PROBLEM STATEMENT

As bones become weak and joint pain becomes a reality for the aged, or any one in any age group wheelchair play a useful role in helping them with their daily activities. In a comfortable chair, the elderly not only become more mobile, but they regain a sense of independence and not having to depend on anyone for simple tasks. In addition to providing mobility, an appropriate wheelchair benefits the physical health and quality of life of the users by helping in reducing common problems such as pressure sores, progression of deformities and improve respiration and digestion.
