. If you attended last Saturday - remember, there are more workshops coming up, so please stay involved. And if you couldn't make it, consider attending an upcoming event. Visit www.sandag.org/sandiegoforward for more info.

Below is a summary of the thoughtful and extensive input provided by stakeholders during 4 facilitated roundtable sessions held at the June 29 event. This input will be used to shape policy objectives in San Diego Forward: The Regional Plan.

Listed below are just some of the ideas expressed by participants at the workshop, and some pictures, too.

Mobility

- The mind-set needs to change that accessibility for biking is just as important as cars.
- Ensure that sound barriers and walls are factored into the cost of expanding freeways.
- A bullet train will be necessary in future and should be built in center of the freeway with a station every 4-5 miles underneath.
- Create a stronger public transit network so

Gracias a los participantes que tomaron parte en el taller del sábado 29 de junio en Adelante San Diego: El Plan Regional!

Su aporte y retroalimentación son claves para el proceso de crear una visión y un plan que mantendrá la región de San Diego como un gran lugar para vivir ahora y en el futuro. Si usted asistió al taller del sábado 29 de junio, le recordamos que habrá más talleres para seguir involucrado. Y si no pudo participar, considere asistir a un próximo evento. Visite www.sandag.org/sandiegoforward para obtener más información.

A continuación se encuentra un resumen de las ideas y reflexiones que los participantes expresaron en las 4 mesas redondas facilitadas en el taller del 29 de junio. Esta retroalimentación será utilizada para dar forma a los objetivos de política en Adelante San Diego: El Plan Regional.

A continuación se enumeran algunas de las ideas expresadas por los participantes en el taller, y se incluyen algunas fotos, también.

Movilidad

- Información de mapas en español, folletos en español en trolley y camiones.
- Actualizar información ofrecida al público en transporte público.
- Fines de semanas no hay muchas rutas disponibles (Ruta 961).
- Parada de camión (18th y Highland) la

it's more connected, timely, and frequent.

- Expand bus service in South County.
- South County lacks access to healthy foods.
- Encourage Farmers Markets in National City.
- People will just take their car if they have to walk far to get to a bus.
- Improve transit to the Airport.
- We need better transportation to key destinations throughout the county.
- Transit networks need to be expanded in communities with higher dependency, such as low-income and senior residency areas.
- Operate transit into the evening so that people can attend night events.
- SANDAG needs to use demographic trends to increase bus routes and tailor increased service to communities that are most dependent on transit.
- Focus on transit projects rather than automobile infrastructure.

Healthy Communities

- All streets should have safe bike lanes and sidewalks, especially along routes to schools to promote walking and biking to schools.
- Implement more engaging and participatory outreach to promote Safe Route to schools - there is an opportunity for SANDAG to have a presence in schools and educate children.
- Improve water quality in schools- currently children are discouraged from drinking water, as it tastes like drinking from corroded pipelines.
- Convert all buses to run on compressed natural gas.
- Implement policies to invest in and install existing technology that helps reduce energy uses.
- A healthy community means friendly people and an inclusive community where people feel safe.
- Kids should be able to walk to school, but parents and kids are concerned with safety.
- Schools should design loading/unloading zones to support a safe environment for pedestrians.
- There should be more bike lanes and better signage for bikes and pedestrians.
- Wider sidewalks would help calm traffic and make streets safer.
- We need more housing in National City, the right kind where people can walk to their daily needs.
- It is important to focus on children and seniors who are more dependent and at risk.
- Our community suffers from high obesity and diabetes, and high asthma rates.
- SANDAG should focus their funding on infrastructure to mitigate air pollution,

parada de camión no tiene protección para el sol (techo).

- No hay conexiones de North Park a National City.
- Miércoles y jueves en el parque Kimball venir para hacer encuestas para preguntarle a la gente su opinión.
- National City esta desconectado de San Diego y sus comunidades alrededores.
- No hay rutas a la playa por transporte público.
- Necesitan acceso a lugares de interés regional como Balboa Park y sus museos. Un transporte especial los fines de semana, por ejemplo.

Comunidades Saludables

- Vivir en ambiente limpio, libre de toxinas, libre tránsito, áreas verdes.
- Áreas verdes para los niños (no existen parques).
- Enfrente Iglesia existe terreno que se pudiera acondicionar para área verde, atrás de la escuela en el centro comunitario existe solo un pequeño centro.
- Seguridad de tráfico para los niños (escuela en la calle 18 - intersección de Highland y 18th) semáforo atrás de la escuela. Los carros no se detienen, reforzar respeto al peatón además que el semáforo peatonal no dura mucho. La alcantarilla bloquea el cruce peatonal.
- Gas para mina está localizado a pie de calle en la gasolinera y es peligroso por accidentes de choque o conductores en estado de ebriedad.
- Iluminación en la misma zona. Así como falta de iluminación en Old-Town National City.
- Determinar límites de velocidad por la misma zona para la seguridad de los niños que van a la escuela.
